This is the only machinery which the zemindars now possess for speedy realization of rent after the abolition of the notorious *pancham* and *saptam*, to deprive them entirely of it is now, I think, out of question. The law, as it now exists, is seldom resorted to, at any rate in Bengal, and more particularly in this Chittagong Division, except in cases of temporary and non-resident tenants of the *char* lands. Instances of complaints against the zemindars in such cases are very rare. My humble opinion is, where there is no dispute between the landlords and tenants, either about the amount of rent or the ownership of the land, the former seldom seek the aid of the court, nor the sale of the crop in most cases becomes necessary; the tenants pay their rent amicably either from their own pocket or, what is more general, by sale of a portion of the crop with the consent of the attaching landlords or their officers. In a few cases the landlords seek the aid of the court in causing distraint, and in most of these few, suits to contest distrainer's demand on one or other grounds follow with results generally unfavourable to the distrainer. I have seldom heard of distraint of crop of an occupancy raiyat in this district or in Chittagong. I have consulted with zemindars, landholders and legal practitioners of these districts. They agree with me in recommending that the occupancy right which has practically become saleable in these districts be made subject to summary sales. If this be done, the exemption from distraint, which they practically now enjoy, may be legally extended to them. Occupancy right may vary greatly in value, and may be very cheap where population is sparse and land abundant; but I think no permanent and saleable holding is worth existing if its value does not cover one year's rent. Experience has not shown me one. Whether the exemption be legalized or not, I am sure the distraint shall be practically in these districts, if not all over the country, confined to cases of temporary and non-resident raiyats only. The Government of India is satisfied that the process of distraint "can no longer be left to the unsupervised action of the zemindar's servants, and the reference to the courts is an essential safeguard." It now invites only suggestions for still further improving or cheapening the procedure adopted by the Select Committee. In this wise, I beg to suggest (1) the zemindars may be permitted, in a single application under section 140, to join any number of tenants whose holdings are within the same village or in different villages, but at a convenient distance from one another, so that the distraint may be made by a single officer deputed under section 142. (2) The fees payable on this application may be so low as 4 annas, or something like it; the costs of deputation of an officer and fees and poundage for publication of sale notices and sale respectively may also be made very low. (3) This officer should be empowered, on his own responsibility, to leave the property in charge of sureties supplied by the tenants, or in their default by the zemindars. I think the words "some other person" in paragraph 1 of section 142 and sub-section 3 of the section 144 do include such sureties. (4) The certificate to the purchaser under section 151 should be exempted specially from stamp duty chargeable under article 16, Schedule I of Act I of 1879. (5) The costs of procuring a certified copy of an extract of Collector's register, to show that the proprietor or manager's title has been registered under Act VII (B.C.) of 1876 [see section 139(1)], may be dispensed with if the zemindar's statement to that effect, to be made in an additional paragraph (*h*) of his petition under section 140(1), be accepted as *primâ facie* evidence of it.

If all these points are not carefully considered, and if no special provisions of such nature are made, the boon which the law contemplates to confer will be out of the reach of the petty peasant zemindars of this division, and the costs will swell out of proportion in cases of small holdings, ruining the landlords and the tenants alike. As to the delay in issuing process in consequence of various restrictions put on it, it may be avoided by specifying time within which the officer of the court shall be deputed under section 142, and by making it compulsory, and not discretionary with the court to issue *interim* order under section 141 (3) *immediately* after the examination of the applicant, to be served on the raiyats free of all costs.

CHAPTER XIV.

Judicial Procedure.

Section 161.—Some special procedure for stamping the "written authority" is needed if the benefit of this law is intended for the tenure-holders of limited income also, of whom this division abounds. These authorities ought to be treated as something different from general *powers-of-attorney*, otherwise the provisions of the section 37A of Civil Procedure

Code, Act XIV of 1882, render this section quite unnecessary. If it be treated as "*Appointment*" under article 6 of Schedule I of Act I of 1879, the zemindars will try to — I believe they actually now do—evade it without much, if any, chance of detection.

Section 163.—The sections of the Civil Procedure Code, mentioned in sub-section (*d*), are very seldom, if at all, resorted to by the parties in any suit under Rent law. The sub-section (*e*), I fear, will be a dead letter in the generality of cases; but if properly attended to, it will help the court in excluding much unnecessary and irrelevant matters which now find their way into record through the untried pen of the legal practitioners. The sub-section (*f*) alone will give some material relief to the overworked courts. Except this, I do not think this section will much improve the procedure that is now followed in 999 out of 1,000 cases. The sub-section (*g*) seems to be redundant. Section 256 of Civil Procedure Code empowers court to issue execution on oral application when the decree is for money less than Rs. 1,000. Summary execution for higher sum is neither necessary nor recommendable.

Section 164.—This section may be a powerful engine of oppression in the hands of the unscrupulous persons to annoy the neighbouring zemindars and their tenants, and in shifting *onus probandi* on the weak (though rightful) party. The tenant, and the party under whom the defendant falsely sued holds, may be too poor to be able to pay in the rent demanded in the suit. The decree will in that case be made *ex parte* on his face, and he shall stand by quite helpless. The law may be left as it is; the question of title being tried, not by dragging the third party into court in the most undesirable position of a plaintiff, but incidentally in presence of the tenant only. In order to discourage the tenant to raise question of the landlord's title merely to harass the landlord, or cause unnecessary delay for gaining time, or to throw undue weight of evidence on his shoulder in a summary rent suit, the courts may be empowered in such cases to order for eviction of the tenant at its discretion, if the plaintiff moves it to that direction, though no prayer for ejectment was made in the plaint. To eject such a refractory tenant is not against the sound principle of law, equity, or good conscience.

Section 168.—Further provision may be added to this section abolishing all appeals in purely arrears of rent suits when the amount is petty, say Rs. 10, or 20, or 25. The lower judicial courts of all grades may now be considered fully competent to deal with such suits with little chance of errors in fact. Special powers proposed in clause (6) may be given to officers of greater experience and tried merit.

Section 174.—With reference to the remarks of the Select Committee on this section, I beg to submit that mere conversion of plaint into application will not go to reduce to any appreciable extent the expenditure of the litigation which this section will rake up. Much will depend upon the procedure that shall be followed. The cost of local enquiry through revenue officer may alone be simply prohibitory, especially in cases of petty holdings.

CHAPTER XV.

Sales.

Sections 182 and 183.—I think the remarks made by Hon'ble Mr. Gibbon, respecting the distinction that is made between holding with fixed rent and occupancy holding, are perfectly opposite. It will be a source of much litigation and disputes between the parties in execution proceedings. I see no harm in applying the same procedure [section 179 (*a*), sections 180 and 181] to all transferable holdings without distinction. The question whether a holding is held at a fixed rent or rate of rent is not an easy one to be summarily dealt with in execution proceedings. It is one of the stumbling-blocks on which enhancement suits fail.

Section 192.—The time for presentation of old unregistered instruments should be extended to *three* years at least. It is very doubtful whether the change in the law will reach the ears of those for whom it is intended, *viz.*, the rural population, within so short a time as one year.

CHAPTER XVI.

Summary Sale.

Great deal of litigation may be reduced by making the provisions of this chapter with some modifications applicable to all saleable tenures without distinction.

Section 195 (1).—Whether the first day of Baishakh in this section and first day of Kartic in section 196 should still be retained as the last days for making application of putni sales is a matter that requires much consideration. I think these days should be fixed in each district with reference to sunset days for payment of Government revenue in each. It ought to be also a matter of consideration whether the place of making application for sale, and of sale in cases of petty tenures, say of annual rent below Rs. 100, and in district like Chittagong, where head-quarters is not at a convenient distance from all parts of the district, should be transferred to Munsif's courts or sub-divisional court, *i. e.*, to a court nearer to the tenant's home. These petty taluqs seldom fetch proper price in consequence of the great

distance of the head-quarters from these tenures and people interested to buy them. The zemindars may strenuously oppose this transfer of sales to mofussil courts, on the ground that they will be required to keep a general agent in each court; but this difficulty can be obviated if the tehsildar duly authorized be permitted to make the application and represent the landlord at the sales. (2) The date of sale should likewise be changed. The landholders should be permitted to recover money by such sale at least 15 days before the sunset day for the payment of the Government revenue. (3) Notices of sale should be published also by beat of drum, or by any similar local and customary means, in the village or villages where the holding is situated. Extract of such notices should be sent by post to the defaulter, the landlord keeping a post-office certificate to be filed in court before the sale.

Section 209.—The paragraph 26 of the India Government letter shows how anxious it is to provide a "speedier and cheaper method of recovering arrears, provided always that it does not jeopardise the ryot's right." Nothing can answer this purpose better than the extension of the provisions of summary sales with some modifications suggested in my remarks on section 195 to all saleable tenures and holdings of every description. Provision of a special law for registration of such holding, which may be attended with difficulties of various kinds, is, in my humble opinion, hardly wanted for the purpose of making such concessions. Such tenures and holdings, even where no written leases exist, are ordinarily sold in civil courts in execution of decrees both for arrears of rent and other dues. The necessity of production of leases even is seldom felt. Any misdescription, which rarely occurs, is soon corrected—sometimes amicably and sometimes through courts. The crop of suit arising from this source is not large, and may be still more reduced if the landlord be under heavy penalty compelled to describe the holding accurately in the application and the notices for sale. The form of receipts and accounts prescribed in Schedule III, interchange of which is made compulsory by sections 70 and 71, will accurately show the area, rent, and other particulars of the holding to be sold. Law will make filing of accounts indispensable with an application for summary sale.

The object aimed at by compulsory registration of tenure may also be obtained with much less costs and trouble to the State and the people alike, if the interchange of leases in all cases be made compulsory. The extension of Chapter V of Act IV of 1882 (Transfer of Property Act) under section 177 of it will secure this purpose, or a section may be added to this Bill. As for the existing tenures and holdings of which no written engagements are forthcoming, exchange of leases may be made compulsory within three years or so from the passing of this Act. The registering officers may be called upon to keep a separate register for all the registered leases. This book shall of itself become a register of all the tenures and holdings. The disturbance that may arise in few instances in consequences of this law will soon settle of itself.

CHAPTER XVII.

Section 210.—The paragraphs (*e*), (*g*), and (*h*) may not be extended to contracts evading the privileges for sufficient considerations and duly registered. Exemptions granted by sections 211 to 216 will take away many leases from the operation of this section. In this division most of the leases will come under section 211.

SCHEDULE III.

This form is defective in a very important respect. Though the section 69 (1) and (2) is quoted at the foot, yet in the body of the receipt no space is reserved for stating the *year* and *instalment* to which the tenant wishes the payment to be credited. The form is given in duplicate, yet one to be retained by the zemindar is not marked as such, both may then require stamp under Stamp law, Schedule 1, No. 52. The present system is, the zemindar keeps the counterpart of the receipt signed by the tenant and calls it *chalan*. This seems to be a better practice, as it binds both parties to one another; the form on the left hand therefore should be called chalan or counterpart of receipt. Similar remarks apply to form for "account." The one to be granted by the landlord should be called "counterpart, or duplicate, or copy of account," and signed by the landlord, while the account remaining with the landlord should be signed by the tenants.

CHANDRAKUMAR ROY.

The 28th July 1884.

No. 25, dated Dinagepore, the 28th July 1884.

From—The Sudder Munsif of Dinagepore,

To—The Officiating Secretary to the Government of Bengal, Revenue Department.

REFERRING to your circular letter No. 9T.—R., dated the 5th June 1884, I have the honour to report as follows:—

CHAPTER II OF THE BENGAL TENANCY BILL.

(*a*).—The definition of ryot in section 5 (3) does not cover all classes of ryots. "Proprietor" means a person or a number of persons owning an estate. Section 3 (2)—"Estate" means registered revenue-paying and revenue-free lands. Section 3 (1)—There are unregistered

Paragraph 4 of the circular letter of the Government of Bengal No. 2T.—R., dated the 24th May 1884.

revenue-free lands or holders of such lands. Section 5 (3).—Does not include persons holding land under unregistered lakhirajdars and is therefore imperfect.

3. (b).—Persons holding upwards of 100 bighas of land generally sub-let a portion of their holdings. At times they sub-let the whole holding. This, I believe, is the practice of this district. I am not for retention of the upwards of 100-bigha presumption in the Bill; and for the following reason:—(1) When a tenure is created, and tenures are not unfrequently permanent and transferable, adequate consideration is paid to the zemindar, and the presumption throws an unfair burden of proof on the landlord. (2) A tenure-holder is in a much better position than an occupancy tenant as regards the zamindar. The former is exempted from the rules regarding pre-emption and distraint, but the latter is subject to them. The presumption converts a jotedar of upwards of 100 bighas into a tenure-holder, and, while it improves his position by exempting him from the rules regarding pre-emption and distraint, it deteriorates the position of the zemindar to that extent by taking from him those rights. (3) The presumption will work hard against auction-purchasers, who will be unable to rebut it for want of necessary evidence. However, this hardship might be mitigated by record of rights, if that chapter is retained in the Bill. (4) The presumption cannot work in case of division of holding amongst heirs and successors in interest of the tenant. As shown above, I think the presumption is not fair. I am not aware if any presumption of the kind would be a fair presumption.

3. (c).—Section 37 will give rise to frequent disputes for two reasons—(1) It is not easy to ascertain whether more than half of the holding has been sub-let; (2) in consequence of the proviso (a), I fear it will not work well. Besides, I doubt if it will secure the objects for which it was devised. The object of the provision is—(1) To discourage money-lenders or capitalists from purchasing occupancy rights; (2) to give actual cultivator of the soil right of occupancy. The converted tenure-holder is in a better position than the occupancy tenant owing to his exemption from the rules regarding pre-emption and distraint, and with right of pre-emption given to him. As regards his occupancy tenant (sub-tenant), he can buy up the occupancy holdings under him. Besides, in a 100 bigah jote 49 bighas may be in actual cultivation of the occupant tenant. These advantages, instead of deterring the capitalist from purchasing the converted tenure, will induce him to buy it; and when a tenure of the kind is bought by such a purchaser, the probability is that the tenants (sub-tenants) would be rack-rented or made to abandon the holdings.

CHAPTER III.

Paragraph 5 of the Government letter.

4. Under the rules laid down in Chapter II it is difficult to decide what holdings are tenures and what holdings are not. Chapter III lays down rules regarding enhancement of rent of tenures. The law by which the rent of a dependent talookdar is enhanced is contained in section 51 of Regulation VIII of 1793. The grounds of enhancement are—(1) Special custom of the district; (2) the condition under which the tenure is held; (3) the fact of the talookdar having received abatements from his jama, and thus subjected himself to the increase demanded, provided the lands are capable of affording it. When there was no customary rate, section 8 of Regulation V of 1812 provided thus:—"In the case of a dependent talookdar, if the rent of the lands be computed according to the rates payable by ryots or cultivators for lands of similar quality and description, a deduction shall be allowed from the gross rent in the adjustment of the jama of such dependent talook at the rate of 10 per cent. from the talookdar's profit or income, over and above a reasonable allowance for charges of collection, according to the extent of the talook." This section was repealed by Act X of 1859, but its principle has been followed in the assessment of such tenures. Mohamed Aynooddin, 2, Board's Rep. 749, Morgan and Shambhoo Nath Pundit, J.J. In one case the talookdar was allowed a profit of 6¼ per cent. only—*vide* 3 B. L. R. A. C. 270. Thus under the case law the talookdar was allowed a profit not exceeding 10 per cent. of the collections, after deduction of collection charges. But under the Bill the tenure-holder has been given a profit of less than 10 per cent. of the balance which remains after deducting from the gross rents payable to him the expenses of collecting the rents, and also the "risks of collection." Under the existing case law the rent of a tenure-holder can be enhanced up to a reasonable limit, but the limit of enhancement under the Bill is not to exceed double the previous rent. Thus under the Bill, when the enhancement exceeds double the previous rent, the excess, how great soever it be, will go to the tenure-holder. Under the existing case law there is no limit as to the period during which the enhancement allowed will remain in force, nor is there any provision that the enhancement allowed will be gradual; but the Bill provides a limit to the period of enhancement and prescribes that the enhancement decreed may be gradual. Thus it will be seen that much indulgence has been shown to the tenure-holder under the Bill to the injury of the proprietor of the land, and for no adequate reason. In my humble opinion, the present case law should be embodied in the Bill with this provision, that when the enhancement has been solely due to improvement of the land by the tenure-holder, the superior tenure-holder or the proprietor, in the absence of any contract to the contrary, shall not be entitled to get any.

5. The position of a tenure-holder is different from that of an occupancy tenant. There can be no uniform rules to regulate enhancement in both cases.

CHAPTER IV.

6. *Section* (64*β*).—The 20 years' presumption is a very valuable provision, which the Bill contains in the interest of the ryot, but it operates with harshness particularly against the auction-purchaser of proprietory rights, who is unable to rebut it for want of necessary papers of his predecessors in interest. In enhancement suits the presumption is generally and almost invariably pleaded. It is as often disputed, though not as often rebutted. Section 122 of the Bill does not sufficiently restrict the presumption. In order to sufficiently restrict the presumption, I think a provision should be made to this effect, that no tenant whose title to hold at fixed rates is unregistered after a certain date to be fixed by Legislature can claim the benefit of the presumption.

Paragraph 6 of the Government letter.

CHAPTER V.

7. (*a*).—The greater the area of the estate, or portion of an estate, over which the capacity of the settled ryot to hold land on occupancy title extends, the greater is the loss of the zemindar. The loss cannot be sufficiently obviated if the portion of estate within which the settled ryots would acquire rights of occupancy be limited to district or sub-division of a district; but this provision may sufficiently protect the ryots.

Paragraph 7 of the Government letter.

8. (*b*).—Butwarahs are frequent in Behar and Eastern Bengal. When the butwarah of an estate is completed, the tendency of the maliks of the several portions of it, which have been portioned, is to give new land to the tenants at higher rates in that portion of it, in which their dwelling-houses or homesteads have fallen, or to drive out the old tenants if they do not agree to pay the rates demanded. This they can easily do, as each malik has his *separate* portion of the estate. In order to protect the tenants of East Bengal and Behar, I think it would be sufficient to provide that the parent estate of old shall be taken as the area over which the capacity of the settled ryot to hold land on occupancy title should extend.

9. *Section 28.*—I think applies to a case in which the landlord is the sole owner and not a shareholder, for otherwise the doctrine of merger cannot operate.

Section 29 (1)—Contemplates the case of a joint owner, proprietor, or tenure-holder, I think there can be no harm if the latter provision is retained.

10. A provision similar to section 29 (2) may be inserted in the Bill when the occupant tenant buys a share of the estate in which his holding is situate (in order to prevent the merger of the occupancy right). Any occupant tenant cannot lose the occupancy right by reason of such purchase.

11. *Section 31* (*e*).—I think it is fair that the occupancy tenant should be allowed to make improvements on his holding if he is disposed to make any.

Paragraph 8 of the Government letter.

12. *Section 31* (*f*).—Occupancy rights, if made transferable, are in danger of largely falling into the hands of money-lenders, and also of persons who are hostile to the landlord. The former class are rack-renting landlords. Besides, if the money-lenders cultivate any other than food-crops on the holding purchased—and this they generally do—the result will be a scarcity of food-grains and consequent famine. This is nowhere better seen perhaps than in the province of Behar, where a large portion of lands, and the best lands are appropriated to the purpose of indigo cultivation, and where failure of food-crops for a single year or so brings on scarcity, if not famine generally. The plan devised by section 37 to prevent money-lenders from purchasing occupancy holdings does not cure the evil. This has been already submitted by me. The right of pre-emption given to the landlord greatly diminishes the value of the holdings, and no purchaser is expected to offer the full value when the landlord has right of pre-emption. I think the best course would be to leave the question of transferability or otherwise of occupancy rights to local custom, which is the existing law. In this district occupancy holdings are transferable by custom. As there are few speculators here, the evil effect of transferability is not known.

13. (*a*).—The grounds of enhancement mentioned in the Bill are not exhaustive. It is seen that the productiveness of soil increases from other causes than landlord's improvement and fluvial action, though it cannot be ascertained what those causes are. This has been omitted from the Bill.

Paragraph 9 of the Government letter.

14. (*b*).—The prevailing rate has been objected to as a ground of enhancement. But I think the objection is untenable. There are prevailing rates for one class of land in some districts, and in others there are none. Attempts have been found on the part of landlords to create fictitious and high prevailing rates by fabrication of papers, and cases also have been met with in which prevailing rates have been found to exist. I think it would be unfair to abolish the prevailing rate as a ground of enhancement. The Courts should be left to decide the cases according to the evidence before them.

15. As regards the extent of enhancement material changes have been introduced in the Bill. The Bill provides for two methods of enhancement—one by private agreement registered, and the other by suit in Court. The former method has been restricted. But I do not think it would be proper to interfere in the freedom of private contract. I do not remember to have met with instances in which tenants have agreed to pay enhancement out of Court, such as to preclude the belief that in so agreeing they were either free agents or knew what they were doing. I have only heard of such cases, and the number of them is very few.

Paragraph 10 of the Government letter.

16. Equalization of limits of enhancement in and out of Court. Considering the law, limits of enhancement in both cases will tend either to stop enhancement by private contract altogether, or to reduce the limit of such enhancement to a point much lower than the limit prescribed; for when tenants come to know that in a judicial enquiry greater enhancement cannot by obtained through Court than by private contract, they will not come to terms, or they will agree to pay a trifling or nominal enhancement. In cases of private contract I think it is sufficient to provide that the contracts should be registered, and that special care should be taken to ascertain that the tenants in so contracting were either free agents or knew what they were doing.

17. As regards enhancement through Court, there is manifest injustice in allowing 50 per cent. enhancement only on the ground of prevailing rate, for there can be no reason why the tenant from whom the enhancement has been claimed should pay less rent than other tenants who are similarly circumstanced as he is. As to grounds of rise in prices and increase of productiveness due to fluvial action, 25 per cent. enhancement on the old rent has been allowed in each case. When the enhancement is greater, the landlord gets an increase only to that extent, and the remainder of the enhancement goes to the tenant. In my humble opinion, the limits of enhancement should be raised, and in the case of prevailing rate the landlord should be allowed rent at the full rate; and in the other two cases mentioned, the enhancement should be allowed up to a limit not exceeding double the previous rent, and it should be provided that the enhancement decreed shall have a currency of ten years.

18. The ground of prevailing rate is workable. The ground (*b*) is not fairly and mechanically workable always upon the basis of price-lists, even if such lists can be correctly prepared; for the increased cost of cultivation has to be deducted at times, and it is impossible to prove such costs without record. The grounds (*c*) and (*d*) are workable properly after tables of rates are prepared, if the same can be properly prepared. If landlords do not get facility in obtaining adequate enhancement, the result will be, as is now the case, most disastrous to tenants; for the former will try to harass the latter by frequent litigation by means of rent-suits for the different kists of the year—a proceeding which is helped by the Courts Fees Act—and will make them abandon or otherwise part with their holdings. This harassment can only be avoided by the tenant by deposit of rent, but all tenants have not money at hand in time to help them. Hence I think the interest of the tenantry would be better protected if proper facility is given to the landlord in obtaining an adequate enhancement of rent, when the same is obtainable, instead of restricting enhancement, both in and out of Court, as in the Bill.

19. An apprehension has been felt that, as no limit has been placed on rent which a non-occupancy ryot has to pay, the tendency of section 60 (9) and of section 41 (2) will be to increase the prevailing rate to the highest possible limit. But I think there is no good ground for such apprehension always. A landlord cannot settle any land with a non-occupancy tenant at a higher rate than the prevailing rate of the village, for under ordinary circumstances no tenant will ever agree to pay such higher rate when the land is not capable of bearing it. If owing to extraordinary causes the fertility of any village increases to an unusual degree, the landlord may let lands to new tenants at rates higher than prevailing rates, for the tenants will be then willing to take them at such rates. In such cases the pre-emption rules cannot help the landlord, for the occupancy tenants would be unwilling to part with their holdings. But if majority of the tenants die, and owing to superior fertility of the soil they cannot desert their holdings, in that case only the apprehension alluded to may be well founded. But this increase of prevailing rates cannot harm the tenants, for they become the willing causes of it. As the danger apprehended lies in extraordinary cases, or in rare or very few cases, and as the lands are capable of bearing such enhancement of prevailing rates in such cases, I do not think there is any necessity of any provision to meet it.

Paragraph 11 of the Government letter.

20. As far as my knowledge goes, *bastu lands* are held either as a part of the holding or by separate conditions by means of pattahs and kabuliyats. This is the custom of this district also. The former case is very common. In districts of Behar, where batwarahs are common, it often happens that homestead lands of tenants, which form a part of their holding, fall in a different *putty* by partition from that in which the arable portion of the holding is distributed, and the tenants take new lands or holdings from the maliks of the *putty* in which their homestead or dwelling-houses have fallen. The maliks then settle new holdings with the tenants at higher rates, and this they are enabled to do for two reasons—(1) the tenant cannot leave his homestead easily for more reasons than one; (2) each malik, having his *putty* separate, can with little difficulty deprive him of the arable portion of his old holding. It also happens that

Paragraph 12 of the Government letter.

tenants, the arable portion and homestead portion of whose holdings have fallen in the *putties* of different maliks by partition, retain possession of the holdings, including the homestead, and do not take new land at higher rates; but such cases are very rare. Under the circumstances, the tenants have no doubt right to retain possession of such homestead lands as part of the occupancy holdings.

21. I am given to know that in parts of this district the soil is deteriorated in consequence of the appearance of a substance like *reh* on the land. It is whitish and is called *khar or nona mati*. It does not permanently diminish the fertility of the soil. In some years it appears, and in other years it does not. The provision of the section 51 (*a*) includes this calamity (when it permanently deteriorates the soil).

Paragraph 13 of the Government letter.

22. As to commutation of produce-rents into money-rents, I believe the provision of the Bill will affect more the landlords of Behar than those of Bengal. In Behar about one-third of the land pays rent in kind, and in some cases the profit of the landlord exceeds half of the gross produce. The bhaoli system has its advantages and disadvantages. When there is no crop, the bhaoli tenant has to pay nothing as rent, but liability for rent cannot be avoided by the tenant who pays money-rent in years when there is a failure of crop. When there is increase and decrease in the productive powers of the soil, the landlord and the tenant gain and lose equally, the share of each being half of the gross produce. In case of increase of productive powers, there is no necessity for the landlord to bring enhancement suit, and when the productive powers decrease, the ryot does not come to Court to obtain a reduction of rent. I think it would be ruinous to the landlord of Behar if the provisions regarding commutations of produce-rents into money-rents are retained in the Bill. Besides, it is the practice of many land-owning families in the villages of Bengal to let a portion of their lands as produce-paying holdings. The rice thus received as rent forms the stock of their daily consumption (for they do not buy rice in the market), and with the money-rent they receive they pay rent due to the landlord or Government revenue, and manage to meet their ordinary expenses. The advantage of commutation to the tenant is such that it will be his interest to have the produce-rent commuted if the provisions in the Bill are retained. The provisions regarding commutations affect this practice and are revolutionary.

23. Grain rent varies from year to year as regards the amount when the share to be paid is fixed. This is due to two cases—(1) variation in the amount of produce, and (2) variation in price. When the grain rent to be paid is a fixed share of the produce, the rent to be so paid may be considered to be invariable, and the fixed proportion of the crop, notwithstanding rise and fall in price, can be fairly considered with regard to the clause (2) of 20 years' presumption as the natural and equivalent antecedent of a money-rent invariable over a term of years.

24. I doubt if enhancement can be fairly based upon the price lists alone and worked out mechanically always. It is necessary to deduct the increased cost of cultivation when the same has increased. Section 48 of the Bill provides that the Court shall not in any case decree any enhancement which appears to it, under the circumstances of the case, to be unfair and inequitable. When the increased cost of cultivation has to be deducted, it has to be proved. It is difficult to prove it without any reliable record; and so enhancement cannot in all cases be worked out mechanically on the basis of price-lists. It is seen, and the cases are few, that the tenants sell crops to their *mahajuns* at a cheaper rate of price than the current market rate.

Paragraph 15 of the Government letter.

This they do in consideration of the loans supplied to them previously. It is a matter for consideration whether the price-lists can be fairly acted upon in raising the rent payable by such tenants.

25. In the event of rise in price it does not always happen that the cost of cultivation increases, except as regards the seed. Cost of labour increases or decreases according to the state of the market-demand and supply. In many or most cases the cultivators themselves are the labourers, and in those cases I think it is sufficient to deduct the increased price of seed only. In other cases a similar deduction only does not meet the ends of justice.

26. There is a difference in the cost of labour between well-communicated and non-communicated or ill-communicated districts, but unless the average value of labour in those districts for certain years is known, the extent of the deduction which has to be made on account of increased costs of cultivation with reference to those districts cannot be stated.

CHAPTER VI.

27. The provisions regarding the non-occupancy tenant who is in the position of a tenant-at-will under the existing law have been newly introduced in this Bill. They are such that he cannot but acquire right of occupancy in time. The judicial lease which the landlord is compelled to give him under section 60 (7) makes his position firmer and safer in the attainment of right of occupancy. I do not recollect any instance in which a landlord ever attempted to oppose the growth of occupancy right, though I was in Behar for about 12 years in different capacities.

Paragraph 16 of the letter of Government.

Landlords try to dispossess tenants in order to obtain an increased *jama* or enhancement of rent, and not to prevent the growth of occupancy right. This is the result of my experience. The provisions in this chapter materially affect the landlord. They serve to facilitate the growth of occupancy right, but to the injury and loss of the landlord.

CHAPTER VII.

Paragraph 17 of the Government letter.

28. The provisions contained in this chapter will serve to check sub-letting in certain cases and not in others. When the quality of the land is such that by sub-letting it a tenant can derive a profit of more than 50 per cent. or 25 per cent., the rules contained in this chapter will check sub-letting; but when the tenant does not expect to get a higher profit than the above percentage, he would not sub-let his land. Short sub-leases (section 38), and the restrictions put on rent payable by sub-tenants (section 62), check sub-letting to the extent mentioned above. Those sections also affect the operations of section 37; for if an occupancy tenant cannot get by sub-letting more than 50 per cent. or 25 per cent. profit, when he expects to have larger profit by keeping the land in his cultivation, he will not sub-let. That section will, I believe, operate in cases of inferior quality of lands only. Section 62 will not be workable in the district of Backergunge, in which numerous middlemen or tenure-holders intervene between the zemindar and the actual cultivator of the soil. I do not think any limitation on under-tenant's rent, or any limitation of the terms of sub-lease, per section 38, is desirable.

CHAPTER VIII.

Paragraph 18 of the Government letter.

29. *Sections 81 to 83*—Concern the district of Behar particularly. The gross produce of a bhowlee holding in Behar is thus appraised: The quantity of the produce is estimated on the field by men of the landlord, and a value is placed upon it according to the market rate in presence of the tenant. A paper is thus prepared, called *khesra kankutu* or *khesra danabundy*. The landlord gets half the value of the produce so estimated. In the case of *betai* holdings in the same province, the division of the produce takes place on the field in presence of the parties (*e.g.*, the landlord or his agent and the tenant), and each party takes his share, which is half of the gross produce. In this district we have *adhi* holdings only. The tenant cuts the produce and brings it to the place of the landlord, where it is divided. After division, the landlord and tenant each takes half share of the produce. Section 83 (2) gives the tenant the exclusive possession of the produce to be divided, but this is opposed to the practice in this district, as noted above. Sections 81 to 83 include all cases of appraisement or division of produce, and also possession of produce before appraisement or division in Behar.

30. The forms of receipt and account in section III of the Bill are sufficient.

CHAPTER IX.

Paragraph 19 of the Government letter.

31. *Section 90.*—In the province of Behar, where rainfall is scanty, or is not so copious as in Bengal Proper, tenants irrigate their fields by digging wells (*i.e.*, *kutcha* wells) or by excavating *pynes* or aqueducts connected with rivers, navigable or otherwise. This is the practice of the holders of high lands. I cannot say if such *kutcha* wells are dug with the permission or acquiescence of the landlords or without it. But the high lands are such that they cannot possibly yield anything unless irrigated, and there are cases in which irrigation of such lands can be effected only by water from the well. Whatever be the *status* of the tenant, be he an occupant tenant or a non-occupant tenant, the holding would be useless to him if he is not permitted to dig a well for irrigation purpose. It is not necessary to empower a non-occupant tenant to construct a well for the irrigation of his fields, for the landlord cannot but give him the permission; and if the permission is denied, the tenant, as a matter of course, will surrender the field to the loss of the landlord. Irrigation of lands with water from the well is rare in Bengal Proper, and no such provision in that case is necessary.

Paragraph 20 of the Government letter.

32. I think section 96 fairly deals with the case of abandonment of holdings by tenants. Its provisions are liable to be abused, but such instances, I believe, will be rare. The landlord is amenable to criminal penalties in such cases.

Paragraph 21 of the Government letter.

33. As far as zemindars are concerned, I think it is sufficient that measurement of lakhiraj holdings should extend to a survey only of external boundaries.

34. I think it is safer to conduct the actual measurement by the local and not by the English system of mensuration, and then to convert the said measurement into the English measure.

Paragraph 22 of the Government letter.

35. I am against the appointment of managers for management of joint estates. It is of no benefit to the landlord or to the ryot. By appointment of managers the zemindar's responsibility for payment of Government revenue is not a whit diminished, but the risk of punctual payment of

the same is increased. Generally managers enrich themselves at the expense of landlords and tenants alike, and act detrimentally to the interests of the proprietors. When there is a dispute between the co-owners, the tenant is sufficiently protected by section 73 (c) by deposit of rent.

CHAPTERS XI and XII.

36. As to tables of rates, owing to multiplicity of rates in certain parts of the country, it is impracticable to prepare them. But when a table of rates is prepared for any tract of land, it will facilitate enhancement. When an enhancement suit is based upon such a table, the landlord has only to prove to what class or classes of land the holding belongs. This may be ascertained by proper local enquiry.

Paragraph 24 of the Government letter.

37. As to proprietors' private lands, I think the definition given in section 138 (a) of proprietors' private land is not exhaustive. It has been seen in certain parts of Behar that proprietors let their zerát or private land on *munbundee* principle. The tenants cultivate those lands and pay a fixed quantity of produce as rent. The above definition does not include this class of land.

CHAPTER XIII.

38. The Bill abolishes the right of private distraint which the landlords enjoy under the existing law. Distraint through Court is attended with delay. The *interim* order, per section 141 (3), prohibits the removal of the produce pending orders, but it does not prevent delay. When the tenants strike, the only speedy way of realizing rent from them is by using right of private distraint or distraint through Court. It is a fact that the right of distraint has been often abused. But if very heavy penalties are provided in the case of abuse of the right, that is sufficient to bring the landlords to their senses. The saleability of the occupancy right is not perfect security for realization of rent. In places in which there is no demand for land the remedy of sale is inefficacious to realize rent. I think the present law of distraint may be retained for occupancy tenants and non-occupancy tenants alike, with heavy penalties in case of abuse of the right.

Paragraph 25 of the Government letter.

CHAPTERS XIV and XV.

39. It is very inconvenient that a landlord should be permitted to sue a number of tenants by means of one plaint. A suit of the kind may be conveniently and easily disposed of when the defendants do not appear, but difficulty occurs when the case becomes defended, and the different defendants defend in different ways, for each tenant has to be heard separately, and separate judgments have to be written; or in other words, one judgment must contain several findings with respect to the different tenants. When a case of the kind comes on for trial it may happen that some defendants may apply for time to file evidence, while others may be prepared to examine witnesses, and it is some time before it can be taken up for trial. However, the general practice is to try *analogous* rent-suits of the same landlord together, for it is convenient to try them together.

Paragraph 26 of the Government letter.

40. The procedure sections, *e.g.*, 163, 164, 168, 171, 175, 177, 185, and 186 have been read by me. They simplify the judicial procedure. The sections may be retained, except section 185. That section will much diminish the value of occupancy holdings. Section 164 will sufficiently fulfil the purpose for which it has been introduced. I think it would be better to add that the defendant's petitions for appeal and re-trial will not be admitted unless he pays or deposits in Court the amount of the decree money.

CHAPTER XVI.

41. *Section 209*—Is very useful and important. I think the provision of summary sale should be made applicable to all permanent tenures or occupancy holdings with right to hold at fixed rent after they have been recorded and registered.

Paragraph 27 of the Government letter.

CHAPTER XVII.

42. *Section 213.*—*Chur* or *dearah* land has been defined to be land ordinarily liable to improvement or deterioration by fluvial action. According to this definition, I think it will not be easy to ascertain what lands are *chur* or *dearah* lands.

Paragraph 29 of the Government letter.

43. *Section 210.*—I am not for the provisions of this section. Freedom of contract cannot be taken away. In order to protect the interests of the tenant, I think it would be sufficient to provide that in case any such contract is entered into by the tenant, the contract shall not be valid unless registered.

44. So far as this district is concerned, section 227 of the Bill is enough for the purpose.

Paragraph 30 of the Government letter.

45. I am given to know that dependant talooks of the kind mentioned in paragraph 2 of the letter of Government of India, No. 784, dated the 5th May 1884, are not in existence in this district. Since such talooks are permanent and held at fixed rent, the summary sale law may be made applicable to them.

Paragraph 31 of the Government letter.

46. In case the arrears of R. C. and P. C. are very small and trifling the summary sale law may not be made applicable for their realization.

Paragraph 32 of the Government letter

47. *Utbundy* and *hal hasli* tenures do not exist in this district. Lands are taken by tenants for one season, or for one year or two years, at a rate of rent agreed between the contracting parties. When the crop is ripe for reaping, the quantity of the land cultivated by the tenant is measured, and then the rent payable is settled. When land is taken on the above condition, the tenant is called *utbundy* tenant, and the tenure is called *utbundy* tenure. Tenures of this kind exist in Nuddea and 24-Pergunnahs. The ordinary incidents of the ryoti tenure do apply to such tenures.

Paragraph 33 of the Government letter.

48. Howlas, nim howlas, usat howlas, and usat nim howlas of Backergunge are transferable by custom. These tenures are created generally by interchange of pattahs and kabuliyats. The tenures are well known and well defined. I think they can be specifically excluded from the operation of the pre-emption clauses.

Paragraph 34 of the Government letter

49. The *bastu* question has been discussed by me in paragraph 20 of my this report with reference to paragraph 12 of the Government letter dated the 24th May 1884. Here I beg to add, with reference to paragraph 2 of the circular letter of the Government of Bengal under reply, that within my jurisdiction as Sudder Munsif of Dinagepore no custom exists of exempting from sale *bastu* or homestead land when the occupancy right in the arable portion of the holding is put up for sale in execution of a decree. I have not known any instance of the kind. When the homestead land is held under a different engagement from that under which the arable portion of the holding is held, the decreeholder, at his option, proceeds either against the arable holding or against the homestead. But this, I believe, is a separate question.

Paragraph 2 of the circular letter of the Government of Bengal No. 9T.—R., dated the 5th June 1884.

50. As far as my knowledge goes, the local custom of this munsifi or this district does not any way recognise some right in a ryot to his holding independent of the statutory occupancy right.

Paragraph 3 of the above Government letter.

No. dated Gaibandha, the July 1884.

From—Baboo Krishnadhan Chaudhuri, First Munsiff of Gaibandha, Rungpore,

To—The Offg. Secretary to the Government of Bengal, Revenue Department.

With reference to your land revenue circular No. 9T—R, dated the 5th June 1884, calling for my attention to the revised Bengal Tenancy Bill, with the report of the Select Committee and the dissents published in the *Calcutta Gazette* of the 2nd April and following dates, and forwarding to me copy of a letter from the Government of India, No. 784 of the 5th May 1884, and of circular letter No. 3 T—R of the 24th idem, from the Government of Bengal to the Commissioners of Divisions, on the subject of the Tenancy Bill, I have the honour most respectfully to submit the the following report.

2. *Answer to 1st question.*—The revenue officers ought to be empowered to arrange for cutting of irrigation channel, the distribution of water, and the payment of compensation. Otherwise the system of irrigation would be altogether a failure, for some would wish for irrigation of their lands, while others will not consent to it.

3. *Answer to 2nd question.*—It is essentially necessary that the summary sale procedure should be applicable to dependant taluqs. Otherwise the zemindar could not be responsible for the payment of revenue, for the realization of which he is provided with no easy means. Particularly the zemindar has no corresponding interest for his responsibility. Indeed, very great benefit both to the zemindars and the tenure-holders would accrue if the modified putni procedure be applied to these tenures.

4. *Answer to 3rd question.*—The summary sale procedure can be made applicable also to the recovery of arrears of road cess and Public Work cess from rent-free tenure-holders.

5. *Answer to 4th question.*—There is no practise prevailing in my jurisdiction for *bastu* lands. I think the conditions attached to the right of occupancy right to be attached to every *bastu* land. Otherwise no persons would be safe in making a permanent residence. When the defaulters had other property, *bastu* land should not be sold beforehand in execution of decree for arrears of rent. *Bastu* land would be sold only when it is proved that such arrears

could not be otherwise realized. The burden of proof in this case should lie on the landholders. Tanks and gardens adjoining to a homestead should be considered as included within the *bastu*. If the *bastu* is settled along with other lands, in case of sale for arrears of rent, the holder of *bastu* will be entitled to hold only his *bastu* on equitable terms and in the settlement preference should be given to him. The conditions applicable to other *bastu* will then apply to this *bastu*.

6. *Answer to 5th question.*—The provisions contained in section 214 ought to be applied to similar tenures under other names. Otherwise such lands would scarcely be settled and brought under cultivation. The provisions should be applicable to every division, not in Chittagong Division alone.

7. *Answer to 6th question.*—I do not know what is guzashta and gera holdings.

8. *Answer to 7th question.*—It is possible to improve the price list by filing by the local traders of extracts from their purchase and sale-books, and price lists should be prepared from these extracts. Enhancement of rent based on such price list will be much more accurate.

9. Occupancy ryots should remain occupancy ryots, and ought not to be converted into tenure-holders under any circumstances.

10. There should be no difference between the ryots and tenure-holders at fixed rates; the statutory presumption ought to be retained, otherwise in reality there will be no tenant at fixed rates. A certain time should be allowed for registration of the tenures.

11. There is no objection against the definition of "estate," but occupancy right ought to be extended in the same village only, and not to the same estate. The date ought not to be changed, as otherwise the survey records will all become useless.

12. The onus of proving the right of occupancy should lie on the party possessing the right, for it is easier to prove one's own right than to prove the adverse right of another.

13. As regards enhancement of rent, after an enquiry into the gross produce of the land, the price of it should be ascertained from the price list. The cost of cultivation, which should be also ascertained by enquiry, should be deducted from this price, and the remainder should be given partly to the zemindar and partly to the tenant for their respective interest.

14. The provisions of the section 42 have been judiciously made. If without taking into consideration the previous rate of rent, the rate of rent payable by an occupancy ryot let into land hitherto held by a non-occupancy tenant be fixed in conformity with the rate paid by the surrounding occupancy ryots, the zemindars will be unwilling to let them into their lands. This will indeed prove injurious to the occupancy ryots. The provision of section 43 (*a*), about having regard to the rate of rent paid by the surrounding occupancy ryots. When an enhancement is claimed, provision should be made that no regard is to be had, in case of enhancement to the rate paid by such occupancy ryots.

15. As to the grounds of enhancement, the crops grown in particular lands ought to be taken into consideration, and not the staple crops of the district. In enhancement it will be also necessary to call on the local traders to furnish extracts from their purchase and sale-books as stated before. Exceptional cases of good or bad years should be avoided, if the average price for five years preceding be taken into consideration, there can be no reliance as regards accuracy of the price list furnished at present.

In commuting grain rents to money rents, the average price of the grains received as rent by the landlord in five years passed should be fixed to be the money rents.

17. The rate of rent payable by a non-occupancy ryot on his first entry upon a holding should be fixed as what he contracts with the zemindar. Otherwise in such case if there be provisions for fixing judicial rent, it will affect the interest of both landlord and tenant according as the case may be.

18. The protection given to under-ryots in Chapter VIII is sufficient.

19. (Chapter VIII.) These crops may be kept with landlord or tenant according to local custom.

20. As to the question of abandonment by a tenant, the manner in which the Select Committed have attempted to solve it is suitable.

21. The powers conferred or conferable on the revenue officers charged with the preparation of the record of right are, in my humble opinion, sufficient, and the powers which the Local Government is competent to confer upon them under section 223 will be sufficient for the purpose.

22. In framing records of rights, the revenue officer will dispose, in the manner provided, of every class of cases which he is capable of disposing of, and in case of special difficulty or importance, he will refer it to the ordinary civil courts.

23. As regards distraint (XIII), the provisions made in the Bill is not, in my humble onipion, unfair or unjust.

24. To institute a collective suit against any number of tenants belonging to one village by means of a single plaint will not, as I consider, work well in practice. Only in suits for arrears of rents a general reduction in stamp duty is desirable, and when any number of suits are instituted by one plaintiff against any number of defendants belonging to one village on the same date, the same process fee should be chargeable as is now required for any number of defendants in a single suit.

25. As regards service of summons, the provisions made in the Bill are facilitating, but as to the speedier and cheaper method of recovering arrears, I have already suggested about the latter in paragraph 25, and have to say that to press upon the local officer for speedier disposal of suits is the only means for attaining the former object.

26. The provisions of the section 164 should be omitted from the Bill, as otherwise much difficulty will occur and inconvenience be caused.

27. The provisions made in the Bill about the procedure (XIV) are in general sufficient.

28. Right of occupancy should be transferable.

29. The section 78 (*b*) should be omitted from the Bill, otherwise many tenants with an object to harass his landlord will deposit rent on the pretext that he believes that the latter won't take rent and give a receipt.

30. I am unaware as to the existence of any practice which prevails in my jurisdiction of exempting, under any circumstances, the *bastu* land from sale, when the occupancy right in the arable portion of the holding is put for sale in execution of a decree.

31. I am unaware as to the existence of any custom which in any way recognizes some right in a ryot to his holding, although he has not held it for 12 years, but acquired a statutory right of occupancy.

32. In conclusion, I beg to state that the provisions made in section 32 of giving the right of pre-emption to the landlord is not in my humble opinion unjust, but where there is a shareholder of the tenant, the right of pre-emption ought to be given to him.

No. 116, dated, Serajgunge, the 3rd August, 1884.

From—BABOO KAILAS CHANDRA MAJUMDAR, Munsiff of Serajgunge,

To—The Secretary to the Government of Bengal, Revenue Department.

With reference to the Government circular No. 9T—R, dated the 5th June last, calling on me to submit my opinion on the revised Bengal Tenancy Bill, I have the honor to submit as follows:—

CHAPTER II.

Paragraph 4 of the letter from the Government of Bengal to the Commissioners of Divisions.

(*a*) The definition of ryot in section 5 (3) may cover all classes of ryots—those holding under unregistered lakhirajdars as well as under the holders of revenue-paying lands, if the word "tenure" includes all interests in land whether rent-paying or lakhraj (other than estates as defined in chapter I).

This is the form in which the word "tenure" has been defined in Act VII (B.C.) of 1868. To remove difficulties I think that a definition of the word "tenure" should, if possible, be given in the Bill. The description of "tenureholders" given in the Bill does not appear to be clear on the point.

In the case of Nilmony Sing Deo *versus* Chandra Kant Banerjea, I. L. R. 2, Cal., 125 Justice Glover says: "It may be that the defendant has cultivated or does cultivate some part of his holding, but this would not deprive him of his position as the holder of an intermediate tenure."

In the full Full Bench case Shyam Chand Kundu *versus* Brojo Nath Paul Chouduri, 12 B. L. R., 484, "tenure" has been described "to be not the right or interest of any person in the land, but the holding or the interest which has been created by the lease."

In the case of Kristendra Nath Ray *versus* Aena Bewa, I. L. R. 8, Cal., 675, it has been held that the word "under tenure" "is not confined to a tenure intermediate between the zemindar and the ryot, but includes any tenure which, by title deeds or the custom of the country, is transferable by sale."

If the cultivation of some part of the holding by the tenant himself does not affect the position of the holder of an intermediate tenure, I think that the definition of the word "tenure" as given in Act VII (B. C.) of 1868, with certain changes, may cover the classes of tenure-holders, who are the creatures of the present Bill.

I venture to define "tenure" in the following way:—

The word "tenure" includes all interests in land, whether rent-paping or lakhiraj (other than estates as defined in chapter I), which are intermediate between the proprietor and the ryot, and which by title deeds or by the custom of the country are transferable, whether some part of the holding is cultivated by the tenant himself or not.

(*b*) Ryots who call themselves gantidars in the district of Jessore, and the jotedars of these districts with a holding of 50 or 60 bighas, do claim the privileges of a middleman and act as middlemen generally do, although under the existing law they do not possess any right superior to the right of occupancy. These ryots are generally rent receivers, and taking the status of these ryots as my guide, I think that the presumption in section 5 (5) is a fair presumption.

(*c*) To protect the sub-lessees of ryots, sub-letting should be discouraged. The scheme of conversion may discourage sub-letting, but the practicability of the scheme is, I think, doubtful. As provided for in the Bill the status of the converted tenure-holders, with regard to the important question of enhancement, remains, even after the conversion, the same as before, and the converted tenure-holders are put to a worse position when, with their own conversion, their under-ryots are also converted into occupancy ryots.

The disadvantages to which these converted tenure-holders will think they will be put to, if the under-ryots are converted into occupancy ryots, will preponderate, and the advantages with regard to pre-emption and distraint will not be a sufficient inducement to them to see that their status is improved.

In districts where the registration of deeds is not even now resorted to, although the law is well understood by the people for a period of 20 years, if not from before, section 37 will have no effect if the registration is left optional with the ryots.

To make the provision workable, I think that the registration should be made compulsory, and that a penal clause should be attached to the section for its compliance.

CHAPTER III.

In the case of Rani Shurnamoyee *versus* Gouri Pershad Dass, 3 B. L. R., 271 (a suit for enhancement of rent payable by a talukdar), 6½ per cent. was, under the circumstances of the particular case, allowed to the talukdars for profits, but this was not considered to be enough to enable a man to live comfortably and to provide against bad seasons and bad tenants. Under the case laws a reasonable profit is to be allowed to the talukdars, but a profit less than 10 per cent. cannot be held to be reasonable.

From the facts of the case Mohini Mohan Roy *versus* Ichamoyee Dassi, I. L. R., 4, Cal. 612, it appears that there may be circumstances in any particular case under which the enhancement should be gradual. A provision to this effect therefore should find a place in the new law.

Difficulty, however, may rise as to from what date the period—10 years—mentioned in section 10 is to run, if the enhancement be gradual. The portion "during the 10 years next following the date on which it has been so enhanced" appears to be ambiguous. It is not clear whether the 10 years is to run from the year in which the increase of rent commences, or from the year in which the limit is reached.

It will, I think, be convenient if "customary rate or pergunnah rate" (pergunnah rate being more easily ascertainable) is substituted in the place of "customary rate" in section 7.

CHAPTER IV.

With reference to this chapter it is said that section 23 with the 20 years' presumption will tempt ryots to defraud the zemindars of their just rights. In practice, however, this is not found to be the case. In many parts of the country, particularly in the eastern districts, the practice of granting printed rent receipts has not yet become common. True, that in suits for enhancement this presumption is generally pleaded by the ryots, but the ryots seldom plead it successfully. Still there are few ryots who preserve their rent receipts with care, and there are few enhancement cases in which the zemindars have found difficulty in rebutting the presumption, or have failed to succeed simply on this ground. With collection papers, which the zemindars keep as a rule, they come prepared to meet the ryot's case, and it is the ryots who generally suffer. Even now the ryots are as ignorant and careless as they were before. The ryots therefore do stand in need of some protection, and it will operate hardly against them if the presumption is now removed from the Bill.

The currency of presumption is limited in the Bill, so that no good zemindar is likely to suffer if he takes care to have the tenancies registered in the way provided for in the law. To limit the presumption in any other way will be most disastrous to the ryots.

The zemindars are the most intelligent of the classes, and now that the presumption is already in force for more than 20 years, it is easier for the zemindars (who are possessed of better materials) to rebut the presumption than for the ryots to prove their right by proper legal evidence.

CHAPTER V.

According to sub-section (1) to section 25 a settled ryot acquires the right of occupancy in respect of all lands which he may hold in a village or estate, whether belonging to the same or different zemindars.

The right of occupancy has thus been made personal to the ryot, but this change in the law I think will press with some degree of severity upon the zemindars, and give undue advantage to the ryots.

A non-occupancy ryot by buying one piece of occupancy holding in the village or estate will thus become an occupancy ryot with respect to all his holdings; and if the village or estate belongs to several zemindars, which is not unusually the case, all occupancy ryots holding under one zemindar will, under the Bill, acquire the right with regard to all lands which they may acquire under other zemindars.

The sub-section may be modified in the following way without injury to the just rights of the ryots:—"A settled ryot of a village or villages shall have a right of occupancy in all lands in the village or *villages* which he may acquire under the same zemindar under whom he has an occupancy right."

The lands of an occupancy ryot do not generally extend over a pergunnah when the "estate," as defined in chapter I, is a pergunnah or the share of a pergunnah. To give him this right in the Bill will be giving him a right which he cannot reasonably expect to have. A word having a more limited signification should, I think, be substituted for the word "estate."

Sub-section (2) to section 26 is a new legal resumption in the Bill, but this resumption, I think, will operate hardly against ordinary unregistered lakhirajdars and small tenure-holders who do not keep regular account books of the collections they make, and also to new purchasers at auction sales.

In the practice we see that in the case of lakhirajdars and small tenure-holders who are females or minors they are put to the greatest disadvantage when the ryots try to defraud them of their just rights by setting up false defences. The presumption is very wide, but for the good of the ordinary tenure-holders I think that it should be placed under certain restrictions. The section may be modified without injury to the rights of ryots who have real rights of occupancy in lands if it is worded thus—"If in any proceeding under this Act it is proved or admitted that a person holds land as a ryot for a period above six years, it shall, &c."

To make the definition of settled ryot more clear, I think that the case law, I. L. R., 3, Cal. 560, to the effect that "a ryot occupying and cultivating land for more than 12 years under a landlord who has no title to the land, nevertheless acquires a right of occupancy," should be added to sub-section (3) to section 26.

In the case of Sreemutty Alladinee Dassi *versus* Sreenath Chunder Bose and another, 20, W. R., 258, it has been ruled that "a co-sharer in an estate who cultivates a portion belonging to himself and the other shareholders should *pro tanto* be considered their tenant." If a tenant, he may in course of time acquire a right of occupancy in the land he holds. Section 29 (1) provides that this ryot should have a right of occupancy, and I think that this is in accordance with the ruling cited above.

Section 28 applies to the case of landlords who are not part owners, but are the proprietor of the entire holding. The one therefore does conflict not with the other.

The second part of section 29 (2) is in accordance with the case law, 1, W.R., 76, which rules that "a ryot does not lose his right by subsequently taking the land in farm." But to make the first part of the sub-section clear I think that it should be made to accord with the case law, 25, W.R., 503, to the effect that, if before the farming lease the ryot did not acquire any right of occupancy, the ryoti interest must remain unchanged in character during the currency of the farming lease.

I think that the following should be added to section 29 (2) :—

A firm of capitalists cannot by any length of occupation acquire rights of occupancy in a village or estate, I. L. R., 4, Cal., 957.

To prevent unnecessary litigation, I think that section 31 (*a*) should be made a little more definite.

As to the question of transferability of the occupancy holding, I think that when such holdings are, as a matter of fact, daily sold and bought by cultivators in every district in Bengal, to facilitate the extension of this right is simply to embody into law what is a recognized custom in every district in Bengal.

The procedure laid down in the Bill is, however, elaborate, and I think that it will make transfer almost impossible. Under the Bill in every case of private transfer a ryot is to make the transfer through the court; but a ryot who lives at a distance and wishes to sell a bit of land on urgent emergency will not have time to go to court nor to wait for the time prescribed in the Bill.

Under the existing practice the ryots do sell and buy occupancy holdings whenever they wish, but no complaint on the ground that this sort of free transfer affects their interest has ever been made by the zemindars. On the contrary the zemindars do generally recognize these transferees as tenants on receipt of a certain sum as *nuzzur*.

If the recognized custom is embodied into law, free sale should be allowed, and the ryots should have an unrestricted right of sale. I think that free sale may be allowed, and at the same time right may be given to the zemindars to question the sale and to have the sale cancelled, if after the sale the zemindars find that the ryots have acted fraudulently or that the sale does affect their interest in any way. Without this any provision to restrict the right by giving the right of pre-emption to the zemindars before the sale, will, I think, make the scheme practically almost unworkable.

If the pre-emption sections are retained in the Bill, it will be difficult to apply them in practice, if, when the holding is held under several sharers, each of the sharers claim the right of pre-emption severally. When this is the case, how will their claims be decided? The Bill is entirely silent on the point.

If the section 42 remains as it is, the omission of section 56 of the former Bill will, I think, have a serious effect upon the prevailing rate.

The danger is real, and to meet it I think that one or the other of the two following must be provided for:—

(1) If the other provisions are left as they are, the maxima rates of rent payable by the occupancy and non-occupancy ryots are to be made equal, so that the landlord may not have the liberty to let the land which falls into his hands yearly to non-occupancy ryots at rates above the prevailing occupancy rate; or

(2) If the maxima rates are not made equal, provisions should be made to prevent a considerable quantitity of ryoti land falling yearly into the hands of landlords. This may be done if the pre-emption sections are withdrawn and the surrender and abandonment sections made more strict. But with respect to lands which must inevitably fall, it should, I think, be provided that the first ground of enhancement is not to include rates framed under section 42 (1).

The first one is, however, the easier of the two.

With regard to the question of enhancement out of court, I think that to prevent litigation the tenant may be let free to contract up to the maximum limit to which rent can be enhanced in a court, but as in practice it has been found that the tenants are not always free agents in entering into contracts with their landlords, some provision to check the contracts is I think necessary.

If officers who are to prepare the record of rights or officers more responsible than the present rural sub-registrars are vested with the powers of registering these contracts, I think that the contract may be properly checked, and the inconvenience apprehended may be removed. With a proper check on contracts, the provision as to enhancement out of court may work well.

Under the existing law the first ground of enhancement, as explained by the case laws, is almost unworkable in practice.

To make out this ground the facts to be proved are not only the prevailing rate, but that that rate is paid by ryots of the same class for similar lands and with similar advantages; but in very few cases the zemindars can satisfy the requirements of law by proper evidence. Cases are, however, rare in which the zemindars have really succeeded to prove this ground by the production of false evidence. Under the Bill as it stands there will be two classes of occupancy ryots, one holding at the old prevailing rates, and the other holding at rates framed under section 42 (1); so that under the Bill the prevailing rate may to a certain extent be definite and ascertainable, and this being so the abolition of the ground may tell unfairly on the zemindars.

The application of section 46 (6) will be most difficult if the portion— "the increase likely to be caused by the improvement"—is retained in the Bill. This is an uncertain fact which cannot be easily ascertained. If in any case the possibility is the only point to be taken into consideration in determining the amount of enhancement, it will be most unsafe to fix a certain amount simply on the ground of possibility. If this portion is taken away, the portion in rule (IV)—" the ability of the land to bear a higher rent"—which is equally vague and uncertain, is not necessary to be retained in the Bill. To make this ground of enhancement workable, I think that section 46 (6) should be made more certain, and that it should be provided that as a rule the landlords are not to have the benefit of this ground, unless and until some increase has actually been caused by the improvement.

The Bill mentions certain facts which the courts are to be take into consideration in determining the amount of enhancement on the ground of landlords' improvement, but what rule of proportion is to be followed in fixing the amount has not been provided for in the Bill.

The evidence to prove the possibility of increase and the ability of the soil to bear a higher rent will be most uncertain and vague, and on such evidence it will be very difficult for courts to come to a right conclusion.

To remove difficulties I think that a certain rule of proportion should be provided for in the Bill.

In determining the amount of enhancement on the ground of rise in prices the cost of production may be taken into calculation, although by the Full Bench decision in the great rent case no ryot is entitled to any deduction on this account.

The cost of production was taken into calculation in the case of Joment Mundul *versus* Shoorender Nath Roy, 25, W. R., 291, and I think that that this should be done when the cost rises in a greater ratio.

There being more demand at the head-quarters, the fluctuation of prices as head-quarters is not the true index. At these places the prices are invariably high. List of prices are, I think, to be made from the account books of the mofussil mohajuns.

Under the existing law the question of enhancement of rent of bastu lands arises only when the bastu forms an integral portion of the occupancy holding, or is held as a ryoti tenure by persons engaged in agriculture.

The law relating to homestead lands, as it now exists, is as follows:—

In the case of W. G. N. Pogose *versus* Raju Dhopee, 22, W.R., 511, it has been ruled that "where the tenure or bastu is a ryotwari tenure, these bastu lands do come within the operation of the Rent Law."

In 24, W.R., 153, it has been held that, when the principal subject of the entire occupation is bastu land the residue (if any) of the holding being merely subordinate, the Small Cause Court has jurisdiction.

"But when the principal subject of the entire occupation is agricultural land, the building or buildings being mere accessories thereto, the Small Cause Court will not have jurisdiction."

Under the case laws therefore bastu lands in order that they may come under the Rent Law must be accessories to the arable portion of the holding, or in other words, the origin of tenancy with regard to these lands must be for agricultural purposes.

It is when the bastu land lies in a village and forms part of an agricultural holding that it is liable to enhancement under the existing law (3, B.L.R., App. 133).

When the origin of the tenancy can be known the application of the law as it now exists is not very difficult (I.L.R., 8, Cal., 960.)

Difficulty arises when the origin of the tenancy cannot be known, and in course of time the bastu land lying in an agricultural village becomes the principal subject of the entire occupation and the arable portion accessory to be bastu.

In I.L R., 3, Cal., 696, it was laid down that when the tenant did not hold under an express agreement he would be treated as a tenant-at-will, and would be liable to be evicted upon a reasonable notice to quit.

This ruling made the law clear, but by this the ryots were left entirely at the mercy of their landlords. Numerous cases of eviction were instituted and real hardship did ensue after this ruling was passed..

Subsequenly the law was modified by the rulings 10, C.L.R., 25, and I. L. R., 8, Cal., 96 , and as the law now stands a ryot acquires a right of occupancy in the bastu land if it is shewn that the land was originally granted for agricultural purposes and a permanent tenure in it when the land is shewn to have been left for building purposes.

Cases, however, generally arise in which the purpose for which the land was originally granted cannot be ascertained, and for the protection of ryots holding such homesteads I think that there ought to be some provision in the present Bill.

If any local custom is to regulate the incidents of tenancy of these homesteads the existence of such a custom will be a matter of proof, but this the tenants will find it very difficult to prove by evidence. The tenants of these homesteads will thus be as unsafe as they are under the existing law.

Within my experience I have not seen that bastu land forming part of an occupancy holding is exempted from sale when the occupancy holding is sold in execution of a decree for rent. At these sales the entire holding is sold irrespective of the question as to whether any portion of the holding is arable or bastu. The holding cannot be sold by parts because no division of the holding can be made by the zemindars with the consent of the ryots.

At other sales the bastu may be sold separately, but as by recognizing the purchaser a

division of the holding is recognized, the zemindars do not generally recognize the purchaser as a tenant. If they do recognize, they recognize the purchaser as a joint tenant.

If by butwara or sale of the superior tenure the occupancy holding is divided, apportionment of rent is now made according to the principle laid down in the case law, I. L. R., 5, Cal., 902, and the holding which was originally one comes to be held as separate holdings according to the several parts into which the holding is divided by the butwara or sale, but without affecting the conditions under which the holding was originally held.

In these districts the bastu of a cultivator is generally held as accessory to the arable portion. It is not held as a distinct tenure, nor is it held on conditions separate from those which attach to the holding as a whole.

In case of females, minors, &c., it is generally the case that for want of means or of proper men to manage their properties, they, with the consent of the zemindars, surrender the arable portion of the holding to the zemindars and occupy the bastu as a separate tenure, but subject to the same conditions under which the occupancy holding was occupied by them before. In respect of bastu lands held in this state for a long time, the origin of tenancy cannot be easily ascertained, and the ryots holding such homesteads are under the existing law quite helpless.

If the surrender of the arable portion which the zemindars now ordinarily recognize is embodied into law it will be a boon both to the zemindars and ryots, and then the necessity for making some express provision for the homestead of ryots will be quite apparent.

Under the existing law land let for one purpose cannot be used for different purposes without the consent of zemindars, so that, if a ryot converts an agricultural holding into a bastu one, he is liable to ejectment under the existing law.

Unlike the present law, the Bill gives right to occupancy and non-occupancy ryots to erect suitable dwelling-houses, &c., on portions of the holding they occupy. To prevent interference of the zemindars with these sites of the ryot's house, and for the safety of the ryots therefore, some express provision with regard to the rights of ryots in bastu lands should be made in the Bill. To leave this to custom will be most unsafe to the ryots.

CHAPTER VI.

In these districts there is no local custom recognizing any right in the non-occupancy ryots. These ryots are now left entirely at the mercy of their landlords and are without any remedy if they happen to fall out with their landlords on any ground. The law that "where a tenant has not any gozastah right, or any right either of occupancy or of fixed rent, his tenancy may be determined at any time by reasonable notice to that effect" (21, W.R., 268) strictly applies to the non-occupancy ryots of these districts.

In the eastern districts estates are generally let out in ijara. New ijaradars or other leaseholders who have the rights to collect rents try the best means in their power to realize something over and above the legitimate rent payable by the ryots, and whenever the ryots do not accede to their call, they deal with the ryots in any way they like, serve them with notices to quit, and if any class of ryots is the most oppressed under the existing law, it is the non-occupancy ryots.

In many districts in Bengal, if an estate is let out in ijara or in patni the settlement is made at the most exorbitant terms. A certain big amount is paid as selamee, and the *hustabood, i.e.*, the total amount of collection made by the zemindar, is made the jama payable by the leaseholders. *Primâ facie* therefore the bargain is to the disadvantage of the lessees. A lease taken under such terms cannot be made profitable unless something over and above the actual rent is realized from the ryots. What can then be the object of the ijaradars or patnidar in taking leases on terms under which they are no better than mere collecting agents. The object is purely to profit at the expense of the ryots. The non-occupancy ryots are the persons then looked to as best suited to satisfy their object, and the result is that under the existing practise the non-occupancy ryots are dealt with by leaseholders at their discretion.

If the same freedom of contract is allowed in the present Bill, and at the same time the term of tenancy is limited, the position of these ryots will be worse than it is under the existing law.

To improve the status of the non-occupancy ryots, therefore, the power now allowed to the zemindars to deal with the non-occupancy ryots at their discretion must be checked, and a certain limit on rent, not above the occupancy rate, should be provided for in the present Bill.

CHAPTER VII.

Under-ryots are creatures of the present Bill. They have got a certain legal status, which they do not possess under the existing law.

I doubt, however, that section 38 of the present Bill will have the effect of discouraging sub-letting if the provisions of section 37 are not availed of by the occupancy ryots. To these it will be a gain if the leases are to remain valid for short terms only. Limitations on rents payable by under-ryots are therefore desirable.

Although the word tenant, as defined in chapter I, is wide enough to include a talukdar, but to prevent ambiguity I think that section 73, relating to deposit of rent, should be expressly extended to patni taluks, as under the existing law, the sections on deposit have been so extended by the case law, 22, W. R., 431.

In practice it is generally seen that when a certain sum is carried to the payment of back rents, which might remain due for more than one year, the receipts only shew in a lump sum the amount which has been credited as back rent without specifying the particular year or years for which the arrears have been so paid. To make things clear and to make the counterfoils of receipts the best evidence of the jama actually paid by the ryots in the previous years, I think that a clause to the effect that "if the arrears or back rents due be for more than one year, the year or years to the account of which the payment is credited should be distinctly shewn in the receipts," may be conveniently added to section 69 of the Bill.

Section 78 of the Bill is the same as section 52 of the present law. By the case laws, 12, B. L. R., 439, Privy Council and I. L. R. 9, Cal., 88, section 52 has been made applicable to cases where the right to cancel a lease arises under the provisions of the Act, as well as to cases where the right arises under agreement between the parties."

I think it will be convenient if section 78, paragraph 2, is made to apply to the cases of tenure-holders and holders of transferable holdings also.

CHAPTER IX.

To prevent a large quantity of ryoti land falling into the hands of landlords by the abandonment of holdings, and to remedy the malpractice which now exists, the provisions relating to abandonment should, I think, be made a little more strict, and the arbitrary power now exercised by landlords should be checked.

If when the right of re-entry accrues the landlords are made to go through certain preliminaries before they can enter on the holdings, I think that the danger apprehended may to a certain extent be removed.

In the case of surrender the tenant is required to give notice to the landlord through the court, and the land will be taken as surrendered after a certain time prescribed. So in the case of abandonment, the landlord before taking a certain piece of land as abandoned may be required to notify the fact of abandonment to the court, have a notice served on the tenant through the court, and then after a certain time to be fixed re-enter or settle the holding with others.

By this the exercise of arbitrary power on the part of landlords may be checked, and the number of cases of abandonment may be made far less than it is under the existing law.

CHAPTER XII

Under the existing law waste lands lying within a zemindari do come under the head of private lands of zemindars.

CHAPTER XIII.

The law of distraint is a powerful instrument of oppression in the hands of landlords. In practice it has been found that whenever the benefit of this law is availed of by landlords many an act of oppression and many a malpractice are carried on under the authority of this law.

The right of distraint, however, is exercised by landlords in exceptional cases only. This law therefore, although said to be the only sure and inexpensive process for the collection of rents is not availed of by the landlords ordinarily. If statistics are taken from the mofussil courts, it will appear that there are districts in which this method is not at all adopted by landlords for the speedy realization of rent. If in any district there be cases of distraint, the number will be found to be insignificant in comparison with the number of suits instituted for rent. Practically therefore this law has no application. The landlords can and do generally manage without it, and if so, I do not think that the landlords would lose any thing if this law is not retained in the Bill.

Attachment before judgment may serve the purpose, and if this process is adopted instead of distraint, it can protect landlords against any loss that they might apprehend at the hands of designing tenants.

The courts find great difficulty in applying this law in practice. In practice it has been found that in exceptional cases only, *i.e.*, at the time when the ryots turn refractory, that this procedure is adopted by landlords, and that not for the purpose of realizing rent, but for the purpose of ruining the ryots who turn refractory. Now the landlords know it well that as by this process the ryots are ruined and their crops go for nothing, they adopt this as a means of ruining the ryots, and not as a speedy means of realizing rent. The ryots are driven to the

necessity of bringing suits for damages, but they find it very difficult to prove the real facts by evidence.

This coercive measure, therefore, in whatever form it is framed, instead of being considered as a means for realization of rent, is known as a powerful engine of oppression and annoyance in the hands of landlords. If this law is at all retained in the Bill, to prevent it being abused, I think that some provision to safeguard it is necessary, and that it should be placed under certain restrictions. Without this the free exercise of the right is sure to increase litigation and put the helpless ryots into great hardship and inconvenience. Whatever be the procedure laid down it is sure to work evil, if the free exercise of the right is allowed to landlords. From my own personal experience I know that under cover of this law the landlords commit the most daring acts of oppression with impunity, and that the poor and helpless ryots do not get sufficient relief in court.

It is true that in the case "of an improvident peasantry a remedy against the crop is a more humane process than a remedy against the land," but it is true in theory only—not in practice. In practice this remedy has been found to be the most inhuman and oppressive, and no provision in the law can make it better if the relation which now exists between the land-owning classes and the ryots does not undergo any change.

Now the relations between the land-owning classes and the ryots are not of a cordial description, and in this state of things, in whatever form the law is framed, the measure is not to work well without producing some degree of hardship upon the poor ryots.

CHAPTER XIV.

Now, in practice, if a landlord institutes 20 separate suits for rent against 20 tenants residing in the same village, the suits, though instituted separately, are, by consent of the parties, tried together. The evidence taken in one case is by consent admitted as evidence in all, and one judgment governs them all.

If, therefore, the landlords are permitted to institute a collective suit against any number of tenants belonging to one village, it will only embody into law what in practice the courts now do by consent of the parties. Section 28 of the Procedure Code does in a manner support this sort of procedure, and if collective suits are allowed, they can most conveniently be tried in the same way as contribution suits are now tried under the Procedure Code.

With the plaint, the collection papers, particularly the counterfoils of receipts, are to be filed to prove the jama and the arrears due.

Even under the existing procedure the plea of non-service of summons is not very common. To make, however, the service more sure, I beg to suggest the following:—

The summons to be served in the same way as it is now done, with this modification that if the summons cannot be handed over direct to the tenant or his agent, the peon should, in addition to what he now does, bring the signatures of three substantial persons residing in the neighbourhood in attestation of the service having been made on the spot.

If the suit be a simple suit for rent fixed for final disposal, the procedure will be that the defendants will not be heard in defence unless they pay into court the amount (if any) which they consider to be due by them to the plaintiffs at the time of such payments.

In enhancement cases and in suits in which issues are to be framed, the procedure cannot be made shorter than that which now exists.

Written statements should, I think, be allowed in cases like these.

In such suits the defendants are not to pay into court any sum unless their liability is finally ascertained by the court in their presence.

After the suits are disposed of, the decrees will be drawn up in the same form as they are now drawn up in contribution suits.

The certificate procedure cannot be adopted, because in the case of ordinary landlords no liability can be properly ascertained without evidence being gone into in the presence of the tenants, but the case is otherwise when the estates are under the Court of Wards and managed by responsible officers of Government.

CHAPTER XIX.

Under section 222 of the Bill the co-owners of an estate or tenure are to act collectively or by common agent, but there is no provision in the Bill to meet the cases of co-sharers who under the existing law act separately. The effect of decrees obtained by co-sharers in cases in which they act separately is also not provided for in the Bill.

Suits against agents or the sureties of such agents, which now come within the operation of Rent Law, also find no place in the present Bill.

No. 84, dated Calcutta, the 12th September 1884.

From—BABOO PEARY MOHUN MOOKERJEE, Honorary Joint-Secretary, Central Committee of Landholders of Bengal and Behar,

To—The Secretary to the Government of Bengal, Revenue Department.

I have the honor to acknowledge, by direction of the Executive Committee of the Central Committee of Landholders of Bengal and Behar, the receipt of your letter No. 6T.-R. of 28th May last, and submit herewith in a separate cover notes and comments on the several sections of the revised Bengal Tenancy Bill for submission to His Honor the Lieutenant-Governor.

2. The notes have not yet been adopted by the Central Committee at a meeting, and it is probable that a few slight alterations and additions may be made before they are finally approved; but as His Honor the Lieutenant-Governor is about to close his report, the Executive Committee deem it expedient to submit them in their present form. They have every reason to believe they substantially set forth the opinions of the Central Committee on the provisions of the Bill, and indicate also the views expressed by landholders throughout the province at the numerous meetings held for the purpose of protesting against the provisions of the Bill.

3. In thus submitting before Government detailed criticisms on the Bill, the Committee desire to lay before His Honor their respectful but earnest protest against the general principles which underlie the proposed legislative measure. Into a discussion of those principles they deem it unnecessary to enter at present. They feel they would be treading upon trodden ground and indulging in repetitions if they were to undertake the task again, but justice to themselves and to the important public interests confided to their charge demands that they should place before Government their respectful protest against the enunciation of doctrines of landed rights which are wholly unknown in this country and which essentially militate against both the spirit and the letter of the great code which defines their rights and privileges. It is against the repeated interpretations of the same by the Legislature, by the highest courts of justice, and by some of the highest officers of Government.

4. There has been, the Committee very much regret to say, great delay in the submission of their views on the Bill. Your letter under acknowledgment was received by their late lamented Secretary and mislaid during his last illness, and it was discovered only after his death when search was made for his office papers. The Committee beg to tender their sincere apologies for the unfortunate circumstance.

NOTES ON THE REVISED BENGAL TENANCY BILL.

Section 3, Definition No. 5.—The definition of rent should be altered with a view to provide for cases in which the ryot is deprived of the use and occupation of the land by an act of dispossession committed by a third party—a circumstance which does not legally affect his liability to pay rent. Or it may be that a lease is taken, or an engagement of some kind is made, for the use of land, but afterwards circumstances, not due to any act or neglect of the lessor, might intervene to prevent the lessee from using or occupying the land, such as want of capital to build a hut or to cultivate the land, and in such cases the penalty should rest with the party who fails, and not with him who is deprived of the rightful use of his land by the failure of the defaulter.

Definition No 10.—"Transfer" should not include mortgage; otherwise a mortgagee without possession would have the right of getting his name registered in the zemindar's sherista.

Section 5 (1).—For reasons stated under section 37, the words commencing with "and the persons" should be omitted.

(2) The words "subject to section 37" should be omitted; and the title of successors of those who originally acquired land for the purpose of cultivating it to be themselves called ryots should be qualified by the condition of his holding the land for agricultural purposes. A person who has established a mart or a factory on his land, or who uses it for the purpose of brick-making, would, under this definition, be a ryot if his ancestor came into the possession of the land for the purposes of agriculture.

(4) *and* (5) These clauses would simply tend to create confusion as to the meaning of a "tenure-holder" and a "ryot." The definition of the terms given in clauses (1) and (2) is, subject to the observations made above, clear enough, and is consonant to the use of the terms in ordinary practice. It is essential that there should be a clear line of distinction between the two classes, and no inducement should be given to efface that distinction and to create complications by allowing evidence to be gone into of the existence of the alleged custom or of the area of land in a holding which has been sublet. A tenure is, and must necessarily be, a creation of the proprietor or of a superior tenure-holder; and as a ryoti holding is inferior to the interest of a tenure-holder, it would be an anomaly if a tenure could ever be created by an act of the ryot. These two clauses should therefore be omitted.

Section. 7 (1).—The word "prevailing" should be substituted for the word "customary" in this clause. The word used would not only be unjust to the zemindars but would also lead to vexatious enquiries, which may be easily avoided.

Section 7 (3).—The margin of profits proposed to be given to tenure-holders is very larger—much larger than what the courts have been accustomed to give them. Besides, an enquiry into the particulars mentioned in this clause will simply lead to increase of litigation and introduce considerations, as *e.g.* "risks of collection" which have been hitherto reckoned to be altogether foreign to the enquiry.

Section 9.—Provision for gradual enhancement of rent is altogether incompatible with the very nature of the case. When a landholder is declared entitled to get enhanced rent, he should get it without delay. It would be difficult to determine what considerations should influence the court on the ground of hardship to the tenure-holder. It was very properly remarked by Lord Bramwell that he could not see "what could be taken into account really under such a clause as that." This section should therefore be omitted.

Section 15 (3).—Nothing would be easier for a transferer or transferee of a tenure to allege refusal on the part of the landholder to register the transfer and thus to recover from him a heavy penalty. It is due to the landholder that no suit should lie for the recovery of the penalty until after a notice of application for registration has been served through court.

The Bill is altogether silent with reference to an important point connected with registration of transfers. The number of persons, male and female, owning shares in a tenure or holding is often very large. Should the landholder be bound to register the names of all who shall apply to him for registration? It should be remembered that in suits for arrears of rent he would be bound to sue all persons whose names are on his record, and that a rule for registration of names without any limit of number would indefinitely prolong the trial of rent suits, and increase the costs of litigation.

Section 20 (1).—The decree mentioned in this clause is evidently a decree for arrears of rent due in respect of a tenure, and not any decree for money; the language should be made clear and unequivocal.

Section 20 (3).—As provided in section 15 (3) a corresponding provision for recovery by the landholder of penalty from the transferee for neglecting to register the transfer or succession should be made.

Section 23 (a).—The proposal to give ryots holding at fixed rents or rates of rent the privilege mentioned in (*a*) and (*b*) is fraught with incalculable confusion and mischief. If it were provided that the privileges in question would attach to all ryoti holdings, which are by virtue of registered contracts protected from enhancement or which have been declared so by judicial decision, the matter would have been different; but as it is, who is to judge whether a ryoti holding is or is not held at a fixed rent or fixed rate of rent? In 999 suits for enhancement of rent out of every 1,000 the ryots claim their holdings to be protected under section 4 of the Rent Law. No occupancy ryot would be so unmindful of his own interest as to admit his holding without any sort of struggle to be not protected from enhancement by giving his landlord a right of pre-emption when he wishes to transfer his holding. The effect of the provision under notice would therefore be that, with the exception of that inconsiderable number of holdings which have been judicially declared to be not protected from enhancement, all other holdings will be capable of being freely transferred in spite of the landholder. The landholder will have no pre-emption in such cases. He may of course contest by a suit the validity of such transfers, but to what an alarming position would he be drifted if he were called upon without a moment's notice to prove scores, perhaps hundreds, of holdings to be not protected from enhancement? He will not be allowed his own time to decide when he will sue a ryot for enhancement of rent. He must, without any notice, accept a stranger as his ryot, and also give up for ever his right to enhance the rent of a holding, or institute suits to establish his right to enhance with the inevitable prospect of a defeat.

Section 25.—The rights vested in what are called settled ryots are clear infringements of the rights of landholders and they are as such very objectionable. All the evil effects of these new provisions it is not possible to foresee at once. It is clear that one of the effects of the instantaneous growth of a right of occupancy in a settled ryot in regard to all land let to him would be (*see* section 96) to create great uncertainty of title in ryoti land, and therefore to increase litigation to an alarming extent.

Section 26.—This section gives settled ryots rights much larger than those proposed to be given by the original Bill. In joint Hindoo and Mahomedan families the number of co-sharers, male and female, in a ryoti holding is usually very large, and some of them may be living for years far away from their ancestral homes. The extension of this privilege of a settled ryot to each and every one of them would not only lead to great confusion and conflict of rights to the detriment of the ryots themselves, but it would also be a novel and very objectionable encroachment upon the rights of landholders. Again, clause 6 goes much further than the provision contained in section 96. In proposing that after a ryot has ceased to hold land in a village as a ryot he shall continue to be a settled ryot of a village, the clause involves a clear anomaly. A person cannot cease to be a ryot and be a

ryot at one and the same time. But section 96 does not allow the ryot to return to his holding in every case before the expiration of a year. Even if the ryot abandons his residence after the middle of a year and fails to cultivate, &c., the landlord would have a right to enter or let the holding to another. The following clause is still more objectionable: it would lead to results which it is easy to foresee. A ryot may sue to recover possession of land just before the expiry of the period of two years, and the final determination of a suit so instituted may take years, during which time a new ryot, if a settled ryot of the village, has acquired rights and perhaps spent money in making improvements. The proposal to raise a presumption of occupancy in favour of the ryot in every suit or proceeding involves a novel inroad upon the rights of landholders. Nothing is more easy for a ryot than to prove residence in a village or possession of a land for 12 years, not at a remote period, but immediately before suit, and yet the Bill proposes to raise an unjust presumption and to throw the burden of proving a negative on the landholder.

Section 27 (a).—The word "village" should be more accurately defined with reference to its fiscal constitution. It frequently happens that the geographical boundaries of a village contain the lands of a second and third village belonging to a different estate and owner, or separate and defined parts of a village belong to different estates and owners. The definition of the word here given would therefore give as against a proprietor a right of occupancy and that of a settled ryot to persons who had never before held land in the village or estate belonging to that proprietor. This would be an extension of the right which is neither sanctioned by the Secretary of State nor contemplated by the framers of the Bill. Many villages have so grown up as to have combined into one, bearing in such cases a compound of two or three names, and others may do so; some have grown up into towns of considerable size, whereas the principle on which the provision is justified is that the holdings are contained in the same village or part of a village as is owned by a single proprietor. Clause (b) of the section shows this clearly, but with a different object as objectionable as this.

Section 27 (b.)—Considering the purposes to which the word estate has been used in subsequent sections, the definition of the word here given is very objectionable. The arbitrary meaning opposed to the hitherto prevailing acceptation of the term and to its definition in section 3, attached to the word by this clause will lead to great confusion, while the inroad into proprietary rights which it involves is great. The effect of this section would be that a person who has never held any land under A, but who has held land for 12 years under B—perhaps an enemy of A—will be deemed a settled ryot of A's estate, if at any time subsequent to 1853 the two estates formed, or formed part of a parent estate. Some estates which formerly comprised lands in two or more districts have subsequently to 1853 been partitioned, but on that very ground this section would deem a ryot of a village in Burdwan a settled ryot of village in Hooghly, which is more than 60 miles apart, and which he has very likely never seen in his life. The danger of a theoritical rule conceived in utter ignorance of existing circumstances, could not have been better illustrated. What again would be the effect of the interpretation in question with reference to section 25? It would be simply this, that a person who has held land under a landholder for a few days would acquire a right of occupancy if he had held land for 12 years in a distant estate which once formed a part of the same estate as his. An examination of the nature and origin of estates would show how harmful the proposed definition would be. An estate of the Maharaja of Burdwan is composed of villages scattered in five or six districts. The Bill certainly distorts the views on this point of the Secretary of State, who evidently refers to partitions of estates in future when he remarks "it will be necessary in actual legislation to provide that this right is not forfeited by any sub-division of estates and alteration of village boundaries." The bearing of the law in regard to the sub-divided estates called sikmis or lots created by Government will be even more injurious. One great objection to this section, and the portion of the Bill which depends upon it, is that in reality it seeks to give rights to pyecast ryot at the expense of khodcast ryots.

Section 31 (a).—If a ryot establishes a mart on his land or sets up a *surkee* mill upon it, he will not lose his right to the land, because by such act he does not render the land "unfit for the purposes of the tenancy." This is opposed both to existing law and custom. A ryot should not have it in his power to use the land for other than the purposes for which it was let. Again a ryot may use the land in a manner which does not render it unfit for the purposes of the tenancy, but nevertheless, deteriorates the quality and value of the land. For obvious reasons such deterioration should not be allowed.

Section 31 (d).—In omitting to provide for ejectment for non-payment of rent the Bill takes away a remedy which landholders have not only all along enjoyed, but which is necessary for the recovery of their rents. It would be found on enquiry, if one were made, that in a very small number of cases indeed have the landholders availed themselves of this remedy, and that in a large majority of the cases in which decrees were obtained for ejectment, the lands have been re-let to defaulting ryots after some arrangement for the payment of the arrears have been come to. It is the existence of the remedy which serves as a check to habitual and wilful non-payment of rent, and its absence cannot but give rise to mischief.

Section 31 (f).—This section gives ryots a right of free sale of occupancy holdings. This would be as unjust to the zemindars as it would be ruinous to the ryots. It deprives the

landholder of his right of choosing his own ryots. It requires no great experience of mofussil life to see that the learned Chief Justice is quite right in considering this to be "far from a sentimental grievance." A provision which allows raiyats to thrust upon a landholder as his tenants persons who are his avowed enemies, or who are notorious bad characters, and who would therefore in all likelihood create disaffection and combination among his other raiyats, place obstacles in the collection of rent, commit breaches of the peace, and sow the seeds of discord among a peaceful community, affects most materially the proprietary rights of the landholders.

Nor are the evils apprehended or likely to arise from the working of the law to be confined to the landholder only. The raiyat is for certain to suffer from them even more grievously. Whereas now they have permanent tenures which they cannot be deprived of in any way, except by their own default in paying rent, and their sons and grandsons and successors without limit may inherit, and always remain owners of their ancestral fields, under the new law they will be liable to and practically will soon be reduced to day-labourers, and their fields will pass to middlemen, thus defeating the primary and professed object of Government, namely, to better the condition of the ryots. Our conviction in this respect is firm, formed as it is by our thorough personal experience of the country and the condition of the poorer classes. Nor is this belief unshared by the governing classes. Mr. Ilbert, when introducing the Bill, in adverting to the power of sub-letting, remarked:—"The powers of sub-letting which the Bill recognises may in time lead to a state of things in which the great bulk of the actual cultivators would be not occupancy raiyats but under-raiyats, with but little protection of the law" (page 291). The power of free sale will greatly hasten this consummation. Simple occupancy rights are held by persons who are in a majority of cases very poor, and who have no resources to fall back upon in seasons of agricultural distress. The result of such a rule would be that within a few years the holdings will change hands, a number of middlemen will come into possession of the greater part of the holdings of every village, while the original raiyats themselves, who are believed to be the objects of so much tender solicitude on the part of the Legislature, will be reduced to the condition of day-labourers, or of under-tenants paying rack-rents to their superior holders.

The learned Chief Justice has observed "that to give a poor population like the Bengal raiyats the means of selling or mortgaging their tenures at pleasure is a very certain means of making them improvident. I should have thought that the most effectual way of protecting such people, and preventing them from wasting their substances, would be to secure them a permanent interest in their property, by prohibiting the alienation of it in any shape or way." The truth of these observations have been painfully illustrated in a large number of cases. Whatever may be the custom in some of the eastern districts, the sale of raiyati holdings, even with the consent of the landlord, is very limited in the western districts. It is mostly those holdings in respect to which the right of sale is expressly reserved by a lease that are now and then sold in the western districts; but when the landholder neglects his own interests, or when the proprietor is an infant or a widow, or when by reason of long continued litigation among the different co-sharers of property the management is left entirely in the hands of the local agents, it is then that opportunity is taken by money-lenders, traders, and others to buy up raiyati holdings, not for the purposes of cultivation, but for letting the lands, in most cases to their vendors themselves, at a large profit. The purchasers become middlemen and the original raiyats become korfa or under-tenants with no rights at all, and are placed entirely at the mercy of their superior holders. In the Resolution of His Honour the Lieutenant-Governor on the administration of Sonthal Pergunnahs, dated 21st July 1884, and published in the Supplement to the *Calcutta Gazette* of 23rd July last, His Honour remarks—

"The attempts to restrict the transfer of tenancies by cultivators are stated, however, to have been fruitless. On this point the Deputy Commissioner observes that "the evil has attained such magnitude, and constitutes such a real danger, that nothing short of the extension of the prohibition against transfers prevailing in the Damin-i-Koh to all Sonthal land in the district will now cope with it." An interesting account of the origin of this practice is given by Mr. Oldham in paragraphs 34—44 of his report. Previous to 1878, sales of land by Sonthals, or by mere cultivators, except in one pergunnah of the Rajmehal sub-division, were unknown, the reason being apparently that in the Damin-i-Koh transfers were prohibited, while in other parts the cultivators were either mere tenants-at-will, or, if they had rights, could find no purchasers. In the year above mentioned, however, Mr. Boxwell, the then Deputy Commissioner, reported that sales of this kind were taking the place of borrowing. A report was called for; all the old officers who were consulted questioned the correctness of the statement, though admitting that the raiyat's credit had increased. On this ground interference was deprecated, but in 1881 and 1882 it became known that these sales had largely taken place, and that in many cases the Sonthals were working as labourers on lands on which they had formerly held rights. "All these changes," writes Mr. Oldham, "due to the suddenly enhanced credit, have occurred in the years since 1876, all distinguished not only by good harvest, but by prices most favourable to the producers. In the present season, when credit is wanted, there is none, and in my recent tour through Hendue and Passai, I was followed by crowds clamouring for the restoration of their lands, and complaining that they could get no advances. * * * Were the buyers fellow

tenants, or even proprietors intent on merging tenancies, there would be nothing to be said. But they are not. They are all either Bengali traders and money-lenders from Beerbhoom and Burdwan, or the far more dangerous class—Bhagat traders from Bhojpur. * * * It is impossible to describe their greed for land and their daring in pursuit of it." As a proof of the extent to which these sales have been effected, it is stated in tappa Hendue (about 450 square miles) 10 annas of the Southal lands have been sold, and in pergunnah Passai (about 300 square miles) 12 annas. How much is mortgaged has apparently not been ascertained. The statement of the Deputy Commissioner that in these transactions the purchasers are always Bengali traders or money-lenders from other districts is not borne out by the returns now before the Lieutenant-Governor from the Registration Department. These returns would seem to show that, though a considerable number of the sales have been made to mahajans and traders, in the great majority of cases the purchasers are ryots in the Sonthal Pergunnahs. The figures for 1883-84 are 691 sales to money-lenders and 1,932 to ryots. The purchases of holdings by the zemindars themselves are very few. But whatever the facts may be as to the persons who buy the ryot's tenures, Mr. Rivers Thompson is of opinion that it is of the utmost importance to the civil administration of the Sonthal Pergunnahs that the Sonthalis should retain possession of their lands. The growth of a large class of Sonthali labourers working for interlopers on lands once their own must be checked by every legitimate means as being dangerous to the peace of the country and of benefit only to a few individuals who are actuated in their dealings with the people by mere mercenary motives, and who consequently are the greatest obstacles to the prosperity of the country. The question is, however, one of much difficulty.

* * * * * * * *

The Lieutenant-Governor is therefore not prepared to issue a rule on the subject until the matter has been fully considered in connection with the larger question which has been raised as to the right of transfer of occupancy holdings under the Bengal Tenancy Bill now before the Legislative Council, upon which a final decision will shortly be made.

It is needless to add that small middlemen are worse than useless factors in Indian social economy, and that as a general rule the ryots of large zemindars are much better off than those under small middlemen. The evil would increase a hundred fold if a right of free sale were given to the ryot. If the present law were left untouched in this respect matters would adapt themselves to local conditions and circumstances. The custom which has grown up in some of the eastern districts has nothing pernicious in it. There the holdings are large, cultivation is mostly carried on by hired labour, and the transfer of the holding causes therefore no change for the worse in the condition of the tenant. The lesson given by the Deccan ryots should be a warning to the extension of the right of free sale to other places. "The saleable value of the land greatly increased the credit of the ryot, and encouraged beyond measure the national habit of borrowing, which I have before observed on." Secretary to the Government of India, to the Secretary to the Government of Bombay, dated 29th February 1879.

Section 31 (k).—A provision making right of occupancy heritable like other immovable property is objectionable on many grounds. It would lead to minute divisions and subdivisions of the right to an extent wholly undesirable on all economic grounds. It would create great confusion in matters relating to registration of names and place landholders in great difficulty in suits for recovery of rent by reason of the number of persons, who, as heirs under the Hindoo or Mahomedan law, may claim a share in the land. The provision on this point in the Rent Law of the N.-W. P., 1873, is much more reasonable. Section 9 provides that "no collateral relative of the deceased, who did not then share in the cultivation of his holding, shall be entitled to inherit under this section."

Sections 32-36.—The right of pre-emption proposed to be given to landholders on the sale of occupancy rights is as inappreciable as it would be ineffectual in palliating the wrong done to them by making the right transferable. The right of pre-emption would go for nothing if the ryot chooses to think—it would be preposterous to assume he would do otherwise—that this holding is protected from enhancement and one therefore which under section 23 is not subject to the landlord's right of pre-emption. If the landholder wishes to assert his right of pre-emption, he must go to court prepared to prove the holding liable to enhancement, or that it is a simple occupancy holding, and *that* within six months from the date of sale, gift or bequest. Nothing would be, however, more easy than for the ryot to defeat the landholder's right of pre-emption by keeping the transfer a secret from him for a period of six months, after the lapse of which the landlord would have no right or remedy whatever in respect of the transfer. The case would be much worse if the ryots combine against their landlord at the instigation of a neighbouring and on friendly landholder, and call upon him to exercise his right of pre-emption at once in respect to a large number of holdings. Few landholders in Bengal have the means of meeting such a call. With rare exceptions therefore they will be placed in such a case at the mercy of their ryots. In cases of sales in execution of decrees the Bill does not provide for any service of notice of intended sales upon the landlord, but he is expected to make himself cognizant of all such sales and to bid at the sales—a provision which shows further how worthless is the right of pre-emption proposed to be given to land-

holders. The Bill makes no provision whatever for cases in which one or two of several joint-owners claim jointly or in rivalry to exercise the right of pre-emption in opposition to the wishes of the rest.

Section 37.—The provision contained in this section involves in the first place an inroad upon the rights of landholders. A ryot will have it in his power to convert himself into a tenure-holder, and thus to evade the provisions as to distraint and the landholder's right of pre-emption. The proposals are in the crudest possible state. Great uncertainty will arise by reason of the extent of disability by disease or accident being left as a matter for determination by the court. It is, moreover, indefinite as to whether the converted tenure-holder will lose his right of occupancy as regards the portion of his lands which have not been sub-let, and what rights will accrue to his superior landlord with regard to that portion of the land. Again the dependence of the provision upon the future enactment of a law, of which the vaguest indication has been given in the Bill, will leave the section a dead letter for an indefinite period of time.

Section 41.—The restrictions placed by this section upon enhancement of rent are most arbitrary. In none of the Bills previously framed was the maximum limit reduced to less than double the existing rent, and in none did the minimum currency of the enhanced rent exceed ten years: but this section would limit the maximum enhancement to 25 per cent. of the existing rent and extend the minimum currency to fifteen years.

Section 42.—When any land comes to the khas possession of the landholder, it is usually let to some one of his ryots. It is in rare cases that a stranger comes to rent the land, or the landholder has the inclination to let it to one whose antecedents are unknown to him. For all practical purposes therefore the landholder's right to let will be materially restricted even in respect to land which we have been accustomed to regard as land over which he has absolute control. He would not be able to rent the land at a higher rent than what was previously paid for it, unless by a registered contract approved by the registering officer, who should see not merely that the contract rent is not more than what the law allows, but also to satisfy himself "that it is fair and equitable, and that the ryot in entering into it acts as a free agent." The climax of the evil is reached in cases in which the landholder lets out land which has come to his possession by virtue of the right of pre-emption. Payment of the highest price available for the land does not give him an iota of right in excess of that restricted right he would have in respect of land which has come to his possession by relinquishment, forfeiture or death.

Section 43.—The changes proposed to be made on the grounds on which a landlord may sue for enhancement of rent will make matters much worse than at present. The introduction of the words "staple food crops" will place additional difficulties in the way of the landholder, and make enhancement of rent dependent on what the Local Government or of the Board of Revenue may choose to call staple crops. Again, in proposing that the landlord shall not be entitled to increased rent on the ground of improvement of the productive powers of the land, except on proof that such improvement was effected by the landlord or by fluvial action, the Bill circumscribes the ground on which landholders have been hitherto considered entitled to claim enhancement of rent. There is no reason why the landholder should be deprived of the benefit of all improvements not effected by the agency or at the expense of the raiyats. It is a proposal which strikes at the root of their proprietary title.

Section 44.—The arbitrary limit which this section imposes on enhancement of rent is wholly uncalled for. If a ryoti rent is below the prevailing rate of rent, it should on all equitable grounds be raised to the limit of that rate. It is difficult to understand why under such circumstances the rent should not be enhanced to more than 8 annas in the rupee.

Sections 45 to 47.—The rules in restriction of enhancement of rent contained in these sections are new and wholly unwarranted. They will simply introduce greater complications than at present in investigations relating to enhancement of rent and make the trial of enhancement suits much more expensive both to the landholder and the ryot. The infringement of the rights of landholders which these sections involve are great, and in this respect the revised Bill does them much greater injustice than any of the previous Bills.

Section 49.—When a landholder gets a decree for enhancement of rent, it is on the ground that he is entitled to it by reason of the increase in the productive powers of the land, or of a rise in the value of produce as determined by an examination of the produce or prices of a number of preceding years. The decree is for what the ryot has been withholding from the zemindar. It is not the case of a poor debtor who is unable to meet the creditor's demand, unless the court allows him to pay the creditor by instalments. The provision for gradual enhancement is therefore unjust and uncalled for. Again, section 169 gives the court a discretion to fix the date from which a decree for enhancement shall take effect. The two provisions taken together will give the courts a power to render any decree of enhancement abortive. Progressive rents are necessary only with regard to waste and jungle lands, which cannot be cultivated all at once.

Section 53.—Payment of rent in kind is a method of payment which saves the ryot the trouble and expense of taking his produce to the market, and of contesting the zemindar's claim for enhancement of rent, while it saves the latter the trouble and expense of periodically asserting and proving his claim to enhanced rent. It is a self-regulating system which adjusts

itself to the variations in the price of produce, and one therefore which is best fitted to give to each of the interested parties his just rights without the interference of laws and courts, and is on that account eminently deserving of the support and fostering care of Government. To use the words of a Government settlement officer "it gives the landlord a fair profit in any improvement he may make; the rents are self-adjusting; the tenant is not driven into debt to meet a fixed demand: if he borrows he borrows from his landlord—a less exacting creditor than the village banker; a feeling of mutual inter-dependence and self-interest is created between landlord and tenant; the former is more than a mere rent-collector—his own prosperity depends on that of the cultivator."

The ultimate loss to the zemindars, if such commutation were allowed, would be in other respects very heavy. After the rent has been commuted into money-rent, the ryot need only relinquish the holding, and he or his neighbours would be able to compel the landholder to re-let the land at what the court will consider to be a fair and equitable rent. Payments in kind also secure to poor landholders their requisite supply of food-grain for consumption throughout the year, and it would be a source of great inconvenience and hardship to them if the ryot be allowed to change them into money-rent at his pleasure. It should, moreover, be recollected that it is in respect of lands, which are more than ordinarily subject to the risks of cultivation, and which the ryots do not venture to take at a fixed annual money-rent, that rent is paid in kind. Our legislators should think twice before they recommend a change which may ultimately injure those most for whose benefit they now wish it. It should also be borne in mind that in the two districts of Behar where bhowly rent obtains to a large extent, the cultivation of land is carried on on the co-operative system. Both in Patna and Gya the cultivation of land mainly depends on the landholder. It is with his money that embankments must be raised and maintained, and it is with his money that *pynes* or water-courses must be cut and kept clear before the land can be cultivated. The ryots are altogether powerless to execute and maintain these works, and any measure which would throw the entire responsibility of cultivation on them would be their ruin.

Sections 55-61.—In the face of the great anxiety expressed by the Secretary of State that the principle which allows no right of occupancy to accrue except by possession for twelve years should not be abandoned, and his emphatic declaration that he attached great importance to it, this chapter proposes to give ryots who have admittedly no right of occupancy as good a right of occupancy as that created by Act X of 1859, if not one much more damaging to the landholder. The rent of such a ryot cannot be raised at the will and pleasure of the landholder; he cannot be ejected, except for breach of a condition of a written contract; his rent cannot be enhanced without a notice having been previously served upon him and a decree having been obtained against him; and the measure of enhancement must be determined by court. These are rights much greater than what an occupancy ryot enjoys at present. The whole of this chapter trenches most injuriously on the rights of landholders.

Sections 62 and 63.—These rules relating to under-ryots are altogether new. It is not difficult to foresee that the operation of these rules will bring on great confusion regarding the rights of under-ryots of different grades.

Section 64 (2).—This rule of presumption has placed the zemindars at a great disadvantage, and they have complained of it most bitterly. Sir Richard Garth truly observes that "this section has undoubtedly operated very unjustly against the landholders;" and further on: "But in the case of rent it might well be that for 20 years no ground of enhancing it had ever occurred; or from the fact of the landlord being a minor, or female, or over-lenient with his tenants, any opportunity for enhancement might not have been taken advantage of, and in such cases it would be hard to presume against the landlord that because the rent had not been enhanced for 20 years, it has been fixed from the time of the Permanent Settlement." The experience of the last 24 years has shewn that in 95 per cent. of suits for enhancement of rent, landlords were unable to rebut the presumption thus raised, and how could they? Those who have come into possession of estates and taluks by purchases at sales for arrears of revenue, or rent, or in execution of decrees, did not get a scrap of paper belonging to the former proprietors, while those who purchased at private sales were in no better plight, considering the great difficulty of preserving from white-ants and other causes of destruction, massive collections of papers of a period more than 30 or 40 years old. It is impossible therefore for landholders to adduce evidence, except in rare cases, to rebut the presumption, and it was this consideration which induced Mr. Reynolds to suggest an amendment to the effect that no such presumption should be raised unless the ryot succeeded in proving uniform payment from 1839, *i.e.*, 20 years before the date of the passing of Act X of 1859, which for the first time enacted the rule. The observations made by Mr. Reynolds in support of the change are unexceptionable. "Allowing all due weight to the arguments of the Commission, it is to be remembered," he said, "that the presumption was first introduced by Act X of 1859, and that it was then necessary for the tenant to prove a uniform rate from 1839. It is now only necessary to prove such uniform payment from 1861. As there is reason to think that rent receipts have been much more regularly given and much more carefully preserved during the last 20 years than during the 20 years which preceded them, it seems to follow that the lapse of time has made it more and more easy to raise the presumption, and more and more difficult to rebut it. Nor can it be denied that auction purchasers labour under a special grievance in this matter. If it be said that they may be expected to regulate their bids accordingly, it may be replied that it is

not for the public interest that estates should sell below their value on the ground that the circumstances of the sale facilitate the advancement of fraudulent claims by the tenant." It behoves the Legislature to enquire how very easy it is for ryots with the aid and connivance of former talukdars and their gomastas to produce rent receipts shewing uniform payment for 20 years. The injustice of the rule of presumption is clear from the fact that Government with all its prestige and resources wish to keep clear of it in respect of temporarily-settled estates. The exception which section 20 of the Bill makes with reference to such estates proves beyond all manner of doubt the necessity of a change of the law for the behoof of the landholders. The remarks made by Mr. Reynolds on this head are conclusive. He says: "The exception in the case of tenures in an estate not permanently settled is stigmatized by Baboo Joykissen Mookerjee as an invidious distinction which shews the injustice perpetrated on the holders of permanently-settled estates. A little consideration will shew that the exception is perfectly reasonable."

Section 64 (3).—The money value of rent in kind varies in different years with the price of agricultural produce. Payments in kind cannot therefore be reckoned as uniform payments of rent. The effect of this section would therefore be to extend the rule of presumption to cases where there has admittedly been no uniform payment of rent. This would be most objectionable. It would in that case be in the power of every ryot to prevent enhancement of rent on the ground of a rise in the value of produce which payments in kind secure to the landholder.

Section 67.—Such a variety of objections have lately been taken in the trial of rent suits as to the instalments by which rent is payable, and so many capricious decisions have been passed on the subject, that some simple rule on the subject has become very desirable; instead of that, however, the Bill would make matters worse. In the case of tenure-holders the Bill would give free scope in the first instance to the terms of any agreement between the parties, then to custom, and lastly to such rules as may be framed on the subject by the Government. In the case of a large majority of the ryots, *viz.*, the occupancy ryots, the Bill provides that the number of instalments should on no account exceed four. It is a fact borne out by the Regulations that Government revenue was formerly collected in monthly instalments subject to a penalty of 25 per cent. for default. By the custom of the country the rents of ryots are even now collected by monthly instalments, and all the leases evidencing creation of tenures, putni and other, contain stipulations for monthly payments. A reduction of the number of kists would therefore be unjust to the zemindars and tenure-holders. Mr. Reynolds' Bill effected a compromise in the matter which was acceptable to all. He proposed in his Bill to fix only four instalments, the date of each of which was timed just one month before the dates on which the four instalments of Government revenue are payable. A definite rule like this would be much simpler and more conducive to peace and harmony than a procedure which is sure to cause useless trouble and expense to suitors.

Section 68.—The proviso to this section is new, and it proposes a mode of payment of rent which is wholly unjustifiable. A postal money-order does not state anything beyond the amount and the names of the sender and payee. How is the landlord to ascertain for what year the rent is paid, whether it includes the cesses and interest, and for which holding the rent is paid, supposing the sender to have more than one holding in his possession?

Section 69.—This section ignores a long-established practice. It offers a direct incentive to arrears accumulating, so that after the lapse of the statutory period of three years the ryot may wash himself clean of all liability to arrears. On the other hand it compels the landholder to resort to the civil court for every default, without shewing any consideration to his tenant. In fact it is a premium on hardheartedness and discount on mercy. A zemindar should unquestionably have the right of crediting payments of rent to the account of arrears, if there be any, and the ryot should have no right to demand that it should be credited to a particular year and instalment if the rent of previous years be in arrears. The rule in question, being opposed to the established practice, should be omitted.

Section 70.—In providing for receipts for rent by the landlord, the Bill evidently means receipts by his authorised agents. It would be well, however, if the meaning be made clear. The amount of rent and the amount of arrears would be shewn in the annual account. Why, then, require them to be repeated every time the rent would be paid? It should be also borne in mind that in the case of *utbandi* and some other tenures the annual rent payable on account of a land is not determined till at the close of the year, when the land is measured and the crop on it valued. If the introduction of any change be at all desirable, the Legislature should see whether the *kat-chita* system may not be introduced for the purpose of evidencing payments of rents. It has several considerations to recommend it. But whatever the form of the receipt that might be adopted, it is necessary in the interests of both the parties that the counterfoil of each receipt should be signed by the ryot.

Sections 73-76.—A ryot is at present allowed to deposit rent in court on his verified statement to the effect that the landholder's agent has refused to receive the amount tendered to him, and that the amount is all that is due by the ryot up to the date of deposit. Nothing can be more reasonable than this provision. The Bill, however, proposes changes in the matter of deposit of rent which are unjust to the landholders and quite uncalled for by the circumstances of the case. It proposes to allow deposits of rent to be made if the ryot has

144

reason to believe (without an actual tender) that his rent would not be accepted; or if he is unable to obtain a joint receipt from all the co-sharers of a property, or if he entertains a *bonâ fide* doubt as to who is entitled to receive the rent. The Bill would therefore make the ryot the judge of his landlord's title and of his inmost intentions. It would give the ryot power to convert the office of the Collector or such other officer as may be appointed in this behalf into his landlord's kutchery, and to compel his landlord to bring an expensive suit to establish his title against any person of the street whom the ryot may choose to think has a rival title in the property. The proposition is so opposed to all recognised principles of law, and so dangerous in its effects, that in providing for interpleader suits by stake-holders the Code of Civil Procedure has expressly excluded (section 474) tenants from the category of persons who, as stake-holders, may compel rival claimants to interplead in a suit in court. The immediate effect of this would be to empower the officer to assume the functions of a civil court and adjudicate in an informal but quite effective manner regarding rights to one's property on the issue of a few rupees, and put the actual possessor out of possession on the alleged right of third parties. The Bill, moreover, would give a ryot much greater rights than what the Procedure Code gives to any other stake-holder. It would save the ryot from the expenses of a suit, but allow him to compel his landlord to plunge into an expensive and in most cases fruitless litigation. Provisions like these are calculated simply to breed ill-feeling, create animosity, harass both the interested parties, and give rise to endless litigation.

The provision for the service of notice on landholders is anything but satisfactory. In most cases no personal notice would be served, and the landholder, however poor he may be,—and the great bulk of them are poor,—is expected to have an agent always present at all the revenue offices of the district to inform himself of the fact of deposit by any ryot from the notification required to be affixed at the revenue office. The provision for payment of the amount deposited is equally objectionable. The revenue officer may pay the amount to any person he thinks entitled to get it, and then the party aggrieved may recover the amount by a regular suit. In matters like these in which the rights of parties are not involved, and in which legislation may go a great way to foster good feeling between the parties, a provision which will unnecessarily set class against class is wholly unwarrantable. The present law relating to deposit of rent is about as good as a law can be. If a time be fixed within which notice of deposit should be served on the landholder, and if a provision be made for the transmission of the money by a postal money-order to the landholder, all the improvement that it needs will have been made. The party depositing should be made responsible for due service of notice to the party or parties who are believed to be entitled to the money.

Section 79.—The introduction of evidence of usage for determining rates of interest on arrears of rent would prove simply harassing to the parties, and the proposal that interest shall not run until after the expiration of a year is anything but just. The present law on the subject is equitable, and should be retained.

Section 85.—Both Sir G. Campbell and Major Baring classed some so-called impositions under the head of abwabs or illegal cesses which are no abwabs at all. The salamies, for instance, which a landholder gets from a ryot for making excavations and taking earth for making bricks, for hewing trees, for excavating fish-ponds, &c., are not impositions in any sense of the term, but consideration money for special privileges which he is entitled to exact on every equitable ground. These acts of the ryot deteriorate the letting value of the land, and are therefore such as landlords are lawfully entitled to receive compensation for. Such salami or compensation landholders have in several cases recovered by suits in court. Indeed, the words *abwab* and *mathut* used in the section would not have covered them at all but from the fact of some such payments being made annually or at recurring periods, or so long as the special advantages are enjoyed, and because the concluding part of the section declares all additions to the actual rent to be illegal, and the next section imposes a heavy penalty. It cannot and should not be the intention of Government to prohibit special charges for special benefits; and it is necessary therefore that the term abwab should be clearly defined, and exceptions should be expressly made with regard to such compensatory charges. In several places the imposition of abwabs has taken the place and superseded the necessity of enhancement of rent. It is in fact a moral adjustment of rent in consequence of the increased value of produce, and is in that light not so objectionable as it is supposed to be. In many cases it is only a rate added to rent at so much per rupee, and distinguished from the previous rent by a special designation. It is unquestionable that ryots agree to pay these cesses much more readily than enhanced rent. The cry against them arose at a time when it was necessary for fiscal purposes to ascertain the actual collections of the landholders, and is simply meaningless at the present moment. Nay, the prejudice against these moderate increments to rent prevent their being consolidated into *neat* sums which would be so much the more convenient to discuss about in courts of justice. The only other remark which need be made with reference to this subject is that our legislators are evidently ignorant of the fact that what is called the mathut is a village fund raised by ryots for their own behoof, and not a fund raised by the landholder for his own benefit. The fund is made up of small contributions from all the ryots of a village, and is spent under the direction of the Punchayet or Committee of Mundles of the village in Churruck or other poojahs, in paying annual perquisites to the police, in village festivities, &c.

Sections 87-94.—The power which these sections give to ryots not having a right of occupancy of building houses and out-offices on the land without the permission of their landlords,

of compelling their landlords to make improvements, and of making the improvements themselves on default of their landlords, is inconsistent with the very notion of a tenancy. The provisions for the award of compensation for improvements made by ryots are altogether foreign to this country. Improvements are rarely made by ryots. Nothing is more true than what fell from His Excellency the Viceroy on this subject in the course of the debate on the Central Provinces Tenancy Bill. All these provisions should therefore be omitted. These sections provide for the award of compensation to ryots for improvements made by them. In most cases the amount of outlay would be more than repaid by the advantages which the ryots would enjoy by reason of such improvements, and it would in such cases be unreasonable to give them any compensation for exhausted improvements. The limitation prescribed in this respect by the Rent Commission was an equitable one. They suggested that no compensation should be awarded after a certain number of years from the making of the improvement.

Section 96.—This section provides that a ryot must cease to hold land for the full period of one year before his title to the land expires. In the meantime the land will remain fallow, and the landholder will have no security whatever for his rent. Very often pyecast ryots who wish to relinquish their holdings simply absent themselves during the cultivating season, and such absence is reckoned as an act of relinquishment without a regular petition to that effect. It would not be at all unreasonable if it were held that a ryot's title would cease by his absenting himself from the village up to the end of the cultivating season without making any provision for the payment of the rent payable by him. By the Central Provinces Act an absence of 30 days operates to extinguish the ryot's title.

Section 100.—This section provides for cases in which a ryot occupying a land refuses to attend the measurement and point out the boundaries, but the Bill takes no notice whatever of the important class of cases provided for by the present law, in which the landholder, usually a new purchaser, is unable to ascertain the names of the ryots or persons who are in possession of particular holdings in his estate. In such cases a landholder is placed in a situation which entitles him to as much help from a public officer as in any other. It is a situation which purchasers of estates and tenures at auction sales are frequently placed in. The Bill should provide for such cases as well as impose penalties for determined attempts on the part of the ryots to thwart the Collector's attempt at a measurement of the land, as provided for by section 10 of Act VI of 1862 B.C.

Sections 102-109.—A provision which gives the owner of a minute fractional share in a property or a single ryot the right of applying to the District Judge for taking it out of the hands of the proprietors thereof and placing it in charge of a joint-manager would be productive of very great mischief. Such an interference with the rights of private property can be justified only on the ground of public good, which certainly does not mean that if certain tenants of a locality who happen to be opposed to their landlord in questions of private property, and it is only in exceptional cases, as when mismanagement of the zemindar interfered with the well-being of third parties, that is, parties other than landlord or tenant, that a District Judge should be empowered to appoint such a manager, but a provision empowering him to do it whenever a dozen ryots choose to allege that such a course would lead to public convenience, or the owner of $\frac{1}{16}$th share represents that it would conduce to his benefit, would be a most unwarrantable and officious piece of legislative interference with private property. The most objectionable feature of the law is the power it virtually gives to the Judge to adjudicate questions concerning possession in an indirect manner and without due precaution. The proviso attached to the section is intended to serve as a safeguard, but as in all disputes of the kind the real contention will be about possession, either the law must fail, or the Judge must take up the question of possession in an indirect manner. Much of the objectionable character of this provision would be removed if it were provided that no joint-manager should be appointed, unless the owners of more than half the share of the property apply for the same. While upon this subject it may be mentioned that interference of this kind on the part of Government has not been wholesome in the N.-W. Provinces. There the Government makes the coparceners to elect a hereditary lumbardar, and it is now found that the heirs of this common manager having become numerous, the old state of disorder has revived. In Bengal the separation of shares and partition of estates which prevail will on consideration be found to be the natural and best solution of the difficulty.

Section 110.—For obvious reasons no record of rights should be undertaken in any tract of country on the application of landholders and ryots. The first ground laid down in subsection 2 (*a*) of this section should therefore be omitted. If it were allowed to stand, it would be in the power of the ryots of any village to ruin their landlord by compelling him to meet all at once their claims to fixity of tenures and fixity of rents and such other rights as they might choose to claim.

Sections 123-134.—The first attempt made since 1793 to regulate enhancement of rent by the enactment of definite rules has failed, and it requires no great foresight to see that the elaborate rules laid down in the Bill for the preparation of tables of rates would make matters much worse. It is anything but reasonable to expect public officers wholly ignorant of the conditions of the people, of the nature of the soil, of the different kinds of crops, and of the agricultural capabilities of a village would ever succeed in fixing proper rates of rent for different classes of land. They must err on one side or the other. Did not our judicial officers make confusion worse confounded by decreeing (before they ceased to decree any

rates at all) a variety of rates for the same class of land in a village? The most feasible way of meeting the difficulty appears to be the legal recognition of the indigenous system of the country. Let the preparation of a table of rates for each village be entrusted to a punchayet consisting of a number of mandals on one side and the zemindar's gomashta of the village on the other, and some provision made for cases of difference of opinion. A table or jamabundee so prepared would be more satisfactory to the parties concerned than any table prepared by a public officer, and all the trouble, expense, and loss of time to the detriment of cultivation which it involves would be avoided.

A provision for the payment by zemindars and raiyats of the costs of preparation of a table of rates, including the salaries and portions of salaries of officers employed in the work, is under the circumstances unjust and unwarrantable. A suitor paying high institution and other fees is entitled to have his suit tried and decided, otherwise the salaries of Judges and Moonsiffs may with equal justice be made payable by him in addition to what he pays by way of institution and process fees. The payment of the cost of preparation of tables of rates would not relieve suitors of the costs of suit. After they have paid for the preparation of tables of rates, they would have to pay the costs of suit all the same. Again, after a table of rates has been prepared at an enormous cost, what use will it come to? In the adjudication of suits for enhancement of rent the court is required by section 134 not to rely solely on the table, but to adjudge the rate of enhancement on a variety of considerations. The condition of the land, the changes made in it, the persons by whom the changes were made, and the proportion of cost incurred by each contending party in making the change would have to be enquired into, and latitude should also be given to custom and contract to vary the rates mentioned in the table. The great difficulty which officers would experience in preparing correct tables of rates, the enormous expenditure which the work would entail, the double costs which the procedure would throw on landholders and ryots, and the little practical use the table will come to in suits for enhancement of rent are all considerations against the feasibility of this illjudged measure.

Sections 139-158.—Distraint of crops for the realisation of rents is an indigenous institution of the remotest antiquity. It enables the landholder to collect his rents by the agency of his permanent establishment, without adding in the list to his own expenses, or saddling any cost on the ryot. It prevents the ryots on the other hand from cheating their landlords of their just rents, and in so far acts as a check to fraud and improvidence. If in some cases the power has been abused, the fact is so easy to prove, and the penalties for offences committed in connection with it are so heavy that the law might be left safely to vindicate itself. In Bengal at least, cases of abuse of the power of distraint have been very exceptional. It was the majority of the members of the Rent Commission who, labouring under an error, assumed the institution to be an offset of the English law, and suggested a radical modification of it on purely theoretical grounds. The framers of the present Bill have improved upon the alterations in the law suggested by the Rent Commission, and drafted, under the head of distraint, a number of provisions which not only bear no resemblance to the institution of distraint, and amounts practically to a total abolition of the law of distraint, but actually deprives the landholder of even some of the rights which an ordinary creditor enjoys under the law of the land. Distraint has always been understood to be an act of a landlord as distinguished from attachment, which must be act of a constituted authority. But the Bill provides that if a landholder wishes the crops of a ryot to be distrained for recovery of his rent, he must make an application to court for the purpose; that such an application must contain all the particulars required for plaints, if not more; that it should be signed and verified like a plaint; that the amount of arrears should be proved as in suit for arrears of rent; that the court may then either admit or reject the application; and that, if admitted, an officer of the court would be deputed to distrain the crops. Where, in the first place, is the necessity of laying down all these elaborate provisions when it is open to the landholder to have, like any other plaintiff, the crops of a defaulting ryot attached before judgment under section 483 of the Code of Civil Procedure immediately after bringing a suit for recovery of rent? What facility would the Tenancy Act give the landholder over the ordinary procedure of civil courts when he would have to pay the court fee, adduce evidence, and pay the expenses of attachment all the same? What inducement would there be to the landlord to apply for such an attachment in regard to a poor ryot paying a small rent when the cost of suits and attachment are likely to eat up the whole value of the crops? What would the officer of court attach after all costs have been incurred if the ryot has removed or sold the crops in the meantime, and of what benefit would these provisions be to any ryot who would be thus unnecessarily saddled with a large amount of costs? Consistently with the other provisions under this head the Bill provides for heavy penalties and punishments for certain acts in connection with attachment of crops. But why should any penalties be at all imposed beyond what the ordinary law provides for attachments made by order of the court, by an officer of the court, and after proof to the satisfaction of the court of the justice of the claim?

The primary object of an amendment of the rent law, according to the repeated promise of the Bengal Government, was to provide facilities to landholders for the realisation of rent, and the section under notice deprives them of one important facility they now possess, without supplying them with any substitute whatever.

Section 168.—As regards rent suits, it is a great mistake to suppose that suits for small amounts are of no moment. They form the largest number of suits in the courts, and they are often suits of great importance. In suits in which the amount of rent annually payable by a ryot is in dispute, the High Court has held that no appeal lies at that court, inasmuch as no question of title is involved, though the point adjudicated effects matters which in reality give rise to a contantly recurring cause of action. In such cases an appeal should be allowed in the interests of both parties, and the proposal to make the decision of the first court final in suits of the kind for sums not exceeding Rs. 50 should be abandoned.

Section 169.—This section gives the court a discretion to fix the date from which a decree for enhancement of rent should take effect. The Bill provides for so many and so diverse limitations in the way of enhancement of rent that it would be a matter of great difficulty to a landholder to get enhanced rent. Why unnecessarily increase the difficulty by giving the court an arbitrary discretion which will place an additional obstacle in his way? Were it the policy of Government to prohibit enhancement, the various provisions in question would practically carry it into effect without such policy being openly declared; but as we believe such is not the case, we consider the difficulties thrown in the way of enhancement are, as they would practically make it not worth the while to seek it by reason of the trouble, annoyance, and heavy cost, unsound on economic grounds and unfair towards the landholders, who have the right of protection in common with all other classes of the community.

Section 176.—This section is very objectionable. It is an encroachment on the rights of auction purchasers at sales for arrears of rent which they have all along enjoyed. The effect of item (*e*) would be to deprive the purchaser of the right of avoiding a mookururee or other permanent lease created by the defaulting tenant. Such a provision is opposed to the fundamental principles which regulate sales for arrears of rent, *viz.*, that they restore the tenure to the condition in which it was at the time of creation, and give it to the purchasers free of all encumbrances created by the out-going tenant. Section 66, Act VIII of 1869, provides for the sale of tenures free of all such encumbrances. The proposition is also one which would give rise to fraud and litigation, inasmuch as every defaulting tenant will try to make the best of their incumbency by creating mookururee leases in favour of relatives and dependents.

Section 180.—The provision for the sale of tenures for arrears of rent subject to registered incumbrances in the first place and then if necessary free of such incumbrances would simply increase the costs of litigation which will ultimately fall on the ryot, deter intending purchasers from bidding at sales, lead to inadequate prices being offered for the tenures, and thus cause material injury at every step both to the landholders and the ryot. The sale should always be, as at present, free from all incumbrances.

Section 210.—The provisions against freedom of contract in respect to the accrual and to the incidents of the right of occupancy is indefensible on all grounds, rational and economical. The ryot is a free agent in all other concerns of life. He may sublet his lands at any rent, however small, he may borrow money at a ruinous rate of interest, he may relinquish, mortgage, or sell whenever he pleases, and convert himself into a day-labourer, but he must not consent to forget the acquisition of right of occupancy even in regard to land which he requires for temporary purposes, or to pay enhanced rent to his landlord at a rate which he has not the least disinclination to pay. The ryots are unquestionably a much more intelligent class of men than day-labourers, but although the latter are free to contract away their liberties for service in an unknown land for years, the freedom of the former must be restricted in the opinion of our legislators, in matters in which they are the best judges of their own interests. The result of such a restriction would be that landholders would not come to terms with ryots who will fail to compensate by payment of *salamy*, or otherwise his loss in rent, and let out the land to those who would be able to do so. The poorer portion of the ryots would thus be turned into labourers. It is freedom of contract alone which can rescue them from serfdom. The argument drawn from section 58 of Regulation VIII of 1593 in support of the proposed restriction is at best fallacious. That section required the form only of the potta to be submitted for approval once for all, and let the adjustment of the conditions, terms and details to the parties concerned. Section 56 of that Regulation clearly shows that no sort of restriction whatever was intended to be placed in the way of the contracting parties.

The objections to the restrictions to freedom of contract apply with double force to contract relating to rent which the contracting parties with an eye to their own interests will enter into. Whenever a ryot agrees to pay a certain amount of rent for a plot or plots of land he does so after taking into consideration the situation and capabilities of the land and the profits it or they well fetch him. He is the best judge of his own interests in the matter; he has his remedy in all cases in which the least coercion has been used, and yet this section restricts his rights as a free agent and makes the registering officer the guardian of his interests. But will any amount of legislative precaution prevent the parties from entering into any contract for rent they might agree upon? The futility of such attempts was made abundantly clear by the experience of the usuary laws. The result of such a law would be that honest zemindars would suffer, while those whose exorbitant demands for rent it is intended to limit would be able to carry every thing in their own way.

Sections 194-206, 13, 14, schedule.—The attempt to incorporate in the proposed Act the law relating to putni tenures should be abandoned. These sections should therefore be omitted. The present law on the subject is a masterpiece of legislative wisdom. It has stood the test of experience for more than 60 years, and has always been found to be a complete and satisfactory law on the subject.

Section 226.—The proposal to exempt khas mehals and wards' estates from the operation of the proposed law is anything but reasonable. It is but only fair that the rights of all tenure-holders and ryots should be regulated by one code of laws. Nothing would create a greater confidence in the minds of the people in the justness of an Act defining the rights and obligations of landlords and tenants than the fact that it applies equally to Government as landlord and to private landlords. There is no difference in the position and character of the subordinate agency employed by Government and by private landlords in the collection of rent and management of estates, and yet the State has secured to itself a special and summary procedure for the recovery of rent. In the matter of rights and obligations relating to land, however, the people have a right to expect that there should not be one law for private landlords and another for the strongest and most irresponsible of landholders—the State.

NOTES ON THE REVISED TENANCY BILL, 1884, BY THE EAST BENGAL LANDHOLDERS' ASSOCIATION.

CHAPTER I.

PRELIMINARY.

Section 3, sub-section 1.—The definition of "estate" does not include such revenue-free or lakhiraj lands as are not entered in the general registers of the collectorate. This may not appear to be defective *per se*. But it excludes unregistered lakhirajdars from being "proprietors" (sub-section 2). Then if sub-section 3 of section 5 be taken into consideration with the above definitions, it will be apparent that an unregistered lakhirajdar cannot have a *ryot* as his tenant, nor can a tenant have the rights and privileges of a "ryot," even if he holds lands for the purpose of cultivation, when his immediate landlord is an unregistered lakhirajdar. As an unregistered lakhirajdar is not a proprietor, and as he need not be a tenure-holder, the difficulty arises as to whether a tenant holding land under such a lakhirajdar can have the rights and privileges of ryots, even though he be holding the lands for the purpose of cultivation. It is submitted that the proviso contained in sub-section 3 of section 5, taken in conjunction with the above mentioned definitions of "estate" and "proprietor" will preclude such tenants from enjoying the rights and privileges of ryots.

There is a further objection to the definition of "estate" on similar grounds. It does not include such khas mehals as belong to Government and which are not entered in the Collector's general register as revenue-paying lands.

The proviso to this section again expressly excludes also such Government lands as are entered in the general register of the Collector and thereby curtails the definition of estate as given in clause *c* of sub-section 2 of section 3 of the Land Registration Act, VII of 1876, (B.C.).

The effect of this would be that Government will not be deemed a "proprietor" in respect of such lands, and the tenants holding lands for cultivation under Government will be excluded from the right of acquiring and enjoying the privileges of ryots by reason of the above mentioned provision in sub-section 3 of section 5.

The definition of "proprietor" is defective in other ways also. The word "owing" used in the above definition if meant "to be the owner of" in the common and ordinary acceptation of the word, then it is very doubtful whether the definition in question would include trustees and persons having a life-interest only in the property, as well as *mutwallees* of *wakf* properties, *shebaits* of *debutter* estates, and managers of charitable or religious endowments, and such other persons as proprietors.

The definition of proprietor as given in the Bill prepared by the Rent Commission had the word "owner;" and the use of the word "owning" in its place is certainly no improvement. If the word "proprietor" has been used in the present Bill in the like sense as "owner" has been defined in the English Public Health Act of 1875, to which reference was made by the Hon'ble Mr. Ilbert when he introduced the Bill of 1883 in Council, and which says "owner means the person for the time being receiving the rack-rent of the lands or premises in connection with which the word is used, whether on his own account or as agent or trustee for any other person, or who would so receive the same if such lands or premises were let at rack-rent," then it is submitted that in order to avoid future doubts the definition of proprietor should be made as clear as is the like one in the English Act. On the other hand, the definition in the Rent Commission's Bill clearly included in the category of proprietors not only a person who was a sharer in an estate but also a person who had "*an interest*" in an estate. Under the present definition it is doubtful whether a single individual out of a number of persons who jointly own an estate would be treated as a proprietor even separately.

Again, a person who as owner holds some specific lands in an estate or in any other way possesses an interest in the estate would have been recognised a proprietor under the said old definition. But it is very doubtful whether such a person may be reckoned as such under the present wording of this definition.

Sub-section 7.—The words "one set of conditions" in this sub-section are indefinite, and may raise difficult questions as to whether various parcels of lands constitute one holding or not though let out at different times.

CHAPTER II.

CLASSES OF TENANTS.

Section 4.—In the classification of tenants it appears that tenants holding lands other than arable lands have been purposely excluded. Yet the provision contained in sub-section 5 of section 5 supposes the existence of such tenants, and gives them certain rights and liabilities.

Again, clause *b* of sub-section 4 makes ryots at fixed rent or at a fixed rate of rent a distinct class of tenants. This is against the recognised *ideas* of the country in the matter of classification of tenants. These numerous distinctions and classifications will only complicate the system of the law without any adequate advantage being gained by any side.

Although the definition of tenure-holders as given in the present Bill is an improvement on what is to be found in the preceding one, yet it is not at all precise. The sub-section 4 of section 5 which tries to distinguish a tenure-holder from a ryot instead of removing rather creates difficulties on that head.

The word "primarily" used in the definition of tenure-holders, although put in to cover cases other than those expressly included by the definition, will ultimately raise many difficult questions and make the definition altogether indefinite.

If the definitions of tenure-holder and ryot as given in the present Bill be admittedly faulty they should be set right instead of leaving the matter to be discussed and fought out in every case with *different* results.

If it be difficult for the Legislature to give a better and more precise definition of the two classes of tenants, it would be more difficult for the courts to apply properly such definitions in contested cases.

For reasons stated in these notes with reference to the definitions of estate and proprietor, sub-section 3 of section 5 should be expunged. The retention of this provision will be very injurious to the interests of ryots.

The presumption *provided* by sub-section 5 of section 5 is most objectionable irrespective of the question as to whether such a class of tenants as is mentioned in this sub-section should or should not be classed as a tenure-holder. The provision for such a presumption will be a fruitful source of litigation between the landlords and tenants. It will do nobody any good, but will on the contrary create more indefiniteness in the status of the tenants. It will further create many anomalies. Some tenants holding more than 100 bighas of land will remain ryots. Some having the same quantity of land will be promoted to the position of tenure-holders on account of having sublet a part of their holdings, while others having the same quantity of land may remain tenants even after having sublet the whole of their holding as the presumption is of a rebuttable nature.

How the presumption may be rebutted it is not easy to determine.

The principles enunciated in sub-section 4 of section 5 for distinguishing a tenant from a tenure-holder will not be of much use. Evidence as to the nature of the right of tenancy as originally acquired will generally be very meagre. Enquiry on this head will generally be unsatisfactory from the nature of things.

This sub-section is objectionable also on other grounds. It indirectly gives authority not only to non-occupancy ryots to sublet their lands, but even to tenants who are not ryots to do the same. Although the present Bill does not intend to give rights of occupancy to tenants holding only pasture and such other lands, yet there is just a chance left for such a tenant to convert himself into a tenure-holder, and thus secure a position above an occupancy ryot if he can obtain a holding of more than 100 bighas and then sublet the whole or a part of this holding.

The creation of a new class of tenure-holders from out of tenants holding more than 100 bighas will be productive of great mischief. It will bring in a state of things wholly unknown in the country and without any advantage being secured to the zemindar: it will encroach upon his rights and privileges.

In short, the presumption is not at all a fair one. It gives an undue advantage even to ryots who have no rights of occupancy and to other tenants who have so long been recognized as tenants-at-will.

Section 11 of the Rent Commissioners' Bill had embodied a most objectionable provision, by which a new class of tenure-holders were created for the country, and though that provision was left out in the Bill of 1883, yet the present Bill again indirectly reproduced it only in a modified though not in a less objectionable form.

CHAPTER III.

ENHANCEMENT OF RENT.

Sections 6 to 22. Tenure-holders.—There is a class of tenure-holders to be found in some parts of East Bengal whose tenures are of a peculiar nature. From time to time various permanently-settled estates were put to sale for arrears of revenue and purchased by Government. When the Government took possession of these estates it found that there were some tenure-holders in the mehal whose tenures did not date so far back as the permanent settlement, but had been created subsequent to that date. In some cases Government collected the rents of the mehal under khas management for some time, and then having made surveys and assessments let out the lands to the tenure-holders for a definite term at a jumma far above their original rent. The jumma put upon these tenures was generally based upon the gross assets, making an allowance of Rs. 10 per cent. as collection charges and Rs. 10 per cent. as malikana to the tenure-holders. In other cases the tenure-holders were never dispossessed, but settlement was made with them on the above principle after survey and assessment. These settlements were renewed from time to time, though not at rents adjusted at the time of the first settlement. Subsequently these khas mehals were sold by Government at public auction and were purchased by persons other than the tenure-holders. These purchasers evicted or tried to evict the aforesaid tenure-holders. The litigation that followed these acts or attempts has generally been decided in favour of the tenure-holder. The High Court has generally held that these tenure-holders have by the abovementioned indulgence of the Government got a status in the mehal, and that though they could have been altogether ousted by the Government as auction purchaser at a revenue sale, yet, they having been retained in possession or subsequently put into possession of their tenures at an enhanced rent, their tenures have not been avoided altogether, but that they have permanent tenures with variable rents. When the Government made settlement with these tenure-holders it did not make any contract as to the principle on which their rents were to be assessed in future; it simply made arrangements for a definite term which were to come to an end after the determination of the prescribed period. There have also been cases in which no allowance was made to tenure-holders expressly by the name of *malikana*. In both these classes of cases difficult questions often arise as to the rate of rent payable by them to the subsequent purchasers of the mehal, and as to the rate to which their rents are liable to enhancement. Formerly section 8 of Regulation V of 1812, now repealed, which provided the allowance of 10 per cent. as profit to such tenure-holders together with a reasonable allowance for collection charges covered the cases of such tenure-holders. The existing law has no definite provision bearing on such cases. At the present time the courts generally decree enhancement to the full extent allowing the tenure-holders collection charges at the rate allowed by Government as also the extra allowance received either as malikana or by any other name.

It is submitted that the present Bill does not make any definite provision to cover such cases, but leaves the law in the same indefinite state that it has been in since the repeal of the above-mentioned Regulation V of 1812. When distinct provision is intended to be made in the present Bill to cover all possible cases of enhancement in respect of all classes of tenures, it is submitted that clear provisions like those in Regulation V of 1812 should be enacted so as to cover all conceivable cases. It is very doubtful whether section 7 of the present Bill will properly and adequately meet such an object. The word customary used in section 7 will be a fruitful source of great dificulty to the landlord. The same difficulties that have to be met with and surmounted in proving a custom will stare the landlord in the face when a customary rate will have to be proved.

Sub-section 3 of section 7—Should fix a maximum limit of profit that may be allowed to tenure-holders. The maximum limit of profit at 30 per cent. under sub-section 3 of section 21 of the Bill of 1883 was rather hard on the landlord. Clause *c* of sub-section 3 of section 7, which requires the courts to regard the "risks of collection" to be incurred by the tenure-holders, adds only an item of indefiniteness with regard to the adjustment of their rents. Such vague expressions are productive of no good, but of contentions most difficult to be satisfactorily dealt with. When the landlords cannot expect to claim any indulgence with respect to the stringent provisions of the sunset law, even when the source of their income is stopped either by flood or famine, or by drought or agrarian disturbance, when no considerations are made by Government towards them on the ground of "risk of collection," although admittedly no facilities have yet been given to the landlords to collect their rents, why then should such considerations be shewn to mere middlemen who are neither *bonâ fide* cultivators nor proprietors of land.

Sub-section 4 is not based on fair principle. "Fair and equitable rent" in such a case is an indefinite expression. In the cases contemplated by this sub-section, the rent to be calculated should be the rent payable by ordinary or at most occupancy ryots to a tenure-holder for similar lands with similar advantages in the vicinity. Sections 8, 9, and 10, which limit enhancement to double the amount of the rent previously paid, vesting the court with a discretion to allow a period of five years for the full fruition, by yearly instalments to be settled by the court, of an enhancement decree, and further imposes a period of ten years as the shortest interval between any two consecutive suits for enhancement, are very objectionable as general propositions meant to govern all cases and all classes of tenure-holders. Why these

middlemen tenants should have these indulgences is not very clear. These restrictions on enhancement, even if they can be defended with some show of reason and fairness in the case of occupancy ryots, can hardly be defended when applied to the cases of tenure-holders. The tenure-holders as a rule collect the rent from their tenants and make a profit out of these collections. Nobody grudges to allow them to have that profit, but why should they be allowed to retain by way of right an extra sum, simply because the landlord did not keep their rent always running in the highest level attainable. Why should the landlord suffer because he allowed the tenure-holder to hold over for some time at a vey low rate of rent? There is no hardship in the case of these tenure-holders at all, if they are asked to pay up the landlords' just share after full allowance is made for their share of the profit. Why then should there be a gradual increase in their case? As these provisions restricting the limit of enhancement of tenure-holder's rent have been embodied in the sections relating to the enhancement of the rent of occupancy ryots, with these differences only that the latter restrictions are more stringent, it is submitted that the remarks that will be made under those sections against the general principle of these limitations may be taken into consideration in deciding the justness or otherwise of the restrictions imposed by these sections on the enhancement of rent of the tenure-holders. At least an exception should be provided to sections 8, 9, and 10 in the case of such tenure-holders as have been mentioned above, and also in the case of those that hold their tenures under a contract which allows them only a prescribed percentage on the gross collections. In the case of such tenure-holders it would be most unjust to curtail the right of the landlord to the full assessment simply because he has been very indulgent and neglected to trouble the tenure-holders every now and then by insisting rigorously on his strict legal rights. No such exception is asked to be made in favour of persons whom the Bill will directly convert into tenure-holders or who just stand a chance of an elevation to that class under the gradual operation of the Bill when passed into law.

There is nothing objectionable in section 11 when applied to these tenures, which are recognized at the present day as permanent and transferable. But if the Legislature means to classify tenants who hold more than 100 bighas of any kind of land for any purpose, and who have been subletting the whole or a part of those lands as tenure-holders and promote other classes of tenants to these grades, it is submitted that then the provision contained in this section relating to the general power of sale, gift, and mortgage given to all permanent tenure-holders is most objectionable.

Again, tenures which are only heritable, but not transferable, are rare in the country. There are also very old tenures which, by the conditions of the contract creating them, are not transferable. Even these tenures are made transferable by one sweeping provision contained in this section 11, and the condition of non-transferability which was embodied in the contract, say, even 20 years before this Bill was made, is swept away and made illegal by section 12.

The unfairness of these provisions is apparent. If the landlord knew that he would not be able to make such a contract to protect himself, very likely he would not have created such a tenure at all. To make such conditions in a pre-existent contract null and void, and to take the landlords by surprise and to cut off the reversion of the tenure to the landlord on failure of heirs, by allowing the last owner to transfer the tenure against the implied or even the express conditions of contract creating it, can hardly be said to be just. It is not unknown that when at the time of the creation of a tenure heritability only is given or a restriction is imposed on its transferability, the landlord forsakes a part of the bonus which he would otherwise be entitled to in full. Under such circumstances to secure to the middleman a right for which he did not pay, and which the landlord would not have yielded even for a consideration, must be said to be subversive of his proprietary right.

The phrase "a condition *consistent* with the provisions of this Act" used in section 12 will be productive of misapprehension and dispute. The Bill does not and cannot give an outline of the principles which may guide the court to determine what conditions are *consistent* with its provisions. It is doubtful whether such conditions as are not forbidden by the Bill can be said to be *consistent* with its provisions.

Again, the wording of the section is such that the onus of shewing that the particular condition solemnly agreed upon by the tenant is consistent with the provisions of the Bill appears to be very unfairly thrown upon the landlord. The just and fair principle is that where an admitted condition is sought to be nullified as being illegal the party who wants to get over such condition on such plea should substantiate it.

As to the consistency or otherwise of a condition with the provisions of the Bill, take the following instance:—A Hindu landlord creates a tenure in favour of a Mahomedan tenant, and it is provided that no cow should be killed or allowed to be killed on the land, and that in case of a breach of this condition the tenure-holder will be liable to ejectment. What is to be said of such a condition? Is it consistent with the provisions of the Bill?

With reference to the above it would be proper to consider the effect of clause *a* of section 31 and clause *b* of section 58. Both these clauses allow the tenant to use the land as he pleases, provided he does not by any of his acts render it unfit for the purposes of the tenancy. Now, slaughtering cows can never be said to render the land

unfit for tenancy; rather on the contrary it may be argued that the blood and bones of the animal, acting as manure on the soil, would improve the land, and render it the more fitted for cultivation. But such an act would not only be most repugnant to the feelings of a Hindu landlord, but would, according to the tenets of his religion, make him liable to expiation. And yet such a condition may not be deemed to be *consistent* with the provisions of the Bill.

To curtail the freedom of contracts and the means of enforcing them by such vague expressions, leaving the parties to grope in the dark, is any thing but fair. The general principles of the law of contract and the valuable rights and privileges of the landlord should not be hedged and fettered in the anxiety to protect the interests of the tenants.

The above remarks apply with greater force in the case of ryots, and therefore it is submitted that the phrase above alluded to, which has been used in section 12 as well as in clause *b* of section 23, clause ii of section 31, and clause *b* of section 58, may be so modified as to make a condition void only when the same is expressly forbidden by the provisions of the Bill.

While on the subject of private contracts, it is proper to state here once for all that the present Bill has in many places embodied provisions which, giving retrospective effect to its stringent clauses, sets at naught legal and fair contracts of long standing. This is not only unjust and unfair in general, but is in the present case fraught with positive mischief, in that the application of new provisions with a retrospective effect to the old state of things would deprive the landlord of his vested legal rights and privileges without substituting any adequate return for their loss.

REGISTRATION OF TRANSFER OF TENURES.

Sections 15 to 22.—Although there seems to be no substantive provisions for the registration of the transfer of shares of tenures in the above sections, yet section 21 assumes the registration of the transfer of shares, and thereby indirectly authorises their registration. But at the same time there is no saving clause as is found in Act VIII of 1869, under which the zemindar is not bound to recognise any division of the rent of a tenure. This omission is likely to create difficulties and raise vexed questions. On the other hand, section 18 may be said to provide indirectly that when a transfer even of a share is registered the landlord will have to look to the transferee only for the due payment of the rent of that share. It is very likely that the present Bill means only to compel the landlord to recognise the transfer of the entire tenure as far as the rent question is concerned. But without the abovementioned saving clause there remains room for a doubt. And in these matters the room for a doubt is always objectionable. While on the subject of the registration of transfer of tenures, it may not be out of place to make some observation on the definition of the word transfer. The word "transfer" in the present Bill is defined to *include* sale, mortgage, and gift. But transfer as defined in the Transfer of Property Act has a wider meaning: it includes under that Act also leases. The present definition is therefore ambiguous. It does not limit the meaning to sale, mortgage, and gift only, and therefore may be said not to exclude leases. It would be better to do away altogether with the word transfer from the Bill, or to define it so that it may only mean sale—voluntary or by court and gift. If it be allowed to include also mortgage, then the use of the word in the sections relating to registration of tenures would not only compel the landlord to register even simple mortgages of tenures, but may also create other difficulties.

CHAPTER IV.

This chapter is very objectionable. It creates a new class of tenure-holders never recognised or even known in the country. Failure on the part of the landlord to rebut the presumption raised in favour of the ryot under sub-section 2 of section 64, will elevate an occupancy ryot into a tenure-holder, and thus secure to him certain distinct rights and privileges not enjoyed by other occupancy ryots. This elevation will go on from time to time to the detriment of the interests of the landlord. What is the principle on which this promotion is based, and what are the advantages to be gained by the inauguration of this system and classification it is not easy to determine. On the contrary, the ryot at a fixed rent or rate of rent will be a peculiar class of tenant He will be a tenure-holder with respect to the transfer of and succession to the tenure, but remain a ryot in all other respects, such as the realisation of his rent. His holding or tenure will not be liable to summary sale, and his crops will be liable to distraint. The landlord will not be entitled to claim a right of pre-emption in the case of transfer of his tenure. Nor will the provision contained in section 35 relating to gifts apply to his tenure. Thus the status of this class of tenants will be a *bundle* of inconsistencies, and create unnecessary complications and invidious distinctions between two classes of occupancy ryots, which it would be hard for the ryots themselves for whose benefit all these pains are being taken to understand.

Section 23, clause b.—This clause gives an undue advantage to ryots at a fixed rent or rate of rent. It has been stated that they are merely a class of occupancy ryots. Why then should they not also be liable to ejectment for reasons mentioned in clause *i* of section 31. If these ryots are allowed to render the lands they hold unfit for the purposes of the tenancy without any penalty for doing so it would not only encourage them to do so to the detriment

of the landlord's interest in the land, but will also tempt all other ryots who have done such acts to set up false claims of holding at fixed rent. The exemption of this class of ryots from suffering the consequences of their unlawful and mischievous acts cannot be defended on any ground whatsoever.

CHAPTER V.

OCCUPANCY RYOTS.

General.

Sections 24 to 31.—The provisions relating to the "settled ryots" are most objectionable. They make very many novel encroachments on the rights of the landlord. It has often been said by high authorities that Act X of 1859 by creating a class of tenants under the name of occupancy ryots had invaded the then recognised rights of the landlord. Yet compared with these provisions it can safely be said that the injury done by Act X of 1859 is indeed very small.

(1) Under Act X of 1859 the payment of rent was a condition inseparable from the acquisition and maintenance of the right of occupancy. The present provisions ignore altogether the necessity of such a condition.

(2) Act X of 1859 gave right only to the specific land which had been held or cultivated by the ryot for a period of 12 years continuously. The "settled ryot" of the present Bill is required only to have held some land or other in a particular village or estate for a period of 12 years, and then he is endowed with a peculiar attribute on account of which he is capable of creating a right of occupancy in his favour in every piece of land that he may get hold of, either of the same village or of the same estate.

(3) Section 7 of Act X of 1859 saved the terms of written contract against the acquisition of a right of occupancy. But section 210 of the present Bill by one sweeping clause (clause *a*) nullifies all such contracts, *i.e.*, makes all conditions against the acquisition of a right of occupancy void *ab initio*.

(4) Under Act X of 1859 it was the ryot who had to prove that he had acquired a right of occupancy. The present Bill, on the contrary, creates a presumption in favour of the ryot which it will be for the landlord to rebut, or in other words it will be for the landlord to prove in every case in which any ryot may choose to set up the plea of an occupancy right that the ryot has *not* been holding the land in question or any part of it for 12 years. This is undoubtedly a preposterous proposition. It sets all the principles of the law of evidence at naught, imposes the burden of proving a negative on the shoulders of the landlord, and allows the person who alone is capable of shewing most satisfactorily how he has made up the required 12 years to remain at ease, and requires the landlord who may be an auction-purchaser of a few years' standing, and therefore quite incapable of hunting out the antecedents of a particular tenant before he came in contact with him, to ferret out and disclose the past life and career of his opponent tenant. The failure to prove such an absurd item is inevitable, and the result is that every ryot who may choose to call himself a settled ryot is likely to succeed in obtaining a verdict in his favour.

It is not easy to determine what object will be gained by this half-and-half measure, how it will "tend to simplify litigation," and what are the state of things in the Lower Provinces, the existence of which warrants such a presumption. The presumption does not cover the whole ground of the acquisition of the right of occupancy as enunciated in the present Bill. The plea of the ryot may be that although he has not held the specific plot or any part of it continuously for a period of 12 years, yet he is a settled ryot of the village or the estate the land of which may be in dispute. In such a case the presumption is worse than useless.

(5) Act X of 1859 never allowed a ryot who had left his holding without making any arrangement for the payment of its rent to come back and claim the same at any time within three years. The courts from the time he left the same have aways looked upon such acts as amounting to abandonment or relinquishment of the holding. The present Bill not only allows the ryot to get back into possession even in such cases (section 96) and not only causes a substantial loss to the landlord in such cases, but allows the ryot even to count the period of his absence to make up his 12 years.

The following illustrations will shew the justness of the above remarks:—

First, take the case of a settled ryot On the 5th of Baisakh a settled ryot of village A, but who resides on the land of a different landlord in village B, leaves his holding in village A, and ceases to cultivate the same. For almost one year, *i.e.*, down to the close of the current agricultural year, the landlord *must* wait and see what the ryot means to do. He cannot enter upon the land and let it out to anybody else or bring it into cultivation himself. Then arises the question whether the landlord can even after the close of the current agricultural year let out the land in the above case. Section 96 says that the landlord can do it when the ryot has voluntarily abandoned his *residence* and has ceased to cultivate the land. In the case supposed the ryot has not abandoned his residence at all. He is still residing where he was. How can section 96 then cover such a case. Taking for granted that this section covers also such a case, the landlord was to go to the expense and trouble of publishing the notice required

by sub-section 2 of section 96, which there is nobody to repay. The year's rent also is wellnigh lost. If the former ryot had cultivated the land, the rent might have been realised by distraint. After the abandonment and after it has been let out to another ryot the holding cannot be sold for the arrears.

Take another case.

The landlord enters upon the land and lets it to a third party and publishes the required notice. The ryot does not stir for about two years, and then files suit. The landlord having been very much annoyed contests the suit, and more than a year and very likely two years elapse before the case is finally decided. So by the time the ryot recovers possession by executing the decree five years elapse from the time the ryot left. The landlord has to remain in suspense for three years and then give up the land and the costs of the suit in the bargain.

Then, again, the fact that the ryot will be able to recover back his land if he should sue within three years, and the chance of any new ryot who might be inducted on the land and who would surely be dragged into the suit against the landlord, losing his labour and costs of cultivation, not to mention costs of suit, will all conspire to keep away all right-thinking people from taking lease of and cultivating such lands, and thus the landlord will be left either to cultivate the land himself or to let it remain fallow and without any return.

As section 96 has been referred to it would not be out of place to state here that sub-section 7 of section 26 coupled with section 96 will give even to the non-occupation ryot a right to remain away from the land for a year and a half before he makes up his mind as to whether he should sue to regain the possession of the land, which he under no circumstances should be allowed to do. Why should he even be allowed to sue for possession after having voluntarily abandoned his holding, and why should the landlord wait for one year for his return without having been paid the rent in advance; and lastly, why should he be allowed to count this period of his *neglect* to till the soil to complete his 12 years? Can there be anything more unjust and one-sided than this provision, which brings about a result so disastrous to the landlord.

Restrictions on Transfer.

So much has been said on this question from time to time by representatives of both the landlords and the ryots' interest that the question may be said to have been argued threadbare, and any attempt to put forward any further argument would be a mere repetition. Yet as some of the restrictions proposed by the Bill of 1883 have been omitted from the present Bill, it has become necessary to say something with regard to matters of detail.

Under the original Bill of 1883 the landlord had a right to buy up at a fair price the holding even in the case of bequest, when the bequest was in favour of a person other than the legal heir (section 55 of the Bill of 1883).

Again, when the ryot made a gift of his holding in favour of a person other than the landlord, the landlord had a right under the Bill of 1883 (section 54) to buy it up if he chose at a price to be fixed by the court.

These restrictions have now been done away with. It is submitted that it would be most prejudicial to the interests of the landlord if no right be reserved to him to annul, transfer or buy up holding in cases of bequests or gifts made to persons other than heirs.

The effect of allowing transfer of occupancy rights to take place unreservedly has been so disastrous in the Sonthal Pergunnahs (*vide* Resolution on the Administration of Civil Justice in the Sonthal Pergunnahs. *Calcutta Gazette,* July 23, 1884) that no argument is needed to be able to see clearly what the consequences would be in Bengal were such practice legalized.

Section 35 of the present Bill reproduces with some minor alterations the provision of section 54 of the original Bill regarding the service of notice on the landlord after registration of the deed of gift. Of what use will this provision be if there remain no clause under which the landlord may object and claim to annul the gift or purchase the holding. The meaning and object of sub-section 4 of section 35 is not clear.

Restrictions on Subletting.

Section 37—Of the present Bill has been framed with the object of restraining (1) non-agricultural classes from buying up occupancy rights; and (2) subletting by occupancy ryots. In order to gain the above object it has been provided that when an occupancy ryot will sublet more than half of his holding he will be converted into a tenure-holder. Not a tenure-holder out and out, but one having some incidents of a tenure proper attached to his tenure.

The first question is whether the status of a tenure-holder is so disadvantageous as to deter the non-agriculturist from buying up any occupancy holding, and secondly to deter the occupancy ryot from subletting.

The only disadvantage threatened is the liability of the holding to summary sale for arrears. Now, is it a disadvantage at all? If it is, all permanent tenures are liable to this disadvantage. An ostensible advantage of a summary sale to the landlord is the

saving of a little time. An occupancy right is made saleable under a decree of a court. In case it is converted into a tenure it will be liable to be sold on a simple petition. But if the tenure-holder contests the demand the Collector will have to raise issues and decide the question as much as the civil court would have to do in case of a suit (section 198). The ryot has an advantage under the summary procedure. He is not harassed so much under this as by a civil suit. His cost is much less than what he has to incur in the civil court. And lastly, whether he defends or not, the ryot is liable to the landlord for much less cost in case of sale by the Collector than in the case of a sale by the civil court. All these are advantages to be gained by the ryot in case of a summary sale. What then is the fear which is likely to deter non-agriculturists from buying occupancy rights or occupancy ryots from subletting.

The proposed conversion of a ryot into a tenure-holder is advantageous to him in more ways than one:—

(1) He is no longer liable to distraint for rent.

(2) He can be ejected for having used the land in a manner which renders it unfit for the purposes of the tenancy.

(3) He can transfer his tenure without having to take the trouble of observing the preliminaries provided by section 82, and without any apprehension of any claim to pre-emption by the landlord which enhances the value of his tenure as it ensures security to the purchaser. From the above it will be clearly seen that section 37, instead of gaining the object and acting as a deterrent, will on the contrary encourage subletting and purchases by non-agriculturists which the Bill proposes to guard against.

Instead of such imaginary checks if it were simply provided that in cases of subletting by occupancy ryots after March 1883, the portion so sublet was to revert to the landlord, and that the relationship of landlord and tenant between such sublessee and his lessor should cease, except in the cases mentioned in clause (a) of section 37, it should stop subletting altogether and effectually check non-agriculturists from buying up occupancy rights.

That the restriction provided by section 37 will be altogether an unworkable provision is apparent on the face of it. It is provided that the holding is to be deemed to be a tenure when it has been so registered under any Act that may be passed for the purpose. Now the question will be whose duty or interest it will be to have the tenure registered. The landlord does not gain anything by the conversion; rather loses some of his rights. Hence it will never be his interest to have it registered. If the conversion be deemed disadvantageous by the ryot he would not do it. The sublessee no doubt has a prospective hope of acquiring a right of occupancy. But being under the influence of the occupancy ryot and standing the chance of being ejected and troubled by his lessor he would not before the perfection of his title take the trouble and bear the expense of having his lessor converted into a tenure-holder.

Then, again, various questions will arise in order to determine whether the ryot had sublet more than half of his holding. An occupancy ryot may have more than one holding. He may be taking lands from time to time and subletting parts of the same. So that the quantity of land which represented more than half the holding in any given year might be under that proportion the next year. In this way cases might arise where it would be a matter of considerable difficulty to determine the period of time at which the line ought to be drawn to find out whether more than half the holding has been sublet.

Enhancement of Rent—Sections 39 to 50.

Often and often have hopes been held out to the landlords that facilities would be given them to enhance the rent of the occupancy ryots to a fair and equitable rate, which, on account of the unworkable nature of the provisions of Act X of 1859, they (the landlords) have not been able to obtain. When the Hon'ble Mr. Ilbert introduced the first Bill in Council, he said "that the two main objects at which our legislation should aim are :—*First*, to give reasonable security to the tenant in the occupation and enjoyment of his land; and *secondly*, to give reasonable facilities to the landlord for the settlement and recovery of his rent."

He also said, in another place, that "Act X of 1859 was a useful and beneficial Act, and if, as must be admitted, its working has not been successful on some important points, this failure is attributable, not to any defect in the fundamental principles on which the Act was based, but mainly to defects of language and expression."

The Select Committee, to whom the Bill, introduced by the Hon'ble Mr. Ilbert, was referred, and who have taken the trouble of revising and re-casting it in the present shape, also say in paragraph 31 of their report—"As regards enhancement by suit, our object has been, while laying down rules which will be substantially just to both landlords and tenants, to devise a system which would avoid those elaborate and difficult enquiries, the necessity for which has made the present enhancement law an almost useless instrument in the hands of landlords."

Now, the questions for consideration are :—

First—Are the provisions contained in the present Bill substantially just, both to landlords and tenants?

Secondly—Has the present Bill removed those obstacles and difficulties in the way of getting a fair and equitable rent in any way, or to any extent?

The present Bill deals with the subject of enhancement under two heads, *viz.*, *First*, enhancement by private contract; *second*, enhancement by suit.

The provision relating to the enhancement of rent by private contract is a novel one, and has no place in the existing law. No such suggestion appears to have been made in the Bill prepared by the Rent Commission. It is submitted that neither the wisdom nor the policy of this addition is at all clear. The ryot having a right of occupancy has a fixed tenure. It is admitted, both by the Bengal Government and the Government of India, that the ryots having rights of occupancy are far more numerous than those that have it not. It cannot be denied that the position of the ryots having occupancy rights is far more strong at the present day than it was even ten years before. Nor can it be denied that such ryots know and understand the privileges and security of their position better at the present day than they did even ten years before. Nor can anybody ignore the fact that the occupancy ryot of to-day wields greater powers to check the landlord's arbitrary acts than the latter has to harass the tenants. Nor does it admit of any doubt that the ryot of the present time is far more able than the landlord to dictate and enforce his own terms. The agrarian disturbances that have of late taken place in different parts of East Bengal show most unmistakeably the spirit of combination which the ryots possess, and which they can and do use with impunity against their landlords. Under such circumstances, can it for a moment be conceived that the ryots will be imposed upon or forced to enter into any contract by undue influence? Why, then, these limitations as are provided by section 41 of the Bill upon private contracts? Terms of a private contract are based upon and determined by the nature of the supply and demand or the likelihood or otherwise of losing something more in any other way than what is given up by private contract. No such circumstances exist in the case of an occupancy ryot. He cannot be ousted, even if he would not accept the terms proposed by his landlord. His rent cannot be enhanced, theoretically, even to anything beyond what is fair and equitable. After subjecting oneself to the delay, trouble, vexation, and costs of a lengthy litigation, involving "elaborate and difficult enquiries," one has only one to hundred chances of coming out successful in an enhancement case. What reason has the occupancy ryot to fear the landlord; what the risk or necessity which is likely to induce the occupancy ryot to enter into a contract so prejudicial to his interest as requiring the active intervention of the Legislature to impose so many restrictions and limitations upon private contract for the settlement of rent? An occupancy ryot is not more helpless than a *purdanaseen* lady, nor is he a more likely person to be unduly influenced than is a debtor by his creditor. Nor does he stand the chance of being more deceived than a ward, who has lately arrived at majority, by his guardian. Nor is his relationship with his landlord one of greater active confidence than that of a client to his attorney. And yet the general principles of the law of contract are deemed sufficiently protective of the interests of such and like other persons. And, then, why cannot a ryot be left to avoid and annul any agreement which he may have entered into under mistake, misrepresentation, fraud, coercion, or undue influence? And, then, why should there be a special legislation in favour of occupancy ryots as a class imposing stringent restrictions and limitations upon private contracts? The restrictions and limitations put upon private contracts at enhanced rates will undoubtedly drive the landlord to a suit for enhancement, even in cases where he might have amicably settled the matter out of Court. Take the instance of enhancement on the ground of prevailing rates. Even with the restrictions made by the Bill on this head, the landlord is entitled to get 50 per cent. increase by a suit. But by a private contract he cannot get more than 25 per cent. Take another instance: the landlord is entitled to the full benefit of the increase caused by improvements made at his cost or agency, and a Court of Law will decree him that. But if he were to make a private contract relating to this very matter, he could not secure more than 25 per cent. over the rent previously paid to him. It is, therefore, submitted that such a provision, which necessarily drives the landlord to seek the assistance of the Law Court, because he cannot amicably settle the matter out of it, however much he and his tenant may be desirous of doing it, is a most dangerous provision subversive of all amity and good feeling between the landlord and tenant.

That these restrictions and limitations are altogether onesided, and forged only in the interests of the tenants, and cannot be said to be "substantially just to both landlords and tenants," is evident. That these, instead of facilitating the settlement of rent, will increase litigation and set class against class is also clear. These, in short, will discourage all contracts and bar all private settlement of rent. On the face of the restrictions and limitations imposed upon enhancement by suit, the chance of getting a private settlement of rent at enhanced rates is *nil*. The ryot, knowing full well how matters stand, and counting his chances in a Court of Law, would be the last person to enter into a contract prejudicial to his own interests. If, over and above this difficulty, there be further restrictions and limitations put upon private contracts, what the fate of the landlord will be can be better imagined than described. When a maximum limit is fixed by law regarding anything, it is not possible, except in exceptional cases, to obtain it. The restrictions and limitations imposed upon enhancement by contract will be obnoxious in another way. These will have a tendency to induce the tenants either to

go to Courts to avoid and annul the engagements they may have made, or to dispute their validity, when they may be put forward against them. Thus litigation ruinous to both parties, and the question as to what was the rent before the contract was made, will open a fresh field of enquiry for the Court and a fresh source of trouble for the landlord in these cases. These restrictions will handicap the landlord and curtail his right of property without any adequate advantage being secured to him in any way, and will give an undue preference to the fancied interests of the tenants to the prejudice of the just rights of landlords.

The duty imposed by sub-section 2 of section 41 on the registering officer of "ascertaining that the contract is in accordance with the provisions of the Act is one of the most unworkable and objectionable provisions of the Bill. It presupposes that the registering officer is fully conversant with the details of the Bill, and is also aware of the various customs which have not been abolished by it, and which in many particulars govern the relationship between the landlord and tenant. It entails an enquiry into the state, conditions, and rent of the holding before the contract was made. What time and trouble such an enquiry will cost it is impossible at present even to imagine. Although clause (*c*) of section 54 provides that certain rules will be made for the guidance of officers registering contracts under sections 41 and 42, but it is submitted that the rules, however wisely and definitely drawn out, will scarcely be able to get over the complications which will necessarily arise out of the provisions above mentioned. Much less will they be able to ensure saving of time and trouble.

The revised section is no improvement on the section which it remodels. The Select Committee say that they have expunged the provision by which the registering officer was required to satisfy himself that the contract was fair and equitable, and that now he will have *merely* to satisfy himself that it is in accordance with the provisions of the Act. It is submitted that this change does not, in the least, lessen the work or responsibility of the registering officer. The present provision not only fully covers all that the registering officer would have had to do if the former wording had been retained, but also something more. The present expression is as vague and indefinite as the one expunged. This provision gives the registering officer a final power and authority of deciding the question as to whether a certain condition is or is not in accordance with the provisions of the Bill. Such a power would not even be allowed to the Civil Courts of first instance if the matter were to come judicially before them. Whether the decision of the registering officer on this subject is to have any effect in the Civil Courts, where the whole question may be fully re-opened, is not settled or known. If the Civil Court will have power to enter into the whole question afresh, then what is the good of encumbering the registering officer with these details and such duties. The provision virtually leaves the matter of registration entirely to the discretion or caprice of the registering officer. No provision even for appeals against his decision has been embodied in the Bill.

Section 42 is not only objectionable in the interests of the landlord, but also in the interests of the ryot. The restrictions hereby put to the settlement of rent on new lands taken by the settled ryot will preclude landlords from letting the same to him. And this will not only eventually deteriorate the value of lands, but will also lessen the chances of the settled ryots getting new land, although in great need for the same. If is inexpedient, therefore, to curtail the power of the landlord in letting out such lands by private contract.

ENHANCEMENT OF RENT.

BY SUIT.

Then as to the provisions relating to enhancement by suit, it is submitted that the provisions of the present Bill, though they are more definite in some respects both as regards the grounds and the limits of enhancement than the provisions of the present law, seem to secure this wherever it has been attained, at the landlord's expense. In other respects the provisions of the present Bill are as indefinite as those of the present law. In some cases "elaborate and difficult enquiries" under Act X of 1859 and the present law so reproachfully spoken of remain substantially the same with only a change as to the mode and process of investigation. Clause (*a*) of section 43 is the same as clause (1) of section 18 of Act VIII of 1869 (B. C.). Instead of the words "same class of ryots" the general name of "occupancy ryots" has been used. This is the only improvement by way of definiteness. All other vexed questions which arise and require determination now under clause (1) of the present law will also arise and have to be determined under clause (*a*) of section 43. What is to be deemed the prevailing rate in each particular locality is one of the most difficult of questions. How far the preparation of a table of rates by the revenue officers as provided for by Chapter XI of the Bill would solve the difficulty, and how far it would be fair and equitable to depend upon such table of rates for determining the question in each particular case will be discussed hereafter in its proper place. Suffice it to say here that the difficulty will remain the same, if not knocked on the head arbitrarily by enforcing a strict adherence to the tables prepared, which it would be hardly fair and equitable to do.

The determination of the question as to whether the land the rent of which is sought to

be enhanced is of a similar description and possesses similar advantages with those lands, the rate of rent of which is put forward in evidence for comparison remains encircled with the same difficulties. Hence, as far as this clause is concerned, no facility whatever has been granted to the landlord for the adjustment of his rent.

Clause (2) of the present law for enhancement has been sub-divided into three heads and placed under clauses (*b*), (*c*), and (*d*) of section 43 of the present Bill. Under the existing law the increase in the value of the produce of the land is the most important ground of enhancement, and this is a ground which is susceptible of distinct proof and substantiation. It allows the landlord a reasonable, fair, and equitable share of the profit made by the ryot in each particular piece of land. The elimination of the word 'value' from the present clause and the substitution of the word 'price' for it is no doubt more accurate and definite. In other respects clause (*b*) of section 43, which is put in the place of this portion of clause (2) of the present law is not only no improvement on the existing provision, rather on the contrary it curtails the landlord's right to enhancement and makes it dependent on the rise of the price of *staple food-crops* only. The Select Committee in paragraph 33 of their report say "that the price-lists of staple food-crops are to be taken simply as indicating a general rise or fall in prices, and without any reference to the particular crop grown on the land the rent of which is in dispute; and our intention is that the price-lists should be worked out very much on the principle on which the commutation of tithes according to average prices is worked out in England." It may be that the price of all other crops has a certain relation and bears a certain proportion to the rise or fall in the price of food-crops. But it is not always true that the rise or fall in the price of food-crops regulates the rise or fall in the price of other crops. It is therefore neither safe nor expedient to adjust the rent of lands producing crops other than staple food-crops by the rise or fall in the price of food-crops. Such a provision is likely to act injuriously both in the interests of the landlord as well as of the tenants. The Bill that was framed by the Rent Commissioners as well as the Tenancy Bill of 1883 provided the regulation of rent according to the prices of the staple crops. The present Bill not only ignores the custom of the country as to the adjustment of rent according to the crops grown on the soil, but even makes a new departure from the lines sketched out by those Bills and very unfairly introduces a restriction unknown and unheard of in the country. It very unjustly excludes from consideration the rise in prices of very valuable crops, whose cultivation has thoroughly and generally been established in particular tracts of the country. It indirectly brings all kinds and classes of lands almost to the same level and makes enhancement under this clause to depend not upon the price of crops actually grown on the soil, nor upon the fitness of the lands to grow such valuable crops, but upon the general rise in prices of food grains to be declared staple by certain authorities. There are places which are particularly fitted for and which do grow high-priced crops, and yet if the lands of such places are not to be fairly assessed on the basis which is the only proper one, namely, the rise in prices of such crops, it cannot but be most prejudicial to the interests of the landlord. It has never been denied, but rather on the contrary it has often and often been admitted, that the principles of enhancement as enunciated in Act X of 1859 are just and fair to the landlord as well as the tenant. Why then is that old principle of regulating the rent of the land according to increase in price of the produce of it to be narrowed and limited to the rise in the price of some particular crops? It is submitted that the principle underlying the proposed provision of this clause is not only unfair but also erroneous. If this encroachment on the right of the landlord and the tenant to have their rent adjusted according to the price of the crops sown on the soil has been made on the ground of a supposed facility for determination of the rise in the price of any particular crop, afforded by the preparation of price-lists of staple food-crops, it is submitted that such price-lists can as well be made of all or at best the principal crops that are usually sown in a particular locality, and the question as to the price of which of such principal crops is to be taken into consideration in regulating the rent of any particular plot of land may safely be left to the consideration of the courts in each particular case.

Clause (*c*) of section 43 is also faulty and one-sided. Under the existing law, and so it was under the old, the ryot is liable to enhancement when the productive powers of the land have increased otherwise than by his agency. The provision under this head has been divided into two parts in the present Bill, *viz.*, improvement by or at the expense of the landlord, clause (*c*), and by fluvial action, clause (*d*). The two heads have been made to exhaust, though they really cannot exhaust, the existing provision. These two clauses do not at all touch the case, where the increase in the productive powers has been effected by the joint agency of the landlord and the tenant. That there are numerous cases of this description no one will deny. Not only did the Bill prepared by the Rent Commissioners, but even the Bill of 1883 did provide by sub-section (2) of section 74 and by clause (*b*) of section 75 for such a case and made a fair provision to govern it. That provision, though embodied in a different form in clause (*b*) of section 134 relating to the table of rates, yet does not find a place in the general principles enunciated by section 43. This is objectionable and is prejudicial to the interest of the landlord.

Then again there are, and may be, cases where the productive powers of the land have increased neither by the agency of the landlord, nor by that of the tenant, or by the joint agency of both and not even by fluvial action. Section 43 does not make provision for such

cases. Clause (c) of section 134 partly covers such a case. The existing law covers such a case by the simple qualifying phrase "otherwise than by the agency or at the expense of the ryot." A principle which would cover such a case should find a place in section 43. As an illustration of such a case take the instance of a canal cut by Government. It was not for purposes of irrigation, in which case a tax would have been paid either by the landlord or by the tenant for the use of its water. This canal may however increase the productive powers of the land even without flooding the adjacent places. Why should not the landlord reap the benefit of such improvement equally with the tenant.

Under the existing law the landlord can enhance, where there has been an increase in the value of the produce otherwise than by the agency or at the expense of the ryot. This ground cannot be said to be fully covered by the ground embodied in clause (b) of section 43, *viz.*, a rise in the average prices of staple food-crops. The landlord may establish a market near the tenant's land or may cut a canal or open a way from the tenant's village to the nearest market, and thereby cause an increase in the value of the produce of the specific land without there being any general rise in the average price of the staple food-crops in the market. Such a case cannot also be said to be covered by clause (c). It does not actually increase the productive powers of the land. As it is not only a possible but a likely case, it should have a place in the general principles of enhancement. It is hoped that it will appear from the above that there has not been any improvement made by the present Bill on the existing law as far as the principles of enhancement are concerned, and that the proposed changes are detrimental to the interests of the landlord and in curtailment of his recognised rights. The present Bill has, in short, merely tried to narrow the application of the existing principles and that only in the interests of the ryot.

Section 44, clause (a), is a new provision inconsistent with the custom of the country and the associations of the people. It is unfair in principle and inexpedient in policy. In olden times the prevailing or customary rate was the general standard of enhancement. No limitation as the one proposed by the Bill was placed on enhancement by Act X of 1859, nor since the passing of it. No such restriction was suggested by the Rent Commissioners, nor by the Bill of 1883. The proposed change punishes the landlord for his indulgence towards his ryots. One of his rights is curtailed because he allowed some of his ryots to hold much below the prevailing rate at a time probably when inclemency on the part of the landlord would cause their ruin. If the prevailing rate of rent is at all a ground of enhancement, other circumstances remaining the same, the maximum enhanced rent ought in fairness to be allowed to come up to such rate. In support of this restriction on the old rule of enhancement the Select Committee say that they have not been able to adopt the proposal to limit the maximum enhanced rent to one-fifth of the average annual gross produce in cases of enhancement on the ground of an increase in the productive powers of the land, because it would be almost impossible to ascertain in each instance the average annual gross produce expressed in staple crops, and because weighty objections have also been taken to the principle underlying that proposal. That they have accordingly struck out the provision to the above effect contained in the original Bill. And that as a set-off against this they have increased the stringency of another limitation contained in the original Bill by providing that, when rent is enhanced on the first ground, *i.e.*, clause (a) of section 43, the enhancement shall not amount to more than 8 annas in the rupee (50 per cent.) and that, when it is enhanced on the second or fourth of these grounds under clauses (b) and (d) of section 43, the enhancement shall not amount to more than 4 annas in the rupee (25 per cent.), and by providing that the court shall not in any case decree an enhancement which appears under the circumstances of the case to be unfair and inequitable. Enhancement on the ground of increase of the productive powers of the land has always been found under the old and the existing law to be most unworkable of all the provisions relating to enhancement, and it appears that the Select Committee were fully conscious of the difficulties that lie in the way of enhancement on that ground. But they say "enhancement on this ground when the increase is caused by the landlord's improvement will be facilitated by the system of enquiry and registration provided for in the Bill, but enhancements on the ground of increase of productive powers caused by fluvial action will still be liable to the same difficulty caused by the absence of any proof of the former productive powers of the soil, as has rendered this ground of enhancement futile in the past years."

The onus in an enhancement case is heavily put upon the landlord; the least flaw in the evidence which causes the mind of the judge to waver exonerates the tenant from liability to enhancement. Rarely can a judge be satisfied of the justice of the landlord's claim in such a case. And the difficulties spoken of are the difficulties of the landlord which thus constitute the vantage ground of the tenant. Under such circumstances it is clear that the landlord has very little hope in this direction. As to the facilities of enhancement on the ground of increase of productive powers by the agency of the landlord, which it is supposed the proposed system of enquiry and registration will afford, it is submitted that it is more theoretical than practical and that it will ultimately prove to be of doubtful good, if not altogether delusive. It is hardly fair to impose so many stringent restrictions as an insurance against the excessive flow of good from the proposed system of enquiry and registration, which at best must for some time be regarded as tentative and uncertain, when such restrictions relate to another and altogether different ground of enhancement, *viz.*, the one based upon prevailing rates so long acknowledged to be the most convenient and the

most easily understood ground. If any one of the grounds of enhancement is more feasible than the others it is this ground. The ground based upon the rise in the average price of staple crops, though more definite than the third and fourth grounds, requires such enquiries relating to the past and present prices that it is not likely to prove so easy of ascertainment as is supposed. Under such circumstances to cut down the rate of enhancement according to prevailing rates by way of set-off for the protection of the ryot against any possible apprehension of hardship in case of enhancement on any other ground is most prejudicial to the interests of the landlords. It is against all principle to impose a restriction on a particular right simply on the ground of a bare possibility of any abuse of another and a quite distinct right. In such a case, if any restriction is really necessary, it should be on the exercise of the latter right. As to whether there is any such necessity or not will be discussed hereafter under section 46.

The injustice and unfairness of this restriction will be apparent in the following illustration:—

A holds 10 bighas of land at Re. 1-4 per bigha and pays Rs. 12-8 yearly.

B holds the same quantity of land of a similar description with similar advantages at the rate of 14 annas per bigha and pays Rs. 8-12 yearly.

C holds a like quantity and at the rate of Re. 1-8 and pays Rs. 15 yearly.

All the three are occupancy ryots.

The prepailing rate for such lands held by occupancy ryots is found to be Rs. 2 per bigha. Suits are instituted for enhancement and decreed.

D, E, F, &c., &c., are all occupancy ryots holding similar lands with similar advantages in the vicinity and all of them are paying at the rate of Rs. 20 for 10 bighas. The decree cannot make A pay more than Rs. 18-12 yearly, B more than Rs. 13-2, and C is made to pay Rs. 20.

What is the fault of the landlord in such a case, and why should such an invidious distinction be made between A, B, and C when their rent is fairly and equitably settled by a court of justice and not by a capricious and oppressive landlord?

In the above case B cannot be made to pay even as much as C had been paying.

Then again the difference once made is likely to remain for ever, and whoever by an accident got into possession of a quantity of land at an unusually low rate will reap not only the advantages of the low rate for the time being, but will be entitled to enjoy the benefit of the accident at the commencement of his tenancy in the shape of immunity from a fair and equitable enhancement, whereas others who came on their lands on a high rate of rent will be required to pay higher and higher.

It may be said it would be very hard on B if he were made to pay at once Rs. 20 in the place of Rs. 8-12 annas. But how is it hard? He should be grateful for the *indulgence* that he had for some time. That indulgence should not be a ground of showing him further indulgence at the cost of the landlord.

Clause D is also objectionable in the general form in which it has been put. The rate of rent based upon landlord's improvement should also be taken into consideration even in ascertaining the prevailing rate of rent in cases where the ryot whose rent is sought to be enhanced has derived benefit from improvement. It may be said that in the case supposed the landlord would be able to enhance under clause (*c*). But it is submitted that instead of going over the same question and the elaborate enquiry necessary under section 46 or any other provision that may be substituted in its place, it would be shorter, safer, and more reliable work if the landlord were allowed the option to have the question decided under clause (*a*) of section 43. The expression "with similar advantages" in the clause would cover the case supposed. On the face of clause (*d*) of section 44, no advantage can be taken of the phrase "with similar advantages." Of course it would be prejudicial to the landlord if the restriction embodied under clause (*a*) of section 44 remain intact and the landlord proceed to enhance rent in the aforesaid cases of improvement under clause (*a*) of section 43 instead of under (*c*). For in that case he does not get the benefit of the whole enhancement in those cases where the rent formerly paid is so low that when raised by 50 per cent. it does not come up to the prevailing rate.

Section 54, clause (*b*).—The restriction imposed in the maximum amount of enhancement made on the ground of rise in the average prices by this clause, *viz.*, of 4 annas in the rupee or 25 per cent., is another restriction imposed by way of a set-off.

The unfairness of the principle upon which this has been based has been already stated. Enhancement on the ground of rise in the average prices has been considered by the Select Committee as one which will be the easiest of accomplishment on account of the preparation of authoritative price-lists by the Local Government. How far this will be attended with success remains to be seen. But this stringent limitation has been unjustly put upon it in anticipation of any possible advantage that the landlord might derive from this provision. Clause (*c*) of this section is more than a sufficient check. Why should there be a further check? Why should not the landlord get proportionately? It was once before arranged that

the limit should be double the amount of the former rent; now it is reduced to its one-fourth on no higher ground than as a set-off against a possible danger.

This curtailment is altogether a novel proposition, never broached before, and has no authority for its support either in practice or in theory.

Clause (a) of section 43 gives a very wide discretion to the courts to compare the prices of the five years' rent before the suit with any other five years. These other five years might include years of scarcity when the prices rose abnormally high from accidental causes such as food, drought, or the like; any comparison with the prices of such years will surely be most prejudicial to the interest of the landlord, and yet there is no provision limiting the discretion of the court in this respect.

Then as to the lists periodically published by the authority of the Government, the clause in question makes them conclusive evidence, and yet everybody knows that no great reliance ought to be placed upon those lists. The statistics are gathered in the most slipshod fashion and there is none to check or test them. They are published as obtained. They should not therefore be made conclusive evidence of the rates of current prices for the time being.

Section 46.—The elaborate enquiry required by this section is rendered useless by one indefinite phrase put in sub-clause IV of clause (b) of this section. The consideration of the ability of the land to bear a higher rent leaves the matter in the greatest possible uncertainty, and the conditional nature of the decree as provided by clause (c) leaves an open sore for continual litigation. Where the increase in the productive powers has been caused by the sole agency of the landlord the whole benefit of the increase should go to the landlord. The tenant is not entitled to share the profits to the smallest extent. Clause (a) of section 75 of the original Bill had such a provision. The same should be retained for purposes of definiteness and certainty. The proposal to limit the enhancement to one-fifth of the average annual gross produce in such a case is most unfair and based upon no principle. The increase is merely a return for the advance made. The ryot gets his costs, &c., necessary for utilising the same and he is entitled to nothing more. If any share of the profit obtained by such outlay were to be allowed to the ryot it would at once discourage such improvements. Although the Select Committee did not adopt this proposal, yet they very unfairly made the greatest possible concession by way of compensation for this proposal by imposing stringent restrictions on the other modes of enhancement.

Section 47.—Has two restrictions and provides an enquiry indefinite and unworkable in its nature. With the restriction provided by clause (c) the further limitation under (b) is unfair and unnecessary.

Section 48.—May be allowed to qualify only enhancements under clauses (b) and (d) of section 43. On no account can the question as to whether the rent is fair and equitable arise where the rate to be fixed is the prevailing rate. Again in the case of enhancement on the ground of improvement by the landlords' agency, the landlord is entitled to the whole of the increase, therefore no such question arises. It is to be declared fair and equitable by the Legislature, and therefore no discretion can properly vest in the courts in such cases.

Section 49.—The provision as to progressive enhancement may, from one point of view, appear to be fair; but with other restrictions it becomes most reprehensible and specially so when applied to the cases under clauses (a) and (c) of section 43. In the case of the prevailing rate being high no such concession should be made to the ryot, and in the case of improvement brought about by the landlord no such indulgence can be shown to the ryot except at the expense of the landlord who is entitled to the full increase. If any such occasion were made to the tenant in such cases, then it would be giving him a share of the profits which came into existence otherwise than by his agency. The landlord having paid for the increase is entitled to the whole of it.

Section 50.—Fifteen years' interval is too long a period. If these restrictions are imposed in cases where there has been a private contract with a slight increase, it will check private contracts and draw parties to litigation, a state of things most to be avoided; or it will oblige landlords to exact the last pice from the tenant and to practise the utmost rigour in his dealings with tenants even when they are otherwise disposed to be indulgent. The above observations, it is hoped, will make it clear that the present provisions are in no way improvements on the existing law. The principal difficulties in working out the theory and principle of enhancement remain almost the same. Instead of one set of elaborate and difficult enquiries another set is substituted, and above all the rights of the landlord as enunciated by Act X of 1859 and re-enacted in Act VIII of 1869 are unfairly encroached upon and cut down without any adequate advantages by way of compensation. Novel checks, restrictions, and limitations are imposed upon the principles of enhancement on the plea of simplicity and definiteness, which however might prove wholly delusive.

PRICE-LISTS.

Clause 5, section 52.—The time of 15 days for making an objection to the price-lists prepared by the Collector is very short. At least a month's time should be allowed.

Clause (b), section 54.—The reasons why the price of crops only should not be the index for ascertaining the rent of a holding have been always put forward. It is therefore submitted that the word "food" in this clause should be struck out.

CHAPTER VI.

Non-Occupancy Ryots.

Sections 55-61.—Why should not a non-occupancy ryot be liable to ejectment when the landlord requires the land *bonâ fide* for his own purposes?

Why should the expiration of the term of a lease be a ground of ejectment only in cases where the lease has been registered? Oftentimes ryots are let into lands for a specified term under oral agreements. Why should verbal agreements be ignored altogether and the ryot exempted from ejectment on expiry of the terms of such contracts. If the rate or amount of rent payable by a non-occupancy ryot can be proved in a court by oral evidence, why should not the term of his lease also be allowed to be so proved? The last sentence of clause (*b*) of section 58 does not presuppose the existence of a *written* contract. When the breach of such a condition as under the Bill entitles the landlord to eject the ryot can be contracted for orally, why cannot the term of a lease be allowed to be contracted for likewise? The provision contained in Section 59, that no suit to eject a non-occupancy ryot shall be instituted six months after the expiration of the term of the lease, is very hard and objectionable. Regarding enhancement of the rent of a non-occupancy ryot the adjustment should have been left to competition. Instead of that he is placed by sub-section 9 of section 90 exactly in the same position and allowed the same advantages with an occupancy ryot, and in a better position enjoying greater advantages than a tenure holder enjoys (*see* section 8).

CHAPTER VIII.

Section 64.—The objectionable nature of this presumption has been so clearly shown by high authorities that a discussion of it must necessarily involve a repetition of arguments more or less familiar. If the presumption were prejudicial to the landlord when it was first enacted in Act X of 1859, it would be more so if it were reproduced without any limitation or restriction now in 1884. To keep the twenty years a constant quantity to be calculated backwards from the date of every suit in which a question of the fixity of rent is raised, would give the tenant an undue advantage over his landlord. If the retention of such a presumption is a foregone conclusion, it is submitted that it may be restricted so as not to prejudice auction-purchasers who, having regard to the peculiarity of their position, would be quite incapable of adducing any rebutting evidence to meet the presumption in favour of the tenant. In this class of cases it is desirable that the 20 years should be calculated back from a definite and prescribed point of time. The most unobjectionable point of time would be the date of enactment of Act X of 1859.

Section 66.—This section applies not to ryots but also to permanent tenure-holders. It allows landholders to impose an additional rent in case of increase of the area of a tenure and entitles tenure-holders to claim abatement of rent in case of decrease of area of the tenure caused by diluvion or otherwise It does not make any distinction in this matter between tenure-holders at a fixed rent and those held at a variable rent. So far the landlord and the tenant are both equally dealt with. But coupled with clause (*f*) of section 210, it becomes an unfair and an one-sided provision. Clause (*f*) favours the tenant and looks to his interests only at the expense of the landlord. Section 210 together with section 66 saves all contracts by which the landlord may have agreed not to impose any additional rent for excess lands gained by alluvion or otherwise But it nullifies all contracts by which the tenant may have agreed not to claim any abatement or reduction of rent in case of decrease of area on account of diluvion or from other cause. Is this fair? Why should not there be a mutuality in contracts? Why should one party be bound by a condition when another condition which is the consideration for the other should be declared null and void. In all cases of tenures wherever there is a condition that there is to be no reduction of rent on account of decrease of area, there is always found a similar condition in order to counterbalance the prospective loss of the tenant by which the landlord binds himself not to claim an increase of rent for increase of area. The landlord foregoes the right only in consideration of the covenant made by the tenant that he would not claim a reduction. The two conditions together ensure the same invariable rent to the landlord at all times and under all circumstances. But the present Bill, while holding the landlord liable on the covenant in favour of the tenant, proposes to grant immunity to the tenant for the consequences of the covenant in favour of the landlord. The retrospective effect proposed to be given to these provisions will undo old and legal contracts, and make uncertain and variable rents hitherto known as fixed and invariable. In short, this provision will ruin the landlords. The existing law on the subject cannot be said to be hard upon the tenant. He can, if he chooses, allow the tenure to be sold for arrears of rent, and if the tenure is a losing concern, it will come into the hands of the landlord and relieve the tenant from further loss.

Section 69.—Is also an objectionable provision. No tenant should be allowed to force the landlord to accept rent of a subsequent period keeping the older rent in arrears. It will cause difficulty in the realisation of rent and produce confusion in the landlord's accounts. The declaration of the tenant accompanying any such payment required by this section may be oral, and this will incline unscrupulous landlords as well as tenants to make false statements in this

matter and be productive of dispute and litigation. What particular advantage this provision is intended to secure to the tenant it is not easy to find out.

RECEIPTS AND ACCOUNTS.

However advisable it may be to force landlords to give unequivocal receipts to the tenants and keep proper and correct accounts, to force them to mention in every receipt all the particulars of the tenant's holding and even the quantity of lands held by him, together with the details about Bunker, Julker, and Phulkar, would hamper the collection of rent and make it a costly affair. The penalty for even an accidental omission or mistake is also very great.

And what is the advantage the landlord gains for all the trouble and expense incidental to such a system of collection? None whatever. He cannot realise his rent as the Government does by issuing a certificate. His demands are as much liable to be contested under the present Bill as they are under the existing law. Not so much as a presumption is created in his favour. Why then all these forms, all these pains and penalties?

Deposit of rent, clause (*b*) of section 73, is very vague and indefinite. It allows the tenants to avoid payment of rent to the landlord and deposit the same whenever he chooses. This will lower the landlord's prestige and make the relationships of landlord and tenant more artificial than it is even at present.

There should be some provision in the Bill by which the tenant would be bound to make a verified application on such an occasion. This might operate as a check on tenants inclined to drag their landlords to court, by resorting to it themselves. The words "payable by the tenant and" in sub-section 3 of section 74 may be the cause of creating some ambiguity in the meaning of this sub-section. The sense would be clearer if those words were omitted. The sub-section as it stands might be contended to mean that the receipt will act as a full acquittance for all the rent that may be payable by the tenant down to the period for which the deposit may be made. While on the subject of deposit, it is proper to make here some observations necessary relating to the limitation of suits for arrears of rent where a deposit has been made.

Schedule IV, Part I, Article 2.—Clause (*a*) provides that a suit for the recovery of any arrear of rent down to date of deposit must be brought within six months from date of the *deposit*. Under the existing law such a suit may be brought at any time within six months from date of the *service* of a notice of the deposit on the landlord. This notice is served upon the receipt of the deposit. The present Bill does away with the provision of serving a notice on the landlord in the first instance. At first a notification is provided to be affixed in the office of the officer receiving the deposit Then if no one appears and claims the deposit within 15 days from the date of the aforesaid notification, a notice will have to be served on those who may be deemed entitled to the deposit.

It is clear that the landlord is not at all likely to know of the deposit until a notice has been served on him. The notification in the office is almost useless. There being no time fixed within which the notice is to be served on him, it may be served a very long time after the deposit. This will undoubtedly prejudice the landlord, who may have to contest the fairness and propriety of the deposit. There seems to be no reason for a change in the existing law and for the curtailment of the period of limitation on the subject.

CHAPTER IX.

IMPROVEMENTS.

Regarding the registration of improvements one observation is necessary. The landlord should not be compelled to register improvements effected before the present Bill is made into law. It would be very hard upon the parties if they were to be forced to have such improvements registered, and that within 12 months, as provided by clause (*a*) of sub-section 3 of section 91, after the commencement of the Act.

The abovementioned clause (*a*) taken with clause (*a*) of section 46 of the Bill will virtually preclude enhancement on the ground of improvement made at any time before the Act. The registration of such improvements will open a wide channel for litigation. Instead of imposing such a heavy penalty for non-registration of improvements made before the passing of the Act, the matter may be left optional with the parties—and the clause relating to the limitation for registration of such improvements expunged.

Section 90, taken in conjunction with section 93, will entitle every non-occupancy ryot to build pucca houses and excavate tanks, and enable him to do so without any risk of ejectment. Now-a-days an occupancy ryot cannot do such things except on payment of a salami to the landlord. These sections, if passed into law without any restriction, would not only take away part of his legitimate gains from the landlord without any adequate compensation, but leave him under a prospective liability to a heavy compensation to the ryot for works done against his will in cases where he wishes to eject him on reasonable grounds. This is undoubtedly very hard on the landlord. A non-occupancy ryot should not be allowed such privileges at the expense of the landlord.

SURRENDER AND ABANDONMENT.

Some provision should be made allowing the court to presume surrender in case of dispute; and voluntary abandonment of cultivation for a year, except in certain exceptional cases as provided in clause (a) of section 87, without payment of rent, should be presumed to be a surrender of the right and interest of the ryot in the holding until the contrary is proved.

MEASUREMENTS.

Why should not the landlord be allowed to measure his own lands at his own cost whenever he chooses? Why should he be restricted in doing it for a period of ten years following one measurement? How is he to ascertain any encroachment that may have been made by a tenant on the surrounding waste lands or on the lands of a neighbouring ryot? Why should an auction-purchaser be barred if he chose to measure the lands purchased by him more than two years after his purchase? The restrictions referred to above are most arbitrary and utterly subversive of the landlord's rights. These restrictions are based upon no sound principle or policy and are altogether unwarrantable.

There are various reasons other than those mentioned in clauses (a) and (b) of sub-section 2 of section 9 which necessitate a measurement of lands by the landlord. To limit the landlord's right to measure to those cases only would therefore be very prejudicial to him.

MANAGERS.

The provision relating to Managers will deal a death-blow to the coparcenary estates of the country. It is well-known that the largest portion of the landed interest in the country is held jointly by co-sharers. The present Bill, instead of facilitating the realization of rent by co-sharers, reproduces some provisions of a Regulation almost obsolete and well nigh forgotten and about three quarters of a century old. With so many provisions in the Bill for protection of the ryot's interest, these provisions about the appointment of managers are perfectly unnecessary. These provisions, if re-enacted, will *desest grabi patio* of the landlords of the management of their estates.

Much has been said on this subject from time to time, so instead of entering into the details a humble protest is submitted against the enactment of these provisions.

CHAPTER XI.

TABLES OF RATES.

Sections 123-134.—There will be found so many varieties in the classes of land and in the rates of rent payable for the same even in adjoining localities, not only on account of difference of soil and situation of lands and such other causes, but also on account of the kinds of crops cultivated in the lands and the classes of tenants holding the lands as well as on account of peculiar customs prevailing in different localities relating to the holdings, that it will be almost impossible to prepare one set of tables covering and governing a large area.

The chief advantage proposed to be gained by the preparation of these tables depends upon their general applicability in all classes of cases. In order to obtain that, either some existing differences and distinctions too difficult to be embodied in a general table must be arbitrarily ignored and done away with, at the expense of either the landlord or the tenant, or numerous sets of tables must be prepared at an enormous cost and with great delay. It is not unknown what a long time the butwarra of an estate takes; and at least one of the causes for it is the classification of lands and their assortment by comparison. How much more difficult, dilatory, and expensive the preparation of the proposed tables will be when made applicable to large tracts of the country it is easy to imagine. For the above reasons it is apprehended that the utility of the tables will not be very great; and the making of these conclusive evidence of the rates will be very injurious, when brought to bear upon questions raised in particular cases.

The preparation of these tables, when made for large areas, will not excite particular interest and invite all the necessary objections, nor their details be discussed with that amount of care and precision as the nature of the case requires. In matters of public and general interest the people of the country are yet apathetic; so these tables will generally be made *ex parte*, published, and confirmed, and their injurious effect known and taken notice of at a time when there will be no chance of any amendment.

The proviso contained in section 125 is not only unfair but will act most injuriously to the landlord when he will have to enhance rents on the basis of these tables. The restrictions embodied in the sections relating to enhancement of the rent of occupancy ryots regarding the maximum limit will then necessarily be super-added to the restriction made by this proviso. The tables will have been prepared after a considerable concession has been made to the ryot, and then when these will be applied to particular cases, another concession will have to be made.

CHAPTER XII.

Record of Proprietor's private lands.

Sections 135-138.—The law and procedure prescribed for the record of proprietor's private lands are unnecessary and expensive. In cases of dispute as to whether a particular piece of land is the private land or not the civil court may be left to decide the question.

A serious objection is taken to the most arbitrary restriction imposed by section 138 upon the creation of khamar lands, and as it is submitted that the landlord should be allowed to retain the right to create khamars from time to time as occasion may arise, the provisions contained in sections 135 to 137 become not only unnecessary but also impossible for being worked out.

It is submitted that the restriction proposed to be imposed upon landlords is most arbitrary and is a distinct invasion upon their proprietary right.

CHAPTER XIII.

Distraint.

Sections 139-158.—Although the realization of rent by distraint is not much in vogue in East Bengal, and although the restrictive measures proposed will not therefore be very much felt by the landlords of East Bengal, yet it is necessary to object on principle to the procedure provided by the Bill.

The only important change made in the present Bill from the original Bill of 1883 is the reduction of the amount of court-fee payable on an application for distraint.

The procedure prescribed is far more lengthy and costly than that under the existing law. The most important right which the landlords had of distraining the standing and ungathered crops, of their own motion and by their own process, is taken away, without giving them any the least facility for the collection of their rent.

In short the object of the law of distraint, *viz.*, speedy and least expensive mode of realisation with the least harassment of the tenants, is entirely lost by the procedure adopted in the Bill. Hence proposed provisions, instead of being any improvement on the existing law, make the very important and valuable right of distraint so long enjoyed by the landlord altogether useless for them.

What is named as distraint is virtually a suit for arrears of rent with attachment before judgment, and with this disadvantage, that while in a regular suit for rent the landlord can sue for the whole arrears, under this process he can sue for only the arrears of the current year.

CHAPTER XIV.

Judicial Procedure.

Sections 159-174.—As already pointed out, it was one of the main objects of the original Bill of 1883, which has been revised and cast into the present shape by the Select Committee, to give reasonable facilities to the landlord for the recovery of his rent. The agitation which led to the consideration of the whole question of the law of landlord and tenant in Bengal, and caused the submission of different measures on the subject from time to time, was also based principally upon this question. The procedure relating to the recovery of rents is therefore *the* portion of the Bill with which the landlords are principally concerned.

Although the Select Committee have bestowed their anxious consideration on the subject in question, it must be said however that no satisfactory result has been obtained.

If arrears of rent must be recovered by a suit only, it is evident that the Legislature cannot make realisation sufficiently speedy, though the procedure for such a suit may be a good deal summarised. In every suit there must be the issue of summons, proof of service where the defendant does not appear, proof of the claim, the framing of the decree, and its enforcement either by arrest or attachment. The defendant may appear and contest service of the summons and the demand, and the suit becomes contentious. Where the defendant appears at the original hearing and contends the demand, evidence on both sides must be gone into and there must be a sifting enquiry before decree. The abovementioned procedure must be followed more or less in detail, and however much may the details be cut short, in practice it will be found to take always more than three months, and very often six months, before a decree is obtained in contested cases. The Legislature cannot sufficiently form an idea of the practical difficulties which hinder the speedy trial of suits. Process after process may be taken for the attendance of witnesses and the case delayed. The Judge adjourns the case from time to time to suit his own convenience, and the party who has his witnesses in attendance has got to drag himself to court from day to day and bear the costs incidental to such attendance. The Moonsifs are heavily pressed with work and much fault cannot be found with them. Knowing fully well that a case will not be taken up at the first hearing, oftentimes the

witnesses do not appear even when they could, and as often the witnesses do not allow parties to take out fresh processes as a matter of course. Whoever has carefully looked into the procedure of suits in a court of first instance will bear out the truth of the statements made above. Then after the decree there comes the appeal against such decree; that also takes up at least three months' time, even in cases of rent suits of the nature of Small Cause Court cases. How then can the landlords be satisfied with only a partial abridgement here and there of the lengthy procedure of a suit. The rules that the High Court may frame under section 159 and the effect such rules may have on the procedure of rent suits it is not possible to conjecture.

Section 159.—Simply avoids the difficulty for the present—and throws the whole burden and responsibility on the High Court.

Sections 164 and 165.—Are the only two sections enacted in the interests of the landlord and which distinguishes the procedure for rent suits from that for any other suit. But the benefit likely to flow from them is nominal. They will not induce the tenant to admit anything substantial.

Then again the effect of the above sections will be well nigh neutralised by section 166, which gives a very wide discretion to the court to allow the tenant to pay even the admitted amount by instalments. There should be some provision in conjunction with section 165, under which the landlord may be able to take out the money immediately after it has been deposited.

The taking away of the right of appeal in rent suits will not mend matters much, and on the contrary may be prejudicial to both parties.

It should however be provided that no application for retrial of a suit decided as *ex parte* nor an appeal shall be admitted when filed by a tenant, until the amount decreed has been deposited in Court.

When the Bill makes such stringent provisions relating to receipts of rent and accounts to be kept by the landlords at a great cost and trouble, it would be fair and an act of bare justice to allow them some substantial advantage in the shape of a speedy method for realization of their rents.

The only two modes now in existence are the summary sale procedure and the certificate procedure. Both these procedures may with certain modifications be made equally applicable to the case of occupancy ryots and the last, *i.e.*, the certificate procedures may be applied to the case of non-occupancy holdings. Very heavy penalties may be imposed upon landlords for the abuse of any of these rights.

Without any of these procedures the realisation of rent will remain as difficult in future as it is now.

Section 170.—Eventually does away with all ejectment suits, and gives an undue advantage to the delinquent tenant.

The requisition on the part of the landlord prescribed by sub-section I of this section is perfectly unnecessary. No landlord is likely to rush into court if there be the smallest chance of settling the dispute amicably.

The words "reasonable compensation" and "reasonable time" used in this sub-section are very indefinite. These, together with the provision relating to requisitions, will undoubtedly raise unnecessary difficulties to the entertainment of a suit for ejectment. And oftentimes these preliminary objections will prove fatal to an otherwise good cause. These provisions will increase the mass of evidence and make cases more lengthy and costly.

If the tenant has forfeited his holding by acting against his landlord, he should not be allowed any indulgence on these preliminary grounds. Sub-sections 2 and 3 will only prolong litigation between the parties and make the relationship between the parties more inimical.

Sub-section 3 and the provision relating to requisitions should, however, on no account be retained.

The words "contrary to local usage" used in clause (*c*) of section 171 at once neutralise the whole effect of the clause, opens a wide door for dispute, and makes the provision altogether indefinite and vague.

CHAPTER XV.

SALE FOR ARREARS UNDER DECREE.

Sections 175-193.—All transferable holdings are hypothecated for their rent. It has been also declared by the present Bill that the rent of such a holding is a first charge on the holding (section 77).

Hence, when a decree for arrears of rent has been obtained against such holding, that decree may be looked upon in the light of a mortgage sale decree passed under the Transfer of Property Act. In execution of such a decree no attachment need be made. It may advantageously be provided that only a sale proclamation shall be needed in such a case. It would save a great deal of time, and be less costly.

If the circuitous, dilatory, and expensive procedure relating to the sale of these holdings be retained, by which in the first instance all registered and notified incumbrances are protected and rendered liable to cancelment at the desire of the auction purchaser only in case of second sale, the first sale failing to fetch the decretal amount, it would be only fair to do away with the process of attachment in order to counterbalance the delay and cost that would be caused by the abovementioned procedure.

The abovementioned procedure relating to the sale of a holding twice over and the provision that the auction-purchaser will have to annul encumbrances by a particular act within a particular time appear also to be unfair. With the provisions embodied in the Bill for the protection of under-tenures, and sub-tenancies by payment of the arrears due, it would not be at all unfair to sell the holdings at once free from all encumbrances, excepting those mentioned in the Bill as protected interests. Such a provision would be in keeping with the existing law both as to sales for arrears of revenue of estates as well as to sales for arrears of rent of transferable tenures. The change in the existing law on the subject will only add complications, and will have a tendency to make the realization of rent insecure and dilatory.

If the abovementioned provision be retained there will be another inconsistency. When a patni tenure will be sold under a decree for arrears of rent, it will be sold subject to the registered and notified encumbrances; when the same tenure will be sold summarily under Chapter XVI, the auction purchaser will have the power to annul such encumbrances. This distinction will be productive of confusion and loss to the parties concerned. No particular object is gained by creating these anomalous distinctions. No particular objection would be taken to section 182, as objection has already been taken to the conversion of occupancy holdings at a fixed rent or rate of rent into tenures.

There is a further objection to the limitation prescribed by section 184 for the annulment of encumbrances One year, from the date on which the auction-purchaser first has notice of the encumbrance is rather short and very indefinite. The question when he had notice will be a matter of hot dispute. Again, where the auction-purchaser is the decree-holder himself, his right may be barred before he becomes the purchaser. He may have received notice of the encumbrance under section 193 more than a year before the tenure is brought to sale. Hence if any limitation is to be prescribed it should be within three years or at least two years from the date of confirmation of the sale irrespective of the question of notice.

When objection has been taken to the general principle of the sale of tenures, once subject to encumbrances and again with power to annul them, it is needless to say that section 185 is very objectionable.

The provision that the landlord is at the most entitled to the rent of only six months out of the period intervening between the institution of a suit for arrears and a sale in satisfaction of a decree in such suit is most arbitrary and unreasonable. It is well known that a tenure or holding is not likely to be sold within this short period of six months. And supposing it is sold within that time it would be at least two months if not contested, before the sale is confirmed. The auction-purchaser's rights and liabilities will commence from the date of confirmation of the sale. Hence, why should the landlord be defrauded of his just arrears, when the security for the payment of the same is lost by the sale. The only just provision that can be made on the subject is that the decree-holder will be entitled to have the arrears that may accrue from the date of suit down to the date of confirmation of the sale.

Section 192 is a most objectionable provision. It will not only act as an incentive to the creation and setting up of false encumbrances but be a license for the same. It will be a fruitful source of dispute and litigation, ruinous to the raiyats themselves, and detrimental to the interests of the landlords.

CHAPTER XVII.

The objectionable nature of the restrictions on contract and of the retrospective effect given to such restrictive provisions have been incidently commented upon. It is therefore needless to repeat what has been said. Suffice it to say that the provisions contained in section 210 are most arbitrary, unfair, and one-sided. In short, the provisions are neither based upon any good policy nor can they be supported upon any sound principle. The raiyat has full liberty to mortgage, sell, and sub-let his holding on any terms he may choose. He can make any terms in case he is granted a permanent mokrari lease, yet he cannot be deemed capable to making any contract that may trench upon some particular provisions of the Bill. This surely is unwarrantable and indefensible.

Section 216—Will not, as is supposed, cover all cases of homestead lands of raiyats.

The Bill is admittedly silent on the question of bastu lands of tenants other than raiyats: nor does it make any provision regarding such lands held by tenure-holders, when the same is not held as part and parcel of the tenure. Perhaps it is understood that this last class of cases falls within the division of bastu lands held by tenants other than raiyats. There are various incidents attached to homestead lands. To leave all these incidents to be settled wholly by local custom may not be very advantageous to the parties concerned.

Dated Furreedpore, the 22nd August 1884.

From—Baboo Ambica Charan Mazumdar, M.A., Secretary to the Furreedpore Peoples' Association,
To—The Secretary to the Government of Bengal, Legislative Department.

Now that a general discussion has been invited on the revised Bengal Tenancy Bill as published in the *Calcutta Gazette* of the 2nd April last, the Furreedpore Peoples' Association desire to offer a few observations on the subject. Their opinion on the Bill was invited by the Commissioner of the Division, but as owing to some untoward circumstances they have been unable to comply with that authority's request in due time, I am directed to submit, for the consideration of His Honor the Lieutenant-Governor, the following expression of their opinion on some of the provisions of the Bill.

2 The Association beg to be understood that they do not enter into the following discussion with any particular sympathy with either one of the two parties primarily interested in the subject—the actual proprietor and the actual tenant. On the contrary, they regard both of them to be important factors in an agricultural country like their own, neither of whom can be safely eliminated from the considerations of a paternal Government sitting to legislate for the peace and prosperity of its people. They believe the interest of both the classes to be co-extensive if not identical, and they are inclined to think that a correct and satisfactory solution of the problem, which has set this Bill on foot, lies only in the establishment of a harmonious relation between the two, and not in setting one against the other of these two contending parties. The Association are grieved to find that, although the Bill has undergone material alterations at the hands of the Select Committee, the main principles of the original Bill, which are so repugnant to the growth of that harmony, remain unchanged. Upon full consideration of the subject, they cannot divest themselves of the conviction that some of the provisions of the Bill are still so violent and revolutionary in their character, that, however much they may be now regarded in theory as conducive to the future welfare and prosperity of the tenantry, they will eventually prove destructive of even those rights which the latter had been slowly, but visibly and without opposition, acquiring under the least obstrusive of all laws—the law of the usages and customs of the country; and in submitting the following, the Association earnestly hope that Government will take the provisions of the Bill to which they refer into its serious consideration before passing them into law.

3. The provisions of the Bill to which they allude, and which appear to them open to serious objections, are the following :—

1st.—The unusual extension of the occupancy right of the settled ryot as given by section 25.

2nd.—The hard presumption for the first time sought to be raised in favour of occupancy right by clause (2) of section 26.

3rd.—Sub-letting of occupancy holdings.

4th.—Transferability of occupancy right and the imperfect restrictions proposed thereto.

5th.—Price-lists ; and

6th.—The absence of adequate provision for the protection and better security of the tenants in their bastu or homestead lands not forming part of an occupancy holding.

4. (1) *Occupancy right.*—The extension of occupancy right of the settled ryot over all lands included within a village or estate, as fixed and demarcated by the Survey authorities, seems to be open to two-fold objections—(1). In Eastern Bengal, and specially in the districts of Furreedpore and Backergunge, almost every such village contains lands of three, four, and sometimes five or six estates, and almost every estate pervades through 10 to 50 survey kismats or villages. These estates mostly belong to distinct proprietors. Now, if the capacity of the settled ryot of a village to hold, on an occupancy title, land of which he has been let into possession, is to extend over such an entire village irrespective of the length of time for which, and the malik under whom, he may hold, it would be productive of the greatest injustice and hardship to many an innocent proprietor, and at the same time prove no less injurious to the tenant. For example, a certain village A contains lands of four different estates—B, C, D and E—belonging to four different proprietors; R is a cultivating tenant holding under B for more than 12 years in this village A. After the end of the 12th year R's demand for land increases with his improved condition or the increase of his family, but B, his landlord, has no lands to supply him, and consequently R applies to C, D, and E, the other proprietors, who have lands of their estates in the same village, and takes from them three parcels of lands separately. The moment R is let into possession of these lands he acquires a right of occupancy in them. Certainly there is no circumstance in the existing state of the country to justify the introduction of such a violent provision of the law. The example cited is neither an imaginary nor an unusual one. In the district of Furreedpore such cases are of the most frequent occurrence, and in the southern part of it the general practice. The consequence of such a violent change in the law will be that either many talukdars and petty zemindars will in total ignorance of the status of the resident ryots of their neighbouring proprietors let such ryots into possession of their lands as payekhast ryots, and after-

wards, when a necessity will arise to provide for their own ryots, find themselves deprived of a valuable right, which deprivation they never calculated upon before, or, what is more probable, the tenants will scarcely find for cultivation any land not belonging to their own landlords, and being thus compelled to depend solely upon what scanty provisions their own maliks can make for them within their own estates, the tenantry will gradually sink in poverty and distress. The payekhast system (by which is understood in this and some of the neighbouring districts cultivation by a tenant resident within the estate of another proprietor), which is widely in vogue in this and in other districts in lower Bengal, and which is eminently suited to the occasional requirements of the agricultural community, will be rapidly extinct, and the tenantry left in a condition of utter destitution. (2) There will be a further and greater evil arising from this provision It is a common practice with tenants in almost all districts of Eastern Bengal to take several *mudaffats* at different times in the same village and within the same estate, and keep them as distinct and separate holdings. They themselves would be unwilling to have them consolidated into one holding, and in many rent-suits the only plea raised by the tenant is against attempted consolidations on the part of the landlord; for the advantages which the tenants derive from this separation are very great. In the event of a sale or ejectment for arrears of rent, they can easily afford to preserve some of them, although they would be quite unable to save all; and in case of their falling into adverse circumstances by deaths or otherwise, they can surrender one or more of such *mudaffats* or holdings, and retain a number of them sufficient for their family requirements. The proposed rule of law, apparently giving them an extended right, would therefore virtually be ruinous to them. The hardship on the one hand, and the mischief on the other, that will certainly arise from an undue extension of this capacity of settled ryots in large estates extending over a large tract of country, or sometimes into more than one district, are easily deducible upon an application of the above process, and need not therefore be particularized.

5. Upon the above considerations, the Association would humbly suggest that in justice to the proprietors, and particularly in the interests of the ryots, section 25 of the Bill ought to receive the following amendment:

Every settled ryot of a village or estate shall have a right of occupancy in all land held by him *under the same proprietor, and in one holding*, as a ryot in that village or estate.

6. The amendment proposed is italicised. It is perfectly true that if a ryot holding a quantity of lands for more than 12 years under one landlord should afterwards happen to take from the same landlord an additional quantity of land in the same village or estate, and enjoy the two together two characters ought never to be attached to different portions of the same holding so constituted. The proposed amendment will completely answer all these difficulties, for it will leave the tenant and the landlord free to choose with equal fairness whether lands subsequently demised should go to form an accretion to the original holding, and be subject to all the rights and liabilities incident thereto, or be treated as a distinct and separate tenure with somewhat diminished rights at the beginning, but with more extended advantages for all time. To guard against possible fraud and violence on the part of the proprietor, a clause may, however, be added to the section providing for a presumption in favour of the ryot, that in the absence of a written agreement all lands in the occupation of a settled ryot in one village or estate under one and the same proprietor shall be presumed to form one holding, unless the contrary is either admitted or otherwise satisfactorily proved.

7. (2). *Presumption of occupancy right.*—The presumption laid down in clause (2), section 26, will, it is seriously apprehended, operate most injuriously to the landlords. In the first place, it is much easier for the tenant to prove an affirmative than for the landlord to prove a negative. In the next place, the tenants have always better means to prove their 12 years' occupation than the landlords to disprove such a fact. Except where tenancies are created by written instruments (and such creations are very rare in Eastern Bengal), the only evidence which a landlord can produce to prove the actual commencement of a tenancy are the *jama-wasil-baki*, *karcha hishab*, and other collection papers of his own sherista. But these are very properly held to be no independent evidence under the law against the tenants. Besides, when a landlord will attempt to prove the commencement of a tenancy within 12 years by these papers of his own sherista, it is always be open to the tenant to say that earlier papers showing the prior existence of the tenancy have been wilfully kept back. But, on the other hand, receipts of rents granted by the landlords, which, if proved to be genuine, would be conclusive evidence against the latter, are always in the hands of the tenants, by which they can more easily and satisfactorily prove the duration of their tenancy. These practical considerations would lead the Association humbly to recommend that the presumption clause of section 26 may be entirely omitted.

8. (3). *Sub-letting.*—It is now quite clear that the Government fully recognize the dangers which will inevitably result to the actual cultivator of the soil from a formal recognition by the Legislature of the power of sub-letting in occupancy ryots, but the remedy prescribed by putting certain restrictions (section 5 (4) (5) and section 37) to such power seems to be quite inadequate. The scheme proposed in sections 37 and 38 for discouraging money-lenders and speculators from purchasing occupancy holdings will hardly prove effective in averting the evils apprehended, and will moreover be unworkable under the existing machinery of administration. If an occupancy ryot can sub-let up to a moiety of his holding,

and yet retain the privilege of an occupancy ryot as regards enhancement of rent, what discouragement would it be to the money-lender and speculator to make purchases of occupancy holdings? If he is assured that his own rents will not be enhanced, except under conditions applicable to his transferor's case, and that he himself can realize from his under-tenants at a rate much higher than his own, any money-lender wishing to speculate on lands will readily buy as many occupancy holdings as he can, and after keeping one-half of them in *khamar*, will sub-let the other half at exorbitant rents, and thereby seek to reimburse himself for what he has spent in making such purchases. It is exactly what the land-jobbers do in localities where transfers of occupancy rights are allowed either by custom or by the tacit consent of the proprietor, and they wish themselves no better, and the greatest number of oppressions are known to have arisen from such practices. Then the difficulty and inexpediency of going through an elaborate process of ascertaining the extent of a holding sub-let in a simple rent suit, in which the nature of the tenancy of the lessor may have to be determined, may be easily conceived. Such a law will largely increase the labour of the courts, retard the progress of administration of justice, and doubly increase the expenses of litigation. The quantity of lands sub-let will have to be in most cases precisely determined after measurement by civil court amins, and it is not too much to apprehend that many of these parties, after a dozen of such rent-suits, will find themselves entirely ruined, while the actual cultivator of the evil will always groan under the heavy pressure of either of the superior combatants. A provision for equality between occupancy and non-occupancy rates of rent, together with a further provision for summarily dealing with the recovery of rents of occupancy tenants, sub-letting may no doubt prove a decided improvement; but even that will not prove a sufficient preventive remedy for the evils apprehended. This Association would therefore humbly suggest that, in attaching the incident of sub-letting occupancy holdings, the law ought to provide that the holders thereof, upon sub-letting any portion of their holdings, will be converted into tenure-holders or middlemen; and the sub-lessees of such ryots shall not, unless they be actual cultivators, acquire right of occupancy in the lands so leased by them. The right of sub-letting herein proposed will no doubt be a restricted one; but if the evil of a rush of land-jobbers is an evil that ought to be avoided in legislating for the benefit of the true cultivator of the soil and improvement of the land, and if it be deemed necessary to provide also against the improvidence and indolence of an ignorant mass, an unrestricted power of sub-letting will be the greatest mischief that can be done to the Bengal ryots.

9. (4). *Transferability.*—The question of transferability of occupancy holding has undergone a most sifting examination from the time of the introduction of the original Bill. This Association will not therefore repeat the arguments already advanced on the subject. They would only observe that, in districts like Furreedpore, where there are large numbers of small estates with unusually long rolls of petty share-holders, the right of pre-emption given by section 32 will rarely be available to the proprietors, and the occupancy holdings will largely fall into the hands of money-lenders. The fate of the *jotes*, *gantis*, *howlahs*, *mourasies*, and such other transferable tenures with right of occupancy, which were no doubt at one time merely occupancy tenures belonging to actual cultivators of the soil, and have now entirely fallen into the hands of money-lenders and speculators, does clearly indicate which way the new measure will tend. The positive evils that will arise from this provision are not far to seek. If a correct census could be taken of the civil and the criminal institutions arising out of questions between landlords and tenants, it would appear that by far the greatest oppressions on the latter have been committed by money-lenders and speculators. They oftentimes advance in accumulated principal, interest and costs of suits more than the ordinary value of the property secured for their debts, and being themselves obliged to purchase such property in auction, they become relentless in screwing the last farthing from the hands of the tenants for the realization of their outlay. It cannot be doubted that this accident of the occupancy holding will create a host of middlemen, whose multiplication is neither desired by the country nor intended by the Bill. Whatever penalties the zemindars may have incurred by their arbitrary and oppressive dealings with their tenants, surely they have not deserved a forfeiture of their proprietary right to be given away in perpetuity to an unborn generation of irresponsible middlemen.

10. (5). *Price-lists.*—The scheme of preparing price-lists through the Collector every year for ascertaining the prevailing value of crops in any local area will, it is feared, be neither successful nor beneficial. Different prices prevail in different markets, and it will be hardly possible for the Collector to fix summarily a correct and fair standard for the same. The determination of the prevailing value of crops may be left to the courts' decisions upon evidence in each particular case.

11. (6). *Bastu land.*—Some adequate provisions are required for the protection of all classes of ryots in the quiet enjoyment of their bastu or homestead lands not forming part of an occupancy holding. Their right in such lands ought, the Association think, to be heritable only. They should be provided with the same advantages and conditions as the occupancy ryot as regards enhancement and ejectment, but their interests in such lands ought never to be transferable.

12. In conclusion, the Association beg to observe that the provision of section 30, as regards *khamar land*, read with reference to section 53, leaves the status of *khamar lands* as known in Eastern Bengal open to misinterpretation. In Eastern Bengal lands let out in what is commonly known as *barga* are strictly recognized as *khamar* lands, and they ought

never to come within the scope of section 53, which seems to have proper application in Behar only.

No. 73, dated Mozufferpore, the 4th September 1884.

From—The Vice-President, Tirhoot Landholders' Association, Mozufferpore,

To—The Secretary to the Government of Bengal, Revenue Department.

I have the honour to send in a separate cover by book-post a copy of the printed notes prepared by this Association on the Bengal Tenancy Bill as amended by the Select Committee for your perusal.

NOTES ON THE BENGAL TENANCY BILL AS AMENDED BY THE SELECT COMMITTEE.

The Bengal Tenancy Bill, as amended by the Select Committee, is not the production which every one expected—and very reasonably and rightly expected—after the several important questions involved in the proposed measure had been so ably discussed and argued threadbare by men best informed on the subject, and quite fitted to judge of the wants and requirements of the country and its people. This amended Bill has not a little surprised and disappointed all right-thinking men, who consider and treat the matter in the most impartial manner, and do not deal with it, as a firm, staunch, and unflinching advocate or partizan. But much of this surprise and disappointment ought to vanish if we, for a moment, reflect upon the peculiar manner in which the Select Committee was constituted, for most of the members composing the Committee were men who went to the Council Chamber to deliberate upon and discuss the many important questions with firmly-rooted convictions, decidedly in favour of one class and against the other. We have very carefully gone through and considered the Bill, and we find that a considerable portion of it is condemnable from the zemindars' as well as the ryots' point of view. At every step we meet with restrictions and restraints upon the existing rights and privileges of the landlords, imposed without any justification whatever, encroachments upon their proprietary rights made without any reason or rhyme, and measures proposed which will surely plunge both landlords and tenants into a flood of litigation, expense, worry, and trouble. The consequences of such a state of things can very easily be imagined; and we do not think we are wrong when we say that some of the results will be, among others, as follow:—

It will prove a heavy drawback to the prosperity of the people affected by the Bill, which is just the reverse of the object the Government has in introducing the measure; it will revolutionize the existing relations between landlord and tenant, and introduce innovations quite unsuited to the ideas of the people, especially the agricultural population of Bengal; it will wholly destroy the amity and good feelings now subsisting between the parties, making the one a determined enemy of the other; will open a wide door to forgery and perjury and subornation of perjury; most injuriously affect customary laws and rights; and, what is worst of all, fetter freedom of contract which has hitherto regulated all dealings, not only here in India, but in all parts of the civilized world, not merely between landlords and tenants, but all classes of people.

We all know that the object in agitating the question originally was to find the means and way for supplying certain wants of the zemindars. But how strange! Since the first agitation of the question, every Bill, one after the other, which has come out of the Legislative anvil, has been peculiarly remarkable in its confiscatory character. Far from simplifying the procedure for the realization of rent and enhancement of the same, and far from compensating the zemindars for the loss, trouble, and inconvenience they have to bear in consequence of the obligation imposed upon them to realise certain cesses for the Government, the Bill has gone far to render the position of the zemindars very much worse; for it places most needless restrictions upon the exercise of their power of distraint, and certainly the provisions of the Bill in connection with enhancement are cumbrous, difficult, and inconvenient.

There can be no denying that in making the provisions embodied in the Bill, Government is actuated by the best of motives, for it has at its heart the promotion of the happiness and comfort of the tenants and the general amelioration of their condition; but at the same time there can be no denying that in carrying out its object, how good and laudable soever it may be, it must trench upon the vested rights and privileges of the landlords, and curtail many a valuable and fondly cherished right which has been indisputably enjoyed by them ever since the commencement of the British rule, and long before such rule commenced. Why we may very safely observe that this Bill is wholly founded upon the assumption that the property in the soil does not belong to any person, and that therefore it is quite in the power of the Legislature to make any law it thinks fit regulating the proprietary right in land, and making any distribution of the same it thinks fair and equitable in its wise, mature, and calm deliberations. One need hardly be told that a Bill, which is built and constructed upon so grossly false a basis, must be rotten in its very core, and

seriously mischievous in its results as far as landlords or zemindars are concerned. The assumption we have spoken of above is a very barefaced one, put forward as it is with full knowledge of its falsity; for we cannot by any means persuade ourselves to believe that those who put it forward are ignorant, that there is ample evidence within our reach to establish that the property in the soil belongs to nobody else but the zemindars and independent talookdars. We need not go far to collect evidence in support of the position we take, for we have ample proof of this in the Regulations and Acts themselves passed by the Legislature from time to time. It appears to us to be too late in the day to agitate and discuss the question now, when from the very valuable and useful work of Dr. Field, we find that this very question and other cognate matters were very seriously and carefully considered and discussed by such great men as Warren Hastings, Francis, Pitt, Fox, Burke, Dundas, Lord Teignmouth, and Lord Cornwallis, before the Permanent Settlement was effected. As the result of such consideration and discussion, we have what we meet with, first of all, in the most important Regulation, that is, Regulation I of 1793, and other subsequent Regulations and Acts passed by the Legislative Council at different times. The very first paragraph of Regulation I, 1793, runs thus:—

"The following articles of the proclamation, relative to the limitation of the public demand upon the lands, addressed by the Governor-General in Council to the *zemindars, independent talookdars, and other actual proprietors of land*, paying revenue to Government, in the provinces of Bengal, Behar, and Orissa, are hereby enacted into a Regulation, which is to have force and effect from the 22nd March 1793, the date of proclamation."

Then the second section is as follows:—

"In the original Regulations for the Decennial Settlement of the public revenues of Bengal, Behar and Orissa, passed for those provinces respectively on the 18th September 1789, the 25th November 1789, and 10th February 1790, it was notified to the *proprietors of land*, with or on behalf of whom a settlement might be concluded, that the jumma assessed upon their lands under those Regulations would be continued after the expiration of the ten years, and remain unalterable for ever, provided such continuance should meet with the approbation of the Honourable Court of Directors for the affairs of the East India Company, and otherwise."

Sections six and seven run thus:—

"*Section 6.*—In the event of the proprietary right in lands that are, or many become, the property of Government, being transferred to individuals, such individuals, and their heirs and lawful successors, shall be permitted to hold the lands at the assessment at which they may be transferred for ever."

"*Section 7.*—It is well known to the *zemindars, independent talookdars and other actual proprietors of lands*, as well as to the inhabitants of Bengal, Behar, and Orissa in general, that from the earliest times until the present period, the public assessment upon the lands has never been fixed, but that, according to established usage and custom, the rulers of these provinces have from time to time demanded an increase of assessment from the *proprietors* of land; and that, for the purpose of obtaining this increase, not only frequent investigations have been made to ascertain the actual produce of their estates, but that it has been the practice to deprive them of the management of their lands, and either to let them in farm, or to appoint officers on the part of Government to collect the assessment immediately from the ryots. The Honourable Court of Directors, considering these usages and measures to be detrimental to the prosperity of the country, have, *with a view* to promote the future ease and happiness of the people, authorized the foregoing declarations; and the *zemindars, independent talookdars, and other actual proprietors of land*, with or on behalf of whom a settlement has been or may be concluded, are to consider these orders fixing the amount of the assessment as irrevocable, and not liable to alteration by any persons whom the Court of Directors may hereafter appoint to the administration of their affairs in this country.

"The Governor-General in Council trusts that the *proprietors* of land, sensible of the benefits conferred upon them by the public assessment being fixed for ever, will exert themselves in the cultivation of their lands, *under the certainty that they will enjoy exclusively the fruits of their own good management and industry*, and that no demand will ever be made upon them, or their heirs or successors, by the present or any future Grvernment, for an augmentation of the public assessment in consequence of the improvemet of their respective estates.

"To discharge the revenues at the stipulated periods without delay or evasion, and to conduct themselves with good faith and moderation towards their dependent talookdars and ryots, are duties at all times indispensably required from the *proprietors of land*, and a strict observance of those duties is now more than ever incumbent upon them in return for the benefits which they will themselves derive from the orders now issued. The Governor General in Council therefore expects that the *proprietors of land* will not only act in this manner themselves towards their dependent talookdars and ryots, but also enjoin the strictest adherence to the same principles, in the persons whom they may appoint to collect the rents from them. He further expects that, without deviating from this line of conduct, they will

regularly discharge the revenue in all seasons; and he accordingly notifies to them that, in future, no claims or applications for suspensions or remissions on account of drought, inundation, or other calamity of seasons, will be attended to; but that, in the event of any *zamindar, independent talookdar, or other actual proprietor of land*, with or on behalf of whom a settlement has been or may be concluded, or his or her heirs or successors, failing in the punctual discharge of the public revenue which has been or may be assessed upon their lands under the above-mentioned Regulations, a sale of the whole of the lands of the defaulter, or such portions of them as may be sufficient to make good the arrear, will positively and invariably take place."

If we multiplied instances, it would be necessary to produce here the whole of the Regulations, section by section; but we need not do so, as the sections we have given above afford, in our opinion, the clearest evidence that the proprietary right in the land belongs exclusively to zemindars and independent talookdars. For the purpose of indicating how the sections do so, we have underlined in them certain words. The words underlined can leave no doubt in any mind, how sceptical soever it may be, that the actual proprietors of the soil are the zemindars and independent talookdars, not because the Permanent Settlement Regulation made them so, but because they were found to have occupied that position during the Mahomedan rule. All that the British Government did, when it proceeded to make the Permanent Settlement, was simply to confirm the proprietary rights in land of those who have been enjoying them when the country was in the hands of the Mahomedans. It did not confiscate those rights, and we think it did right in not confiscating, having regard to the way and manner in which it obtained possession of the country, for that way and manner was anything, but certainly not conquest.

But for the sake of argument we may concede, as we lose nothing by the concession, that it could confiscate those rights in the exercise of its power as conqueror, and did actually do so there cannot be the slightest doubt; that in the exercise of its sovereign prerogative it has restored them again to those whom they belonged to, their heirs, successors and representatives for ever, satisfying itself with a fixed revenue.

Among the sections we have quoted above, there is section 6, in quoting which our object is to show that by Regulation I, 1793, the British Government meant to convey and confer, and did convey and confer, what proprietary rights it had in the lands.

Here we may very properly notice the argument which is to the effect that the Permanent Settlement Regulation is simply a contract, to which there were only two parties, namely, the Government on the one side and the zemindars on the other, and that therefore the ryots, who were no party to it, cannot be bound by it—a more frivolous and puerile view of the matter cannot be easily conceived. This Regulation, in our opinion, is a Royal Charter whereby the Sovereign Power, in the exercise of its right by conquest, either confirmed in, or conveyed to and conferred upon, certain persons proprietary right in land for a valuable consideration. Certainly the argument cannot come with a good grace from a Government official, for it really amounts to this: Government knowingly and deliberately entered into a solemn contract with a certain class of persons for its own benefit, and that of the class it dealt with, to the detriment and injury of the whole body of ryots.

Again, supposing that it is true that the Regulation is simply a contract, there can be no doubt that the hands of the Government are tied for ever; it becomes then a question who is to legislate in behalf of the much aggrieved class, the ryots? Certainly not the same Government. Who then? This is a question which it is not in our power to answer.

From what we have said above, we hope we have made it clear that the British Government has conveyed the proprietary right in land to a certain class of persons for ever upon a fixed revenue. If it is so, we make no hesitation in saying that it does not at all lie in the power of the Government to make any laws confiscating, curtailing, circumscribing and limiting, in any way, that proprietary right, or the lawful exercise of the same by imposing many needless and unmeaning and irrational conditions. If any illustration in support of what we say here were needed, we have simply to quote one very important instance, and that is to be found in Chapter V of the Bill which treats of occupancy ryots, their rights and privileges. Of all ryots, the most privileged class we know was the *khoodkast* ryots. There is the clearest evidence that to even this class did never belong the rights and privileges which the present Bill aims at conferring upon its new-child—"settled ryots." Still this Bill professes to restore the ancient Land Law!! All that the *khoodkast* ryots were entitled to was to retain possession of their lands so long as they paid the rents demandable from them; but they could not sell or mortgage their holdings without the sanction and consent of the landlords. The latest Legislative enactment on the subject—we mean Act X of 1859—which created for the first time the right of occupancy, could not venture to go further than declaring such right to be merely heritable; but according to the Bill now before us, occupancy right is made saleable and transferable according to the pleasure and fancy of the ryot. It may be contended that the Legislature of the country has the power to make any law it thinks fit, whenever the condition and state of society and the people render it necessary, and that in spite of the fact that one class of the people benefits largely at the expense of another; but we venture to assert that this power can be exercised only in special

cases, and the question is, has any such special case been made out? Has the Government made all the necessary enquiries to satisfy itself and the people, whom the law is to affect, that the present condition of things is such as to justify the introduction of a measure like the one contemplated in the Bill. To our knowledge and belief no enquiry at all, worth the name, has been made. If you say that there are official reports, but these official reports are not unanimous. They differ as widely as possible, and the best and more experienced officers, and therefore the best fitted to give an opinion in the matter, have most strongly condemned the Bill and pointed out very forcibly the mischievous results it will give birth to. Of course some officers, more sentimental than practical, have come forward as supporters of the Bill, but we ask whom, between the two classes of officers, we ought to believe and follow? Certainly not those whose great bias and prejudice against the landlords render their opinion almost quite valueless. It is also worth mentioning here that the same laws which may suit one local area may not be at all adapted to another. This shows the absolute necessity of a thorough and scrutinizing enquiry into the actual condition of things in every corner of this vast Empire, before a grand legislative measure like the one contemplated in the Bill is introduced. If you for a moment consider the very important character of the questions the Bill deals with, you will, we are certain, readily and unhesitatingly pronounce that the hurry and haste with which the Government is proceeding to bring the measure to completion is most reprehensible. Again, conceding everything, conceding that the law is really required, we cannot make ourselves for a moment believe that it will at all benefit the class of people whom the Government so much wishes to help. It is notorious that this class of people is most improvident and thoughtless; they do not think so much of the future as of the present; and a marriage or *shradh* with the power of sale which the Bill confers upon the ryot, will in no time convey wholesale all his lands either to the mahajun or the land-jobber, and one sure result of this will be, that there will be much rack-renting and absolutely hard terms and conditions on which alone lands can be held. Again, the endless litigation which the Bill is sure to lead to between landlords and tenants, though injurious to both, will be the more so to the ryots. A big, powerful, wealthy zemindar may afford easily to defray the expenses of a lawsuit for a time, but it will not be such an easy affair to the ryot. Then again the litigation will constantly keep the ryot away from his home and field, very much to the detriment of agricultural operations, and we all are aware of the unfortunate and disastrous consequences which ensue if such operations are not attended to in proper time. These, and many other thoughts like these, most inevitably lead us to the conclusion that you make the ryot a happy and prosperous man only in the Statute Book, but practically you lead him on the high road to poverty and ruin.

We have said above that a Bill may be most revolutionary, yet if the condition of the country and the state of society demanded it, the Legislature of the place has every right to pass it into law. We will even apply this test to find out how far the present condition of the people and country justifies the introduction into the Legislative Council of the present Bill, which it cannot be denied for a moment is most revolutionary in its character. While on this subject, we cannot better discharge our duty than by quoting here a passage from the speech of Mr. Roper Lethbridge, made the other day at a meeting held at St. James' Hall:—

"We have had Mr. Trevelyan's Bill, which has been already referred to, under discussion, and we have had expression of opinion from Lord Derby and Lord Carlingford on the result of the Irish Land Legislation, and it may be said that we have now before us ample grounds for judging fully of what are likely to be the disastrous results of the introduction of this Bill. Lord Derby confessed last week that the Irish Legislation was a revolutionary measure; but he said it was introduced because of revolutionary circumstances. Now, gentlemen, I ask you, can that plea be adduced for Bengal? Is Bengal in such a state that it must be described as revolutionary? What does the Duke of Argyll say on the condition of Bengal. He said: 'I could not fail to observe, when I was connected with the Government of India, that the portion of the country which has most grown in wealth is precisely that part of it in which the Government has parted with its power of absorbing rent, by having agreed to a permanent settlement.' The most prosperous part of India is admitted to be Bengal! And I would refer to a still higher authority than even the Duke of Argyll, to one whose personal knowledge is absolutely unrivalled on the point, and that is to Sir Ashley Eden, the late Lieutenant-Governor of Bengal. Sir Ashley Eden, after an extended tour in the interior of Bengal in 1877, thus spoke of the condition of the peasantry:—'Great as was the progress which I knew has been made in the position of the cultivating classes, I was quite unprepared to find them occupying a position so different from that which I remember them to occupy when I first came to the country. They were then poor and oppressed, with little incentive to increase the productive power of the soil. I find them now as prosperous, as independent, and as comfortable as the peasantry, I believe, of any country in the world; well-fed, well-clothed, free to enjoy the full benefit of their labour, and able to hold their own or obtain prompt redress for any wrong.' Is that a revolutionary state of affairs? That passage which I have just quoted, it is fair to explain, referred only to Lower Bengal. It has been said that the condition of Behar is not so favourable,—possibly owing to the fact that there has been recently long minorities of the Chief Rajahs and landowners of Behar, during which

the Government of Bengal has had the direct management of those estates. It may possibly be said, and it has been said, that the machine-like heartlessness of Government management has introduced a somewhat worse state of affairs there. But, gentlemen, I again call upon Sir Ashley Eden to bear witness to the state of the peasantry even of this less favoured part of the Lieutenant-Governorship of Bengal. Sir Ashley Eden, in 1881, addressing a deputation of the Behar landowners, thus spoke of the condition of the rural population in that part of the province: 'I can assure you that nothing has given me greater pleasure than to notice, as I have had ample opportunities of doing, the extraordinary improvements in the condition of the people. It is made manifest in a hundred ways daily, even to the most casual observer. I hear the same story from all classes, official or non-official, and it is a matter of general congratulation.' Is that, gentleman, a revolutionary state of affairs to justify revolutionary measure? I maintain, after this statement of Sir Ashley Eden—and I can quote and I intended to quote, but time fails me, other statements from various officials, Commissioners, Collectors, Magistrates, and others, but I will refrain from doing so—that it is an absolutely notorious fact that the position of the peasantry of Bengal is at the present time a good one. I am going to quote in the resolution that I am about to have the honour of moving, some words of Lord Hartington on the subject of this very Bill, or of portions of it. I will ask you to compare those words of Lord Hartington with the legislation of Lord Ripon and Mr. Ilbert, and I will ask you to say, is there not some anarchy of opinion, such as the Duke of Argyll spoke of last week? Is there not anarchy of opinion there? And who are these people on whose behalf I am now calling in the witness of Mr. Gladstone and Lord Hartington and the Duke of Argyll and others to plead before this assembly? They are the most docile, the most quite, and most law-abiding, peasantry in the world. They are also a class of landowners who had proved themselves as loyal and as munificient as any other similar class in any country in the Empire. Why, I ask, what have these people done that we should sow dissension amongst them? Is it the part of a wise Legislature to embitter the relations between the various parts of the country? We have all of us learnt in the Bible that a type of ancient patriot and wise administrator once, on seeing two of his kinsmen striving together, would have set them at one; he said, 'Sirs, ye are brothers, why do ye wrong one to another?' But, gentlemen, our modern administrators do not even wait until they see their kinsmen striving together; they find them living together in peace and amity; they find a condition of affairs in which there is mutual esteem and mutual respect, resulting in well-earned prosperity and contentment; and they apply themselves to set race against race, envenom class against class, and to bring all things into confusion and anarchy."

We will now turn our attention to another portion of the Bill before us, in which the Legislature, on the assumption, which in our opinion has no foundation at all, that the ryots in the country are so imbecile and so poor in intellect and in intelligence that it would be nothing but just, equitable, and expedient, if it interposes its authority in the protection of the interest and welfare of the ignorant and weak class by ruling absolutely that, in all matters of contract between landlord and tenant, whether past, present, or future, as also in all questions relating to adjustment and enhancement of rent, the ryots are to be deemed as quite incompetent and incapable to deal for themselves, lays down that though the landlord shall have to carry out and fulfil strictly his part of the contract, such contract, as far as the tenant is concerned, is not and cannot be binding upon him except under certain special circumstances and conditions, and that all matters of adjustment and enhancement of rent must be made through the Court or under the sanction and approval of some officer of Government. These provisions in the Bill naturally make us forget that we are drawing every day very near the threshold of the twentieth century. It is not certainly a piece of legislation compatible at all with the progress and advancement of the age.

If the Legislature of the country, so far back as the year 1812, considered it safe and prudent to leave the landlords and tenants to enter into whatever contracts they thought best conducive to their interests, we fail entirely to see any force or cogency in the argument which, for the first time now at the fag-end of the nineteenth century, is advanced in support of the proposition that the position of the tenants fully justifies the denial to them of the freedom of contract, not generally however, but only in the particular instance in which they enter into any agreement with their landlord. There are contracts of a graver and more important character to enter into which the capability of the tenant is not questioned at all, and it is quite right that it is so; for man is a free agent, God has made him so, and we cannot find with all our best endeavours to solve the difficulty, anything peculiar subsisting in the relation of landlord and tenant, which makes it desirable, despite all divine laws, that the tenants ought to be by a legal fiction brought down from the class of free agents, whenever there is a contract to be made between him and his landlord.

There is a full recognition by the Legislature of the country of the power and competency of the ryot to enter into any contract he thinks fit with his landlord so far back as the year 1812; for in Regulation V, passed in that year, we meet with the following section:—

"*Section III.*—The proprietors of land shall henceforward be considered competent to grant leases to their dependent talookdars, under-farmers, and ryots, and to receive

correspondent engagement for the payment of rent from each of those classes, or any other classes of tenants according to such form as the contracting parties may deem most convenient and most conducive to their respective interests. Provided, however, that nothing herein contained shall be construed to sanction or legalize the imposition of arbitrary or indefinite cesses, whether under the denomination of *abwab*, *mahtout*, or any other denomination. All stipulations or reservations of that nature shall be adjudged by the Courts of Judicature to be null and void; but the Courts shall, notwithstanding, maintain and give effect to the definite clauses of the engagements contracted between the parties, or, in other words, enforce payment of such sums as may have been specifically agreed upon between them."

Again, why should there be a special legislation in the matter of contracts between landlords and tenants alone? Why should the tenants be deemed incapable to enter into a valid and binding contract with their landlords?

Section II of the Contract Law (Act IX of 1872) says:—"Every person is competent to contract, who is of the age of majority according to the law to which he is subject, and who is of sound mind, and is not disqualified from contracting by any law to which he is subject."

It was proposed to impose certain arbitrary conditions in the matter of contracts between raiyats and indigo planters, as it is now intended to do by the present Bill in contracts between landlords and tenants, and we had in the year 1835 the expression of opinion on the subject from no less a man than Lord T. B. Macaulay. That opinion is so sound, cogent, and forcible, that we cannot resist the temptation of giving here portions of it:—

"The Government have asked whether the Commissioners think that there would be any advantage in declaring invalid all contracts for indigo which shall be for a term longer than one year. I should greatly disapprove of such a measure. It would evidently be opposed to a great general rule, and it is not made out to my satisfaction that the circumstances of this particular case form any exception to that general rule.

"The general rule is this: That grown men, not idiots or insane, should be suffered to make such contracts as are not injurious to others, and as appear to them to be beneficial to themselves. To say that the ryots of this country are mere children and ought to be specially protected is, I conceive, quite incorrect. They are not intellectually superior to the peasantry of other countries. They are as well acquainted as we are with the difference between an anna and a rupee, or between a month and a year. They are suffered to make the most important contracts; and nobody proposes to deprive them of this power, except when indigo is in question. They marry and govern their families. They are treated by our Courts of Justice as persons quite capable of comprehending the nature and consequences of their acts. If they are not so, if they are not able to judge for themselves in matters which concern only themselves better than the Government can judge for them, they will require protection, not in this particular case alone, but in ten thousand other cases. I conclude, therefore, that there is nothing in the intellectual state of the raiyats which renders proper that contracts freely made by him should be set aside. But it is said these contracts are not freely made. Force and deception are employed. The peasant assents to disadvantageous terms from fear of bludgeon-men, or he is tricked into signing some paper which he does not understand. I answer that in all such cases there ought to be a remedy. The law, I apprehend, would even now reach these oppressive and fraudulent practices. If not, the law ought to be altered. In every case of coercion or of deception, the contract should be set aside, and the tyrannical or dishonest capitalist should be punished with exemplary severity. But what is now proposed is that we should attack not the evil, but a circumstance in itself wholly indifferent; not tyranny or dishonesty, but a certain term arbitrarily fixed upon; not unfair contracts, but long contracts. The sound rule is this. If a raiyat has been intimidated or duped into making an agreement for a month, a day, or an hour, cancel the agreement and punish the wrong-doer. But if unterrified and undeceived, he has made a contract for two or three seasons, enforce it. A Government cannot be wrong in punishing fraud and force; but it is almost certain to be wrong if, abandoning its legitimate functions, it tells private individuals that it knows their business better than they know it themselves, and is resolved to serve them in their own despite.

"The proposition now under consideration belongs to a class of propositions which cannot be regarded with too much suspicion. If there be any one political truth proved by a vast mass of experience, it is this, that the interference of legislators, for the purpose of protecting men of sound mind against the inconveniences which may arise from their own miscalculations, or from the natural state of the markets is certain to produce indefinitely more evil than it can avert. It was no doubt a humane feeling which dictated usury laws; laws against forestalling and regrating; laws for raising the wages of labour; laws for lowering the price of commodities; laws for limiting the number of hours during which adults should work; and many other laws of the same kind. But the invariable effect of such laws has been to injure society, and to injure more especially that portion of society which the Government humanely wished to protect. The needy man who could have borrowed at

10 per cent., when cursed with the compassionate aid of the lawgiver, is forced to pay 15 per cent. That which would have been scarcity if prices had been regulated by the avarice of the corn-dealer, becomes a famine when the prices are regulated by the benevolence of the Government. The measure which we are now considering, is a measure of this kind,—a raiyat consents to bind himself to deliver a certain commodity to the capitalists during several successive seasons. If he has been terrified or deluded into making this agreement, the agreement is of course null. But if he has not been terrified or deluded, on what principle are we to refuse him permission to bring his only commodity, his labour, to market in his own way, and to dispose of it on such terms as, in the state of the market, are the best which he can obtain?

"If we cannot prevent the indigo-planter from oppressing and cheating the raiyats, this restriction will evidently be a mere nullity. If we cannot prevent the planters from oppressing and cheating, then no raiyats will make a long contract without what he thinks a *quid pro quo*. And I conceive that a raiyat is infinitely a better judge of what is or what is not *quid pro quo* in such a case than any Government, even the most enlightened, can possibly be.

"I therefore object to this provision and to all other provisions of the same kind which have been suggested.

"On the whole, I am not satisfied that any peculiar system of law is required for the indigo districts. I believe that the evil which exists in those districts differs little either in kind or degree from those which may be found almost in every part of our Indian Empire. There is a bad judicial system. There is a bad police. There is a people accustomed for ages to be plundered and trampled upon, and ready to cringe before every resolute and energetic oppressor. The system of dacoity and the system of thuggee are more malignant evils of the same family. They are evils which never could exist to the extent they exist here, in a country where the tribunals and the police were efficient, or in a country peopled by a manly and high-spirited race."

The above opinion, we all know, did prevail; for in pursuance of it the idea of encumbering indigo contracts with needless and unusual conditions and restrictions was altogether abandoned. The present case is on all fours with that in which the opinion was given; the only difference being that instead of indigo-planters, we have here, as the other party to the contract, landlords.

Last year Baboo Nundun Lall of this Association made the following remarks on the subject of contracts between landlords and tenants :—

"One thing very noteworthy is that, while the legislation of 1859 and also of 1869, in treating of rights of occupancy, fully recognized and upheld the force and validity of contracts made between landlords and tenants, the present Bill takes them away in one sweep, regardless of the reasonableness or otherwise of such contracts. I do not think under the circumstances it will be saying too much if I characterise the present Bill as quite one-sided, for it looks throughout to the benefit and advantages of the ryots. Legislature should mete out justice with an even hand; but the present Bill is an attempt at legislation, which quite overlooks the rights and claims of zemindars, and showers upon the ryots benefits which they themselves never dreamt of. If in making the provisions in the present Bill, liberating without any reason or rhyme the ryots from the trammels of their own voluntary contracts, and holding the zemindars bound foot and hand by them, the Legislature has proceeded upon the assumption that the ryots are a class of people weak in intellect and not quite able to understand the effects of their contracts, I am bound to say that it is an assumption most unreasonable and quite out of place. We all know that, as the age advances, the intellect and understanding powers of men go on improving. If during the time the laws of 1859 and 1869 were enacted, the ryots had brain enough to comprehend the effects of their contracts, they must necessarily be now in a better position to judge of their own acts. Is it not, then, an anomaly that while the other laws held the ryots bound by their contracts, more recent legislation should upset the most solemn contracts, so far as the ryots alone are concerned, on the supposition that they are intellectually a much weaker class of people. One very deplorable consequence of such upsetting of contracts is, that it completely destroys all confidence of the people in the Legislature of the country. This is quite natural. Relying upon the declarations of the Legislature, as set forth in the Acts of 1859 and 1869, the zemindars have minded no trouble and expense in making settlement of lands, in securing written contracts from the people they settled with, expressly waiving all claims to rights of occupancy. Now, according to the present Bill, these contracts will become mere waste paper, so far as the ryots are concerned. A contract is too sacred a thing to be trifled with in this manner."

The above remarks are beyond all doubt just, correct, and proper, and we do not see how any one can reasonably say anything to the contrary.

If the zemindar is the actual proprietor of the land, we do not really perceive how it can be at all in the power of the Government to interfere in any arrangement he may make in regard to his own lands with his ryots, whether in the shape of contracts or adjustment and enhancement of the rents, so long as he does nothing amounting to an offence punishable under the Penal Code. As absolute owner, he is quite at liberty to make any terms he thinks proper for allowing the ryots to occupy his lands. It is entirely a private matter

between him and his tenants, and all interference of the Government appears to us to be quite unjustifiable and improper. Our opinion finds echo in what was observed by Mr. Shore and Mr. Francis, as will appear from the following passage which we copy from a little book by Mr. H. Bell, entitled "the Restoration of the ancient Land Law":—

"But it is said that in prohibiting the freedom of contract between the landlords and the tenants, the Government are merely reviving and restoring the ancient land law of the country. In this ancient land law two principles, it is asserted, are found to be embedded. First, that the resident ryot cannot be ejected from this holding in the village lands so long as he pays the established rent; and second, that it is the right and duty of the ruling power to determine the rent payable by the ryot to the zemindar. No one, as far as I am aware, has ever denied that a ryot with a right of occupancy is entitled to hold the land so long as he pays the rent; but the question is, who fixes the rent, the zemindar or the State? I emphatically deny that the ruling power have ever interfered in Bengal to determine the rents which the ryots were to pay to the zemindars. In other provinces of the Mogul Empire, where, as in Madras, there were no zemindars, the State professedly settled the proportion of the produce which the cultivators had to pay. 'The Institutes of Akbar,' says Mr. Shore, 'show that the relative proportions of the produce were settled between the cultivator and Government, yet in Bengal I can find no instance of Government regulating these proportions.'

"The reason is obvious. In Bengal, the Mahomedan Government assessed the zemindars: in the other provinces of the Empire, where there were no zemindars, the Government professedly dealt with the cultivators. But even where the Government professedly dealt with the ryots, it was found impossible in practice to assess each individual cultivator. It was one of the schemes of Akbar to have a general survey made of his empire; but we are told that at a very early period the scheme of Akbar to assess fields was discovered in practice to be full of embarrassment; and before his measurements even were completed, he was reduced to the necessity of assessing whole villages, and leaving it to the people themselves to distribute the portion payable by individuals.

"Mr. Shore, after stating that he could find no instance in Bengal of Government fixing the rent of the ryots, observes in a subsequent part of the same Minute that, 'the regulation of the rents of the ryots is properly a transaction between the zemindar or landlord and his tenants, and not of the Government; and the detail attending it is so minute as to baffle the skill of any man not well versed in it.' I unhesitatingly assert that there never was a time when the zemindar could not make what terms he pleased with his ryots, and the *pergunnah* rates, or the established rates of which we hear so much, were the rates which the zemindar himself established. How could it be otherwise? If he did not establish them, who did? The Government did not, for Mr. Shore tells us that there is no instance of Government interfering to regulate these rates in Bengal. What were the cesses which the zemindars before the Permanent Settlement were accustomed to levy, but an increase of the rates? 'The cesses,' says Mr. Shore, 'imposed by the zemindar were an enhancement of these rates, and arbitrary at first without being oppressive.' For what object were the lands of the ryots periodically measured, for what object were inquiries made as to the quality of the land and the articles it produced, expect to obtain an increase of rent? 'The rates,' said Mr. Shore 'varied with each succeeding measurement; and when they become too heavy the ryots abscond, or the zemindar allows them a compensation by giving them other lands at a favourable rate.' In the face of these facts, how can it be contended that the zemindar did not fix the rates? The lands were not measured by the Government officer, but by the zemindar's own servants. There was no one but the zemindar who could have fixed the rates. A special officer called the '*halshanah*,' whose special duty it was to measure, was attached to every zemindar's establishment. General measurements, we are told, were made every 10 or 15 years, and the general rates as determined by the measurement would remain in force till the next measurement. These rates would then be the established rates of the village, pergunnah, or other division until revised by a subsequent settlement. But as the rent was fixed with reference to the quality of the land and the nature of the crops grown upon it, there was a great diversity of rates even in a single village. This again shows that the rates could not have been fixed by the ruling power, but must have been a matter of adjustment between the zemindars and ryots. Mr. Francis, writing as a member of Warren Hastings' Government in 1776, says: 'The amount of rent must be settled between the zemindar and his tenant. Government can never descend to the ryots, so as to fix any general assessment upon them, because the rates of land depend on a number of circumstances, such as the quality of the soil, the articles it produces, of which there may be a variety in one village; besides, vicinity to markets or water-carriage makes land of more or less value to the cultivator.' I do not know how it is possible more conclusively to show that the ruling power neither fixed nor attempted to fix in Bengal the rates of rent which the ryots were to pay."

It is clear from the extract which we have just given that the adjustment and enhancement of rent, and the determination of the terms of a tenancy, have always been left entirely to the zemindars and tenants, and there has not ever been any interference in such matters on the part of the Government until the year 1859. In that year a law was made in

which the Legislature for the first time made certain encroachments upon the rights and privileges of the landlords, the principal of which are—

(*a*) creation of occupancy rights; and

(*b*) the rule that the rents of occupancy ryots cannot be enhanced except upon certain specified grounds and after certain formalities have been gone through by the landlord.

We need hardly mention that we are here alluding to Act X of 1859. But this Act even was not so reckless and inconsiderate as the present Bill, for it respected and kept inviolate all contracts between the two classes. It was simply because the Act left room open for contracts that the inconvenience, difficulty, and trouble, which arise from the rules prescribed therein, *quoad* enhancement of rent, were not so generally experienced. Compare the present Bill with Act X of 1859 on the subject of enhancement, and you will see that the proposed legislative measures are extremely hard to the zemindars; while prohibiting contracts, it lays down so many difficult, intricate, and stringent rules in connection with enhancement, that the zemindars must give up all hopes of succeeding in ever securing an enhancement.

We have all seen what little success has attended the attempts of zemindars to enhance under the existing law, the rules of which are ten times simpler, easier, and less intricate than those which the Bill before us contains. We therefore can very safely assert that these rules will never work, and that after all the trouble and expenses that have been wasted upon the preparation of price-lists and table of rates, the whole system will collapse or remain idle and useless as a most unwieldy and unworkable thing.

The result is obvious. There will be no enhancement of rent at all in future, for you cannot enhance by contract or through the medium of the process of enhancement; so the chapter in the Bill about enhancement of rent of occupancy ryots is more illusory than anything else; more a blind than a real means to the attainment of the object which it professes to have at its gift. In other words, it comes to this—Government does not consider it safe and prudent to say at once that it shall not be in the power of the landlords to increase the rents of their occupancy ryots, and therefore what it cannot venture to do openly it does by under-hand means. It gives the right of enhancing to the landlords, but takes particular care to surround it with close-laid and strong thorns, so that no landlord can ever hope to approach it.

Having made the above general observations, we now proceed to examine and notice some of the more important sections of the Bill in detail. We ought to state here, once for all, that it may not be supposed that because we do not expressly make mention of other objectionable sections in the Bill, they have our approval. To notice each and every obnoxious section and comment upon it, and lay bare its pernicious effects, would be a long and heavy task, and this accounts for our selecting the more important sections for our comment.

Section 26. (1). Every person who, for a period of 12 years, whether wholly or partly before or after the commencement of this Act, has continuously held as a ryot land situate in any village or estate, whether under a lease or otherwise, shall be deemed to have become, on the expiration of that period, a settled ryot of that village or estate.

(2). If in any proceeding under this Act, it is proved or admitted that a person holds lands as a ryot, it shall, as between him and the landlord under whom he holds the land, be presumed for the purposes of this section, until the contrary is proved or admitted, that he has for twelve years held the land or some part of it as a ryot.

(3.) A person shall be deemed, for the purposes of this section, to have held land continuously in a village or estate, notwithstanding that the particular land held by him has been different at different times.

With this definition of settled ryots in (1), and the presumption in (2), and the explanation in (3), the Legislature may as well remove from the Bill the chapter relating to non-occupancy ryots and all the provisions connected with them; for it will not be long before all the ryots in a village or estate would fill the position of settled ryots. Who will not try to secure for himself a better position and a higher status, if he knows that he has only to claim it, and then it will come to him very easily? Every single ryot, we are almost certain, will put himself up as a "settled ryot," and his claim will be denied by the landlord, for, as a matter of fact, the ryot squatted on the land only a few years ago. This will take the ryot and his zemindar to a law court for the settlement of the question. There the ryot will have all the advantage on his side, and the zemindar will find his way beset with all manner of difficulties. The ryot has the presumption of law in his favour, and he has in addition another presumption to help him, and that is being the more helpless and weaker party in the contest, the courts' sympathy will naturally be with him. The zemindar has to displace the legal presumption by actually proving that the ryot has not held any land in the village for 12 years. All the evidence he can adduce will be his village papers and the testimony of his village servants. We all know what reception evidence of this kind meets with at the hands of the courts. The court will not believe the evidence; it will say, "nothing is so easy for a powerful and wealthy zemindar as to manufacture such evidence with the aid of his servants for the purpose of depriving a poor and helpless ryot of his position and status of a 'settled ryot.'" The result will be the zemindar will lose the case and a lot of money with it, in the shape of fees to pleaders, barristers, mookteears, and a large number of nameless people in the court, whose good graces must be purchased when a suitor thinks of carrying his case to its termination without all the additional little worry and trouble which it is in their power to inflict.

Far more unhappy and miserable will be the position of purchasers, whether by private or public sales, either in execution of decrees or for arrears of Government revenue. We have spoken above of a hereditary zemindar who has in his possession some sort of evidence. Landlords who will come to the village as purchasers will be quite helpless, for they will have no evidence at all by which they can attempt to rebut the presumption. Some may say that this cannot be true as regards purchasers by private sales. We, however, maintain that it is perfectly true. The utmost a prudent man can do when he purchases, is to secure from his vendor *jamabandi* papers of some years, but he cannot expect to get papers for more than 12 years consecutively.

One sure effect of these provisions will be, that land will find no place in the market if this Bill becomes law. Having some idea of the position to which this Bill reduces the landlords or zemindars, and the rights and privileges it bestows upon the ryots, no man would consider it worth his while to invest money in land, even when such land is put up for sale for arrears of Government revenue. Some people say that this is exactly what the Government really wishes should happen, for then it will have the opportunity of buying itself gradually all the estates settled permanently, and thus smash to pieces the Permanent Settlement.

When we consider the several components which constitute a "settled ryot," we confess we cannot maintain our seriousness, for in spite of all our endeavours, we are unconsciously carried away by the risibility the definition excites by its patent absurdity. Now what are the elements which go to constitute a "settled ryot." They are—

(*a*) The village or estate must be one and the same; and

(*b*) Any land, how infinitesimal soever it may be, say 10 *cottahs*, held in the village continuously for twelve years, will confer upon the ryot the status of a "settled ryot" in regard to say 200 *bighas* of land settled with him only two years ago under a *pottah* expressly providing against the accrual of a right of occupancy.

Can anything be more preposterous than the above. We have done our best, but have failed to discover any logic in this. When Act X of 1859 was passed, creating for the first time a novel right, it defined the right in the following words:—Section 6.—"Every ryot who shall have cultivated or held land for a period of twelve years, shall have a right of occupancy in the land so cultivated or held by him, whether it be held under *pottah* or not, so long as he pays the rent payable on account of the same."

There is some sense in this definition; one can understand it; if a ryot has held a piece of land continuously for 12 years duly paying rents for it, a sort of confidence grows naturally between the parties; the ryot thinks that, if he is punctual and regular in paying rents, his landlord will allow him to continue to hold the lands, and under this assurance he does all he can to improve the land. Likewise the landlord sees that the ryot is a well-behaving ryot and pays his rents regularly, and thus he never thinks of turning him out. Thus you see the ryot becomes attached to the land and the zemindar to the ryot. Under these circumstances, if you confer upon the ryot a right of occupancy, you do a thing which is not and cannot be felt as a hardship. But none of these reasons can apply to the holding of 200 *bighas* to which we have alluded above.

It is a mistake to suppose that fixity of tenure is always a real good and blessing. In illustration of this, we cannot do better than quote here what Lord Bramwell said the other day before the meeting in St. James' Hall. He said:—

"Now, see the mischief of interfering with this. Here are two farms; we will say two pieces of land if you please. Well, they are in the hands of two tenants; we will suppose each pays £50 a year. We will suppose that either of these tenants, if he could, would get both pieces of land, and would be content to pay £150 a year for the two—perfectly possible as you know—because there might be some convenience of water or access to roads, or a difference of soil, or other things which would enable a man to cultivate more profitably. If you treat the peasant cultivator as a man who has fixity of tenure, and whom you cannot turn out of one of these farms in order to join it to the other, what is the consequence? That you have diminished the value of the two farms taken together by the amount of £50 a year. Well, that is not a loss to the owner of that land only, it is a loss to the community. The wealth of the community is made up of the wealth of the individuals who compose it, and it is all very well to sneer at landlords, and to talk about landlordism; but the best thing that could happen would be to take these two unfortunate people and to let the man who had got a personal interest in doing so make the best of his land; because, although the £50 will go into his pocket, it will only go into his pocket because it can be spared out of the pocket of the man who will take the land."

Hitherto the most desirable property in the country has been land. If a man had money to invest, he would more gladly invest it in land than in anything else. But if this Bill becomes law, we can never expect to see any fresh investment in land; on the contrary, we will not be at all surprised if those who have landed property would try to get rid of it as a most unprofitable burden. Landlordism would be denuded of all its charms, and no wonder that it will be so, for in reality it will no longer be an affair of landlord and tenant. You virtually divide the property

between the zemindar and the "settled ryots," who will be considerable in number, and the most unhappy result of this will be, that the zemindar would become more a co-parcener with his settled ryots in the property with very slight differences only, *viz.*—

The zemindar will hold paying revenue to Government, and the settled ryots will hold paying rent to the zemindar.

The zemindar can alienate unconditionally his estate, and the settled ryot can sell his estate, subject to the claim or right of pre-emption of the landlord.

This change will no doubt go very much to reduce the prestige and influence of the landlords, and we may safely predict that it will have a very pernicious and demoralising effect upon the ryots, who will become quite insubordinate and rebellious. The growth of feelings like these would frequently lead to perturbations of the public peace, harmony, and tranquility—a state of things which is extremely undesirable as highly injurious to both the classes.

We have elsewhere pointed out how the many privileges which the Bill confers upon the settled ryots cannot really prove in the least beneficial to them. Well then, we arrive at this result. The ryots will not be at all benefitted, and you most needlessly demolish the landed aristocracy of the country, which has been found upon numerous occasions and in many instances to be very useful to the State and the community in general, and introduce confusion, turmoil, and animosity, and throw everything out of order and system, formed and established gradually in the course of a century. We confess we are not able to find any wisdom in this!!

Section 32. (4.)—We object to the clause in the sub-section (4), which says—"the ryot shall either abstain from selling the land." We do not see why, after the landlord undergoes all trouble and expense, this privilege should be given to the ryot. In our opinion he ought to be compelled to sell when the matter has proceeded so far.

Section 33.—This provision is not in our opinion quite sufficient to meet every case. A man owning large landed estates may not have any knowledge of the fact that the occupancy right of some ryot of his is to be sold in execution of a decree, and he cannot therefore be present to bid at the sale. Again, the language used would make it appear that the landlord himself should bid at the sales. If this is really intended by the Ligislature, then all big zemindars will be necessarily shut out.

Section 35. (1).—We do not see how this alone can possibly protect the interests of the zemindar without some provisions entitling him to object to the transfer. There may be private understanding between the ryot and the ostensible donees, by which the ryot parts with his land for its full value; but in order to avoid and defeat the provisions of section 32 (1 to 6), makes the transfer by a deed of gift. Again, the ryot may solely for the purpose of harassing and causing annoyance to his landlord make a real gift of his occupancy right in favour of a person who is the bitterest enemy of the zemindar.

About the provisions of the Bill relating to enhancement of rent of occupancy ryots, we have already expressed above our opinion. The rules the Bill lays down are so intricate, that we fear that they will be found quite unworkable, and that the landlord who would make an attempt at enhancement under the rules is sure eventually to meet with chagrin and disappointment after he had wasted all his energies and good money upon the proceedings.

We should add here that it will not at all be fair and proper if these rules are made applicable to alluvial lands, and they must apply unless the Legislature expressly removes such lands from the operation of the rules. We should say a few words to show how the rules are inapplicable. These lands upon their first formation are not so productive as they do become in the course of two or three years, when they are capable of yielding and do yield the best and the richest crop. The rent at which the lands are settled upon their first formation cannot be a fair and equitable rent after two or three years, but the zemindar cannot expect to enhance the rent if these rules applied. We need hardly say that we are speaking here of lands being added to the holdings of occupancy ryots by alluvion.

Section 51 (b).—In the matter of enhancement of rent upon the converse of this ground, that is, upon the ground—

"that there has been a rise in the average price of staple food-crops in the locality or at the usual markets,"

the Legislature lays down a limit beyond which the enhancement cannot go. Is it not then, we ask, fair and equitable to prescribe instead of leaving the matter absolutely to the whim and fancy of the court, a limit within which the reduction of the rent of the ryot ought to be confined. But so queer and curious is the course of legislation, that there is, we fear, hardly a section throughout the Bill which one can hold up as quite fair and just.

Section 59 (2).—We confess to our utter inability to comprehend how it will be possible to collect the necessary materials which would enable Collectors to prepare price-lists relating to past times. Of course, if you do not care for accuracy, there will be no difficulty at all in the preparation of such lists. But in our opinion accuracy is of the greatest importance, for these price-lists are evidently intended to be guides for the courts in cases of enhancement.

CHAPTER VI.

We cannot conceal our great surprise at reading Chapter VI, treating of "Non-occupancy ryots." It makes us think that it is the intention of the Legislature to throw every possible difficulty in the way of the landlord, and to make for him a bed of thorns throughout, for otherwise it becomes inexplicable why all the conditions and restrictions even in relation to non-occupancy ryots, as are to be found in this chapter, should at all be thought of much less made the subject of legislation. A non-occupancy ryot means a tenant-at-will, if so, everything connected with such tenant and his tenure should be left entirely to the option of the landlord, and there is scarcely any room for any of the conditions and restrictions which the Bill imposes ! !

Section 68 (1).—But if the tenant does not pay each instalment of rent before sunset of the day on which it falls due, what remedy does the Legislature provide for the landlord? None whatsoever, unless it pleases to call the following provision a remedy :—

(3).—" Any instalment or part of an instalment of rent not duly paid at or before the time when it falls due shall be deemed an arrear."

Compare this with the law regarding payment of Government revenue, and you will see how vast the difference is. We all know what the Sunset Sale Law is. Under that law, if any instalment of Government revenue is not paid by the zemindar before sunset of the day on which it falls due, his estate becomes liable to sale. The source from which the zemindar must draw to be able to pay punctually his Goverment revenue, is the rent due to himself from his ryots. Is it then not fair and proper for the zemindar to ask for some legislative provision, which would fully and completely prevent the ryot's neglecting payment of the several instalments of rent as they fall due.

We hope to be excused if we say anything here doubting the sincerity of the offer of help made to the zemindars by the Government in the matter of realization of rents from the ryots. We cannot easily account for the absence in the present Bill of any provision for facilitating the realization of rents, otherwise than by questioning the reality and sincerity of the offer. It cannot be that the mighty minds who have the law-making of the country in their hands, and who could prepare such a long and elaborate Bill, introducing so many novel and strange phenomena into the country, and providing for such a multitude of things for which there was not the slightest need to make any provision at all, found themselves, as if by some spell, quite unequal to the task of framing a short simple chapter rendering the collection of rents easier and more regular and punctual. We all know to what a trite occasion this stupendous and marvellous work of legislation owes its birth. It is only this—Government was convinced that it lay under an obligation to the zemindars to place within their reach a means and way by which they could realize rents from ryots with facility, and hence it proposed to make a law by which this object could be secured. This was and is a real and serious want; if you do not supply this want, why then legislate at all, and legislate about matters which never were thought of by anybody, whether zemindar or ryot, and in which you were never asked by any one to exercise your brains. It is a great pitty that you have given yourselves so much mental labour in producing a work for which nobody, whether zemindar or ryot, ought to thank you. The zemindars cannot thank you, because you have done them the utmost injury you could : and the ryots should not thank you, because, though you profess to do them a good office, there will soon come to them a time when they will in one voice say, that it would have been much better if you had never thought of them. But wait, let us see if we have digressed, though there should be no surprise if we did, and if there is any contagion in digression. If we have at all digressed, it must be because we have caught the contagion of the digression—the very wide and extraordinary digression—made by able and more powerful minds of which we have been speaking. Those minds were asked to frame a law for helping and improving the position of the landlords ; they sat down to do the thing most needed, but when they rose, they left upon the table a Bill, as the result of their labours, which is a cup of the most malignant poison ! !

Now, what we have a right to insist upon is that you are bound to confine yourself within the four corners of the original proposition, and not budge an inch even out of them. Then the most sensible conclusion at which every right-thinking man will arrive is that the Bill now before us should be altogether shelved, and in its stead ought to be framed a short and simple Bill to facilitate the realization of rents.

It has never fallen to our lot to be connected with the business of law-making, and it is therefore no subject of wonder if, in our first attempt to prepare a skeleton sketch of the Bill, which is calculated in our opinion to answer the purpose aimed at, we bungle a little. Regardless of any ridicule which our rough sketch may expose us to, we have ventured to annex to these Notes an Appendix marked A, which embodies certain rules which, in our opinion, may be safely reduced into a law to render the collection of rents easier and more punctual. As we do not claim for ourselves infallibility and perfection, we should, and we do so very cheerfully, leave full power to the Legislature of our country to adopt them with any additions, alterations, and amendments it may think fit to make.

Section 70 (4).—Is not this a very hard rule. To write and give receipts is, and will continue to be, the business of the village servants. The duty chiefly belongs to the patwari, who holds at the present moment a very singular and anomalous position in the village. He eats the salt of the zemindar, for he is paid by him, but when we come to consider how far the relation of master and servant is agreeable and pleasant between the patwari and the zemindar, we can unhesitatingly say that it cannot be more unsatisfactory and harrowing than it now is. The servant is so secure in his office, that he does not care a pin for what his master may think of him. He knows that it is not in the power of the man, who pays him for the work he does, to turn him out of his own authority, and this knowledge, in ninety cases out of a hundred, makes him quite neglectful of his duty. The zemindar is quite powerless and he has to remain quiet, though he sees with his own eyes that his business is going to the dogs. He does not go to apply to the Collector to get the man dismissed, for upon previous similar occasions, when he did seek remedy in that direction, he found to his cost that he was a fool to do so, for it was a regular fight in which he had to spend his time and money, and then return home with an order in his pockets requiring him to put up with the patwaris he complained of, and in addition their greater insolence and impertinence.

We have given above, in a few words, the nature and character of the man who is to be entrusted with the duty of writing and giving receipts. It will not be at all surprising if this man, from motives of dishonesty, or from a pure desire to injure his master, issues receipts in a manner opposed to the directions of the law. Is it then at all just and proper to punish the master for the sins of his servant? The punishment again may be a very heavy punishment if this kind servant happens to be disposed to inflict it. Let us suppose a case like this: There is a village or estate with a jumma of say Rs. 5,000 a year. This is paid, we will suppose, by 100 ryots. These ryots pay, in the middle of the year, only a very small portion out of large arrears due by them. The patwari issues to every one of these ryots receipts, without inserting in them the particulars which the law requires. The penalty for granting an informal receipt as laid down here is—

"If a receipt does not contain substantially the particulars required by this section, it shall be presumed, until the contrary is shown, to be an acquittance in full of all demands for rent up to the date on which the receipt was given."

Now, whether in the case supposed, the punishment will not be a very severe punishment? The man, guilty of infraction of law, escapes scott-free, and the zemindar is made the scape-goat. This provision in the law would strike any Legislature as extremely preposterous; the case is quite different with our present Legislature, which throughout this Bill has strenuously maintained a most hostile attitude towards the zemindars, and the chief aim of which is to crush down the landed proprietors of the country!!

Section 89 (1), (2), and (3), (*a*) and (*b*).—We fail entirely to see the necessity for rendering the matter so complex as the provisions herein laid down are sure to make it. The simpler course, in our opinion, appears to be this. If any improvement is really needed, the zemindar is the person who should make it. Why then make it the subject of contention between the zemindar and the ryot? By leaving the making of the improvement to the zemindar, you avoid a fight before the Collector between him and the ryot, and you thus save both the parties from a good deal of expense which this fight is sure to bring in its train, and you further leave no room for all the most intricate questions arising, which, as a matter of course, will arise, if you retain in the Bill all the provisions about compensation to be paid to the ryot when his ejectment takes place. But it may be contended that by leaving it to the zemindar, there will be this very evil consequence, and that is, he will never think of making it, though it be needed most. We answer that this is highly improbable, and for the following reasons:—

(*a*) Between the two, the man who can more easily afford to make the improvement is the zemindar;

(*b*) it is the interest and advantage of the zemindar to make the improvement, provided it is necessary, for he will gain by it in the shape of increased rents; and

(*c*) the man better able to judge whether a particular work would be really an improvement is decidedly the zemindar, and not the ryot, whom the authors of this Bill have everywhere treated as worse than mere suckling babes.

Even supposing that the zemindar is so negligent of his duty, and so unmindful of his self-interest that, even when it is really necessary, he neglects to make the improvement, that certainly would be a special case for which the Legislature should provide. But generally we think it more advisable and proper to leave the making of the improvement to the zemindar. We do not at all, as we have already said, object to the Legislature making a suitable provision to meet the special case where an improvement is really needed, and the zemindar, whose duty is to make it, neglects to do the needful.

Being of opinion that the making of the improvement should be left entirely to the zemindar, we need scarcely say that we are opposed to the "prior right" which the sub-section 2 gives to the ryot.

We are strongly opposed to the reference to the Collector, provided for in the sub-

section 3. In the first place, there will be no room for the reference, when our opinion is that the making of the improvement should be left entirely to the zemindar, and in the second place, we are opposed to the reference, if the decision of the Collector upon such reference is to have the finality which the Bill gives to it. The Legislature seems to us not to attach due importance to the questions which may arise in connection with the improvements. It is not difficult to conceive a case like this. Some refractory ryots combine and propose a particular work as an improvement, their object being to injure their landlord. A difference of opinion arises between the ryots and the landlord—the ryots considering that work to be an improvement which the zemindar believes would be highly injurious to his property. The result of this difference will be a reference to the Collector, of course upon the application of the ryots, for the zemindar will be the last man to approach that functionary and invoke his opinion in a matter about which he has made up his mind. No doubt there are many honourable exceptions, but we are, we believe, quite correct when we say that there are men filling this high and important position who are, as if it were, made by nature to view at things from a wrong point. The reference we have been speaking of is made to a Collector of that typical character, and he, in his wisdom, declares the work to be an improvement which the zemindar maintains to the last to be highly injurious to his property. The declaration is made, and the refractory ryots lose no time in executing the work. This work proves actually destructive of the property of the zemindar, and thus the zemindar incurs a heavy loss for which he can hold no one as responsible to him.

Section 93 (1.)—We certainly object to this section as it now stands. It should be so framed as to exclude altogether non-occupancy ryots. We know that the Bill gives such ryots also power to make certain improvements, but what we firmly maintain is that, if they avail themselves of the power which the law gives to them, they can do so at their own risk. They know that their footing in the village or estate is for a time only, and that they are liable to be ejected at any time, and if with such knowledge they make any improvement, they cannot and should not look to the zemindar for compensation when they are ejected.

Record of rights. Settlement of rents. Tables of rates, and Record of Proprietor's private lands.

We need say nothing in particular on the provisions of the Bill relating to the above matters, for we fully and entirely concur in opinion with the (most unfortunately for us, zemindars) late Honourable Baboo Kristodas Pal, Rai Bahadoor, a Member of the Select Committee. That Honourable Member in his Dissent made the following observations:—

"The chapters relating to these subjects are doubtless in accordance with the modern ideas of land administration in periodically settled India, but as far as Bengal is concerned, the rights and interest of different parties are generally well defined, and where there might be disputes between landlords and tenants in matters dealt with in these chapters, common sense would suggest that the application of the law should be left to the self-interest of the parties concerned. But the essence of these chapters is that, while liberty is accorded to both landlord and tenant to move the machinery provided in them, the Local Government is empowered to bring of its own motion the machinery into action. The application of the provisions contained in these chapters will, I fear, plunge the country into a flood of litigation, stir up the worst passions of both the landlord and tenant, open a wide door to perjury and forgery, give rise to endless corruption among the subordinate *amlah*, and throw the agricultural population into a sea of trouble, expense, and loss. This was the lesson taught by the revenue survey. Of course, when the parties will themselves apply for the enforcement of the provisions under notice, it will be their own look out; but I do not see any good or valid reason why the Government should, without any application from the parties, step in and inflict upon the country the evils pointed out above. The work contemplated cannot, I fear, be accomplished in two or three generations to come, and for all this time will run the festering sore indicated above. If the record of rights were confined to those cases in which auction purchasers at revenue or summary sales may not receive *jamabandi* papers for their guide, if the settlement of rents were made applicable to those cases in which the ryots might combine and withhold payment of rent, and agrarian outrages might take place, and if the record of proprietor's private lands were limited to those cases in which the proprietor himself made the application, in all these cases, on the application of parties, it would be reasonable and fair, but to give the wide scope which has been given in these chapters by vesting the Government with unlimited discretion is not only not warranted by the necessities of the case, but will be followed by evils which will be highly detrimental to the best interests, peace, and happiness of the agricultural population. As regards tables of rates, the enquiries which have been made on the subject have made it clear that in most parts of the country they are not practicable, that there are so many variations in rates of rents, sometimes one hundred and odd in a village, owing to various causes—historical, personal, economical, and social—that it is hopeless to discover any typical or uniform rate, or what was formerly called *pargana* rate, in any given area. And yet power is taken by the Local Government to order preparation of table of rates for special areas and to charge landlords and tenants with the cost of this work, though they may not in the least benefit by it. In the same way the expenses which may be incurred by enforcing the provisions relating to record of rights and settlement of rents, will be cast upon the landlords and tenants, though no application had been made by

them. Thus a new cess will be imposed upon the land for purposes of proceedings which may do more harm than good to the landed classes.

"As regards the record of proprietor's private lands which go by the name of *khamar* the definition given is wholly opposed to what is contained in the Permanent Settlement Regulations, and excludes all waste lands. Section 138 declares—

"'*Section 138* (1) —The revenue officer shall record, as a proprietor's private land—'

(*a*) "'Land which is proved to have been cultivated as *khamar, sirat, sir, nij, nij-jote* or *kamat* by the proprietor himself with his own stock, or by his own servants, or by hired labour for 12 continuous years immediately before the passing of the Act; and

(*b*) "'Cultivated land which is recognized by village custom as proprietor's *khamar, sirat, sir, nij, nij-jote* or *kamat*.

(2). "'In determining whether any other land ought to be recorded as a proprietor's private land, the officer shall have regard to local custom, and to the question whether the land was before the second day of March 1883 specially let as proprietor's private land; but shall presume that land is not a proprietor's private land until the contrary is shown.

(3.) "'If any question arises in a civil court as to whether land is or is not a proprietor's private land, the court shall have regard to the rules laid down in this section for the guidance of revenue officers.'

"Section 37 of Regulation VIII of 1793 thus describes *khamar* lands:—

"'Section 37, Regulation VIII of 1793. The above exception (exclusion of *lakhiraj* lands from the general assessment), however, is not meant to include the *malikana* lands in Behar, or the *nankar, khamar, nij-jote,* and other private lands of the zemindars and independent talookdars, or other actual proprietors of land in Bengal and Midnapore, &c.'

"It will be seen by comparing the language of the Regulation with that of the Bill that no such condition as cultivation for 12 continuous years was attached to the zemindar's *khamar* lands under the old law. As for waste lands, it is notorious that they were given to the zemindar to enable him to recoup the loss which inevitably fell upon him under the crushing assessment of the Permanent Settlement."

With regard to the expenses of preparing table of rates, &c., we deem it necessary and desirable to quote here a passage from the speech of Baboo Nandan Lall, a member of this Association. He said:—

"I most strongly object to any portion of the expenses to be incurred in the preparation of table of rates being saddled upon the zemindars. It is clear as daylight that the whole Bill has been conceived entirely in the interests of the ryot. If the Government is so kind to the ryots, and so anxious to ameliorate and improve their condition, it ought, in my opinion, to pay all the expenses to be incurred in the preparation of table of rates. There are two parties before us—one of them is the Government which, out of its boundless benevolence, desires to confer certain benefits upon the ryots at the expense of the zemindars; and the other is the ryots who are to be benefitted the most by this most wonderful piece of legislation. Such being the case, it is not, I believe, unreasonable to make the expenses payable wholly by the Government, the benefactor, or the ryots, the benefitted. Why shall any portion of the costs be charged against the zemindars who are the great losers in the whole bargain?

"Should unfortunately the Legislature turn a deaf ear to what I say, and allow the section to remain as it now is, then it is absolutely necessary that the proportion of the liability for these expenses of the zemindars and the ryots should be clearly specified in the law, and it should further be declared that the expenses will not be a joint and several debt; for if they be a joint and several debt, we all know whom the Government officials will first of all pounce upon for the recovery of the whole amount of the debt. Such officials will not think of recovering anything from the ryots, considering the difficulties they shall have to struggle with in doing so. They will realize every pice from the zemindars, leaving them to recoup themselves from the ryots if they can; and I do not think I am at all exaggerating when I say that the zemindars will not succeed in recovering anything from the ryots."

We will conclude these notes with quoting here the opinion expressed in his dissent by the Hon'ble Maharajah Lutchmeshur Singh Bahadoor on the subject of distraint and realization of rents. That opinion harmonizes so fully and completely with our own that we have thought it better to copy it entire instead of expressing the same sentiments in our own language. This Hon'ble Member of the Select Committee says:—

"It has been admitted on all sides that the zemindars need some more speedy and certain means for realization of rent than they now enjoy, and that the present law is quite inoperative in those cases where all the tenants combine not to pay rents. Such a high authority as Sir James Caird recognizes the difficulties of the zemindars in those estates where the 'no rent' cry is once raised, and even in the Bengal Government's memorandum of January last this difficulty is in a way admitted.

"We zemindars had therefore naturally hoped that, with this object, we would be given some increased facilities for realization of rent. In this, however, we have been greatly disappointed, and this Bill, if passed as it now stands, would leave us in this respect in a worse position than we now are, as instead of providing a summary and inexpensive method for the collection of our legal rents, it practically does away with distraint, the one only sure, equitable, and inexpensive process now allowed to us.

"The present law provides that in those cases where the ryots fall into arrears, the zemindar can by his own agency serve them with notices stating the particulars of their arrears and then at once distrain their crops. This is the only system possible in those parts of the country that lie on the frontier where a large portion of the tenants are not even British subjects, and therefore able to evade the jurisdiction of the British Civil Courts, and also in those vast tracts like the Cosi Dearah in the Purneah district which are inhabited by a semi-nomadic class of tenants who seldom stop in the same locality for more than one harvest.

"Even a day's delay in such cases is fatal. The crops, if the ryots refuse to pay their rent, must be distrained as soon as they are ripe, and the ryots should not have sufficient time to cut them without paying in their rents, as they leave the village for good directly they have gathered the harvest.

"The Bill, however, proposes that in the future the landlords must in every such case apply to the Civil Court, and that the crops should be only attached through that court, thereby giving to the ryot ample time to cut and carry off his crop before the court officers can reach the spot to distrain it. Such a procedure not only throws extra and new costs on the zemindar on account of court fees and legal agency which must be employed, but it will result in the landlord having no power whatever to realize his rents from those semi-nomadic ryots who leave the village directly after they have cut their crops. His only remedy will now lie in a civil suit against a ryot of whose whereabouts even he may be ignorant, and to execute a decree against whom, if he succeeds in obtaining one, will be almost impossible.

"I would specially record that it appears to me to be very strange that a Bill, one of the avowed objects of which was to give to landlords what is admittedly so necessary, *viz.*, some increased facilities for the realization of their rents, should leave the hands of the Select Committee in such a form that instead of doing this, it intensifies their present difficulties and deprives them of the little relief they now enjoy.

"It is the proprietors who are responsible for payments of their share of the Government revenue, which they have to collect from their ryots, and it is not the Government revenue only that they have to realise; they have also of late been made to collect from their ryots their share of certain Government cesses, and if by the sunset of the day fixed for payment of the Government revenue they have not paid in their Government dues, they are liable to be summarily sold up and turned out of their properties, and yet they are not to be given any means by which they can ensure their ryots paying to them what they are bound under such a heavy penalty to pay into the Government to a day.

"The practical working of the law, as it now stands, is this, that a proprietor may be sold up and ejected from his ancestral property owing to no fault of his own, but to his inability to recover his legal rents from his ryots, an inability due to a defect in our existing laws, a defect which, as I have above shown, the proposed Bill aggravates.

"I do not for a moment wish to dispute the justice or necessity of the law that makes it possible for large estates to be sold up for trifling arrears of Government revenue, but what I do wish to point out is that it seems to zemindars a want of justice on the part of Government to reserve to itself this power of summary sale, while it refuses any summary powers to the landlord for the collection of his rents from his ryots.

"The Government itself recognizes the inutility of trusting to the civil courts only for the realization of rents, by having peculiar laws of its own in its own estates or '*khas mehals*,' and if necessary for Government, surely such rules are equally so for us. I do most earnestly hope that this matter will be seriously looked into before any final conclusion on it is arrived at, as it is one which gravely affects the majority of the Behar zemindars."

To take leave of these notes, we must one and all frankly acknowledge "the debt immense of endless gratitude" which we, the zemindars of Behar, owe to His Highness Maharajah Lutchmesshur Singh Bahadoor of Durbhunga. To say the least, His Highness is a gem of wondrous beauty and incalculable value, which every Behar zemindar ought to wear, with pride and glory, in his head-dress. In this Tenancy Bill affair he has, in full appreciation of the importance of the questions which the Bill deals with, minded no personal inconvenience, trouble, and discomfort, and has constantly devoted all his time and attention to this momentous subject, in order to acquire a mastery of it, and be thus fully able to represent Behar in the Imperial Legislative Council. Merely by virtue of his position, as owner of a considerable large portion of the landed property in Behar, he has a thorough and sound knowledge and experience of the land system in the province; but not contented with this, he has, wholly disregarding all the heavy expense he hereby incurred, employed different agents in different parts of Behar, solely for the purpose of

Note.—The Appendix A, hereinabove referred to, will be printed and forwarded as soon as the same is ready.

collecting all available information, to be better able to do justice to the great and important cause he has been called to represent. By the services he has done, he has, we make no doubt, greatly endeared himself to one and all of the zemindars of Behar, and we think we do not at all exaggerate when we say that it is our conviction that but for His Highness, Behar would not have been so ably represented in this all-important affair. May His Highness live long, and may heaven shower upon him the choicest blessings it has in store.

Dated the 2nd June 1884.

From—JOHN SYALKARTT, Esq., *for the "Ryots of India,"*

To—The Hon'ble RIVERS THOMPSON, Lieutenant-Governor of Bengal.

The Government of India, by their letter, from Simla, dated 5th May 1884, from the Secretary, Legislative Department, to the Government of Bengal, desires the further consideration of the Government of Bengal on the Report of the Select Committee on the Bengal Tenancy Bill.

We, the ryots of India, beg that your Honour will, at the same time, as before, take into consideration, and give some answer to the various petitions of us ryots of India "to the Government of Bengal," to the "Government of India," and to the Secretaty of State for India. The zemindars have had the honour of an answer to their petition: up to the present time none of the Indian newspapers, not even the *Englishman*, the organ of the zemindars, have been able to controvert our position—our rights to non-enhancement of the rates of rent or revenue fixed by Government in 1790 and confirmed in 1793.

The ryots assisted to form these rates in conjunction with the zemindars, and that of non-ejectment so long as the ryots pay the fixed demands of Government as above in 1790—1793.

Nor have either of the Governments of India honoured the ryots of India with any answer, consequently we are constrained to believe that our above-stated rights are unassailable.

Your Honour, Warren Hastings pronounced the enhancement of rent by the zemindars to be extortion and robbery: he also provided severe punishment against it, though it benefitted Government, for at that time the whole of the collections were poured into the treasury.

The Marquis Cornwallis, after the Act of Parliament in 1784, in 1790—1793, an interval of twenty years, thoroughly denounced it as making slaves of the people, and confirmed Warren Hastings' decision that it was robbery and extortion, and re-enacted its punishment. If it was robbery and extortion in 1772 and in 1793, it is also robbery and extortion in 1884.

That the zemindars have broken their kabuliyats and taken more than is authorized by law from the ryots has been brought by various Collectors to the notice of the Government, we may say, every decade; but the most extraordinary part of the zemindars' petition is their saying that the Government sanctioned by not punishing them according to law: in other words, that the Government are *particeps criminis* in this robbery and extortion from the ryots for a period of sixty years, and therefore robbery and extortion is their right by custom.

Your Honour, we do not think that the zemindars can prove this, and that we shall, from the Regulations and Acts of Government, do our best to prove the opposite. That from 1760 to 1859 the Government did not sanction enhancement of rent upon the ryot, more especially an enhancement not decreed by the Courts of Law. In 1859 new ideas came in with the petition of the eastern zemindars, when Act X of 1859 was enacted, but so clumsy that it has now become a dead letter, having ostensibly been passed in favour of the ryots, but by the opposite reading ruining them.

We, the ryots of India, have never been recusant like the zemindars, who have often refused to pay the Government demand. We have always paid the Government demand, furnished russud, carts, firewood, &c., although we have not been paid for it; the zemindars seizing the money and getting the credit really due to us. Whatever improvement in the country, embankments, roads, drains, &c., have always been made by us, and even now we pay for it by the Road Cess Act. In all things we have, as a rule, proved docile and humble, and the first battles fought by the late Hon'ble East India Company we assisted side by side with the English soldiers, neither the zemindars nor the present race of sepoys assisting: in fact, they were fighting against the English: therefore, we pray to be graciously heard as follows:—

Battle of Plassey, in which some of our ancestors fought on the side of the English.

1769.	Not increase of rents, and to secure the ryot from all further invasion of his property.
1776.	The permanent and undisputed possession of their lands and payment not more than the pergunnah nerick.
1776 to 1790.	Zemindars were yearly tenants-at-will of the Government.
1786. (Ryots.)	The secure enjoyment of the fruits of their industry—Mr. Shore's minute—by the terms of their leases. No enhancement of rent.

Petition of zemindars to Parliament on their proprietary right not confirmed by the facts discovered by the Select Committee, 1787. Also, again not confirmed by the Decennial Settlement of Lord Cornwallis, 1790, when formal *leases* were given, and then counter-kabuliyats signed by the zemindar agreeing to non-enhancement of rent and non-ejectment so long as the ryots paid the Government demand.

1784.
1787.
1790.

Regulations for the Decennial Settlement confirmed, called the Permanent Settlement; neither enhancement nor ejectment in either of these or the subsequent Regulations—No. 54, Bengal Resolution, section 28.

1793.
1790.

Permanent ease and security of the ryot, in conjunction with the zemindar, to fix *his own* rents, abwabs, and kurcha; fine on zemindar if in this settlement the abwab and kurcha were increased.

To secure to the great body of the ryots the same equity and certainty as to the amount of their rents, and the same undisturbed enjoyments in the fruits of their labours, which we mean *to give* to the zemindars themselves; showing that they had it not.

1872.

Passed for the future ease and happiness of the people, not for the zemindar, who are only congratulated on being hereditary tax-gatherers; lands given only to them in trust, same as before the possession of the country came under the British rule, and in the time of the Mahomedans; confirming the Decennial Regulations, and pottah and kabuliyat of zemindars, the settlement of the land law carried out to this day; instance chur land at Sulkea, new pottah for accretion given out in 1877 and kubuliyat signed in that year, same as 1793. If the Government sanctioned the indiscriminate raising of rent, then why give this pottah and receive this kubuliyat with ryots' names also written in. By the above pottah and kabuliyat the petition of zemindars in 1784 is *refused to this day*.

Regulation 1 to 48.
1793.
44 of 1793.
1877.

No enhancement nor ejectment mentioned; zemindar non-suited if he has given no pottah to ryot; also fines on the zemindars for taking more rent, kurcha, or abwabs.

Regulation 8 of 1793.

Land and houses declared to be the real property of the ryot. No law being passed up, nor can be to the time abrogating the above.

Regulation 17 of 1793.

Confirming the same rates for waste land as the old uzlee land, not a word of higher rates or enhancement. Confirming the Regulations of the Decennial Settlement: these Decennial Regulations should be placed before the public in full.

Regulation 44 of 1793.

"Enacted to put an end to all misconstruction of the previous Regulations forbidding enhancement and ejectment, and continuing the terms and rates for ever, so long as the ryot paid the pergunnah nirick.

Regulation 4 of 1794.

1808. Madras and Benares Permanent Settlement.

Mr. Dodgson, the member for Madras, reiterating the above non-enhancement and non-ejectment for all ryots from Cape Comorin to the most northern parts of India, not impugned by Governor-General nor Court of Directors.

1811.

1812. Report of Select Committee, House of Commons, completely against the zemindars and their petition of 1784 Regulation 5 of 1882.

Where no pergunnah rate of 1793 has been fixed, then authorizing the prevailing rate of neighbouring pergunnahs re-enacted in Act X of 1859, so no enhancement in that year and since for the prevailing rate bowls over every new attempted rate.

1812.

Judgment—*vide* Marshman's Civil Guide, confirming ryots in the possession of their lands so long as they pay the pergunnah nirick of 1793.

1816.

Memorandum of Lord Hastings.

1819 to 1825. Letters of the Court of Directors, correcting the erroneous notions of the Judges, acknowledge permanent settlement of ryots, non-enhancement and non-ejectment.

1815. Memorandum of Earl Moira.

1822. The expediency of maintaining the tenures of the ryots. His Lordship in Council considers it the bounden duty of Government to maintain.

1832. Holt Mackenzie, the zemindar, who is neither an agriculturist nor owner of the soil.

1817. Memorandum of Mr. Canning.

Regulation 7 of 1822. None but the rates recorded in Government jummabundee to be the rules for regulating the rent, even on appeal.

Regulation XI of 1825. Rules for chur land no rates higher than parent tenure.

1830. Letter of Court of Directors directing assessment, but silent on enhancement and ejectment.

1831. Circular order authorising a zemindar to take more than the pergunnah rate only when agreed to by ryot. It is impossible to protect a fool.

A circular order of Revenue Board has not the full force of an Act or Regulation, but it refutes the idea that the Government could ever so have acted against the law as to silently sanction the robbery and extortion by the zemindar. It cannot affect the prevailing rate, as it does not affect the ryot's neighbour : in any year the ryot can withdraw his assent. The ryot can at any time revert back to the prevailing rate of the pergunnah in 1793 by Regulation V of 1812.

1833. Memorandum of Lord William Bentinck.

1841. Answer of Government to Landholders' Society acknowledging that ryots settled after 1793 had khudkhast kudemi rights in consultation on the draft of Act XII of 1841.

1840. Sir J. P. Grant :—" The right to enhance according to the present value of land differs not in principle from absolute amendment of the tenure." Sir J. P. Grant's opinion on the rights of the ryot as proprietor of the soil are too well known. Circular order.—If zemindar refuses to give a pottah to the ryot, the ryot was authorized to take a copy on stamped paper of that page of the Government jummabundee in which his land is mentioned, and that was authorised to be his pottah.

Act XXXI of 1858. Revenue settlement officer *only* to fix the rates of alluvial soil.

1858. Eastern zemindars in their petition acknowledge that they have no right by law to enhance the rates of rent of the ryots, but petition to have it. The outcome of this was Act X of 1859.

1858. Mr. Sconce's memorandum.

Collectors of every decade informed the Government of the malpractices of the zemindars, but by reason of no public prosecution failed to bring them to justice.

In no way have the Government at any time authorized the raising of the rent privately by the zemindars before Act X of 1859 was passed, and it is only by Act X of 1859 that it was attempted to be done by Courts of Law. Both Sir Cecil Beadon and Sir William Grey acknowledged that Act X of 1859 was an infringement on the previous laws protecting the ryots from enhancement of rates of rent and ejectment, and to substantiate this we have the petition of the eastern zemindars in 1858. This Act X of 1859 violates No. 54, section 28, Resolution on the Bengal Settlement, freedom of contract of the ryot. Lastly, we have the answer of the Government of India against the memorial of the Landholders' Association to Her Majesty's Secretary of State for India, dated 12th February 1884 :—" We will not repeat the evidence which has convinced us and *former Indian Governments*" that " the acts of the zemindars have not invariably been the measure of their rights, and that illegal cesses and abwabs presuppose the existence of established rates of rent."

Here we have former Indian Governments not agreeing nor condoning the illegal oppressive acts of the zemindars. Therefore, it cannot be said to be a legally established custom of the country. The former Indian Governments have only followed in the footsteps of the Marquis Cornwallis, who pronounced it a *violation* of the established laws of this country. We trust we have shown that the zemindars' assumption of condonation of the robbery and extortion from the ryot is a might and not borne out by any acts of former Indian Governments.

Your Honour, the whole dispute between the zemindar and ryot is the wish-for-to-be-believed-idea that the Dosala rates are unknown. Therefore, the zemindars ask for enhancement of rates of rent. These rates are well-known ; not forgotten throughout Bengal and Behar. We have the evidence of Mr. Collector D'Oyly to that effect, and we pray that a Committee be appointed to take evidence thereof, and of which Committee Mr. D'Oyly be made President.

The zemindars have desired to be heard at the Legislative Council Board. We ryots also kindly crave the privilege by counsel, and are willing to abide the result.—" God defend the right."

As we ryots are very, very poor, we beg that the Government will graciously and substantially reward the winning Barrister.

Dated 16th June 1884.

From—J. STALKARTT, Esq., for the Ryots of India,

To—The HON'BLE RIVERS THOMPSON, Lieutenant-Governor of Bengal.

Having perused your Honor's instructions to the Commissioners of Divisions, we note that there are many clauses pointed out as dangerous to the rights and liberty of the ryot, rights acquired before under the permanent settlement of 1793 and since. Therefore your Honor desires that the Bengal officials will give all these points their further attention and discussion, so as to eliminate them from the Bill, and renew the guaranteed protection from time immemorial to the ryots with a right and workable effect.

In furtherance of these good wishes expressed by your Honor for the welfare of the ryot, we beg in this letter to point out where the intended Bill presses hard upon the ryots.

In the first place, we beg to bring to your Honor's notice that there is no adequate protection for ryots entitled to fixed rates of rent from being harassed yearly, or every ten or fifteen years, from attempts by lawsuits to dispossess them, or to raise the rents or revenue payable by them. Ryots that are entitled to fixed rates of rents—from sixty to ninety per cent. of the agricultural population—are as well known to the zemindars as to the ryots themselves, and there is not the least reason that every ryot entitled to hold at fixed rates should be at the mercy of the zemindar for a lawsuit when it pleases him. We believe that we have at hand a clause that, if inserted, would protect the ryot, *viz.*, "that every zemindar or his substitute so suing a ryot entitled to fixed rates of rent for every such offence should be fined one thousand rupees; a great many such suits, say 20, would subject him to be removed; and every Judge or Subordinate Judge hesitating to institute such fine should be summarily dismissed from the Government service."

The above may appear a Draconic law, but great crimes require severe measures for their repression, and the same idea, though couched in different words, was the rule of 1772 and 1793. We have good grounds for desiring this repression of crime to be reproduced in 1884, and will lay before your Honor the litigation that has been through 30 years, and for only a small plot of land from 13 to 40 Bengal bighas, over which sums of money by lawsuits, sums not recoverable, have legitimately been expended, approaching near Rs. 10,000 (a like suit to this was borne by Messrs. Burn and Company, who eventually threw up their land). We, Messrs. Stalkartt, ryots of Ghoosery, Sulkea, are in possession of upper and chur land for over a century, a little time longer than Sheik Rutten Bepari; the upper land held under mourusee mokurreree potta at fixed rates of course could not be touched, nor can the chur, as it is protected by Regulation XI of 1825. The zemindars knowing the above well, having skilful lawyers, have tried to dispossess them by law, and to enhance the rates of rent of the chur. They cannot be said to be ignorant of the status of Messrs. Stalkartt as ryots of the première class, consequently their proceeding must have been carried on with a dishonourable intent. We will give a short history of the churs round about Calcutta. Regulation XI of 1825 being passed, the churs were leased out at Rs. 5-5-4, according to Regulation VII of 1822, the rate to be paid by the ryot. At the end of five years, Government attempted to raise the rent to Rs. 20, but after some litigation, the zemindars as well as ryots protesting, it was reduced to its original rate Rs. 5-5-4 in a very able decision by Mr. Thomas Reed Davidson, Commissioner, Jessore, 12th March 1845. The zemindars tried to dispossess Messrs. Stalkartt by giving the land against the law for chur land, Regulation XI of 1825, to one Ameeroodeen Moonshee in 1849. The High Court retained Messrs. Stalkartt in the possession of their land, 1851. Since then the zemindars have been trying—two five-anna and one six-anna zemindar—to raise the rent (by many lawsuits) of this chur land, consequently harassing the ryot against the tenor of the zemindar's kabuliyat to Government—

1st.—By lawsuits before 1759, trying to enhance the rates (the ten-anna zemindar).

2nd.—After 1859 the six-anna tried on all the points of Act X of 1859.

3rd.—Five-anna zemindar thrown out on its being declared in a Municipality.

4th.—Six-anna sued on any or no plea, not even stating equity and good conscience, nor quoting any law in 1879. In 1884 it was ruled that the land came under Regulation XI of 1825, and the same rate settled Rs. 5-5-4, the same as in 1845, by Mr. Thomas Reed Davidson, Commissioner; therefore *res judicata*, on the ground *res judicata*, on all the grounds of Act X of 1859, *res judicata*, the ground of a Municipality.

The last decision of 1884 had to go through four courts, and the costs incurred not permitted by the court over Rs. 2,000, paid by the ryot for being permitted to pay the same rate Rs. 5-5-4 per bigha as decreed by Mr. Thomas Reed Davidson, Commissioner, 1845, just 39 years ago; and the Messrs. Stalkartt are condemned to pay costs to the zemindar Rs. 28, and to receive from him Rs. 132, costs for the decree of Rs. 46, their own legitimate cost Rs. 2,000, less Rs. 104=Rs. 1,896 dead loss.

This suit was only for Rs. 75 per bigha; the previous ones were for Rs 200 per bigha. This might fairly be called keeping the ryot, according to the late Hon'ble East India Company, "in the permanent and undisturbed possession of his property," 1787 A.D. This

is not all; the zemindar having lost the suit in the lower courts has the privilege of taking the suit to the High Court, and the Messrs Stalkartt will have the extreme privilege of paying some more costs, about Rs. 600, which the court will not allow, all for the privilege of paying, as we did before, the large sum of Rs. 46.

In the above calculation the cost and loss of time, travelling, neglect of one's usual business of over four years, four suits before three separate Judges, is not taken into calculation. Could any ordinary ryot have had any chance of being successful, more especially as he could not have paid a tythe of the expenses not recoverable by law. Where are "the secure fruits of our industry" promised to us in 1769, 1776, 1786, 1792, and our "future ease and happiness" in 1793; so that all lawsuits should be eliminated from the Bill. We next come to ryots of occupancy at unfixed rates; this is a misnomer, for all ryots paying the annual demand by Government, not of the zemindars, were by Mr. Grant, Sheristadar to Government in 1787, entitled to occupancy tenure. It is the desire of the new Bill to make the occupancy ryot pay more rent or revenue than the ryot at fixed rates, therefore in the race of life he is more heavily handicapped than the ryot at fixed rates, and the second occupancy ryot or tenant-at-will still more so, for he is literally at the mercy of the zemindar—men who up to this day are not remarkable for good faith or any of the qualities which the Marquis of Cornwallis believed were inbred in them, and which the permanent settlement would bring forth. The Marquis of Cornwallis permitted no tenants-at-will. The permanent settlement was made to firmly attach the ryots to a village, for they had on account of the oppression of the zemindars taken to a roving life, ploughing here and there, and when pressed for more rent flitting to some other zemindari. Having thus far stated their rights to the permanent settlement, we will now turn our attention to the sliding scale of the Select Committee.

This attempt at raising the rates of rent of the ryot, called occupancy ryot, by the Select Committee on the Bengal Tenancy Bill, is a more strange anomaly than all the phases of the Ilbert Bill.

The raising of the rates of revenue for whom? Not for the public good, railways, canals, Government officials, &c., but for the private benefit of a class who are tax-gatherers, and to whom higher rates of revenue than those of 1793 do not belong, acknowledged in this Bill for ryots at fixed rates, that is, for all ryots, there being no distinction of classes in Regulation VIII of 1793 (the law of Settlement).

Let us consider the position of Government: the acumen and knowledge and time of the Legislature are employed to frame traps to catch the unwary poor ryot, and force him to pay more money than he agreed to pay in 1793; *the right is in the man, not in the land,* for no benefit to the nation, and therefore the Legislature should not be employed for the benefit of the few rich to make them richer, at the expense of the many poor to make them poorer.

It is a species of unheard-of thoughtlessness, if not wickedness, not to be found in the present annals of any other nation. Your Honor will, we hope, excuse such free language, for our time is limited to the 14th August 1884. We trust that we shall be able to vindicate our strong language by our critique on the *a, b, c, d* sliding scale for enhancement of rates of rent in the Report of the Select Committee lately submitted to your Honor; any such conduct of the Legislature towards any other private enterprise would be thoroughly denounced throughout the world. The zemindars were before 1793 official Government servants collecting the revenue. In 1790—1793 they descended into private life, and are not entitled to any more than their contract as brokers or commission agents for collecting the revenue, they are paid 10 per cent., but we ryots have, by the Decennial Regulations, the right to ask the Government to charge oppressive zemindars or tax-gatherers.

Apologising for the above forcible language, we now shall attempt the analization of the sliding scale *a, b, c, d*; we prefer to come on the last clause *d* before the others, "that fluvial action has increased the productive powers of the land." This is a difficult question for the zemindars to prove; the mere fact that there is an inundation fluvial action is no settlement of the question. We must wait till the crop of next year is reaped and compared with the returns of former years before any decision can be arrived at.

The alluvial mud of the Hooghly is no better now than in the time of Moses, 3,000 years ago, and even should it have given greater results than last year, the only fact that we can arrive at is that the continual cropping has impoverished the soil, and it is now restored to its former state, when the ryot agreed to pay a certain rate for the land if it continued in that state; if overwhelmed by sand he would certainly throw it up, and the new law would force him to pay enchancement for fifteen years.

An inundation fluvial action does not always bring down beautiful alluvial soil; it very often brings with it so much sand that any improvement is more than exhausted in the first year, and afterwards it is barren, and to puzzle the Judge on infinity of changes can be rung between soil of 1st quality and sand,

ditto 2nd ditto,
ditto 3rd ditto.

The Culna indigo factory, in the district of Burdwan, was shut up for the reason that too much sand was deposited in the first place, and in the second place the land became so high

that not every inundation could overflow the land, it was only a *very* high inundation, which did not take place every year; so that the lands in a very short time were *exhausted*, and the factory in consequence was shut up. The same thing took place in Tirhoot; sugarcane being sown, arrested so much sand that the lands were useless for any crop. How is the ryot to recoup himself for the losses by inundation fluvial action? Will the zemindar pay him for his losses, as he has to receive higher in advance rates of rent? Rent paid in advance of crop. Besides the loss sustained by the ryot, he is to pay rent in advance for the next year's crop. Numerous lawsuits would crop up every year, for lands liable to inundation or fluvial action are so every year. The deposit requires yearly inspection and litigation fresh every year.

The ryot by the new law is to pay his rent in advance. Inundation usually takes place in August and September, so that, when it has occurred, the ryot has paid three kists, and so loses three-quarters of the yearly rental, which by the old law he would not have paid—no crop, no rent; besides losing his crop, most likely his house would be damaged, which he would have to repair, also the bunds of the field next year. From no crops no receipts, he would have to pay the zemindar for the new year his rent at an enhanced rate still in advance, and if he could not, he would be charged interest.

Number of officials have seen the country covered for miles with water, the wretched ryot perched on the roof of his house, because the water was also inside, the house *ruined*, and this man is to pay higher rent next year, and for fifteen years more at enhanced rates.

Supposing no fluvial action inundation takes place for four years, if he had not paid his rent in advance, this little amount of money so saved would perhaps have enabled him to recoup himself. In the fifth year comes another inundation fluvial action which brings him back again to poverty.

When inundation fluvial action took place, it was a good zemindar's cry to go up to Government for remission of rent, but the cry against the ryot is to make him pay more. Government usually remitted the rent, and *never* asked the zemindar to pay higher rent for the next and succeeding years; it was looked upon as a great calamity, and any such demand would be adding insult to injury.

Is the zemindar to refund the rent of the year of inundation with interest?

Our attention will now be given to (*c*), "that the productive powers of the land held by the ryot have been increased by an improvement effected by or at the expense of the landlord" (zemindars). The framers of this clause ought to have had a little more agricultural knowledge. What are the productive powers of the land? The productive powers of the land are not produce. The productive powers of the land may be great, but that is no reason that the produce must be great. It is only by the culture of man (ryot) that the productive powers can be developed. This evidently is the ryot's business, not the zemindars. The productive powers are known only to and made by God, so cannot be increased by any action of the zemindar; it is morally impossible. All means that can increase the crop, such as manuring, draining, ploughing, weeding, sowing, are the province of the ryot, and if the zemindar were to interfere and do these himself for a year only, that he might go into court and so attempt to raise the rent, the ryot would be justified in turning him off the land. In former times the making of the road or a railroad was said to increase the crop, but even that stupid plea is taken away, for there is now a Road Cess Act, so that the ryot now pays for all possible improvements as he did before in the olden times. But what we do learn from this is the reverse of the clause that if the zemindar has made no improvement, then he is not to have any enhancement.

By this reading the zemindar is shut out from scale (*b*), any advantages accruing from the rise of prices, and (*d*) the miscalled benefits accruing from inundation, less the loss to the ryot of that year's crop and rent.

We next come to (*b*), "that there has been a rise in the average of staple food-crops in the locality or at the usual markets;" but it does not say that this rise has been effected by or at the expense of the zemindar. (*c*) infers that if this improvement is not made by the zemindar he is not to have it. Supposing now that this rise is made by the ryots withholding their crops from market, and being in want of money borrowed for their requirements, paying interest thereon (this is now very often done), then the zemindar is to get the benefit of action solely that of the ryots. No reliable statistics of the price obtained by the ryot for fifteen years' back, more particularly by averages, so that the whole of this clause is unworkable.

The intrinsic value of the crop, whether round, well filled up grain (colour, &c., not being recorded, as Englishmen record a tea crop or indigo crop totally distinct from a market demand) would prevent an average public price being defined for years past. In estimating crops there are two points to be considered—first, quality of crop, and second, state of market.

How are the prices of staple crop to be discovered? Take rice for instance. The ryot cannot sell rice to his neighbour, for his neighbour has plenty of it, so he is forced to sell it to his mahajuns. There is no collection of people that one can call it a market; the mahajuns are scattered here and there in the interior of the country, as it suits their

interests. The real market for rice is only in Calcutta, and it has passed through more hands than one before it reaches the Calcutta market, which is excluded by the law. The Inspector of Prices will have to travel miles to inspect mahajuns' books; when placed before him can be read readily the characters of these accounts in Bengali, Nagri, &c.; therefore it will be necessary to attach to this office an interpreter, &c. The inspection of mahajuns' books is a very long affair. Any official who has had to do this in court will know of this difficulty. To get any average to do justice to the ryot, a great many books will have to be inspected, and as some keep two sets of accounts, each one will have to be sworn, &c., and the time to do this will be immense. Before one-half are examined it will be necessary to examine them again, once in the dearest time of the year, and once in the cheapest time; so that it would evidently fall into the hands of the amla of the court, who are at the command of the zemindars, the ryots can put no trust in them. Look at the attempt to boycott the most important documents in the suit of the zemindar *versus* Messrs. Stalkartt, in which one of the native Judges, the amla of the Court, the opposing native barrister, were all implicated. This is not all; the English Judge gave a decree and the amla of the court had to bring it into practice, that is, to define the exact amount in rupees which were due. What occurred; it was only the six-anna zemindar that sued, the amla gave to the six-anna zemindar not only his own share, but the share of the other two five-anna zemindars, and the costs of only one court, whereas it had gone through four courts, therefore four sets of costs should have been calculated. This was brought to the Judge in Bengali, who having faith in his amla signed, and now there must be another petition to the Judge to correct it. If it had been an ordinary ryot, he would have been sold up on the spot. The zemindars as a rule merely require a decree for one bigha for land in the interior, and on the strength of it seize ten acres even of other ryots not parties to the suit. As before, he merely wanted his master's badge, a plea only, not a rupee's wages, not a right, and he can then earn his own livelihood. No wonder that after 20 years of Act X of 1859 the official sent in quest of the prevailing rate could not find it, and asked for a prevailing rate did not know that he had to discover it by calculation from the ryots' receipts. Respecting the costliness of suits to the poor ryot, which your Honor desires to guard against in the new Bill, we have only to bring to your Honor's notice the Government statistics that a very large number of the ryots of Bengal are very poor, and plough such a small amount of bighas that they cannot afford the luxury of a lawsuit, the only panacea that the Government can offer to the poor ryot for all the ills of life before Judges who believe that it is the desire of the Government to enhance the rates of rent at all *costs to the ryots;* the word enhancement is always cropping up, but the word reduction seldom or never. Perhaps it would be agreeable to the Legislature that the zemindar should pay all the costs of enhancing the rates of rent, the ryots' as well as his own, not merely court costs, but actual costs.

JOHN STALKARTT,
for the ryots of India.

The 16th June 1884.

TO—HIS HONOR THE HON'BLE RIVERS THOMPSON, Lieutenant-Governor of Bengal.

YOUR HONOR—

We have a few words more to say respecting fluvial action; perhaps it is intended for alluvion. Now accretions by alluvion are not the province of Act X of 1859: there are separate laws peculiar to this description of land—Regulation XI of 1825, and Act XXXI of 1858. The principles of these Acts are condensed as follows:—Before the zemindar can levy any rent from the ryot, arrangements should be made by Government, *firstly*, for the amount of rent to be paid by the ryot; *secondly*, the percentage thereon allowed to the zemindar for expenses; *thirdly*, the amount of the zemindar's commission agency charges. It appears to us that the Government, in this new Tenancy Bill, do not desire to go backwards behind Act X of 1859, but in this question, as Act X of 1859 is shelved, it cannot be a bar to our ancient rights, which we ryots have not forfeited by any bad conduct, and we have thus to go back to Regulation XI of 1825 and Act XXXI of 1858; by this latter law, it is only the Settlement Officer that can fix the rate for the ryot. These laws clearly show that the English proprietary right for chur land is not in the zemindar, thus backing up Regulations I to XLVIII of 1793, by which laws our rights are continued to us for ever. In our last letter we had the melancholy pleasure of informing your Honor that a costly interminable law-suit was no panacea for all the misfortunes of a ryot's life; we had scarcely written these words, when we find it confirmed in the *Englishman* of the 14th June. An "important meeting of Landholders at Bankipore on the Bengal Tenancy Bill, 13th June." We beg your Honor's careful perusal of the various speeches made by the members of that meeting. His Highness the Maharajah of Hutwa goes over the old grounds which have been refuted so often, that really he should be ashamed of himself if he cannot refute the writings of the ryots and others. Assertions are of no value unless backed up by facts, solid reasoning and law. It is useless giving ideas of a bad state of about-to-be-affairs without facts, and according to the words of the Maharajah, we ryots beg to be excused from believing in the value of the zemindar's irregular summary and *ex parte* proceedings which they desire:—

Extract from the speech of Rai Prakash Lal Bahadoor, Dewan of Dumraon: "What if

you change your laws, would you be able to meet these cases of oppression, I *say No.* I do not like to mince matters, and I will be as candid as I possibly can. A ryot is beaten and his crops distrained, his bullocks seized by one of these *subburdust zemindars* for not agreeing to to pay an enhanced rate of a few rupees. He (the raiyat) goes to the nearest police, and here he finds that the matter is one of the *longest purse.* He goes to one Court, civil or criminal, and has to dance attendance from day to day away from his distant home. In the meantime he spends *his all* in securing the attention of the *amlahs* and mukhtears, and in arranging to get up the preliminaries to a just decision of the case, and what after all if he gets a decree. He curses the day when in a freak of fancy he had chosen to fly for protection from the *subburdust* man to our constituted tribunals. I know of cases, sir, where the recalcitrant raiyat, after playing *the rôle of subburdust ryot,* and winning in legal proceedings every inch of the ground against the zemindar, had ultimately thought it wiser policy to agree to what they thought his unjust demands. The present law is quite ample for all purposes, only, as I said before, it is the *administration that is in fault.*" This is nothing but setting Government at defiance, borne out by the *Indian Witness* of late date. What we raiyats have always said is, that the zemindars consider themselves above the law and act so, and therefore the least that the Government can do is to fine them heavily for a first offence and remove them for a second, strictly according to the established laws of this country. I beg your Honor will consider the style of arguments used; it may be good pleader style to vilify your opponent at the first onset, but with thoughtful men it tells against the speaker. The Dewan of Dumraon Raj describes the zemindars as *subburdust;* to this we agree, for it is true, he next calls the raiyat *subburdust,* so as to make both parties *alike;* but as his speech goes on, we find that the raiyat is not *subburdust,* but that he is a *law-abiding man,* and to the praise of the courts he is successful in his suit; but when he returns to his village his success in court is useless, other pressure is brought to bear, and he is obliged to succumb, and thus he "enjoys scarcely the fruit of his labours" promised to him by the Government from 1765 to 1793 and to 1884 and in future. This Dewan is trying to instruct the Government that their courts and police are useless, and that there is a power in this country superior to the Government, called the zemindari power; if so, no time should be lost in displacing it, as we have said before, and it is our raiyat's right that the zemindar should be changed. We now return to the principles of the Bill, and before passing on to the prevailing rate, we wish to make some remarks, which may assist in describing the prevailing rate and its aspect. Your Honor, Act X of 1859 is to be superseded; being superseded it has no power, and therefore cannot bar our ancient rights. In all descriptions of zemindars and raiyats, every other word refers to ancient rights of 1793, and before. We have said in our petition that the right of pre-emption being given to one man, the zemindar would keep off all other buyers, and the land and house of the ryot would be sold for a song. Your Honor, 95 per cent. of the lands of a village belong *to the inhabitants of that village* called public lands, and only 5 per cent. to the zemindars as nankar or khamar or subsistence land. If any person or persons should have the pre-emption of buying, it should be the remainder of the village community to whom it belongs, and to whom the zemindar could have no objection, and by public auction, then the ryot would stand a fair chance of getting his due. We cannot forget that before 1793 the zemindar made the raiyats remaining in a village pay the rent of those that ran away, so that pre-emption is doubly the ryot's right. The right of distraint that the zemindars' desire is certainly, according to your Honor's memorandum, not a humane proceeding; it is the power of turning a ryot out of his holding, and so bringing on death by starvation, and not according to the declarations of the Government before and after 1793, "and for the future ease and happiness of the ryot," that the ryot "should be kept in the undisturbed possession of his lands and houses." Regulation XVII of 1793 forbids the distraining of the houses and lands of the ryot or any other real property belonging to him—neither his plough, nor his bullocks, nor his seed for sowing next year. By this law he is preserved; the crop being hypothecated for the rent, why should the land be seized; also, is it not more humane to close accounts every year; by so doing there will be no arrears, no other debtor could seize the crop, and so force the ryot to be backward in paying his rent. When a record of land and rates is made, then with the old Regulation XVII of 1793—the law for distraint—the ryot would remain secure in the "undisturbed enjoyment of the fruits of his labour." No crop, no rent as of old, therefore no arrears of rent for after lawsuits, for seizure of the *ryot's landed property.* All suits between zemindars and ryots should not be biassed by native judges and venal amlahs, but by juries; and it would be a good thing introducing the system so as to lead to criminal suits to be tried in the same manner. To introduce the English law of distraint into India, it should be thoroughly understood. Supposing there is a distraint, if there are crops on the land, the landlord must wait till they are reaped (and cannot demand interest on the unpaid rents), if the crops are hypothecated to him, and if English ideas are going to prevail, then why should the native landholder ryot pay interest till his crops are cut and housed; our ideas are totally against the ryot paying interest on kists unpaid of the *current year.* For the rent of an acre or two you cannot sell up the whole of a tenant's holding, you can only distrain to the value of the debt; this would be the means of breaking up a ryot's holding piecemeal, and so make no end of divisions and sub-divisions. Bastu land, on which are the houses and granaries of the ryot, the zemindar can never have a claim to; it is useless to make patched up legislation for rights, and laws will then get mixed in inextricable confusion. The Government have an idea that the zemindars want support in their collection of the rent or revenue, but the zemindars have always collected their righteous dues, and much more, by the law of distraint, Regu-

lation XVII of 1793, for 67 years up to 1859 without complaint, and with very little trouble; so why try to upset the best humane system? it is only unlawful demands that meet with opposition from the ryot. The zemindars are quite sharp enough and have brought suits for arrears of rent at "enhanced rates," and the courts have allowed it. It is this action that brings discredit on the courts. Your Honor, there is not sufficient open discussion on the laws about to be enacted—we mean discussion by the inhabitants of the country (the ryots), not the officials; the officials by their segregation by Government seem utterly unable to understand the wants of the people. Your Honor has desired that the Commissioners of Divisions will collect their subordinate officials and fairly discuss the old (of 1793) and new Bengal Tenancy Bills. We beg that your Honor will permit to be present any ryot so desiring to enter into the discussion, that he be not refused, and all that he has to say be strictly recorded and forwarded to Government, nay not only so, but that many ryots be invited, &c., &c., &c., &c.

I have the honor to be,

Your Honor's most obedient humble servant,

HOPE TOWN:
The 27th June 1884.

JOHN STALKARTT,
for the Ryots of India.

TO—HIS HONOR THE HON'BLE RIVERS THOMPSON, Lieutenant-Governor of Bengal.

YOUR HONOR—

IN this letter we have promised to consider the prevailing rate and its aspect, but before doing so we will quote from the following address, entitled "An unbeliever's description of Christianity," by the late Right Hon'ble Lord O'Neill, so that we may have some axiom to work upon. Now, the very idea of a man having a right to anything involves moral distinctions. For if A has a right, B does wrong if he endeavours to deprive him of it. To do so would be to do him an injury—an injustice. It is something more than merely inflicting pain upon him, which is cruelty. The idea of its being an offence against right is also included. On this account I look upon moral distinctions as having a foundation in nature—in human nature at any rate—and it is because we have no right to injure our neighbour that the precepts of the Decalogue, those of them which inculcate our duty to our neighbour, were given. There are other possessions, external to the individual, the right of which is given by the law of the land, hence the idea of ownership; hence also the general consent of mankind that it is a wicked thing to deprive any one, either by force or subtlety, of what is his own.

The aspect of the prevailing rate is in conjunction with occupancy rights. The occupancy rights of the ryots were spoken of by Mr. Sheristadar Grant in 1787. Ryots had a right of occupancy so long as they paid the annual demands of the sovereign not of the tax-gatherer, his servant. If the demands of the sovereign are limited by Regulation I—48 of 1793, this limits the demands of the tax-gatherer to the same extent, and we do not see how the tax-gatherer is entitled to any more than the rates of 1793, confirmed in 1794, passed to remove all doubts. Then all ryots are entitled to rights of occupancy so long as they pay the rates of 1793.

Ditto the pergunnah rate of 1793.

Ditto the prevailing pergunnah rate of 1812.

The prevailing rate of 1812 must have been in existence before 1812, for we find no new rates were made that year: therefore they must be identical with the rates of 1793, confirmed in 1794, and so transmitted to and by Act X of 1859, for it is the first clause, and overrides the subsequent clauses. We have now to consider the effect of the occupancy right brought to notice in 1787, and carried through all subsequent legislation. The argument consequent thereon has been brought forward by the Duke of Argyll in his speech on the Irish Land Act (certainly a better term than the Bengal Tenancy Act), formed after the model of the Indian law. These arguments are to be found in the newspaper *County Gentlemen*, June 21st, 1884. True extract:—"In a single sentence His Grace set forth the actual state of affairs in Ireland in respect to the land. He said occupancy of land is at its full value, and the ownership of land is destroyed." Add to this that the prevailing rate is a fixed rate in India, the only clause for assessing the land (not for enhancement—a misnomer) to this day that can stand. We have a clear right that the other clauses be abandoned. The right of occupancy being in existence, therefore the ownership of the land did not belong to the zemindar in 1784, 1787, 1793, 1812, 1822, 1825, 1848, 1859, nor since to this day, 1884; therefore the description of the Act should be altered, and called the Indian Land Act, which would mislead neither old nor young civilians. The question arises whether the ryots are to be deprived of the prevailing rate, which will, of course, include the right of occupancy. From the memorandum of Mr. Reynolds it is quite clear that the Government see the drift of this clause it on one side, and the other clauses on the other side, all cannot stand: one must give way to the other. If the prevailing rate is one of the clauses, and it should be so, for has it not come down from 1793, 1812, 1859, 1884, and it is proposed to be continued in the law after 1884. In the list of the Select Committee, marked A, therefore it is *Seniores Priores* to

all the others, and should not be eliminated from the Bill on any account; but undoubtedly the others should be. If the present reign had been Hindu or Mussulman, then on account of the want of the sovereign, and of the British reign the wants of the country, then the taxes might be raised, for a time only the Permanent Settement might be broken, and the amount of the war tax levied by Porus, 25 per cent. of the gross yield might be taken; but as it is legislating for the benefit of the tax-gatherers, it appears to be a questionable state of morality for the British nation to indulge in, especially as they plume themselves *par excellence* as the people of God to do that which is right, and not to leave the people at the mercy of the tax-gatherers. The morals of the Hindus and Mussulmen would not prevent them acting as they pleased, but with Englishmen it would only be dire necessity that would force them to break through the Permanent Settlement for the wants of the country only but this is a question of morals, is undoubted, and from the above quotation from the writings of the late Lord O'Neill we are not singular in our belief in respect to our duty to all men. From the history of the great Akbar, a Mussulman, the taxation of all ryots remained stationary for 140 years, and enhancement of rent by the British Government would not be allowed, and are we, Christians, the salt of the earth, to be less righteous than Mussulmen Mahomedans and permit an enhancement every ten or fifteen years? The morals of the Mahomedans are very low; "thus—make money, but when you do so, give to the church:" compare the above with the tenets inculcated by the Decalogue; are we to be less just than the Mussulmen? What is the idea conveyed by the words "the prevailing rate," it means universal equality. Why do the inhabitants of the Soudan attach themselves to the Mahdi? The very same idea,—justice. The reform of Islam, the establishment of a universal equality, law, religion, and community of goods (*Nineteenth Century*). Nowhere are the natives so contented, peaceably inclined in their relation to the zemindar, paying their rents freely, as when they know it is the old pergunnah rate—*all equal before the law*. By this Bengal Tenancy Act (even the description Tenancy Act is a mistake), it should be Bengal Land Act. There are to be three to four classes of ryots. We, ryots, asked for a reform of the revenue taxation, and we find we are to be more heavily treated and taxed, like the action and speech of Rehoboam, the successor of Solomon, and "whereas my father did lade you with a heavy yoke, I will add to your yoke; my father hath chastised you with the whip, I will chastise you with scorpions:" but not for the benefit of either Queen or nation; this question is distinctly asked by us, the poor. If there is any new assessment, it should be by a jury of the inhabitants, not of the zemindar, or by any Judge. For it was our privilege by section 54 of the Resolution of the Permanent Settlement, to which we have before alluded, and we beg that the old prevailing rate be maintained as our only safeguard, and we, the ryots of India, shall ever pray.

JOHN STALKARTT,
For the Ryots of India.

The 25th July, 1884.

No. 1795R, dated Bhagulpore, the 8th August, 1884.

From—G. N. BARLOW, ESQ., C.S.I., Commissioner of the Bhagulpore Division and Sonthal Pergunnahs,
To—The Secretary to the Government of Bengal, Revenue Department.

AT the special request of the writers I have the honour to forward report of the Bengal Tenancy Bill by Messrs. Eddis and Hennessy.

2. I further send a report by Baboo Soorja Narain Singh, leading pleader of Bhagulpore.

No. 233, dated Purneah, the 11th July, 1884.

From—W. EDDIS, ESQ., Asst. Manager, Raj Durbhunga,
To—The Collector of Purneah.

I HAVE the honor to acknowledge receipt of your letter No. 427G. of 7th June, forwarding me copy of the Bengal Government circular No. 8T.—R of 24th May 1884, regarding the revised Tenancy Bill, and requesting me to give my opinion on the points mentioned therein. I proceed to do so, taking the paragraphs *seriatim*.

CHAPTER II.

2. *Paragraph 4.*—I do not think there can be a simpler definition than "a tenure, as distinguished from a tenancy, may be described as a holding held for the purpose of collecting rent, while a tenancy is a holding held for the purpose of cultivating." The object of section 5 is admittedly to get rid of the self-constituted tenure-holder *as an occupancy ryot*. This section and also 37 are professedly in the interest of the cultivator. The mode of attaining the desired object seems to me to be roundabout. Does it not entrench also upon the zemindar's right of creating a tenure-holder? A simpler way of protection would be to give every resident cultivating ryot paying a fair rent a right of occupancy. The Hon'ble Rai Kristo Dass Paul in his protest contends that these provisions improve the position of the original occupancy right ryot. He had a permanent holding. If he acquires the right of a permanent tenure-

holder he (section 11) acquires the power of transfer, free from the landlord's right of pre-emption, to which as an occupancy ryot he was liable. Mr. Secretary MacDonnell says (paragraph 4, bottom of page 2): "The formal recognition by the Bill of the transferability of occupancy rights may tend to the purchase of such rights by money-lenders (whom it is not the wish or object of the Government to benefit at the ryot's expense), and consequently to the rack-renting of the cultivators holding under such purchaser." Then why give the right? Why interfere with the zamindar's proprietary rights distinctly given by the perpetual settlement? The custom of sale of jamas, more or less prevalent, is working its way, and in time may become "common law" which no one will then dispute. Is it not unwise to forestall the natural process? As to the relation between ryot and money-lender, it is surely wrong to strengthen the latter's power by legislation. The cultivating ryot can best be protected by giving him right of occupancy of his land, and by fixing some limit beyond which he cannot be assessed, thus giving him a chance of acquiring wealth, and discouraging rack-renting. While every one must wish to see the lower classes raised, it must be remembered that small holdings *cannot* support the agriculturist and his family without other means. A five bighas holding even, unless under very exceptional circumstances, will barely support the ryot and his family. There is no good aiming at impossibilities. A large proportion of the agricultural class must be content with the lot of labourers. Cultivators of from 20 to 50 or more bighas of land by the help of paid labour are what is required—not a mass of petty holders cultivating from one to three or four bighas. They must be always from hand to mouth, and one famine season throws them on charity, or they die.

"The ascertainment and registration of sublease" seems to me unworkable and only likely to cause litigation and expense. Sub-letting *will* take place. Protect the cultivating ryot by an occupancy right and by a limit to assessment, and leave the tenure-holders to the terms of their registered leases.

3. *Paragraph* 5.—Would not most of the difficulties vanish if the tenureholders were left bound by their tenures and the cultivating ryot protected by the right of occupancy and a limit to assessment?

4. *Paragraph* 6.—I think the 20 years' presumption rule is unjust. It has no sound foundation, and it is a great temptation to immoral litigation. It is injurious to the ryot, and acts against the fair and in favour of the unfair zemindars. To say that it has been law so long is no argument. The Permanent Settlement has been law much longer, and yet the zemindar's proprietary rights are to be taken away without compensation or compunction.

5. *Paragraph* 7.—As regards occupancy right in land "over an estate," I think the occupancy right of a cultivating ryot should be within a certain limit of the village where he resides. If he took lands beyond that limit he would be a tenure-holder under a lease with an occupancy ryot or labourers under him. I would cut out the words "or estate" from section 26. As to the sections 28 and 29, if the landlord obtains by purchase or otherwise the ryot's right, he obtains the right of settling another ryot, or of himself cultivating the land. Is the question what he will do with the land one for legislation? Such legislation seems to me to be in the direction of Mr. Herbert Spencer's "Coming Slavery," unless under some very exceptional circumstances he would of course settle another ryot.

6. *Paragraph* 8.—Section 31 (*b*), (*f*), and (9) (*b*). Of course both zemindars and ryots should be encouraged to make improvements, but I do not see the need of legislation on the matter. At present certainly the ryot does not make them. Legislation on the subject, and especially regarding compensation for improvements, is forestalling. It is suggesting false claims and inviting expensive litigation. (*f*) I think that legalising transfer is injurious to the ryot. Protection from the mahajun's intrusion would be secured rather by not permitting transfer, except through the zemindar. It is a right that was never intended to be, nor was it in any way, conferred on the ryot by the perpetual settlement. On the contrary it was specially given to the zamindar. A custom of sale is growing up in some districts unopposed by the zamindars. Let it grow. To *legislate* in favour of transfer by the ryot is a breach of faith. Let the custom take root and become common law. At a future time it may be crystallised into "statute law." (*g*) I would leave sub-letting alone. You cannot prevent it, but it need not be encouraged. Petty holdings are a source of misery. A ryot and his family, be the rent what it may, cannot more than barely subsist on a holding less than five bighas. To live, the petty holder must supplement his means by labour. I would strike out (*g*). Leave the matter to custom.

7. *Paragraphs 9 and 10.*—Section 59 of the old is much modified by section 14 of the revised Bill inasmuch as the interference in private contract of the Revenue Officers is struck out. The provision under (2) of clause 59 of the old Bill limiting assessment to not "more than one-fifth of the estimated average annual value of the gross produce of the land," &c., is struck out. This is, I think, a mistake. The principle is sound, and if it can be worked is a great security against rack-renting and over-assessment. It has the merit of simplicity. That there may be difficulty in working it must be allowed. The reasons for giving it up, alleged in paragraph 10 of the Government of India's letter No. 784 of 5th May 1884, may be cogent, but are not, I think, altogether unanswerable. Considering the great gain such a simple guide would be, it is surely worth being attempted. It would be useless for very small holdings and

t might not do alone for any. It may be necessary to work it with other rules, but an effort to retain it as a general guide should, I think, be made. Taking a proportion of the produce of the soil for the Government revenue was ancient custom. It prevailed both under the Hindu and Mahomedan Governments. The custom was reduced to an intelligent system by Todermull, the great Financier of the Emperor Akbar. The proportion taken from the ryot was nominally one-third. The proportion proposed in the last Bill was one-fifth, leaving four-fifths for the ryot. This plan will not work infallibly any more than any other device. The attempts in this Bill to lay down law for every detail must fail in practice. The law will be a dead-letter away from the courts, and near them the legal profession will make fortunes, and the ryot be ruined. It must be remembered that gaining the suit, and costs being saddled on the zamindar, does not bring the ryot off scot-free. The law vultures' exactions are 10 and 20 times the legal costs, and *they* are heavy enough. As to the limits of 50 and 25 per cent., or so many annas in the rupee, I do not think these rules are fair or will work. The question of enhancement should be left to the landlord and tenant, there being some guide as to what is a "fair rent" which will enable the court to limit the assessment. Under the Bill enhancement through the court is encouraged which will flood the courts with litigation. A settlement of rate of rent out of court should rather be encouraged with power of appeal by the ryot to the court against unfair rent. Such suits should be tried by exceptionally experienced officers, with an appeal only to the High Court. The decisions it, may be hoped, would be few, but they would be precedents for large areas. Of course there should also be provision for the zamindar to sue for enhancement. Circuit native officers of experience for local investigation into rent disputes might be useful to assist the court.

8. *Paragraph 11.*—Why should the law recognise difference between rent for the same description of land payable by occupancy and non-occupancy raiyats? As to land falling into the zamindar's hands by abandonment why not leave the thing alone? Every detail hampers future legislation, and is in the meantime only so much gain to the bochas who prey on zemindars and raiyats. A raiyat under bad advice will pay in one suit with the zamindar more than the enhancement asked would amount to in 50 years. I can give a case of which you are cognizant, where a ryot has paid over Rs. 6,000 in trying to escape a moderate assessment barely half the "fair" rent of the land, and to which he had agreed. The simpler the law the better. Nothing can be more vicious than the principle acknowledged in this Bill of legislating carelessly and admittedly with probable injustice, with the expressed intention of correcting mistakes by future legislation, regardless of what thousands, perhaps millions, may have already suffered by the mistake. A wise man says—one who has studied sociology deeply—"To what extent does it happen that the multiplying and elaborating of institutions, and the perfecting of arrangements for gaining immediate ends, raise impediments to the development of better institutions and to the future gaining of higher ends."

9. *Paragraph 12.*—*Bastu land,* homestead, with arable land, is assessed in Lower and Eastern Bengal at say double the rent of the arable land. In Behar it is, I believe, generally held at a much lower rate, and frequently, as in the Purneah district, rent-free. Why legislate about it? The law will not alter the custom, except perhaps in the neighbourhood of the courts—those prime sources of misery to the ryots—and there the ryots will be ruined by litigation. The Government seems to have no conception of what bringing ryots into court means. The zemindars may be fair game, but it should have mercy on the ryots. I think "the importance of the question and its relation to the well-being of the ryot" can be very much rather than "cannot be over-rated." Biltori lands held by artisans and shop-keepers without arable land, if we are to look ahead, might be guarded from the "unearned increment" trouble. The increased value of such lands where a town springs up should belong wholly neither to the occupier nor to the landlord, but to both with a share to the community, whose presence has caused the increased value, for the general good under municipal taxation.

10. *Paragraph 13.*—The question of reduction of rent may, I think, be left generally to the zemindars and ryots. Sufficient causes and remedy for injustice by the zemindar may be left to the court when trying the question of a "fair rent." If legislation on these details *must* be, the grounds (*a*) and (*b*) seem reasonable; but there may be other causes equally so which may be left to the discretion of the court. I do not think the detailed enquiry suggested in paragraph 13 regarding (*a*) of section 51 requires legislation. The matter would come under decision as to "fair rent." As to commutation of grain rents to money rents, I expect the raiyat would gain by the matter being left to private arrangement between him and the zemindar.

11. *Paragraphs 14 and 15.*—The correctness of price lists is very important. Whatever principle of enhancement is adopted, such lists must be useful. They should surely include the price of *all*—not only staple food crops. Paragraph 15 instances jute only as a more valuable crop than the ordinary staple food ones. The Government of India's letter No. 784 of 5th May 1884 (paragraph 13), says: "The Select Committee have restricted the staples to food crops, the objection to the inclusion of other staples, such as jute and indigo, being that they are grown for export in place of food crops, and are subject to such great fluctuations in price as to afford no reasonably stable standard of comparison." This sentence appears to me singularly unfair. Are indigo and jute the only crops grown for exports? What food crop is not grown for export? Where would be the wealth of the country without export? This

objection to making the price of more valuable crops an element in fixing rents is surely utterly untenable. Are not rice and wheat the chief food staples exported as well as cotton, oil-seeds, jute, indigo; every crop in fact more or less? In making the price of crops a guide to fixing rent—and it is a very proper guide—all principal crops should be taken. There is of course difficulty in making price lists. There is indeed so much difficulty in all matters of detail worked up in this Bill that the cardinal question regarding it really is—Is it wise to attempt to legislate on details that are and must be much better settled by custom? That the ryot should be protected from unfair assessment, which means that a margin should be left him beyond bare subsistence, is as much a part certainly of the spirit of the perpetual settlement as the proprietary right given by it to the zemindar; but the Legislature, laying down a few board principles, and giving some general rules as guides, should leave details as much as possible to private arrangement. No doubt prices of produce must be one rule.

12. *Paragraph 16.*—I cannot see see on what principle rent for the same description of land should vary because occupied by ryots with arbitary designations, provided they are resident and pay a fair rent. I feel sure that there is no general desire on the part of zemindars to dispute the ryot's right of occupancy. What frightens them and puts their backs up is the conditions tacked to the right of occupancy, which amount to confiscation of their (the zemindar's) proprietary rights. Nothing can more tend to create ill-feeling between zemindar and ryot than taking the former's right solemnly conferred by the British Government, by a law which has given prosperity to a province and made it the milch cow of India, and giving them to the ryot, especially when these rights are not asked by the latter and still more so when their bestowal to a great extent certainly is a positive injury. I think every resident cultivating ryot—let him hold his land from whom he may—should have a right of occupancy so long as he pays a fair rent. For pykust or non-resident ryots, the rent should be settled by demand and supply, liable to some limit, securing a fair proportion of the produce to the ryot, and the crops should be liable to stringent unfettered distraint. His occupancy, unless fixed by the terms of a lease, should be from year to year.

13. *Paragraph 17.*—On what principle are the provisions (*a*) and (*b*) of section 62 framed? Where there are several holders between the cultivating ryot and the zemindar, how are the accumulated 50 and 25 per cents. to be paid by the unhappy cultivator? If some limit is given to the assessment of the cultivating ryot, the last link—substantial protection— will be given; the intermediate tenureholders will take care of themselves. If their tenures are not worth holding they will throw them up at once if permanent, or at the end of their leases. Tenure-holders—farmers cultivating their lands by the help of labourers—are a boon, becoming a body of substantial yeomen, but not those who merely rack-rent. I do not see the object of the limit in section 38 to an occupancy ryot subletting his holding beyond seven years. If a *bonâ-fide* resident cultivator is settled on land, he should acquire a right of occupancy, and should not be disturbed so long as he pays a fair rent.

14. *Paragraph 18.*—I object in toto to the 20 years' presumption. As to section 83, referred to in paragraph 17 of the Government of India's letter, its provisions are, I think, unfair to the zemindar, tending to foster disputes between him and the raiyats. It would be far better to search for some just means of appraising the produce with the zemindar's help. It would contribute to the solution of the problem how to get at a proportion by which to limit assessment. At all events the section recognises the possibility of appraisement which, in rescinding the one-fifth limit, was considered impossible. (4) Meant to check or punish unfair play on the raiyats' part is on the principle of Mr. Ilbert's paragraph 41 in Statement of Objects and Reasons of the Bill. Sections 83 tends to foster disputes and litigation.

15. *Paragraph 19.*—The Government of Bengal admits in this paragraph that the provisions regarding improvements (Chapter IX) do not appear at the present moment to be of much practicial utility, but it is hoped that in the future they will be found valuable. This is not a right principle of legislation. Why clog the Bill with provisions admittedly not at present applicable? Wait till the ryots make improvements and circumstances arise which warrant interference. At present these provisions only invite false claims. The improvements and compensation clauses of the Bill struck a no less eminent and experienced authority than Mr. Seton-Karr as so ridiculous and uncalled for that he calls them "the mere craze of the philosopher of the cabinet and the pundit of the desk." The attention of the Commissioners and Collectors of Bengal is requested as to whether the "general interests of the country" will not be advantaged by conferring by a solemn Act of the legislature the right on the non-occupancy ryot to construct a well! Who would prevent his making one? If it is feared he will be deprived of his well by ejectment, adopt a broad principle and give him right of occupancy so long as he pays a fair rent. You propose to make him *resident* by permitting him to build a house (section 90). But ejectment or no ejectment let the wells be made without wasting time and money in legislating about it! "The general interests of the country" will undoubtedly be advantaged by the making of wells! This subject of wells is one which has at various times and in different places apparently exercised the Government. If Mr. Seymour Keay is to be believed and I admit his assertion must be received with caution)—*vide* an article in a late number of the *Nineteenth Century*—Government is the only landlord in all India who puts obstacles in the way of ryots making wells. He draws a touching picture of the ryot, his wife and children picking away for years in the hard soil, at last finding water, only to find themselves taxed, because they have found water. If this writer's statements are but partially true, the Govern-

ment of India in its dealings with its ryots in the North-West Provinces and in Bombay merits the exhortation "Physician, heal thyself!" Any way, "in the general interests of the country" let wells be made! Section 90, about a non-occupancy ryot being allowed to make a a house to live in, seems absurd. He makes himself a house, becomes a resident ryot, and should acquire a right of occupancy.

16. *Paragraph 20.*—Why should there be difficulty about the abandonment of a holding? It is the universal practice of the country founded on ancient custom and confirmed by British law that land abandoned by the raiyat reverts to the zemindar. That it does so one would think is self-evident. Why throw in a bone of contention on such a simple matter? If a landlord ejects an occupancy raiyat forcibly to put in another at a higher rate he is doing a distinctly illegal act. It has nothing to do with his right to land abandoned by the raiyat. One or two sharp punishments under the Penal Code would soon stop such illegality. As to selling the abandoned land, it would be a clear infringement of the landlord's rights. The permanent settlement—and the words of the Statesmen who had to do with the passing or criticising of it found over and over again in their minutes and letters—prove that the proprietary right was given, and was beyond a shadow of a doubt meant to be given, to the zemindars.

17. *Paragraph 21.*—Measurement of a village should certainly include lakraj tenures; but I do not see what the zemindar has to do with their details. He has a right to ascertain the quantity of land claimed as lakraj, because any excess must belong to his village. I think the measurement should always be by claim, the cottas marked by the length of the local pole, but brought into English acres, both being recorded. In statistical records it would never do to have the area registered by inumerable different standards.

18. *Paragraph 22.*—If care is taken in the appointment of a manager—if possible one approved by all the shareholders—and if proper control is exercised, there should be no difficulty.

19. *Paragraph 23.*—A record of rights is of course good in theory both for zemindar and raiyat, but can it be carried out? Unless correct, it would of course be worthless. The hearty co-operation of the landlord and tenant are necessary to obtain reliable village statistics. Without this, how are the continual changes to be registered? With the zemindar's co-operation nine-tenths of the difficulties in collecting reliable statistics would vanish, and the great end—to fix proportion of produce as a limit to assessment—might be attained. Under the hal hasilee tenure much of the information was annually collected by the village gomastas.

20. *Paragraph 24.*—It would be better to leave these matters to mutual arrangements. It is quite impossible for any court to manage all the details of the relations between landlord and tenant. The law will either be a dead letter, or confusion worse confounded will arise in every district. If the Bill respected the zemindar's rights his co-operation would remove many difficulties.

CHAPTER XIII.

21. *Paragraph 25.*—Distraint as proposed in the Bill is a farce. Where are the "officers?" What like would they be? Would they be bribe proof? *Bonâ fide* distraint should be allowed (most certainly for pykust ryots) without the interference of the court, abuse being severely punished. Such a simple cutting of the knot will I fear not be allowed, but such distraint was always the custom of the country. It is understood and accepted by the ryot. "It may be, as experience has in some instances proved, that the abuse of the right of distraint is within the power of the executive to suppress, and the Lieutenant-Governor himself thinks that there is a great deal in the statement that in the case of an improvident peasantry a remedy against the crop is a more humane process than a remedy against the land." True words—why not act up to them?

22. *Paragraph 29.*—Without admitting the propriety of other restrictions in this Bill, I think the rate of rent on deara lands should be left quite unfettered as to term or rate. I do not see why a raiyat should not have a right of occupancy as well in deara as in other lands, if he is resident within a reasonable distance of them. As regards contract, I would leave zemindar and raiyat unfettered except as regards the raiyat's occupancy right, which I hold to be as much given by the Permanent Settlement to the ryot as the proprietary right was to the zemindar—certainly in the spirit if not in the letter. The khudkast, *i.e.*, resident ryot had, I am sure, in ancient times, a right of occupancy in the land he tilled, so long as he paid rent, and the proportion fixed by the Government defined what that was to be. This right was acquired by custom, created by circumstances of which it was the natural result. The occupancy of the land was hereditary. This tenure of land was the foundation of society, and even in the old days of lawlessness was as a rule respected. The Hon'ble Justice Field puts it fairly in his "Land-holding, and the Relation of Landlord and Tenant invarious Countries," see pages 423 to 425, paragraph 225. Even were there a doubt, it would be right to give the benefit to the ryot. Justice Field says: "Non-fulfilment of the condition on which the land was cultivated, non-discharge of the Government dues, or non-delivery of the proprietor's share of the produce was the only ground which rendered it necessary to remove a tenant." No doubt when might was right. "Some land-holders conceived themselves to pos sess the power of ousting their tenants in favour of other persons who were

willing to give a higher rent, but in a state of society in which rents were regulated by custom, not by competition, such new tenants did not often present themselves, and so the practical exercise of the power was not frequent. Thus, notwithstanding occasional instances of ouster, it gradually became usual, in the language of a later stage of development, not to evict khudkast ryots so long as they paid their rent. It has been well observed that mankind's notions of right are founded on prescription, and under a Government of absolute discretion, destitute of the modern appliances for legislation, custom was really the sole legislative power." Surely this line of argument is unanswerable. As regards interference with contract generally between landlord and tenant, I think the Hon'ble Rai Kristo Das Pal's words in his protest to the Select Committee's report are very true—"I cannot conceive that if the ryot can fairly be considered a free agent in mortgaging and selling his hearth and home, or his agricultural land; in disposing of the produce of his field, or engaging his labour, and fulfilling a thousand other obligations of every-day life, why he should be considered incompetent to enter into contracts with his landlord." I would just remark the natural way in which the words "hearth and home or his agricultural land" come in as shewing how the right of occupancy is taken for granted. Opponents of the Bill admit that 90 per cent. of the Bengal ryots have occupancy rights, and I do not suppose there is one zemindar in a thousand who would deny the right so long as a fair rent is paid. No educated zemindar would, I think, dispute the fact that such was the existing custom under the native Governments, both Hindu and Mahomedan, and that the perpetual settlement, if it did not positively deny the right, must have admitted it by implication if not in words. I think the legislature is entitled under the provisions of the perpetual settlement to protect the ryot by limiting his assessment to what is fair, but that, while some general rules may be given as guides to determining the point, in cases of complaint that rent demanded is not fair, the zemindar and ryot should be left unfettered to make their own registered contracts.

23. The only other matter of importance on which the circular asks information is regarding the ootbundee and hal basilee systems. The ootbundee* is a tenure prevalent in Krishnaghur and neighbouring districts under which I believe the ryot cultivates part of his jumma leaving other parts to rest, paying only for what is cultivated. This practically decreases the rent the zemindar would receive were all the land properly tilled.

* I am not quite sure about this tenure. It is so long since I was in Krishnaghur.

The hal hasilee tenure prevails or did very generally prevail in Purneah.

Hal hasilee is, I believe, a compound Persian word meaning *hal* now—present; and *hasil* crop. It implies that the rent is calculated on the quantity of land at present under cultivation, and at different rates for the various crops sown. The tenure arose in Purneah probably when large tracts were devastated by the river Kusi, when there was much waste land and few ryots; and the quantity of the land was continually changing by deposit of sand, and its locality by the numerous shifting streams of the Kusi. The ryots cultivated here and there as they got patches of culturable land, and sowed such crops as suited the soil and the season. Every year their scattered holdings were measured and the jumma determined by calculating at the different rates for the various crops sown. This hal hasilee tenure in Dharampore has very generally, as the Kusi receded, drifted into one rate—*nugdi*, locally called *hustaboodi* tenure: perhaps *nugdi* is hardly the name, as I understand that to be a term in distinction to *bhowli*—the one being rent in cash; the other in kind. The rate is now one average one instead of the total of 10 or 12 different rates, though the latter are in the village papers. This hal hasilee tenure, so far as rates on various crops go, is that I imagine on which lands were originally held all over Bengal.

As the villages got more settled, measurement was neglected. If the Mustajir (Dharampore was formerly mostly held in mustajir) measured a holding and found the jumma less than the ryot had been paying, what fell short was added as "kum kast." One would think the ryot would have claimed the decreased assessment, and so he would had he been dealing directly with the zemindar; but the mustajir would represent to him that by still paying the original amount, the jumma would become intact, strengthening or creating, or tending to create, a claim to holding for 20 years at a uniform rate. Thus the mustajir took this kum kast as a favour in the ryot's own interest to the injury of the zemindars. He had salami kharcha and what not over and above. Circumstances have very generally changed the hal hasilee into one average rate—an illustration of how custom works;—but the ryots frequently hold to the old arrangement as proof of the different rates which they should be called on to pay for the various crops sown. This shews that the old custom of charging on crops is recognised and understood. It could no doubt easily be generally introduced and would help to fix a proportion of gross produce as a limit to assessment. Although it may be difficult to get at the quantity of crops, certainly the land under each crop can be ascertained.

PART II.

CONSTRUCTION.

The Commissioner when here said he had been overwhelmed with *destruction*, but nobody offered him construction. Destructive criticism may be negative construction, but no doubt it

is much easier than positive constructive suggestions. Allowing then some legislation to be necessary—on what lines, do I think it should run, I will tell you.

2. There are certain broad principles that should I think be recognised—*1st*, the resident cultivating ryot's heritable right of occupancy, conditional on payment of a fair rent; *2nd*, the need of a limit to assessment, which will leave the ryot of a moderately-sized holding a margin beyond what is necessary for rent and bare subsistence; *3rd*, the zemindar's proprietary right, conditional on payment of a fixed Government revenue as guaranteed by the perpetual settlement; *4th*, necessity of co-operation with the zemindars in any plans for the bettering of the ryots; *5th*, in the attainment of that end, encouragement of private contract between zemindar and ryots; *6th*, discouragement of litigation; *7th*, means of speedy and punctual realization by the zemindar of his rent.

3. The ryot's right of occupancy was certainly recognized by the Hindu and Mahomedan Governments of India. I think the provisions of the perpetual settlement recognise it, as also the duty of Government to protect him from such an assessment as does not leave him a margin, not only to pay his rent and barely live, but to lay by for bad seasons and for the comfort of his family beyond bare subsistence. He should sit at a fair rent. Tenure-holders who hold merely for the collection of rents may be left to the rights secured by their contracts or other documents. Rack-renting should be discouraged. To guide in the settlement of a fair rent among other rules as guides a limit of proportion of the gross produce of the soil might advantageously be fixed, beyond which the tenant should not be assessed. This is the simple rule which guided the old native Governments, and is still recognised by the ryots as just. But the proportion limit will not apply to small holdings. Simple calculation will shew that the produce of a holding of two and three bighas will not suffice for the subsistence of a family and payment of rent. It may be well for the ryots to cultivate a small plot of land, but its produce must be supplemented by the returns of outside labour. In this case the prevailing rate in the neighbourhood might regulate the rent. It can easily be calculated where the proportion of one-fifth of the gross produce, or whatever may be fixed on, can be rightly applied.

4. It is admitted that difficulties [illegible] [illegible]on. They are ably pointed out in paragraph 10 of the G[illegible] of India's letter to the Government of Bengal, No. 784 of 5th M[illegible] I do not think they are insurmountable. Of course the Government of [illegible] letter ignores the greatest difficulty which lies in the ruling principle of the Tenancy Bill, *viz.*, distrust of the zemindar. Section 41 of chapter 5 in the revised Bill is a great improvement on section 59 in the old Bill, inasmuch as the Government revenue officer is dispensed with, if indeed section 117 does not annul what section 41 grants; but the sub-clauses *a*, *b* and *c* of clause 1, section 41, are vexatious, and the suspicious spirit runs, more or less, throughout the Bill. The exchange of registered pottahs and kabuliyats should be insisted on, which of itself would be a record-of-rights. As a rule it is to the interest of both zemindar and ryot (almost *always* to that of the zemindar) that the term should be long. To compare great things with small, constant change is as injurious to peace and quietness of landlord and tenant life as constant worrying legislative change is bad for the country at large. As regards information whereby a proportion of the value of the gross produce may be got at, I do not think that with the co-operation of the zemindar it would be very difficult to get at it. Under the Mahomedan Government, notably under the Emperor Akbar, with the help of his great Financier Todermull, it was not found so. The Canungo worked with the ryots under circumstances more unfavourable to the compiling of trustworthy statistics than would exist now in working with the zemindar and ryot. Between the decay of the Mahomedan dynasty and the rise of British power, the mustajiry farming system came in, on which the perpetual settlement of Bengal with the zemindar has certainly proved a great improvement. The Government should strengthen rather than weaken the zemindar. The aim should be to work with him; educating, coaxing, rewarding, punishing, as may be required. It is idle to talk of oppression. The law should be strong enough to prevent it. It may be that the zemindar would not welcome an attempt at the re-introduction of anything like the old system; but the zemindars would be wise to look facts and the times in the face. Feudal power is of the past. Let them frankly recognise that their and the ryot's interests are one, and heartily co-operate in plans to protect and enrich the ryot. Whatever may be the proportion of the produce of the land left to the zemindar, it will rest with them to enrich themselves by increasing its value by introduction of new crops, improved methods and implements of husbandry, assisting in opening up communication, &c., &c. No doubt it is hard to expect the co-operation of the zemindars when you are worrying, goading, and despoiling them. So pray lift up your voice in the approaching conference that this impolitic action may be dropped. Nevertheless, it is I fear a choice between hearty co-operation with the Government in elevating the agricultural masses and utter spoliation. The latter, while it is ruin to the zemindar, will bring also serious danger to the Government: the former peace, good will, and prosperity all round. To return to the question of needful statistical information. Not long ago I heard an experienced district officer—you know him—suggest that the canungo might be a joint officer of Government and the zemindar, paid by both, with fiscal (the village putwaries being under his control) and certain executive and judicial duties. Such an officer giving status to punchyets, of whom he might be chairman, with summary powers, might be very useful. If possible his humble court should be kept free from the bochas [illegible]

[illegible] of the courts. In calculating the value of the produce of the land, of course all crops should be taken into account." I have gone into this on the destructive portion of this letter, especially as regards paragraph 13 of the Government of India's letter.

5. Regarding the modes of enhancement proposed in the Bill, they would I think all come under the proportion of gross produce limit scheme. Tables of prices and various other statistical information would all be useful if not absolutely necessary.

It must be borne in mind that small holdings will not come under the proportion limit. They might theoretically; but in practice the petty holding ryots would no doubt come off better under contract with their zemindars than under the provisions of the law, which might in application sometimes partake more or less of the heartlessness of political economy. I do not think it can be denied that very small holdings are not favourable to the comfort and advancement of the agricultural masses. There is undoubtedly a limit in the size of holdings below which agriculture will not yield subsistence to a family. All the numerous provisions and restrictions regarding enhancement, &c., &c, are I think useless. No state of society could long endure such interference. The law would be either a dead letter with exceptional spurts of executive, unjust if strictly legal, action, or the people would rise to throw off the insupportable tyranny. Certainly the zemindars would not, if they had the chance, display the loyalty—passive if you like—which they did in 1857.

3.—The Zemindar's proprietary right.

6. The perpetual settlement undoubtedly conferred proprietary rights on the zemindars. Nothing but the most clearly proved necessity for the general good could justify its infringement. This Bill bristles with provisions which invade their rights. Generally and in detail, in the spirit and in the letter, it deprives the zemindars of rights conferred on them by the perpetual settlement of 1793, especially in the transfer provisions and in the 20 years' presumption. Protection of the ryot can surely be secured without such wanton breach of faith.

7. It may be admitted that the ryots need protection; that it is right to legislate on their behalf. If the zemindars have encroached on their rights, whose fault is it? Surely more that of the Government itself than of the zemindar. This being the case, fair play, if not some consideration, surely should be shewn to them. If things had come to such a pass, and abuses had sunk so deeply into the system that they must be violently cut out, it might be necessary to cut them out. But this is not the case. Admittedly legislation was needed as much on behalf of the zemindars as of the ryots. Is it not worth while to encourage mutual good feeling between landlord and tenant rather than the bitter hostility engendered by this Bill? The great object of securing the ryot from over-assessment is admittedly to be most easily gained by statistical information, which it is quite clear can be best and most cheaply obtained by co-operation with the zemindars. Rather than fix a barrier between them and ryots; rather than change their loyality into disaffection to the Government; would it not be wise to see what can be done by some sympathy with *their* troubles, and by acting in co-operation with them see if it is not possible to work out some plan by which village statistics may be compiled and recorded, embracing tables of prices, records, rights, &c., &c.? By pure Government agency this will never be done. Government know well how necessary all this is for efficient administration. Instead of utilizing the most valuable agency in the country, they deliberately alienate it.

5.—Encouragement of private contract.

8. A Tenancy Bill should encourage mutual arrangement between landlord and tenant, reserving only, as being outside contract, the occupancy right of resident cultivating ryots so long as they pay a fair rent. The exchange of pottahs and kabuliyats should be insisted on. Provision should be made for good and sufficient duplicate receipts for rent. The courts would have the power of deciding as to the fairness or otherwise of rent demanded; but this not arbitrarily, but under certain general rules for guidance, the principal one being a proportion of gross produce being the limit of assessment.

6.—Discouragement of litigation.

9. If all rent arrangements were left to the zemindar and ryot, there would be a minimum of litigation. Rent cases should be tried by experienced officers with one appeal only to the High Court. Circuit native officers might assist the lower court in collecting information on the spot, those again being helped by punchyets of head ryots. There would, it may be hoped, be few legal decisions, but carefully given they would form precedents and rule contracts over considerable areas, and the decisions would soon form a useful body of case law. Instances of oppression, abuse of distraint or infringement of the ryot's occupancy right would be duly punished.

7.—Assistance to zemindars.

10. Nothing, I think, would be more likely to maintain good relations between zemindar and ryot than the obligatory exchange of duly registered pottahs and kabuliyats. Where ryots are averse to pottahs, it is generally from some bad motive. The desire to overreach is

not all on the zemindar's side. Sometimes there may be fear that the occupancy right will cease with the term of the pottah. Such fear should be removed by a simple provision bestowing or confirming occupancy right on every resident cultivating ryot paying a fair rent. At the end of the term in 99 cases out of 100 probably a new lease would be amicably settled. If not done within a certain period, say, three or six months, the courts might be empowered to settle the rate: period not to be less than five years, but as far as ten, both parties being willing. The law should make clear duplicate rent receipts obligatory, arrears always taking precedence of current rent. As Government takes rents punctually by sunset of a certain day in four kists from the zemindars, with the penalty of the forfeitures of estate for default, so should the ryot pay punctually in four similar kists, 20 days before the zemindar's kists fall due. If the dates do not suit the reaping of the crops, the pottahs can fix suitable dates.

11. Distraint on the standing crop without interference of the court should be allowed for arrears. Notice that distraint was about to be enforced being filed in court by the zemindar with the ryot's account. Should it subsequently prove that the zemindar had abused his right, he should be punished: the subordinates by simple or rigorous imprisonment: the zemindar by substantial fine. In case he was personally cognizant of the abuse; also by imprisonment; and compensation should be made to the ryot. If the sale of the crop did not liquidate the ryot's arrears, interest from due date at 12 per cent. should be changed. Suits for arrears should be brought within one year succeeding the year in which they became due. The pottahs and the rent receipts would be evidence, and a summary decree should be passed, procedure being similar to that under the Court of Wards and Governmen khas mehals. When the arrears with interest amounted to one year's rent the defaulter should be liable to ejectment if the amount were not paid within three months of date of decree, which decree should carry notice of ejectment, and no further legal process should be necessary. The ejected ryot should be allowed to remove or sell any buildings he had erected on his homestead within 30 days of ejectment. A punchyet of raiyats should fix the price, or, if the raiyat wished, a public auction sale might be held by an officer of the court, who would be paid by a fee to be deducted from the proceeds.

12. I have only in the first part of this letter noticed the points mentioned in the Bengal Government circular. The revised is in all essential principles much the same as the original Bill, though it contains important modifications. My views on the latter are given in a series of letters signed E in the *Englishman* newspaper of the following dates:—

I, 26th	October	1883.	VI, 1st	December	1883.
II, 2nd	November	,,	VII, 6th	,,	,,
III, 9th	,,	,,	VIII, 14th	,,	,,
IV, 16th	,,	,,	IX, 21st	,,	,,
V, 22nd	,,	,,			

My opinions have been carefully considered. They are the result at least of considerable experience extending over upwards of forty years, nearly all of which have been spent in the interior of Bengal, and in constant intercourse with natives of all classes.

I am not a partisan. I desire first the well-being of the millions; but I think that this can be obtained without destroying the rights given to the zemindars by the perpetual settlement of 1793. I think the Bill politically dangerous and that it contravenes recognised principles of legislation. A Bill founded on the principles named in part II of this letter, would I think be more practical and more just.

No. 640G, dated the 21st July.

Memo. by A. WEEKES, Esq., Collector.

FORWARDED in original to the Commissioner. This came too late for me to make use of, but in many things I see Mr. Eddis agrees with me.

Remarks of BABOO SURJA NARAIN SINGH *on the revised Bengal Tenancy Bill, with reference to the circular of the Bengal Government, No. 3 T—R, dated the 24th May 1884, forwarded to the Commissioner of the Bhagulpore Division, in acknowledgment of his letter No. 817R, dated the 29th May 1884.*

CHAPTER II.

1. *Paragraph 4 of Bengal Government Circular.*—I do not think that the presumption in section 5 (5) is with reference to existing practice a fair presumption. It ought to be omitted. In a letter, dated 9th September 1880, which I addressed to the Commissioner, and which is published at page 77 of volume II of the report of the Government of Bengal on the proposed amendment of the Law of Landlord and Tenant, published in 1883 (*vide* paragraph 3 of the letter), I pointed out the objections to a similar enactment proposed by the Rent Commission. These objections were also approved of by Mr. Reynolds who took up the suggestion made by me as to the means of ascertaining whether, in any disputed case, a holder of land was a ryot or tenureholder (*vide* volume I of same report, page 185). For facility

of reference copies of my and Mr. Reynolds' observations are annexed. I may explain that some of the objections taken by me on the former occasion would not apply to the provision now intended to be laid down, for instance, the one based on the difficulty about enhancement, and it may also be said that the present rule is one of rebuttable presumption; but on consideration it would be seen that the course pointed out by me in paragraph 34 of my letter is the only reasonable course to adopt to ascertain whether a holding is a ryoti one or a tenure. The conversion of the subletting occupancy ryot into a tenureholder (section 37) is not in my opinion a workable provision, and is not likely to secure the object for which it was devised. It will be nobody's interest to bring to light cases of such subletting apart from the other manifold objections that apply to the provision. Will the landholders be deprived of the right of escheat which they now possess in respect of converted tenures? By the act of the tenant the old relation between him and his landlord is changed, and the rights of the latter are controlled in a manner which is opposed to custom and law.

CHAPTER III.

2. *Paragraph 5 of Bengal Government Circular.*—I would, in connection with this chapter, invite your attention to what Mr. Kristo Das Pal has said in his minute of dissent (see page 242 of the Supplement to the *Calcutta Gazette* of 16th April 1884 under head tenureholders). I do not see any necessity for or the expediency of re-casting the law relating to tenures and undertenures and introducing changes, the object of Government being to improve the condition of the actual cultivators and not of the middlemen. The existing law as to tenures should only be re-enacted without the introduction of any change affecting the rights of any class.

CHAPTER IV.

3. *Paragraph 6 of Bengal Government Circular.*—There is no doubt that the rule of 20 years' presumption is not only a hard one to the landlord, but it has given an undue impetus to litigation, and has introduced a good deal of demoralisation among the tenantry class. It is thought that the zemindars should experience no difficulty in rebutting the presumption when pleaded or relied upon if it is rebuttable; but zemindari papers are not in most cases credited in the Courts, and auction-purchasers in many instances are unable to produce them. Mr. Gibbon has given very good reasons against the retention of the presumption on the Statute Book. It should be relaxed, and the year 1839, or 20 years before the passing of Act X of 1859, as had been originally proposed by Mr. Reynolds, should be taken as the time from which the presumption might start. The transformation of ryots holding at fixed rates into tenureholders is undesirable. What about the right by escheat and by desertion which the landholders now possess in such holdings?

CHAPTER V.

4. *Paragraph 7 of Bengal Government Circular.*—The definition of settled ryot is justified on its being based on the analogy of rights held by khudkast raiyats, but it can be easily seen that there is not such analogy between them. The occupancy title accorded to a settled raiyat should not extend beyond the limits of the village in which he has acquired that status. There are many estates in this district, the lands of which lie very far, and in several cases in two districts and more than one sub-division. Villages forming an integral part of a single estate are held by different proprietors for half a century or more. It would lead to much complication if a raiyat having acquired the status of a settled raiyat in one of such villages were to be invested with occupancy title in land situate in another village belonging to a different proprietor many miles off. A khudkast raiyat was he who tilled land in the village where he resided. He could not claim to be a khudkast raiyat of the neighbouring village according to customary law, although the land in it might border his own lands in his own village. The existence of a common towji did not affect the question in any way. Why should a different state of things be introduced now and an unreasonable latitude allowed in the acquisition of the occupancy title? Act X of 1859 introduced a period of prescription for the acquisition of the occupancy title. Mere residence without any period of prescription did not, according to the generally accepted common law of the Lower Provinces, confer a right of occupancy, and for this as well as to benefit the *paikhast* tenants who were always tenants at-will according to custom, Act X for the first time prescribed 12 years' occupancy as the shortest occupation which could confer a prescriptive title to occupancy. It is now proposed that a person having once acquired the status of an occupancy ryot should carry it along to lands which he may not hold for the necessary period; but is it consistent with the historical development of the right of occupancy that it should extend over the entire estate? I am also not in favour of increasing the ambit of the estate by going back to any period in the past. I do not think the reduction of the area of estates by butwara is any reasonable ground for widening the extent of the acquisition of the title of occupancy, either by attaching it to the estate as it may exist or as it existed at any period in the past. Section 26, clause 2, introduces a new rule of presumption which is not a fair one. It is said that one of the advocates of the zemindars (Mr. Kristo Das Pal) admitted in Council that 90 per cent. of the ryots have acquired the occupancy title, and therefore the presumption sought to be created is a reasonable one. Apart from the question whether the percentage mentioned is

accurate or not, it is well-known that ryots abandon and desert their holdings, and that in *dearas* and *char* lands, in border tracts, and on the banks of the Kusi there is no fixity of tenure. Ryots move about most freely, and it is certainly a hardship on the landlord if he should have to discharge the burden.

5. *Paragraph 8 of Bengal Government Circular.*—*Section 31 (b)*—Improvements are not generally made by tenants. The landlord should have the preferential right of making them.

Section 31 (f)—While the creation of the right of transfer is objected to by the zemindar as he would have no control over the introduction of tenants into his property, it is a matter for serious consideration whether it is expedient to grant the right knowing how improvident ryots are. There is very little doubt that the effect of the provision would be the improvement of many ryots off the face of the country, and the introduction of mahajuns in their place. What is going on in the Sonthal Pergunnahs would be repeated elsewhere Bequeathing by will is an entirely new feature in the incidents of occupancy right.

Section 31 (a) —I think the sub-section should state that the tenant should use the land only for the specified purposes of the tenancy and not in any manner inconsistent with or opposed to it.

6. *Paragraphs 9, 10, 11 and 12 of Bengal Government Circular.*—The first ground of enhancement provided for in section 43 should not be omitted. It is on the Statute Book ever since the time of the permanent settlement in some shape or other, and is in accordance with the custom of the country. The objections urged to its retention are not such as ought to prevail considering the reasonableness of the ground and the advantages both to landlord and ryot of continuing it. An appeal to this ground precludes the necessity of entering into detailed calculations consequent upon the application of the other grounds. In a discussion of the grounds and extent of enhancement, the customary system of letting land, and the customary mode of agriculture, ought not to be disregarded. When uncultivated land is first let out, a low rent is either fixed or no rent is charged for one or two years. The rent is gradually increased as the capabilities of the land develop, until the maximum village rate for land of the description is reached. Under this system the tenant is reimbursed for extra labour or capital used by him in the cultivation by the lowness of the rate which he enjoys for several years. The Bill ought to recognize and give effect to this custom. The first ground of enhancement is only available to the zemindars for enhancing rent in such cases as well as in those cases where the rents of particular raiyats may be lower than those of the generality of them on personal or other grounds, but fettered as it is with restrictions, it can hardly give him the full amount of enhancement to which under ordinary practice he may be entitled. One can understand the objection to enhancement *per saltum* after the full village rate is reached, but any provision which would deprive the landlord of the benefit of the full rate in cases referred to above are neither reasonable nor fair. Similarly, in *dearas*, where the land is sandy, a low rate is fixed, but in the next year, or in two or three years, the land is quite changed, and the full rate is levied. I am afraid the limitations on enhancement prescribed in the Bill would cause injustice to the landlord in such cases, unless adequate provisions to meet them are laid down. I am aware of the provisions contained in sections 212 and 213 of the Bill, but I do not think them to be sufficient for all purposes

7. The restrictions on enhancement laid down in sections 41, 44, 45, and 47 are not fair to the landlord who is deprived of the full amount of enhancement, although he may be entitled to it. It should be the object of wise legislation not to force parties who stand in the relation of landlord and tenant into Court to adjust questions of rent and other cognate questions, and every facility ought to be given for their adjustment by mutual agreement. The Bill, however, is so framed that at every step of their dealings landlords and tenants have either to appear before the Revenue authorities or the Civil Courts. If enhancement out of Court be not allowed to take place to the same extent as it is permitted through Court, the result will be constant resort to litigation, and such a consummation is neither good for the raiyat nor the landlord. I do not apprehend any danger of the kind contemplated in paragraph 11 of the Bengal Government Circular from the provisions contained in section 42 (I) of the Bill. In the first place, sub-section I is controlled by sub-section II, and in the second place there is already so much diversity in the rents of occupancy raiyats, as is clear from the admission, that except in limited tracts of Bengal a prevailing rate cannot be found to exist; that there is no *a priori* ground for holding that section 42 would have any very disturbing influence on the economy of rents in this country. Zemindars are now at liberty to settle new lands with settled ryots at any rate of rent they may choose. When such is the case, I do not see why his power in this respect should be restricted when land, which has been previously held by a tenant at a money rent, is let to a settled ryot of the village or estate in which it is situate. The circumstances of this district are not such that there is any danger of intricate and costly litigation resulting from the introduction of the provisions occurring in section 42.

8. With rare exceptions bastu lands are generally separate from jote lands, and in a majority of instances no rent is charged for them. The ryots have not any rent-free title to them; the lands are *mal*, but certain castes are excused from the payment of rent, and other castes who have jote lands in many zemindaries pay rent for homestead lands also. There is no uniform rate throughout the district; the practice of charging rent is a varying one. A

ryot by relinquishing jote land does not vacate his homestead land. He may continue to occupy it as before, and he has not to pay rent on ceasing to be a cultivator if he was not paying it before. On leaving the village, the land is the zemindar's, who is free to do with it what he may choose, the tenant possessing no right of transfer or bequest. I do not think the ryots themselves would like any change in the system as it exists. It is no doubt competent to the Legislature to take away the rights of one class of the community and make them over to another, but one hardly sees the propriety of the proposal to deprive landholders of the benefit of an increase in the value of land by fixing the rent of homestead lands in perpetuity, and creating, so to say, a mokurari title in favour of the tenant, contrary to established and ancient custom. The raising of homestead lands above flood-level or any other improvement of them effected by ryots are not of such a character as to entitle the tenant to the privilege of holding at a non-enhanceable rent.

9. *Paragraph 13 of Bengal Government Circular.*—The provision made in section 51 for reduction of rent does seem to cover all cases that would arise with reference to the actual facts existing in this district. It would be impracticable to provide for the operation of any cause tending to deteriorate the quality of the soil until the effect produced by it is visible in a pronounced shape, and when such should be the case the ground of reduction would, in my opinion, apply. With reference to commutation, it will be remarked that if an average extending over a sufficiently long number of years be taken both as to produce and value of it, the risk and burthens referred to by Mr. Reynolds would necessarily be discounted, and no further allowance is required to be made. The average rent which the landlord has received should not in such a case be governed or over-ruled, so to say, by any consideration of the prevailing money rents.

10. With regard to section 54 (3) it is necessary to point out that as the presumption of 20 years is applicable to produce rents, it is worthy of consideration what the effect of commutation (section 53) at the instance of the tenant, or at the instance of the landlord, would be on the power of the latter to seek enhancement in the future. A tenant applies for commutation, but the zemindar is not willing that the produce rent should be commuted in money. The prayer is, however, granted. When produce rent was paid the landlord used to benefit to the extent of his share by an increase in produce as well as as by an increase in prices. The commutation having been made on the basis of prices and produce as obtaining in the past, would the landlord suffer for deterioration in the value of money through the commuted rent being deemed to be non-enhanceable in future, or would an enhancement be permitted? If the produce rent had not been commuted, the landlord would have reaped the benefit of increased prices and increased produce. He should not lose this benefit because the grain rent has undergone commutation in money.

11. *Paragraph 14 of Bengal Government Circular.*—No reliance can be placed on the price lists. In the first place they are not accurate, and in the second place they do not refer to all the local markets. The task of verifying them now would prove a Herculean one, and it would be unsafe to act on price lists so prepared and framed.

12. *Paragraph 15 of Bengal Government Circular.*—To regulate rents with reference only to the prices of staple food-grains would be to upset the whole basis of adjustment of rent as it obtains in this country. By universal custom higher rents are paid for lands on which more valuable articles of produce are grown. Lord Cornwallis, in one of his minutes, prominently referred to the cultivation of the more valuable species of produce as a principal means of raising the rents of land in Bengal and Behar, as the following quotation from the fifth report, page 616, will shew :—

"The rents of an estate can only be raised by inducing the ryots to cultivate the more valuable articles of produce and to clear the extensive tracts of waste land which are to be found in almost every zemindari in Bengal." Minute dated 3rd February 1790.

Moreover, sugarcane and some other valuable articles are produced on lands yielding staple food crops, and the demand for them in the market induces the cultivator to grow them more largely than in ordinary years. For instance, sugarcane is produced both in land where rice is produced and in land in which cold weather crops are also produced.

Extract from letter of Baboo Surja Narain Singh, *to the Commissioner of the Bhagulpore Division, dated 9th September 1880, referred to in paragraph I of the remarks on the Tenancy Bill.*

3. I do not agree in the propriety of enacting section 11, and in this view I think the definition of ryot given in section 3 ought to be amended. The object apparently is to protect actual cultivators who hold under large jotedars, such as exist in Rungpore, and under howaladars, &c., that are found to exist in Backergunge and other districts. It is also probably intended, I think, to encourage the system of *petite* culture. I dare say there is probably some custom in Rungpore and other parts of the country where these large jotedars exist, regulating the status of the holders of them in relation to actual cultivators and intermediate tenants; but if it does not exist, the subject can be provided for by special laws of local application; but there is no reason why throughout the provinces of Bengal and Behar a ryot holding more than 100 bighas (standard) should, against his will and that of the landlord under whom he holds, be converted into a middleman. Whether *petite* culture is preferable to

large cultivation in this country is probably a moot point. At any rate no case has yet been made out for the Legislature to step in and encourage the one as against the other. If we have both side by side, we may hereafter be able to judge of their merits, and as a large number of occupancy holdings in these provinces is probably less than 100 standard bighas, there is no special reason for interfering with those that exceed that quantity.

3(a). The limit of 100 standard bighas is too low. A Hindu living under the joint family system is quite able to cultivate, by the members of his family or by servants or by hired labourers, more than 100 bighas, and Indian Mahomedans are also amenable to that system. The ryots who in this district hold more than 100 bighas (standard) by a single demise to generally cultivate in the aforesaid manner. I know of many cases where ryots hold lands in several villages because they are unable to find enough in their own, and the total quantity thus held would in great many cases much exceed 100 standard bighas. This shews that the assumption that a ryot cannot well hold more than that quantity without the risk of sub-letting is not well founded on fact.

3(b). Occupancy holdings at present revert to landlords on the ryot dying without heirs, and under the provisions of the Bill they would continue to do so, excepting those that may exceed 100 standard bighas, which, under section 11, being converted into tenures or under-tenures, would escheat to Government. This would be an infringement of vested rights.

3(c). If a tenure-holder, made such under section 11, should have no sub-tenants under him, and should cultivate himself the whole of the lands, what will be the standard of enhancement under section 9? If a reasonable rent be calculated, and a profit not exceeding 30 per cent. be given to him, it is not easy to foresee whether his position would be better or made worse. It depends on what is meant by reasonable rent. Does it mean rent paid by occupancy ryots holding under tenureholders of this class, or rent paid by occupancy ryots of the class from which he was raised to the position of a tenureholder, or that paid by sub-occupancy ryots or tenants-at-will?

3(d). The provisions of section 11 will greatly increase the middlemen class. In this district sub-infeudation is not so general and does not go so far down as in some districts in Eastern and Central Bengal. Generally speaking the cultivators here come after the zemindars. In some zemindaries there are farmers and under-farmers but their interests are temporary. In Mahalat Kharakpur, belonging to Raja Leelanund Singh, owing to exceptional causes, mokarraree taluqs are pretty abundant, and in pergunnah Harawat there are some putni tenures; but they are exceptions to the general rule. It will be very undesirable to foster and create middlemen where they happily do not exist by the mere force of legislation. Instead of subserving the true interests of the country, I am afraid the measure proposed will have an opposite result.

3(e). It is well known that a petty landlord is a much greater rack-renter than a big one. The occupancy ryots transformed into middlemen by legislation will prey more upon the next lower class. Section 9 will tend to make their rents easier in time than it would have been if they had remained ryots, and with it there will be a temptation to give up cultivation altogether and act the *role* of a middleman pure and simple. On the other hand, zemindars will refuse to let more than 100 bighas for fear of the creation of tenures under section 11, and ryots who can well afford to cultivate more than that quantity will go without land.

3(f). Landlords will suffer loss, as by the rules of enhancement applicable to occupancy tenures they get more than by those governing enhancement of tenures and under-tenures, and there is no guarantee that the actual cultivator will benefit.

3(g). There is no object gained by the measure when, under section 19, there may be a class of sub-occupancy ryots. It is all the same whether a ryot holding less than 100 standard bighas sublets, or whether one holding more than it sublets. It is true there is more probability of the holder of the larger quantity subletting through inability to cultivate the whole, but the same may happen with the ryot who has the lesser quantity also. Legislation should interfere as little as possible with the economy of the growth of tenures of land; if officiously applied, it may in the end lead to unforeseen mischievous consequences.

3(h). If legislation regulating the extent of an occupancy ryot's holding be deemed necessary, the limit of 100 standard bighas ought to be considerably raised; but I think the difficulties felt in the districts of Rungpore, Backergunge, &c., may be met if the definition of ryot be amended a little and framed to mean only "a person who holds land or who occupies and cultivates land, if such person or his predecessor in title was originally let into possession of such land for the purpose of cultivating it by himself, or by the members of his family, or by servants, or by hired labourers, or partly by some or partly by others of these persons," and a few explanations be added showing that, in determining whether a person is a ryot or a middleman, the court will have to ascertain the purpose above indicated, and that in order to do so it should have regard to—

(1) The description given in the original contract of letting, if any exists;
(2) The description given in the receipts as ryot or middleman;
(3) Any local custom bearing on the question;

(4) Whether the person now in possession of the land whose status is sought to be determined, does or does not cultivate as aforesaid the whole or a reasonably large portion of it;

(5) Whether the area as it was originally or as it is now, if compared with the area of holdings in the locality or at a reasonable distance from it, cultivated as aforesaid by other persons, reasonably leads to the inference that it could not have been a ryot's holding;

and if there are no sub-ryots, or if a reasonably large portion of the land is cultivated as aforesaid by the person in question, and there be nothing in the contract or receipts or local custom necessarily to lead to a contrary result, he shall be adjudged to be a ryot; but if there are sub-ryots and reasonably large portion of the land is not so cultivated as aforesaid, and test No. 5 should be unfavourable to his being considered a ryot, then, notwithstanding that tests 1, 2, and 3 may be in favour of his being considered a ryot, he shall be adjudged to be a middleman, *i.e.*, a tenure-holder or under-tenure-holder as the case may be.

3(*j*). The decision of the question on the above basis does not impose on the Legislature the task of arbitrarily fixing a limit: it gives free scope to contract and local custom, and only controls both when the circumstances of the case would lead to a different conclusion. The question is well worth your and the Legislature's consideration if the Bill be presented before the latter in its present shape.

3(*k*). The rule of enhancement laid down in section 9 is open to grave objection, as it may not under certain circumstances give any enhancement to the proprietor or zemindar, the margin of profit allowed to each successive tenure-holder leaving nothing for him.

Thus if A be the zemindar who has created a tenure at Rs. 500 yearly rent in favour of B:

B an under-tenure of the first degree in favour of C at Rs. 700 rent:

C an under-tenure of the second degree in favour of D at Rs. 1,000:

The gross collections from ryots to have been Rs. 1,500, but since raised to Rs. 2,000.

In this case, deducting collection charges at 10 per cent. from Rs. 2,000, balance is Rs. 1,800, and 30 per cent. of it is Rs. 540: balance Rs. 1,260, which D would pay to C as enhanced rent.

C would pay, deducting collection charges at 10 per cent. on Rs. 1,260 = Rs. 126, and 30 per cent. on the balance as profit to himself = Rs. 340, leaving out fractions, to B Rs. 793, who would similarly pay to A Rs. 500 (collection charges = Rs. 79, leaving out fractions, and profit Rs. 214). A gets no increase, although the rental increased by Rs. 500, and the intermediate persons received more or less increase.

Extract from the memorandum on the Rent Bill by MR. H. J. REYNOLDS *(on special duty), page 185 of volume I, Report of the Government of Bengal on the proposed amendment of the Law of Landlord and Tenant in that Province.*

"The really valid objections to the principle of the measure lie on the surface. It is an arbitrary rule, overriding custom and contract, and placing a number of persons in a position which they never desired or intended to fill. It trenches upon the rights of the zemindars by creating tenures without their consent. It cuts the knot instead of untying it, and sets aside the present law and existing engagements in order to provide for a class of cases which cannot after all be very numerous.

The Government cannot fail to be struck by the fact that, while the zemindars, whose receipts would probably be increased by the adoption of the section, have thus far declined to give it their support, it is regarded with no favour in those parts of the country for which it was supposed to be specially required. In the divisions of Dacca and Chittagong not a voice has been raised in its behalf, and it is alleged that in Rungpore its introduction would lead to consequences prejudicial to the economic interests of the district. The section has accordingly been omitted from the Bill. But as the want of some rule for the guidance of the courts in determining whether a tenant shall be considered to be a ryot or a middleman has been practically felt, a section has been inserted (as suggested by Baboo Surja Narain Singh) in the procedure portion of the Bill, indicating the principle by which the courts should be guided in determining the above question."

Remarks on Bengal Government circular No. 37—R, dated 24th May 1884, by BABOO SURJA NARAIN SINGH, *in acknowledgment of the letter of the Commissioner of the Bhagulpore Division, No. 817R, dated 29th May 1884.*

CHAPTER VI.

13. *Paragraph 16 of the Bengal Government Circular.*—It is very difficult to see how, having due regard to the just interests of the landlords, the growth of the occupancy right

can be facilitated. This policy can only be carried out by trenching upon the just interests of the landlords. A right of occupancy, such as the Bill proposes to create, is a substantial right of property, and every facility given by the law for its creation against the will of the landlord, where it does not exist, cannot fail to affect the just interests of such landlord. If the legislature considers that every ryot should have a right of occupancy at the sacrifice of rights held by the landholders, it would be more candid to give them the right in plain terms than to lead to its creation by legal devices which would foster litigation. Neither the provisions of chapter VI of the present Bill nor those of the original Bill relating to non-occupancy tenants have the recommendation of being just to the landlords or satisfactory in their results. If under-ryots having no rights of occupancy can be tolerated, one does not see why there should be such a great effort made to promote all non-occupancy ryots to the status of occupancy ryots by means of doubtful provisions such as the Bill contains. The non-occupancy ryots are gradually attaining the position of occupancy ryots through the supineness of the landlords, and it is hardly necessary for the Legislature to interfere and enact a law for that purpose at the risk of appearing to deprive the landholders of the rights they now possess, more specially when the definition of a settled ryot would tend to limit the circle of non-occupancy ryots very much. The proposal of the Bengal Government to equalize the rates of occupancy and non-occupancy ryots is opposed not only to the entire scheme of the Bill, but runs counter to the policy which underlies the Rent Law of 1859. That law divided ryots into two main divisions, not only in reference to protection from ejectment, but also in reference to rent. The Legislature then adopted a certain principle, and if it was in breach of the constitutional principle which is relied upon by the Bengal Government, the new principle has at any rate had operation for a long series of years. If, however, we are at liberty to refer to any old constitutional principle, it cannot with accuracy be said that the principle contended for is universally correct. It is a matter of history that in many parts (*see* Hunter's Orissa) of the country the rates of the khudkast ryots were in excess of those of the paikasht tenants; in other parts the reverse was the case, and in some parts there was equality of rates of both. To deduce a particular principle of general application on the basis of such facts, and to legislate on it, would be certainly erroneous, unless statistics were forthcoming to shew that equality of rates was the rule, and the others were exceptions. In other parts of India, the Legislature has recognised a distinction in the rates of the two classes of tenants, and the occupancy tenant has been allowed the privilege of holding in some province at 12½ per cent., and in another at 15 per cent., below the rates of non-occupancy tenants.

14. The produce maxima of the original Bill are open to so many serious objections that the percentage standard of enhancement laid down in the present Bill may be said to be a decided improvement, though it is not free from blemishes. The present standard is by no means so arbitrary as the produce maxima which had nothing for their foundation, but the *ipse dixit* of the proposer. I have already stated that legislation is not needed in respect of non-occupancy ryots; if the Legislature should deem interference to be necessary, then the chapter ought to be modified, and some simpler rules enacted. Do not the provisions of sections 56 and 61 clash a little with those of section 57? The Select Committee say that there is no limit to enhancement by registered agreement, but this ought to be clearly laid down. The word ryots in section 60 (9) is intended for non-occupancy ryots; if so, it ought to be specified. The limitation of 50 per cent. in the said sub-section does not appear to be reasonably fair.

CHAPTER VII.

15. *Paragraph 17 of Bengal Government Circular*.—I do not consider that the provisions of section 37 are workable. The provision of sections 38 and 62 will remain a dead letter in practice, and sub-letting will not be checked.

CHAPTER VIII.

16. *Paragraph 18 of Bengal Government Circular.*—I have already discussed the propriety of the presumption clauses, and of preventing enhancement on commutation in case of produce rents. Instalments (section 67) should be according to contract; if there be no contract then by local usage: the interference of the local Government is not called for and is not desirable. The rules regarding the grant of receipts and statements of account (sections 70 and 71) are somewhat cumbrous, cannot always be complied with, and will not in practice be complied with. Petty lakhrajdars, pundits, and many others own small bits of land which are let out to ryots. It is not likely that they would comply with the rules, nor can they be followed in *bhaoli*, and in those cases, such as *utbandi, hal hasilee, sairbudi, hustabudi*, &c., where the annual rent is only ascertainable on measurement every year or at the end of every harvest. In my opinion the law in this respect should not be compulsory, but only permissive, and some advantages ought to be held out to those who may grant receipts as prescribed in the law in the shape of facility in recovering rents.

17. *Produce rents (sections 81 to 83)*.—The rules do not protect the interest of the landholder. They are well calculated to bring on the abolition of *bhaoli* in time, as the zemindars would hardly be able to prevent pilfering and concealment on the part of tenants.

Remarks on Bengal Government circular No. 3T—R, dated 24th May 1884, by BABOO SURJA NARAIN SINGH *in acknowledgment of the letter of the Commissioner of the Bhagulpore Division, No. 817R, dated 29th May 1884.*

CHAPTER IX.

18. *Paragraph 19 of Bengal Government circular.*—The danger of allowing ryots to make the improvements referred to in section 87 is that as they are in possession of small plots of land, and the landlord is the owner of the whole village and has the interest of it to look to, it is quite possible that what may be an improvement in connection with the particular holding may turn out to be a source of injury to other lands in the village. Besides, the ryot has not the same opportunity of judging of the value of an improvement as the landlord is. The so-called improvement instead of being a blessing might prove a curse. It is true there is some provision in section 89, sub-section 3 (*a*), bearing upon the objection taken above, but in the first place this provision does not come into play in the case of ryots holding at fixed rents or at fixed rates of rent (section 88), and in the second place it does not appear to be quite adequate for the prevention of mischief pointed out above. Before a tenant of any class is allowed to make any improvement, the objections of the landlord should be heard, and a decision should be made whether the objections are valid or not. No improvements affecting prejudicially other lands in the neighbourhood should be permitted to be made, and the landlord should have the preferential right of making them, except very minor ones, such as enclosure, clearance, and the sinking of cutcha wells. It has already been remarked that a ryots' dwelling-house is not generally a part of his jote land, and that in quitting his jote he is not evicted from his house. Such being the case compensation for dwelling-house is not generally required to be given on eviction from jote lands. The universal custom of the country is that a tenant does not build a dwelling-house for himself and his family even on his own jote land without first obtaining permission from the landlord, and it is expedient that this custom should be observed, for a tenant might build on the best land he has, and thereby subject the landlord to loss in future by creating difficulty in the way of his recovering enhanced rent on such land on the basis of crop land. I do not see any harm in allowing the non-occupancy ryot the right of constructing a cutcha well, provided the zemindar is first asked to construct it himself and he declines, and his objection to the tenant constructing it is found to be untenable. The finalty accorded to the Collector's decision (section 89, sub-section 3) is open to much objection. The Collector may take an erroneous view and allow the tenant to make such improvements as might seriously injure the landlord. An appeal to the civil court from his decision should be allowed. Facility should be afforded to zemindars to acquire lands under the Land Acquisition Act for improvements connected with irrigation; but at the same time the zemindar whose lands are acquired should be protected from indirect or future loss caused by the works. I am, however, not in favour of empowering Revenue Officers to interfere in the manner suggested in clause (1), paragraph 2, of the Government of India's letter. Over-zealous officers may cause incalculable harm to one zemindar by cutting his irrigation channels and distributing water to a neighbouring landholder. As, however, the general creation of the right of occupancy and the introduction of stranger tenants by the creation of the right of transfer would tend to weaken the power of landlords, it would be desirable to empower the Revenue Officers or any other authority to arrange for the cutting of irrigation channels in lands held by ryots at the instance of their zemindar or at the instance of any ryots as against *his* zemindar or *ryots under the same zemindar* after the objections of the latter have been heard and finally disposed of by the said officers or authority and on appeal by some appellate authority. It would strike a blow to all notions of exclusive property if Revenue Officers were to allow other zemindars or ryots or such zemindars to participate in irrigation works constructed by a different zemindar or his ryots. This apprehension, however, is not applicable with the same force in the case of irrigation works constructed by a zemindar on his own land or by ryots under the same zemindar. The Land Acquisition Act may be resorted to if sufficient safeguards are laid down to secure the zemindar whose lands are taken from eventual loss by the bursting of the banks of the channels or their widening by the covering of the land with sand or from any other cause not taken into account at the time of acquisition owing to its not having come into play, and the present Land Acquisition Act may be modified for such a purpose. Provisions should also be enacted whereby the zemindar whose lands are taken, instead of receiving the value of them, should have the option of participating in the benefits of the works and also for the construction of works at the joint expense of several zemindars on the basis of an agreement made before the construction of the works or on such other basis as may be deemed equitable; but no power should be vested in Revenue Officers or any other authority to interfere with existing works or such works as might be constructed in future by zemindars on their own account without recourse to the provisions of the proposed Act.

19. *Paragraph 20 of Bengal Government circular.*—The danger apprehended from the abuse of the provisions as to abandonment on the part of landlords is imaginary and not real. Landholders may have expelled ryots or may in future expel them without having recourse to any legal formalities whatever, but there are hardly any cases where a landlord has falsely

set up the plea of desertion and taken possession of the lands of the ryot. False pleas of surrender of jotes are not unknown, and in order to guard against them, some facility of proof of actual surrender other than a registered deed, which is generally expensive, ought to be provided for, or if a registered deed be deemed essential, then the cost of registration should be cheapened. The provision contained in sub-section (3) of section 96 is open to objection. Instead of allowing the ryot to re-enter as is therein provided, it would be better if landlords were required to give notice of abandonment at once to any constituted authority who might hold an enquiry and declare the holding to be an abandoned one. After such declaration the landlord's right to re-entry should be indefeasible. In order to prevent loss to the landlord through delay in making the declaration, the law might enact that the enquiry and declaration must be made within a specified period from the date of application or the enquiry and declaration might be made after re-entry in urgent cases when delay would lead to loss to the landlord.

20. *Paragraph 21 of Bengal Government circular.*—The landlord should have the power of measuring all lands comprised in his estate or tenure, lakhraj or holdings not excepted. It is impracticable for a landlord in many cases to detect whether a lakhrajdar has encroached on his *mal* land, unless he makes a measurement. There is no harm done to anybody if a survey of internal details is even allowed to be made. A survey of only external boundaries might not in some cases afford all requisite information, but this measurement and survey should only be confined to ascertaining the area, the names of the ryots, and the lands held by each, and, if the lakhrajdar should desire, be made in the presence of or through some public servant or amin appointed by the civil court or the Revenue Officers as the Bill may provide. Measurements should be made by the local standard, as this is better understood by every body concerned.

21. *Paragraph 22 of Bengal Government circular.*—The difficulties which are supposed to arise from shareholders' disputes not have been felt in this district, and no managers of joint estates have been appointed. Under the present law, so far as I am aware, those difficulties have to a large extent been minimised by the Land Registration Act. The manager of a joint estate appointed under authority of the existing law, or any law that might be passed in that behalf, would be a title despot, and would play the *rôle* of King Stork of the fable. No attempt should be made to keep on the Statute Book the provisions relating to managers in joint estates. They tend to deprive landholders of the control of their property, make them slothful—a quality in which they unfortunately are not wanting—estrange the landholders and ryots from each other, and cause much harm to the interests of most of the shareholders, especially the poorer ones.

Remarks on Bengal Government circular No. 3T—R, dated 24th May 1884, by BABOO SURJA NARAIN SINGH, *in acknowledgment of the letter of the Commissioner of the Bhagulpore Division, No. 817R, dated 29th May.*

CHAPTER X.

22. *Paragraph 23 of Bengal Government circular.*—To the ascertainment of existing rights and facts and their record in a given form there can be no objection in theory, but the question is a grave one from a practical point of view. Any one having any experience of the country would hesitate long before he recommended the preparation of a record of rights for tenancies in the Lower Provinces. One ought to realise the stupendous nature of the work before he should commit himself to recommending it. Imagine for a moment the number of amins, amlas, peons that would be let loose over the country; the state of unrest that would be created, and the expense that would entail to the State and to both landlords and ryots in feeding and feeing the men that would be let loose. Whatever the results of the adoption of such a course may be in the distant future, it is hardly an exaggeration to say that as long as the machinery would be at work the common run of both landlords and tenants would probably have been effected. The host of claimants that were invited by the Land Registration Act is quite familiar to those who watched its operations. This Act, however, only applied to registration of proprietary interests, whereas the provisions of the Bill would apply to tenancies, the number of which is legion, and the enquiry is a much more detailed and complicated one. The peace and harmony that subsists between landlords and tenants would be rudely shaken, and every inch of ground would be fought by both. Is it expedient that such operations should be started when a complete record of rights and tenancies can be quietly obtained by encouraging the interchange of written leases? The road cess returns also afford some means of preparing a record of tenancies. For instance if periodical returns are made, a comparison of them would shew the length of time a ryot or other tenant has held land in the village, and if in future returns a few columns are added for the supply of some further needful information, the record would be of great value for administration purposes.

To the particulars mentioned in section 111 I would add the classes of land held by a ryot, the crop grown thereon, the average yield thereof, and whether the lands are irrigated, and how. It would be desirable that after all the trouble and expense incurred in preparing the record, it should have finality for a specified period instead of being liable to be disputed

in respect of undisputed entries. To guard against the objections taken to according finality to the record, it might be enacted that all undisputed entries should be signed by the parties concerned, and that if any party should not, on receiving notice to sign, appear within a specified period and sign or object to the entry, a note of the fact should be made against his name, and the entry shall be presumed to be conclusively correct. It would be well if in the enquiry leading to the preparation of the record, selected arbitrators were to act with the revenue officers.

23. *Settlement of rents* (*Government of India's letter, paragraph 21*).—The association of selected arbitrators consisting of landholders or law agents and ryots having an experience of agricultural matters in the vicinity, but not belonging to the village or estate, coming under the operations should be provided for both when the revenue officer is engaged in settling rents and also when the appeal is heard by the special Judge. If an arbitration court sits in each case, the power of the High Court may remain limited as it is in the Bill; otherwise it is not desirable to restrict the powers of the High Court in the manner proposed in section 118 (6). Why should not the High Court sit in judgment on the question of the propriety of the rates? I fail to see the propriety of barring enhancements for fifteen years when the rent is only ascertained and not settled (section 120). The reasons urged in paragraph 21 of the Government of India's letter for the adoption of this provision are not conclusive. It is quite possible that at the time of the settlement of rents, the grounds of enhancement might not be applicable and they might well apply five or eight years after. For instance, a ryot's rent had been enhanced by mutual agreement or by order of court within seven or fifteen years, as the case may be, previous to the commencement of the settlement operations. How could the landlord apply for an alteration of the rent? The result of the provision in question would be to deprive the landlord of all enhancement for a much longer period than it is contemplated in the Bill. The cost of the preparation of the record of rights and of settlement of rents should be borne by the party moving the revenue officer: if the operations should be started at the instance of the local Government, then by the State.

CHAPTERS XI AND XII.

24. *Paragraph 24 of Bengal Government circular.*—In my opinion chapter XI should be altogether omitted. It is now seen that it is not practicable to lay down tables of rates which would be of any value for any purposes of enhancement. The Bill should not contain any provisions which might afford temptation to the local Government to make an experiment. Although the omission of the provision that all lands shall be presumed to be ryoti from chapter XII takes away the pungency which adhered to the provisions of the original Bill, the very same result is attempted to be attained in milder language by the presumption prescribed at the end of section 138 (2). Suppose after making a record of the proprietor's private lands, the proprietor were to cultivate any waste and jungle lands and were to lease them out as provided in section 30, will this land be deemed to be his private land or not? The broad distinction between ryoti lands and private lands of the proprietor according to the custom of the country and the law of the permanent settlement lies in the fact of whether the land is in the possession of any ryot as his jote land or not. All besides this is the proprietor's private land. The introduction of any new distinctions would curtail the rights of proprietor, and as the provisions of the Bill now run would benefit nobody. On the contrary, if it be the intention of the Legislature to bar an increase to the area of the private lands of the proprietor after the preparation of the record, which intention does not seem to be clearly expressed in the Bill anywhere, the results would be withdrawal of all incentive to the cultivation of waste or other unoccupied lands on the part of the proprietor—a result which is very much to be deprecated. Chapter XII should be omitted, for a proprietor can increase the stock of his kamat as stated above. The chapter would introduce an unnecessary complication in the village economy.

CHAPTER XIII.

25. *Paragraph 25 of Bengal Government circular.*—Distraint is a means to an end. If the end be not attained it is useless to provide for distraint. The apprehension that if distraint be made a process of court, the end would not be secured, and the crops would be removed is not groundless. The remedy by an *interim* order is not likely to be efficacious. The distrainer will have to come to the court to make his application and by the time the *interim* order may be made and served on the ryot or the officer of the court reach the spot and distrain, the crop may be removed. The enable the court to supervise the action of the zemindar's servants, it might be enacted that within a specified period of making the distraint notice thereof should be given to the court by an application, and that the court would depute an officer to take charge of the distrained property. After this the matter might be entirely under control of the court. The remark that a remedy against the crop may be a more humane process than the remedy against the land is truly applicable to this country. The right of distraint may in some instances have been abused, but the same may be said of every other kind of right. The abuse is within the power of the executive to suppress, and it does not seem reasonable to alter the law materially and divest the process of distraint of all its utility by making it a process of court from the very commencement. The delay in a Bengal munsif's court, as was truly remarked by a high functionary, who is now a strong

opponent of the zemindars, and an advocate of tenant right, is proverbial. Very few zemindars would resort to the procedure laid down in the Bill for distraint when they come to find that the application would be infructuous.

CHAPTERS XIV AND XV.

26. *Paragraph 26 of Bengal Government circular.*—On the question of simplifying the procedure in suits for arrears of rent, I beg to make the following suggestion which has also been made by the local Landholder's Association. I quote with slight modifications what had been written by the Association elsewhere on the subject.

The present procedure for recovery of rent is dilatory and inconvenient, and ought to be simplified. The rules regarding grant of receipts and submission of annual accounts as contained in the Bill will be found to be impracticable in many cases. The annual rent is not in many cases ascertained until at the close of the year after a measurement of the lands. In some parts of the country rent varies with the crop. It would be impossible in such cases to state the annual rent in every receipt when the amount of it is not even known. Then there are small proprietors who would find it extremely difficult to observe literally the provisions laid down in the Bill. These provisions will practically remain a dead letter, and the landholders shall be held up to as execrable persons for not complying with the provisions of the law, as is now being done in the case of *abwabs*. Legislation opposed to the genius of the people and their inverate habits is hardly acted up to. The law on this point ought to be permissive, and some advantages should be held out to those who comply with its provisions. A landlord's rent suit ought to be decreed on the day the plaint is presented on production of registered kabuliyat and counterfoil receipts and proof of the claim by necessary oral evidence as in an *ex parte* case, and also on proof that a copy of the plaint had been served on the tenant by post or otherwise at least a week before the institution of the suit. Immediate execution should follow, and if the tenant should apply for a re-hearing, it should be incumbent on him to deposit the decretal amount before the prayer is granted. This procedure with necessary modifications might be extended to other cases also when there may not be registered kabuliyats but only counterfoil receipts; but in these cases no *ex parte* decree should pass if the tenant in reply to the notice should serve a counter notice denying the validity of the claim.

The provision occurring in section 164 is good. Chapter XV contains a cumbrous procedure which is likely to retard the speedy realisation of rent decrees. The property should be once for all put up to sale free of such encumbrances as are not protected.

CHAPTER XVII.

27. *Paragraph 29 of Bengal Government circular.*—Freedom of contract should not be barred at all. In deara and chur lands, and also in lands newly reclaimed from waste, the restrictions on enhancement should not apply until the full village rate is reached, and the right of occupancy also should not accrue till then; and if the whole of the village be newly formed, not till the lands have attained to that maturity which such lands ordinarily do. The period of 12 years prescribed in section 212 cannot always be a safe guide; the duration may be longer in some cases though generally it is not likely to be so. Whether deara lands have reached the stage of maturity or not, it is the custom here for zemindars to take *khas* possession of such lands as became fit for the cultivation of melons, water melons, &c., and this right should be preserved unto them.

28. *Paragraph 30 of Bengal Government circular.*—There are no special rights of pasturage, and special provisions are needed for it.

29. *Paragraph 31 of Bengal Government circular.*—I have already offered some remarks regarding landlords, irrigation channels, homestead land, and some other points touched in this paragraph. In my opinion it would be better to separate the taluks referred to in this paragraph from the control of the zemindar, and bring them on the Government towji direct.

30. *Paragraph 33 of Bengal Government circular.*—Besides *utbundi* and *hal hasilee*, there are *sairabadi* and *hustabudi* holdings possessing like characteristics.

31. *Paragraph 34 of Bengal Government circular.*—I have already stated my views personally regarding *gorabundi* holdings. As at present used, the term is convertible with holdings described in section 3 of the rent law. There are no distinct tenancies called *gorabundi* having any special characteristics irrespective of the provisions of the rent law.

Notes on a few of the Sections of the Bengal Tenancy Bill, published in the Gazette of India, *5th April 1884.*

CHAPTER IV.

Section 23 (b).—Where there is a registered agreement between an indigo zemindar and a ryot, the latter is liable to be ejected for non-performance of his contract to sow indigo. Will this section apply? I do not refer to agreements taken since March 1883, but those hat can be traced back for a number of years.

CHAPTER V.

Sections 25-26.—If this means that a settled ryot, who may have held, say, 10 bighas for the last 12 years, and new lands for the last two or three years, acquires a right of occupancy in all the lands in his possession on the passing of this Bill, it would be conferring a right on him which he never dreamt of claiming. The Bill does not propose to give such a right to the landlords for their khamat lands, as will be seen by reference to section 138 (*a*), as there they must show cultivation for 12 continuous years before the passing of this Act.

This section, I presume, is meant to nullify the action of those landlords who shifted their ryots to prevent their acquiring rights of occupancy. In doing so they were strictly within the law. But if the Committee are determined to change the same, would it not be sufficient if the ryot was allowed to have a right of occupancy in the land in his possession on the passing of this law on his proving he had *that area* for the last 12 years, although he might have been shifted from one plot to another?

Section 27.—"Estate" ought to be more properly defined. I have an estate paying revenue in Purneah, and comprising villages in three districts—Maldah, Purneah, and the Sonthal Pergunnahs—and some of the villages are over 30 miles from each other. Many other landlords are in the same position. It never could be intended, a ryot holding land in one of these villages would be a settled ryot in all the others. I would suggest "estate" to mean the villages of an estate contiguous to one another, or within a certain distance.

Section 28.—If the latter part of this section means a landlord cannot make use of the right of occupancy, as any other purchaser of the same, that is, he would lose it if he settled the land with a settled ryot, what would be the use of his purchasing it? He will have to pay for something from which he derives no benefit. It is a mistaken idea to think the landlords are going to purchase all the holdings in the market to make them nij-jotes. It will only be made use of to keep out objectionable tenants or neighbouring landlords.

Section 29 (2).—I understand by the latter part of the paragraph (2) of this section an izardar or farmer cannot acquire a right of occupancy by purchase during the tenancy of his farm. I may be mistaken, but it ought to be clear. Anyhow, he ought not to have the power without the consent of the landlord during his lease.

Section 30.—My experience is, the yearly lease is understood without a written agreement, and so the tenants of the nij lands were never supposed to acquire rights of occupancy; but if the yearly lease, or the lease for a term of years, is to be a registered one, the only remark I may make is, it is entirely against the custom of the country. It was always considered sufficient evidence of the nij-jote if the lands were entered as such in the jummabundi papers of the village, and whatever was collected in the way of kind or money from the under-tenants was kept by the landlord separately, and had nothing to do with the village papers.

Section 31.—Will a ryot, by settling ryots on his land, *i.e.*, allowing them to build houses on it, come under the definition (*a*) of rendering the lands unfit for cultivation? This ought to be properly defined. It is against the custom of the country. I may mention here of the custom of landlords settling a village on any suitable piece of land in the event of the old site being diluviated, without paying any compensation to the cultivators, as it was for the benefit of the whole community. This is so well understood that the saying is first "bastu," then "chass." Under this law a ryot would refuse to give up his land for bhast, although on a chur, if he had been in possession for over 12 years. This would put the whole village to great confusion, and I would therefore suggest custom ought to be allowed to prevail.

Section 31 (*g*).—A tenant is not allowed to sell a part of his holding, but he can sub-let a part. The first part will be evaded by giving a sublease, so that an obnoxious neighbour may be brought in. I know of several instances where the zemindar having objected to the new purchaser, the old tenant has allowed his name to be kept in the jummabundi papers, the rent being paid by the new purchaser, and receipts taken in the name of the original holder. To keep out outsiders, or those objected to by the landlord, I would suggest the sub-leasing should be to resident cultivators. They are always ready to take up land.

Section 31 (*f*).—I am against the right of transfer, as I have seen the evils of it. Hangers about court, money-lenders, amlahs, &c., are very often the purchasers, and my experience has been they have taken more than four times the rent payable by them in kind and money. We may try to stop this rack-renting, but it is simply impossible, as the under-tenants are a very poor class. In districts where the right of transfer has never been recognised, it should not be introduced; but where it has been so, it should be with the consent of the landlord, which has always been recognised. If the Committee is determined to give them the right, then I would suggest they should only be sold to resident cultivators, to which no well-meaning landlord would object. The great object of the Government seems to be to keep the land in the hands of the actual cultivators, and not to create a class of middlemen who will oppress the cultivator ten times more than the actual landlord.

Section 32. Latter part of paragraph 4.—I think the Court once having fixed the price, the tenant should be made to accept it, if the landlord tenders it.

Section 32 (5).—Would the landlord be obliged to pay the price paid or supposed to

be paid by the purchaser, or would he have the right of asking the Court, assisted by the assessors, to fix the value of the same? This is not clear, and ought to be made so. It is a well-known fact fictitious prices are entered in a deed of sale; and without the right to apply to the Court for a valuation of the holding, the landlord would be treated unfairly.

Section 35.—Deeds of sale will be drawn up as gifts to deprive the landlords of the right of pre-emption, so the right the landlord had of purchasing under section 54 (3) and (4) of the first draft Bill ought not to be omitted. It is only those who have had business dealings with the natives of India know how cleverly they manage to evade the law.

Sections 41-42.—If rents are not to be enhanced, unless under a registered contract, Government may at once take from landlords the power of enhancement in so far as it respects certain districts. In some districts the tenants, on no consideration, will go before a registering officer to register their leases; and one cannot be surprised at it, especially where the holdings are small, and the ryots live 20 and 30 miles from the station. In the Maldah district I have had the greatest difficulty in inducing a few tenants to register their leases, and in those instances I have had to pay all charges.

I have had a statement drawn up of the number of my ryots in the Muthrapoor property in Maldah, Purneah, and the Sonthal Pergunnahs, and the following is the result:—

Out of a total of 9,885 ryots—6,700	pay under Rs.	5 a year.		
1,669	" " "	10	"	
684	" " "	15	"	
336	" " "	20	"	
285	" " "	30	"	
97	" " "	40	"	
41	" " "	50	"	and only
43	" over "	50	"	

Most of these ryots live over 20 miles from the registry office, and how can it be expected they will go there for every settlement. Their expenses would be more than the annual rent paid. I have given these figures to show I have not exaggerated the difficulties of the case.

If the law provided that all settlements for a hundred bighas and over for a term of years, or for an annual rent of Rs. 50, should be registered, it would be practicable. If the landlord and tenant come to a settlement between themselves, so long as the rental is not more than a certain percentage of the estimated average annual value of the gross produce, why should there be any interference? There might be a written agreement between the parties for rents under Rs. 50 a year witnessed by the head ryot or the punchayets of the village to prove the validity of the agreement, and as the landlord is bound to give the ryot an account of his holding, according to schedule III of the Act—*vide* section 71, when an acquittance is given—it would be further proof of the agreement come to.

There being no registered lease does not destroy the right of occupancy of the tenant. I can see no objection in enforcing registered leases in small holdings, unless to harass both parties. In limiting the increase to two or four annas in the rupee will benefit the landlord who has not scrupled to harass the ryots with periodical leases; whereas the lenient landlord will suffer by not receiving his full rents for the next century. I have no hesitation in stating a good many of my tenants do not pay as rent one-fifteenth of the value of the crop, and the reason is the rents are low, because I get an equivalent by their sowing indigo for me; but by this section, if they refused to sow indigo, I could only receive from 12½ to 25 per cent. increase on the present rental. The tenants quite understand they would have to pay fair rates if indigo cultivation was given up; but beyond the few registered leases—about 20 at the most, referred to previously—I have nothing but petitions from the ryots which I accept, stating they will pay certain rates on the condition of sowing indigo, and I give them an umnulnamah stating I have agreed. They are paid for the indigo at the end of the season, and take new advances for the next year. This has been going on since 1816, and I am happy to state there has never been a single case in our indigo factories in Maldah or Purneah for damages for breach of contract. I would be very glad to have these agreements or umnulnamahs registered, but the ryots will not do it. It is not from want of trying, for I did my best one year to induce them to do so, and they all combined, and would not put a plough into the indigo lands till I gave in.

When Mr. A. Money was Commissioner of Bhagulpore, he ordered pottahs to be given to, and kabuliyats taken from, all the ryots of Havalee Kurruckpore, belonging to the Maharajah of Durbhunga, then under the Court of Wards, which was accordingly done; but although he offered to pay all the expenses connected with the registration, they all refused to go, and he had to give up the idea. When a Government official of his position could not have his orders carried out, it is not likely a landlord can do so against the wishes of his tenants.

Even if there was a registered contract, the indigo landlord, by section 41, could not take the full rate he was entitled to, but only get either 12½ or 25 per cent. increase, and the consequence would be indigo cultivation would be stopped. This is no exaggerated statement, for I have gone through the ordeal at Rajmehal, where the factory was closed for three years without the slightest dispute between myself and the ryots. In 1880 Mr. Browne Wood, the Settlement Officer of the Sonthal Pergunnahs, fixed a nominal increase of rent in my properties,

which even then were half of what my neighbours collected. I explained to him the rate fixed by him was half of what *he* had settled in 1862 in the adjoining property of Jumnie. He said he knew it, but could not increase the rents more than he had, as it would not look well; but as I was on good terms with the ryots, and did not really want an increase, as they sowed indigo, it was all right. I told him the consequences would be serious to me when they knew I could not get higher rents, and what I said was verified within the week by the ryots stating they would pay the nominal increase, and refusing to sow indigo. I challenged the tenants to state any act of unkindness or unfairness to them, and they one and all said they had no grievance; but having had their rents fixed very low they did not see why they should not take advantage of it. These facts are well known to Mr. G. N. Barlow, the Commissioner of Bhagulpore, and it was only when my property was exempted from the settlement by the Hon'ble Sir Ashley Eden, the Lieutenant-Governor of Bengal, and I had my rents fixed by arbitration, they came to a settlement. However, it was three years before they took to sowing indigo again, by having their rents reduced, as they found it more advantageous.

Section 42.—I consider this section as a modified one of section 56 of the former draft Bill, for if the landlord purchases the right of a ryot, he will not be able to let the lands to a settled ryot at more than an increased rent of 25 per cent., and that only under a registered contract, so that if the under-tenant of the land be a settled ryot of the landlord, and has been paying the middleman 50 per cent. above the landlord's rent, the landlord would have to decrease the rent by 25 per cent. This section if passed will cause landlords not to give the lands to settled ryots. Suppose a landlord buys a holding paying a fixed rent, or a mokurree tenure in his own estate; would that holding come under his khamat, or would he have to take the same rent if leased to a settled ryot, or only get the 25 per cent. increase under a registered contract?

Section 44 (*a*).—The court has the power to give an increase of eight annas in the rupee, whereas the landlord and ryot can only come to a settlement of four annas in the rupee. Is this consistent? Moral points the courts will not give more than 25 per cent. The indigo agreement would be void as I stated before and the indigo zemindar would get at the most 50 per cent., although it may be one-fourth of the prevailing rate.

Section 47 (*b*).—This is very unfair to the landlord, and ought to be omitted. Section 47, paragraph (*c*), protects the ryots sufficiently. I have reduced rents to one-fourth of what the ryots usually paid on account of lands becoming fallow through the failure of an inundation, and in many instances have let off the rents altogether. Under this section, if there was a deposit of mud, the court could only give the landlord an increase of 25 per cent.

Section 50.—This section should not apply to chur or dearah land.

Section 51.—If rents are reduced under this section, what will be the landlord's enhancement when the lands increase in value through various causes? Will it be 25 per cent. on the reduced rent, or 25 per cent. on the original rate?

CHAPTER VI.

Section 57.—The same remarks as I have made with regard to sections 41 and 42 apply to this section.

Section 59 (*b*).—The court having the power to determine the rate between the landlord and tenant as fair and equitable would simply give the tenant the benefit of an occupancy right rent, especially as the five years' lease granted, if after a continuance of seven years, would give the tenant a right of occupancy.

CHAPTER VII.

Section 62.—This section will be evaded by the middlemen, as the under-tenants of small holdings are a poor class. They will never register their contracts, and to save themselves they will either divide the crop or take the excess rent as a salami. If the under-tenants refuse, they will eject them under section 63 by giving them notice.

Where the rent paid by the under-tenant is at present double and treble what is paid to the landlord, I see no provision for a reduction. Either the landlord should be allowed to increase his rent to within 25 per cent. or 50 per cent. of the rent taken by the middleman, or the extra taking of rent ought to be punished in some way. The policy of the Government and of all well-meaning landlords is to keep the land in the hands of the cultivators.

Section 63.—Should a landlord purchase the right of the middleman, and the under-tenant be a settled ryot of the landlord; will the latter become a settled ryot in respect of that holding? This will occur very often.

CHAPTER VIII.

Section 64 (2).—1839 ought to be the presumption, as in Act X of 1859. How few zemindars there are who can produce papers of 20 years. The poorer ones have not the means of keeping them, and in many of the districts, like Maldah, Dinagepore, &c., owing to the

damp climate, they are eaten up with white-ants. In taking copies of records from the courts of 30 or 40 years, you often come across portions marked illegible, as having been destroyed by white-ants.

Section 70 (3).—This is simply impossible on receipts given during the year. The landlord may have to measure the lands every year, and do a good many other things, not knowing the annual rent payable by the tenant. Let there be a counterfoil of every receipt. I quite agree with an account being written on the back of the farkuttee, as shown in schedule III of the Act, to which the ryot is entitled as soon as he pays all his rent. If there is a dispute about the account, the ryot has a perfect right to apply to the court for the same. Nothing is here said about the receipt to be given to the under-tenant. I think he requires more looking after than the others, being generally more ignorant than the others; so section 71 ought to apply to him and paragraph (2) of section 70.

Sections 85-86.—With such a heavy penalty as a fine of Rs. 500 for taking an illegal cess, such as abwab, &c., I think it ought to be properly defined. Six months is a long time for limitation. Two months ought to be quite sufficient to prevent combination with regard to illegal cess. I wish to put the following two or three cases which some may think illegal and others not. For example:—Certain ryots for years pay an extra rent for their lands to certain shareholders, but do not take receipts, as they do not wish to pay the same to the others, and have a hope of not paying it in the event of the property changing hands. Would that be an illegal cess? Again, I have known of instances where the lease of an estate has been taken for a number of years, and the ryots have agreed to give an increased rent during the term of the lease, but would not take receipts, as they did not wish their farkuttees to show an increased rate. Was that an illegal cess? And lastly—would a landlord after purchasing an occupancy right on settling the land with a settled ryot, or with an ordinary ryot, be guilty of taking an illegal cess if he took a bonus to recoup himself for the money laid out in the purchase? I should scarcely think the latter case would be considered illegal, but there are a good many who think the two former are. By all means punish severely all oppression of the cultivator, but let the illegal cess be properly defined.

CHAPTER IX.

Section 89 (2).—If it had been a fact the occupancy ryot made all the improvements and the landlords none, I could understand the ryot having the prior right, but such not being the case. Why place him before the landlord?

Section 95.—Can a ryot surrender a part of his holding? This is not stated in this section, and ought to be settled.

Section 96 (2).—On whom is the landlord to serve the notice if the ryot has left the village?

(3) No tenant will take the land if he finds he can be turned out within two years. A man may give up his land for want of means to cultivate it. He would claim it within the two years if he found it well cultivated. If the occupancy right is valuable, as Mr. Reynolds seems to think, the ryot would sell it. It is only where the population is very great and rents are very low the occupancy right is of any value. In some districts, like in the southern parts of the Monghyr and Bhagulpore districts, where rents are very high, you never hear of any one receiving a price for his holding, although, I should say, 90 per cent., if not more, of the ryots have occupancy rights. In some parts of Maldah, Purneah, and North Bhagulpore, the difficulty is to get ryots. Six months ought to be the limit of time for bringing a suit for recovery of possession. The real hardship a ryot has to undergo to recover possession of his holding is the heavy expense he is put to at present, and it well merits the kind consideration of a Government who wishes to benefit the poor classes especially. The ryot ought to be allowed to apply for possession on an eight-anna stamp paper. At present he has to pay a stamp duty of 7½ per cent. on fifteen years' rental. For example:—If a ryot wishes to recover possession of 25 bighas for which he is paying Rs. 4 a bigha, he has to pay a stamp duty of 7½ per cent. on Rs. 1,500, and 5 per cent. on the same to the pleader as fees, besides other charges; so one can imagine the hardship entailed on a tenant. The same applies to a landlord if he wishes to eject a man who is a trespasser. It is a common habit in Bengal for ryots of another zemindar, who lays no claim to the property, to take forcible possession of newly formed chur lands, knowing the owner is bound to come to settlement with them on account of the heavy expenses incurred n cases of ejectment. This has been my experience in Maldah.

Section 97.—This can be evaded by sub-letting a part of the holding.

Section 99 paragraphs (*a*) *and* (*b*).—These paragraphs respecting measurements show the impossibility of granting receipts according to form schedule III as stated in section 70.

CHAPTER X.

Section 110.—If the Government were empowered to act upon the application of the landlord and tenant, as stated in (2) of section 110, this would be advisable; but as it is,

under the first paragraph, the Government are allowed, of their own motion, to put this section into action, thus causing ill-feeling and promoting litigation.

Section 121.—A percentage ought to be charged on the rental; for, as at present stated, it would be ruinous to all parties. What was the expense of Government in the settlement of the Sonthal Pergunnahs?

CHAPTER XI.

Section 133.—The same remarks applicable to this section as to section 121.

CHAPTER XII.

Sections 135, 136, 137.—Under these sections no landlord could have a khamat on new chur lands, and if he had, after a survey how would he have to act? This would prevent an indigo landlord from having a neez cultivation on a new chur. What is to be done with any waste lands the landlord may have taken up within the last 12 years and planted trees on them? From these sections I presume a landlord could not turn a holding he purchased into a neezjote, even if he cultivated it himself, or turned it into a garden.

CHAPTER XIV.

Section 162 (c).—I would suggest with the summons a copy of the plaint should be sent to the defendant.

Section 162 (d).—If a summons is sent through the post, and the tenant does not accept it, the head ryot or one of the punchyets ought to sign the receipt.

Section 162 (g)—The manner of the execution of a decree ought to be left to the discretion of the decreeholder, and not as at present, where you are obliged to take out execution at first against the person of the judgment-debtor, then against his moveable property, and finally, against his immoveable property, thus swelling up the amount of the decree with costs to four or five times the original amount; whereas, if the decreeholder had been allowed to execute his decree as he thought best, he would have attached the immoveable property, and realized the amount. This has been my experience in Bhagulpore Why cannot there be a summary sale of the holding after decree is given by the court like the putni tenure sale, especially if the ryot is one year in arrears. I would suggest all sales to be held in the village or estate at the mal kutcherry or some prominent place, to enable the resident ryots to bid. Cultivators do not care to go to courts 20 or 30 miles away on the chance of purchasing a holding, so jotes are likely to fall into the hands of the hangers-on about the court.

CHAPTER XVII.

Section 213.—By this section can the ryot and landlord come to an agreement without a registered contract? I presume not, according to sections 57 and 60. It very often happens the land, although over 12 years in the possession of a tenant, is liable to improvement or deterioration by fluvial action. A high inundation may make the greatest difference to the land; whereas, if the high lands for three years or so are not submerged, they become fallow, and are scarcely fit for anything. These lands very often have been 15 and 16 years in existence. All chur lands ought to be exempted from the Act, and the landlord and tenant allowed to make their settlements without being obliged to have a registered contract. The ryots, owing to the fear of the land cutting away, or deteriorating through the action of the river, will not go to the expense of registering their leases. On churs in Muldah there are all kinds of rates; one for boro paddy, another for jetkur cheena, a third for kalia, a fourth for scattered seed crop, a fifth for mustard, a sixth for melon, a seventh for indigo, and so on. Another custom is for the headmen of the village, when a new chur forms, to put in a petition for the lands and then divide the same among all the ryots according to the number of their ploughs, the headmen settling the rent. Under this law a registered contract would have to be taken, which is simply impossible, as next year the land may be in the bed of the river. I mention this as my experience, after living on the banks of the Ganges for the last 25 years, and seen the river change its course within a distance of six miles three times during that period.

JAMES HENNESSY.

EDINBURGH,
2nd July 1884.

No. 1848 R., dated Bhagulpore, the 14th August 1884.

From—G. N. BARLOW, Esq., C.S.I., Commissioner of the Bhagulpore Division and Sonthal Pergunnahs,

To—The Secretary to the Government of Bengal, Land Revenue Department.

I have the honour to forward a copy of a report upon the Bengal Tenancy Act by Mr. H. Reily of Chanchal.

Note on the Bengal Tenancy Bill.

1. At the threshold of the endeavour to regulate and prescribe the conflicting rights of landlord and tenant by legislative enactment, lies the difficulty involved in arriving at some definite conclusion upon which the proposed provisions of the law shall firmly rest. No one who has given the subject serious attention can for a moment doubt, that a searching and comprehensive revision of the present law has now become a matter of absolute necessity. It should, however, occasion little surprise that the gradual elaboration of this new scheme of rent law, from the time of its ruder beginnings to the moment when we have the finished details embodied in the form of a Bill, has been accompanied by varying gusts of opposition, often losing themselves in a whirlwind of wild invective. On theother hand, the advocates of the Bill as originally drafted exhibited, I think, something more than a suspicion of injustice in attributing all opposition raised to the leading principles of the Bill, to a wild and unreasoning prejudice in favour of the rights of the zemindar. The matter, however, is not worth further notice in detail, in that a large proportion of the questions which excited these hostile comments has now been definitely abandoned. At the same time, speaking for myself as one who offered a sustained and persistent opposition to some of the leading principles of the Bill as then drafted, I can most conscientiously assert that the considerations which provoked this opposition were not founded, so far as I am aware, upon any leanings which may be supposed to sway my mind towards the zemindar's view of the question; but were excited quite as much by the feeling that many of the provisions in the law, as then framed, would not give effect to the benevolent object which had procured their insertion. My action was prompted quite as much by my desire to secure the real and lasting benefit to the ryot, as by my anxiety to preserve to the zemindar rights which I considered justly his due. The fact that the attitude assumed by me in this matter has more than once been made the subject of official comment, must be my excuse for alluding at such comparative length to a question of a purely personal nature.

2. The Bill, in order to justify its existence, must necessarily handle with unsparing impartiality cherished beliefs, and with equal candour and firmness set aside customs and observances of suspicious origin; but entrusted nevertheless with the dignity attributable to extreme old age. Without, however, wasting time in an unprofitable endeavour to adjust the precise proportion of merit attributable to each of the contending influences in the noisy controversy, it may, I think, be asserted with safety that the verdict which will ultimately apportion the proper modicum of praise or dispraise to the efforts of the framers of the new Bill, will not to any great extent be attracted by the influences which lie for the moment nearest the surface; but on the contrary gain vigour and force according as it is seen how far this Bill endeavours to rectify injustice, and to mitigate the sorrows of those who are peculiarly susceptible to the tyranny of harsh treatment.

3. In an attempt to criticise the sections of this Bill it would, I think, be absurd to hope that the remarks of each critic, however conscientiously delivered, would not to some degree be tainted by his own predilections. In the great body of opinion which will soon be at the disposal of the Government, this evil will neutralize itself, and those charged with the duty will have little difficulty in estimating the true value of opposing opinions. For my own part,—and I mention the matter more particularly now, as my own views lead me to dissent from one or more of the leading principles of the Bill,—I do not pretend to bring to a consideration of the subject any thing more than a mind stored in some measure with a practical knowledge of the ways and habits of a people among whom a large portion of my official life has been passed. I have enjoyed the further advantage of a long familiarity with the method in which the existing land-laws were worked throughout those districts which were under my immediate observation: armed with this special knowledge, which I may remark, only extends to that part of Bengal where land is greatly in excess of the demand, I may be deemed in some small measure to be in a position to arrive at some definite conclusion on the practical results which await the passing of the Bill in its present shape; and the conclusion forced upon me is, that the Bill in many of its provisions will not fulfil the object it is intended to serve,—a defect conspicuously apparent in a large proportion of the sections professedly inserted with the object of ameliorating the conditions of the ryots. My confession of faith as regards the proper status of the ryot may, I think, fairly be summarised as follows :—" It is but fair and right that some ready means should be given to the ryot to enable him to resist illegal distraint, illegal enhancement, and illegal cesses, and to prove and maintain his occupancy-right." But I should have the right of occupancy kept as far as possible in the hands of the *boná fide* cultivators, and would discourage, if I could not altogether prevent, sub-letting by occupancy tenants. In my view it becomes a question of some importance whether the Legislature, in a matter which must affect the well-being of over 60 millions of people, should not confine itself to removing acknowledged difficulties and to the granting of those requirements which have been found to be necessary under altered conditions caused by ever-changing circumstances; rather than embark on the open sea of abstract principles with no more reliable guarantee for the rectitude of its course than can be extracted by the learned from a vast superincumbent mass of purely theoretical knowledge.

4. With these preliminary remarks, I would now pass to a more detailed consideration of the points noticed in the Government of Bengal Circular No. 3T.—R., dated 24th May 1884.

5. With respect to questions raised in paragraph 4 of the Government letter, whether the conversion of a sub-letting occupancy ryot into a tenure-holder is a workable provision, I am on the whole of an opinion that it would be very difficult to give practical effect to the provisions of the law. I do not see how a tenant so sub-letting is to be forced to make the fact of such assignment public. In the estate under my charge there are twenty-nine thousand tenants; unless the law comes to my assistance, and furnishes me with the right to obtain such information, how will it be possible for me to discover when the ryot by his own action has stepped over the border line which separates him from the class of tenure-holders; nor am I at all certain that the provision will in any way secure the object for which it was devised. The money-lender could easily avoid the restriction attempted to be placed upon him. Among others, the following illustration will support this assertion:—An occupancy ryot, holding a *jote* of 100 bighas, becomes indebted to the local *bunnia* for a sum of Rs. 500; to avoid a suit for the money the ryot is forced to assign 49 bighas of his most fertile lands to his creditors for a sum of Rs. 250. The ryot still retains his legal status as an occupancy ryot, as the amount sub-let is less than one-half of his *jote*; but is left nevertheless to pay the rent of the entire arrear of his original holding out of the margin of profit secured to him by the cultivation of the 51 bighas of inferior lands. It may be taken as certain that the *bunnia* with a debt of Rs. 250, and a large interest accumulating monthly, never pays a penny of rent to the unlucky ryot. It is not necessary to follow out through its further stages the process which will enable the *bunnia* to swallow up the whole *jote* and step into the ryot's shoes, and himself become an occupancy ryot, duly registered in the zemindar's rent-roll.

Government letter, paragraph 4.

6. I have more than once expressed a very decided opinion, that occupancy-rights, to be productive of any real benefit, should be accompanied by severe restrictions against the evil of sub-letting; untrammelled by such limitations, the existence of occupancy-rights must infallibly lead to sub-infeudation. The occupancy tenant will escape rack-renting; but if the holding is large, and the rent he has to pay is lower than that paid by the tenant-at-will, he will probably sub-let and rack-rent his under-tenant. He will have no difficulty in most parts of this province, and in Behar especially, in finding persons who are willing to accept sub-leases from himself, and he will let the whole or the greater portion of his *jote* at rates which would leave a margin to his own rental sufficient to maintain himself and his family. The ryot would thus be able to gratify two predilections,—a love for idleness, and a fondness for having dependents at his back and bidding. It therefore follows that on the one hand, the landlord would enjoy only a small percentage of the rent value of his property, while on the other the actual cultivator would be rack-rented and scarcely able to extract a bare living from the soil; while a band of middlemen fatten on the joint contribution of landlord and cultivator, handed over to them under the direct provisions of the law. If, however, it is found impossible to prevent sub-letting, I am of opinion that under-tenants, whether of tenure-holders, or tenants with rights of occupancy should themselves be permitted to acquire rights of occupancy. The actual cultivator is the only person who should be considered worthy of protection, and I certainly think that under-tenants should be allowed to acquire rights of occupancy. Hitherto the under-tenant has been merely a tenant-at-will, and has been rack-rented and scarcely able to extract a bare living from the soil: an attempt might, however, be made to reduce the evil effect of sub-letting, by enacting that the landlord of every tenure-holder or occupancy ryot sub-letting any portion of his holding should, when the time arrived for the next revision of the rental of that particular *jote*, be entitled to ask the Court to fix such rental, calculated, as far as the portion of the *jote* sub-let was concerned, at a rate of only ten cent. less than the amount paid by the under-tenant.

Sub-letting.

7. I would omit this section (section 8). There are many instances in this district where a tenure-holder (under the new definition) pays only two or perhaps four annas a bigha, and has sub-let his lands to under-tenants who are paying him 12 to 14 annas per bigha. I do not see why the tenure-holder should only be liable to have his rent raised to four or eight annas per bigha, as the case may be, when he can raise his under-tenants' rates from twelve annas to Re. 1-8 a bigha. I fully appreciate, however, the motive which would make enhancement gradual, and I would direct that in no case should the enhancement payable in any one year be more than four annas in the rupee. But I would make no limit to the enhancement except that stated by me in paragraph 24. I can conceive no reason why any hard-and-fast rule should be adopted as to the percentage up to which enhancement should be allowed. If the courts are to be trusted, I think the only limit to enhancement should be a fair and equitable enhancement, as determined by the court. The provisions of this section would simply allow a tyrannous landlord, one who has exacted the uttermost farthing, to enjoy the full benefit of his rapacity; whereas a zemindar who has treated his tenants with consideration will be at a positive disadvantage. As a matter of fact, the harsh landlord busying himself continually with enhancing his rents to the full turn of the screw would, by

Government letter, paragraph 5, chapter III, section 8.

such process, preserve his estate comparatively unimpaired; while the pattern landlord, keenly alive to the comfort and interest of the tenants would, by his very philanthrophy, indirectly bring about a serious diminution of the rent-roll. This section simply means a confiscation of an important portion of the landlord's rights; the legal machinery set in motion to enforce this view being calculated to work with greater cruelty on the most deserving of the class of landlords, while the rack-renting, evicting zemindar comes off comparatively free, and escapes punishment altogether. If the restrictions laid down in section 8 were omitted, and enhancement permitted to the full amount obtainable under the provisions stated by me in paragraph 26 of this letter, I would feel inclined to direct that rents once enhanced may not be altered for 25 instead of 10 years, as laid d[illegible] section 10. Another objection to this percentage being fixed at a hard-and-fast limit is, the difficulty of calculating the percentage in cases where land is held below its real letting-value in consideration for service rendered, or the growing of a new produce. How are we to determine what the money-value of such service is, or what the proper enhancement should be, in cases when the ryot got his land at a low rate for the purpose of the introduction of these new crops? The present arrangement is perfectly unworkable; whereas if the enhancement were to be "a fair and equitable one," every one of these considerations would have its due weight.

Government letter, paragraph 6, Chapter IV.

8. In the Maldah district, the few instances in which suits are brought, the 20 years' presumption is almost invariably pleaded *pro forma*, but never persevered in; the reason of this is, that the frequency with which ryots alter the sites of their holdings in districts where so large a margin of uncultivated land exists, renders the success of such a claim impossible. There can be no doubt whatever but that the presumption would be a grossly unjust one if it were advanced in the manner indicated in the section. Mr. Reynolds, however, stated the case so clearly in the remarks which accompanied his draft Bill, that words of mine would be superfluous in support of his contention.

Government letter, paragraph 7.

9. I am decidedly of an opinion that material and practical loss would result to zemindars if the power to acquire rights of occupancy by a ryot were extended to all lands comprised on an "*estate*" as defined in the Bill. The whole difficulty which surrounds this and many other questions connected with the Rent Bill would, in my opinion, vanish if the attention of Government were directed to reinstating not some imaginary class of cultivators, but the class which has hitherto been recognised both by the zemindar and the ruling power: I allude to which the "*khud-khast*" ryot. If the "*mouzah*" were made the unit within the area of go upon. We occupancy rights can be obtained, we should have something definite and tangible to difficulty as to the [illegible], moreover, have a limit which is understood by the [illegible] uole and are mapped out; estates on the [illegible] "*estates*" &c. would disappear [illegible] are well defined mapped. The substitution of the "*mouzah*" as the unit within which the 12-years' right should alone accrue will, I think, avoid all difficulties and furnish a successful solution to a problem which has proved invincible up to the present time. I would, in fact, restore the "*khud-khast*" ryot to the status which he occupied before the Permanent Settlement, with, however, certain additional rights which I now proceed to specify. In the first place, I should give a ryot who has once obtained occupancy-rights of lands within a *mouzah* the right to hold all lands he may subsequently obtain *in that mouzah* as an occupancy ryot, and this not only in the *mouzah* in which he has his homestead, but also elsewhere, so long as he has laid the nucleus of this right by holding lands there for a period of twelve years. For instance, a tenant residing in *mouzah* A, and cultivating land there for upwards of 12 continuous years, would hold any lands in that *mouzah* he might hereafter lease as an occupancy ryot. The same privilege would accrue to him in regard to lands held in any other "*mouzah*" so long as he had cultivated land in that "*mouzah*" for 12 continuous years. By this means not only the "*khud-khast*" but the "*pykast*" ryot would in time acquire rights of occupancy. In "*dearah*" country, where lands are liable to be washed away and yet from their peculiar fertility attract ryots this precaution is absolutely necessary.

Government letter, paragraph 8.

10. With regard to the remarks contained in paragraph 8 of the letter under reply, I would here repeat what I have before said with greater or less emphasis. I would enact that the sale of a *jote* in which occupancy-rights had accrued shall not convey such rights to the purchaser, except in those cases where the *jote* is sold for arears of rent due in respect of the lands which comprise that *jote*. Unless some such respective rule be adopted, my own sincere opinon is—and I am sustained in this belief by a large majority of those conversant with the subject—that in a very few years the present occupancy ryot will have disappeared. I cannot too strongly protest against the mischief that is presumably about to be perpetrated against the interest of the cultivating ryot in the very effort ostensibly made to ensure his welfare. It must be remembered that more than 50 per cent., if not a higher proportion, of the tenants are hopelessly in debt to the money-lender. The magnitude of this debt is to a great extent owing to the flimsy nature of the security afforded by the tenant. The motives which have hitherto restrained the money-lender from selling up his debtor is traceable, rather to his knowledge of the fact that more is to be gained from his hesitation, than to any actual regard for the interest of the wretched ryot. The passing of the Rent Bill

immediately imparts the right of occupancy to an enormous number of tenants hitherto considered mere tenants-at-will. The same law also furnishes the ryots with the power of selling their rights. Under these circumstances will it not infallibly follow, that the local *bunnia* throughout the province will immediately see the advantage of forcing the ryot to transfer his *jote* in part payment, probably of an old debt. It should not be forgotten that the interest charged on the original debt was calculated on the supposition that the ryot had little or no security to offer in return; by this Bill the Legislature proceeds to confer on the ryot a right in the nature of an extremely valuable security, presumably with the only ostensibly purpose of ultimately bettering the position or adding to the usurious gains of the money-lender. In my opinion, five years after this Bill comes into force, more than half the present holders of occupancy rights will have been sold up by the money-lender, and the original occupancy-holder relegated to a position comparatively little better than a serf. In connection with this subject, I ordered enquiries to be made, and a statement was prepared showing the number of tenants indebted in 15 of the villages in the Chanchal Estate. I had not the establishment to make a detailed enquiry over the entire area of this estate, and therefore selected two villages in each circle to enable me to form some idea as regards the proportion of tenants indebted to money-lenders. The investigation extended to 1,849 families, consisting of 9,408 persons, or between 4 or 5 souls per family; these families cultivated 30,249 bighas of land. The average holding, therefore, per family is little over 17 bighas or nearly 5 acres. They owed at the time of enquiry Rs. 6,764 for rent, or about one-fourth of one year's demand. The annual average rent is Rs. 7-8 per family, or Re. 1-6 per acre. As nearly as could be ascertained, 1,155 or ⅝ths of these tenants were in debt, and some of them hopelessly so, to the money-lender. About 90 per cent. of these would probably obtain occupancy rights under the new Bill. Hitherto the right has not been deemed transferable in this district, but the moment it is made liable to sale in the same manner as other property under a decree of Court, a large proportion of these debtors will be sold up; or what is much more common, the tenant will be induced to hand over his holding to the money-lender in part payment of his debt, on the promise that he will be allowed to remain in possession of the land on the *adhi* or *metayer* system. The money-lender, once he is let into possession in this manner, soon finds an excuse to dispossess the original holder bit by bit, and eventually the occupancy-holder is reduced to the possession of a serf or a paid servant, who is given just sufficient to keep body and soul together, while the bulk of his earnings go towards paying off an ever-increasing debt. In going through a list of tenants in pergunnah Rokanpore, where the average rent paid for land is less than six annas a bigha, I found 133 tenants who, though their names appeared in the zemandari papers as tenants, no longer occupy the lands comprising their holdings. They had long since made them over to the money-lender in part payment of their debt, and had either disappeared from the village or were serving the money-lender in the capacity of a servant, or had sub-leased the holding from him on the *adhi* or *metayer* system. Ts I have a lender had avoided the necessary mutation of names by continuing to pay the rent in t at name of the original occupier.

11. The argument which would transfer to the occupancy ryot the rights of free sale is, as I understand, based on the contention that such rights being an ordinary incident of a tenant in most countries, it does not seem to be equitable arbitrarily to exclude a ryot in Bengal from the enjoyment of the privilege appertaining to such incident. The danger, however, attending so radical a change in the existing law should, I think, prevent the innovation. It should be remembered that the occupancy ryot, in accordance with the suggestion made in paragraph 32 of this letter will, to all pratical purposes, enjoy the right of sale. He has only to fall into arrears to force a sale, and such sale being for arrears, must carry to the purchaser the occupancy-right. In a subsequent paragraph I have suggested that the landlord should be allowed to eject an occupancy tenant who failed to pay the amount decreed within 15 days of the order; I should however, permit a ryot desirous of selling his occupancy-right by falling purposely into arrear, to deposit the amount decreed within the 15 days, and yet have the right to insist upon the sale; the deposit in these cases being simply made with the object of preventing ejectment by the zemindar.

Government letter, paragraph 9.
Prevailing rate.

12. There is practically no such thing as a universal "prevailing rate" in the corner of Bengal in which I have local experience. It is true the tenant will tell you on enquiry that lands of certain quality pay certain fixed rates of rent, but on investigation this assertion has always proved illusory. In the Maldah district, and I believe in the neighbourhood, suits for enhancement of rent of an occupancy ryot on the ground of the "prevailing rates" are conspicuous by their absence; a suggestive proof of the difficulty of working a suit to a successful issue under this clause of section 18 of the Bengal Rent Act, 1869. I have never heard of a single instance where the manufacture of fictitious rates have been utilized with the object of raising the rate of rent of an occupancy ryot in a court of law. The only case known to me of a practice similar to the one indicated here, is where the zemindar, dealing with a body of refractory tenants, induces, generally by illicit means, a dozen of the more leading ryots to make a pretence of holding their lands under rates fixed by the landlord; the body of villagers usually follow the example of their leaders, and the agitation for the moment is allayed. But this process could not even give temporary validity to the "prevailing rates" so created, for none of the tenants would dream of having a *pottah* registered in which

these fictitious rates found a place. Even the leading ryots originally cajoled into an acquiescence would show the same aversion in spite of the pecuniary inducement which procured in the first instance their agreement to the terms of the zemindar. Fictitious rates of this class could be successfully eliminated from the consideration of a Judge if it were enacted that no Court should accept any evidence of a "prevailing rate" other than which may be gathered from rates specified in a *pottah* which had been duly registered.

13. There can be no doubt, however, that the existence of a number of holdings in a village or *mouzah* paying rents respectively on registered *pottahs*, must, in process of time, create a "prevailing rate" within such limits; and as the registration of *pottahs* is made compulsory under the Bill, it follows that the "prevailing rate" in a year or so will be a fact easily ascertainable by investigation by the Court: under these circumstances, I think the clause making the "prevailing rate" a reason for enhancement should still be retained in the Bill. The utility of retaining the clause is, that it furnishes the landlord with a recognised standard of rates on which he can base an application for raising the rents of tenants who pay abnormally small rents in contrast to the rates paid by the great majority of the tenants. Though there may be no such thing as a "prevailing rate," yet rents in every village or *mouzah* range themselves under different groups varying generally, it may be, from two annas to a rupee a bigha; for the larger proportion of the tenants paying at the higher rates. The existence of the clause on "prevailing rates" would enable the landlord to raise the rents of the small minority of tenants' holdings at two (2) annas a bigha to an approximation of the rates paid by the majority.

14. I am in favour of making no difference in the terms obtainable by a zemindar by amicable settlement, and those which may be afforded him by a suit in Court. In the first place, the registration of these private contracts made compulsory by the law will, to a great extent, prevent ignorance of the ryot being unduly utilized to his disadvantage. But the main reason for my opinion lies in the fact that in practice, when enhancement on a systematic plan is determined upon by the zemindar, he, as a rule, brings half a dozen test cases in Court, and on the result of those cases the enhancement of the rental of the entire village or group of villages would be carried out without the further assistance of the Court. The marked difference in the advantage to be gained by a recourse to the Court under the provisions of the Bill, as now framed, would prevent the landlord entering into any amicable arrangement with that portion of his tenants whose rent he is desirous of raising (possibly with their consent) beyond the limits fixed by the Bill, as applicable to private contract alone.

Government letter, paragraph, 10. Enhancement by private contract.

15. What the letter of the Secretary to the Government of Bengal objects to as a fictitious, varying, and [illegible] standard of rate, I look upon as a true in[illegible]essful [illegible] of the real letting-value of land and the true [illegible] of prevailing rates. The true letting-value of the land is, in my opinion, the only standard it would be safe to go by, and which is sufficiently elastic to suit all parts of the country. Section 42 deals with the rights of the "*settled ryots*" in respect of the occupancy lands leased to him which have come into the hands of the zemindar either through the pre-emption clauses or through the falling in of tenancies owing to a ryot's death or desertion of the holding. Under that provision, such "*settled ryot*" obtains occupancy rights the moment he enters into possession of the lands. And it is further laid down that he is not bound to pay for lands so leased to him any rent higher than that paid by the previous tenant, unless such higher rent has been fixed by a contract in writing; and all contracts made under this section (42) are made subject to the provisions of section 41: this contract, however, must also be registered and approved by the Registering Officer. In order to judge of the practical effect of these new provisions should they become law, I propose to apply them to a case that lately came under my notice in the estate under my management. Not long ago a tenant enjoying occupancy-rights died leaving no representatives to whom his rights, under the present law, would descend. During his lifetime he paid an annual rental of Rs. 84; shortly after his death I received applications from various tenants on the estate for a lease of those lands. The rental offered in each case was greatly in excess of that paid by the late tenant, and on enquiry, I discovered that the deceased had sub-let his entire holding to several sub-tenants, and was at the time of his death in receipt of an income of Rs. 156 a year for those lands. Under the existing law I found no difficulty in transforming these sub-tenants into direct tenants of the estate, leaving them in the possession of their respective *jotes* with a prospect of acquiring occupancy-rights in due course. Now, assuming for the time the rôle of a zemindar, let me sketch out the procedure I would in all probability adopt had I to deal with this case under the law as laid down in the new Bill with this difference, however, that in the present case the tenant must be taken to be desirou, of selling his holding. In the first place, I would have to decide whether it was worth while to exercise my right of pre-emption. This decided in the affirmative, the next question would be the amount to be paid for such purpose. The law as it stands is somet what hazy as to the rules to be adopted by the Civil Court under which the amount to b- paid by me is to be calculated. On the one side I would naturally seek to depreciate th

Chapter V, paragraph 11, enhancement on re-settlement.

value of the property, urging on the notice of the Court that it had hitherto only paid a rental of Rs. 84 a year; that under the law the right of occupancy in respect of these lands, if let to a "settled ryot," will immediately accrue to the tenant to whom I re-let them; that under the severe restrictions placed by the law (section 41) my right to enhance the rent of an occupancy tenant, I could not hope to add much to the rental paid me by the late tenant.

16. Here let me pause for a moment to show that I am not forgetful of the fact that the provisions of the Bill enable me to lease these lands to a "non-occupancy" ryot at their full letting-value. This alternative would, however, in this particular case, be valueless. Where, for instance, could I turn to in search of a tenant who would not at the same time come under the definition of "settled ryot"? For any tenant who might possibly be induced to lease these lands would, under the definition of the Act, be a "settled ryot," already holding lands in the estate in which these lands are situate. Practically, therefore, I should have no choice in the matter, and be forced to have recourse to illegitimate means for the purpose of securing to myself the full rent which would be obtainable by me (the zemindar) could I let these lands unhampered by the restrictions placed on my actions by the provisions of the new Bill.

17. On the other hand, another intending purchaser at the sale, anxious to secure the property to himself, might fairly urge upon the Court the fact, that although it might be true that the land if purchased by the landlord (myself) would be worth to me little more than a rental of Rs. 84 a year, yet to a stranger, unhampered by the restrictions as to occupancy rights, which bind the zemindar alone, purchasing these lands they would be worth a great deal more, *viz.*, the difference of value as shown between Rs. 84 paid to the landlord, and the Rs. 156 paid by the sub-tenants to the occupancy tenant. With these facts before it, the Court would have to arrive at some decision. It is impossible to say to which side the mind of the Court will lean in estimating an equitable amount as the purchase-money of the property. On the one side, it might fairly be urged, that as the zemindar had the right of pre-emption reserved to him by the law, and by the same law his right to enhance has been restricted to almost infinitesimal proportions, that the amount of purchase-money should be calculated in accordance with these considerations; on the other, the fact remains that the power of pre-emption preserved to the zemindar is optional and not compulsory—a fact sufficient to enable the Court to fix the purchase-money calculated on the real value of the property as represented by the rental paid by the sub-tenants at the time of sale. Probably the decision arrived at would be a compromise between these two adverse considerations, and I, the landlord, supposing I considered it advisable to exercise my right of pre-emption, will find myself called upon to pay a larger price for this privilege than would be considered at all just or equitable.

18. The right of pre-emption given to the zemindar has, I confess, a specious appearance of generosity; but as I have attempted to show, it only requires a determination on the part of the Court to fix the amount of the purchase-money in accordance with the real value of the land, ignoring the somewhat anomalous position into which the unfortunate landlord is relegated by the law, to make the value fixed prohibitory as far as the landlord is concerned, and render this much lauded privilege an useless and empty formality. Another matter in connection with this right of pre-emption merits attention. At the time of sale the Revenue Officer or Civil Court, as the case may be, in calculating the amount of purchase-money, will, as a matter of course, have to take into consideration the so-called ryot's improvements on the land, and this will form, I take it, an appreciable proportion of the sum ultimately settled upon by him as purchase-money; it being but fair that the outgoing tenant should be repaid for any improvement effected in the land at his own cost. The zemindar, should he deem it advisable, or as it will often occur, find himself compelled to exercise his right of pre-emption, will find himself burdened with the payment on account of these improvements; but will under the provisions of the present Bill (clause *a*, section 41) be precluded from reaping any advantage from the extra outlay. At present it is true there is nothing to prevent the zemindar from retaining these lands in his possession, and farming them himself or leasing them to a non-occupancy ryot. But should the land be situated at a distance from the zemindar's residence, it would not always be possible for him to undertake to cultivate these lands himself. It would in many instances be difficult for the landlord to find a non-occupancy tenant if the definition of the Bill, that all tenants holding lands for 12 years in any one village of an "*estate*" gives them a right of occupancy over all lands comprised in that "*estate*," be retained. There are many instances in the Chanchal Estate when the entire lands for some miles round would belong to the one and the same "*estate*," and in these tracts it would be impossible for the landlord to find a non-occupancy tenant to whom the newly acquired holding might be leased.

19. Another difficulty in the way of the zemindar exercising his right for pre-emption suggests itself. Take for instance the case (and they are numerous in this estate) where tenants are holding at the rate of two annas a bigha, but who obtain at the rate of a rupee a bigha from the under-tenants. Here, on being afforded the opportunity of exercising my right of pre-emption, I should have to consider the fact whether it would be worth my while to purchase the *jote*, when at the most I could obtain under the law (section 41) would be no more than 2½ annas a bigha from a settled ryot for lands which had in fact yielded a rupee a bigha. Again, suppose a ryot during the continuance of his tenancy has improved

his property to the extent of Rs. 200 by digging and making a brick-well; in the exercise of the right of pre-emption, I, the landlord, would have to count upon having to pay at least Rs. 150 for these improvements. In attempting, however, to re-let these lands after purchase to a "settled ryot," the law places a severe restriction on the amount of rent I can claim. The utmost sum so attainable would not be fixed, or indeed be influenced by the fact that I was out-of pocket to the extent of Rs. 150 for improvements, which moreover, my new tenant would enjoy. These two illustrations, I think, clearly show how illusory is the benefit supposed to be imparted to the zemindar by assigning to him the right of pre-emption.

20. Now to continue our illustration, let us suppose the zemindar to have exercised his right of pre-emption and the jote for the time being his, he may keep the land in farm himself or re-let it again to a tenant known under the Bill as a "settled ryot" or to a non-occupancy ryot. In the former case the in-coming tenant is assured of his right of occupancy. The restriction placed by the provisions of the Bill for calculating the rent to be paid to the zemindar by the "settled ryot" is so stringent, as in my opinion to make the prospect of a settled ryot ever obtaining these lands impossible. The zemindar will, therefore, have recourse to any expedient rather than accept a settled ryot as his tenant under the term imposed by the Bill. Is it, I may ask, expedient that the Legislature should make it the interest of the landlord to keep resident ryots out of acquiring the holdings that may come into his hands, and in this manner increase the area of their small holdings? In the statement given by me (see Appendix), it will be seen that out of a total number of 29,000 tenants in the Chanchal Estate, over 17,000, or 58 per cent. hold less than 5 bighas or 2½ acres of land. If sections 41 and 42 are retained, the zemindar exercising his right of pre-emption over any one of these *jotes*, or when the lands revert to him by death or relinquishment, will naturally be extremely averse to permit any of the neighbouring tenants, or indeed, any "settled ryot" from leasing the lands in question, and thereby affording the tenants the opportunity of increasing the limits of their already liliputian holdings. The mischief, therefore, in this instance works equally to the detriment of the ryot and zemindar. The result may, I think, be safely predicated. The zemindar, in order to free himself from the restriction placed upon his actions by these sections, will probably seek either to recoup himself for the loss suffered by him with the demand of a large bonus, or *salami*, or he will naturally prefer a stranger non-occupancy ryot to one of his own tenants, or again—and this will be the more usual course—he will find a dummy tenant, a creature of his own, who under his directions, will sub-let to a "settled-ryot" at the full rental, and thus defeat the object these sections have in view.

21. The zemindar having paid an appreciable sum for the re-purchase of his own land, in reletting it he would naturally look to obtaining a return for his outlay with a margin of profit. The law, however, as I have attempted to show, skilfully interposes a series of obstructions formulated with the avowed object of making the zemindar part with his property at a loss; in this dilemma the zemindar will naturally look about for some method of obtaining his desires, or, as he would consider them, his rights, and would not be averse to adopting any expedients, in themselves questionable, or at least not authorized by the law, for the purpose of gaining the object he has in view. One obvious method would of course be the exaction of a *salami* from the in-coming tenant, and it would be paying a very poor compliment to the ingenuity of the native of the country could we not assume that a hundred similar dodges will crop up like mushrooms, to be utilized for the purpose of evading the law.

22. One of the results growing out of the kind of legislation I have been discussing is, that it puts a zemindar and ryot at arms length at once. The zemindar purposely crippled by the law, fights at a disadvantage, and naturally has recourse to any weapon that may first come to hand to ensure himself the victory. He is powerless theoretically to injure his opponent under the provisions of the Bill. He nevertheless can, as I have attempted to point out, obtain a show of victory with the aid of questionable or illegal expedients.

23. It may perhaps be as well to note the fact that there is no provision in the Bill under which the costs occasioned by a reference to a Registration Officer by a zemindar or a ryot are to be paid. Is the zemindar to bear the whole amount of the additional expense, or is the ryot, who, it must be remembered, forces the zemindar into the field by his desire to part with his holding to pay his share of the necessary charges? In many parts of Bengal, 75 per cent. of the tenants have occupancy-rights. Therefore the services of the Registration Officer, made imperative under the Act, will be in constant requisition. Again, it is during the rains, when the entire country is under water, that the ryot is specially busy in making arrangements for the acquisition of land for the coming agricultural year; the very time when the difficulty and expense of seeking out the requisite Registration Officer, who alone can give validity to any leases, have been enormously increased. The head-quarters of this officer may be 30 to 60 miles distant, and accessible only at the busiest time of the year by four or five days' boat journey over an inundated country. I have much doubt whether, in spite of the provisions of the new Bill, should they become law, the ryot, or for the matter of that, the zemindar, will trouble himself about a visit to the Registering Officer, entailing, as it must infallibly do, additional expense, loss of valuable time, and what is more potent in his eyes, an infinity of trouble, which the ryot at any rate will consider

unprofitable and unnecessary. The ryots will very soon begin to see that it is to their interest that the lease should *not* bear the the Registration Officer's signature, and the result will be, that the zemindar will be called upon to pay for each lease made with a "settled ryot" a fee that may amount in travelling expenses alone to four or five, and it may be ten times the amount obtained as an enhancement.

24. It will be useful, I think, at this stage to describe at length the counter-proposals I am in favour of introducing in supersession of that portion of the Bill dealing with the vexed subject of *enhancement upon the re-letting*" of lands; and this seems to be the more necessary as my suggestion will, in some measure, meet the difficulties mentioned in the concluding sentences of the latter portion of paragraph 11 of the Government letter. In the first place, I would place no restriction on any contract between the landlord and tenant, save in such manner as I shall point out presently. The contract once entered into would, as provided by the Act, make registration compulsory. Further, I would restrict the discretion of the Registration Officer simply to ascertaining from the ryot his knowledge of the contents of the document. As to the contract itself, I would not give a ryot the power to contract himself out of the privilege secured to his status a a ryot, given under the Bill; but the restriction should not, in my opinion, be made to extend to any supervision over the agreement he may be willing to enter into with his landlord as to the rates of rental. In making the registration of contracts compulsory, I am not forgetful of the difficulty involved in securing easy access to the Registration Officer mentioned by me in paragraph 23 of this report; it will be incumbent, I think, on the Government if it insists on making registration compulsory to ensure the appointment of a sufficiently numerous body of officers, which will effectually minimise the danger I have indicated. The foregoing remarks, as will be seen, are intended to apply indifferently to occupancy as well as non-occupancy tenants.

25. I now proceed to deal with each class of these ryots separately. First as to *non-occupancy ryots:* I should leave this class of ryots to make their own terms with the zemindar, unhampered by any restriction whatsoever. Now as to the *occupancy ryots:* as has already been stated by me, I would place no restriction upon the occupancy ryots as to the rate of rent he may contract to pay the zemindar upon any amicable arrangement the parties may arrive at out of Court; the registration of the *pottah* in the manner indicated by me being, in my opinion, a sufficient precaution against undue oppression or fraud. If this liberty be not accorded, it opens the door to much confusion, and invites both the zemindar and the ryot to have recourse to illegitimate means for practically carrying out their own wishes which they are precluded from giving legal effect to with the aid of the Court. A hundred reasons may be conceived where an occupancy ryot, without undue pressure being brought to bear upon him by the zemindar, may be desirous of obtaining the lease of the lands in question at rates higher than could be demanded by the landlord under the provisions of section 41 and 42. If this amicable arrangement be not recognized by the law, it will probably follow that the zemindar, either by the extraction of a large *salami* or by a covert agreement for the payment of an illegal cess, or some other indirect means, will obtain the object he has in view; and this, be it remembered, with the consent of the ryot, who not deeming the demand unjust, is naturally willing to agree to the terms which eventually put him in possession of the holding. It may be urged that the ryot once let into possession under these illegal terms could thereupon ignore them and set the zemindar at defiance; in the first place, this mode of procedure if once successful would naturally be productive of ill-feeling between zemindar and ryot, an evil which it should be the endeavour of the law to mitigate than encourage: and further, it may be taken for granted that a trick of that kind would only be played but once upon the zemindar, the insertion of a dummy middleman between the zemindar and the actual cultivator, as already explained by me, would defeat the possibility of a ryot playing false, and moreover leave him in the comparatively unenviable position of an under-tenant, when forsooth he would have been willing but for the restriction placed upon him by law to lease those lands as a direct tenant and enjoy in regard to them the privilege of an occupancy tenant. To make my reasoning more clear, let us suppose the following instances:—(A) A ryot relinquishing his holding which lies contiguous to the holding of B, an occupancy ryot; (B) applies to the zemindar for a lease of the relinquished holding, and with his experience of the disadvantage attendant upon having a neighbour so close to his holding, is willing to pay the rental fixed by the zemindar for the lands. But if this rate happens to be in excess of the rates which the zemindar can, under the law, demand from B both B and the zemindar are powerless to give effect to their united wishes. The zemindar will naturally prefer a stranger, from whom he could demand a higher rent, or create a dummy middleman, one of the numerous hangers-on about his house; and the occupancy tenant will be let into possession as an under-tenant of the creature of the zemindar, paying probably a rack-rent.

26. It may be here objected that these suggestions instead of meeting rather tend to emphasise the difficulty pointed out by the Government letter in paragraph 11, which notes the possibility of a tendency to level up rents to the highest point. I am aware of the danger, but am prepared to meet in the following way:—In the first place, I would leave an "occupancy ryot" in quiet possession of his holding after enhancement for a period of 25 years. If this suggestion be adopted the Government may well afford to be careless about

the exact nature of the "prevailing rate" which might be utilized for the purpose of assessing the enhancement of rent; the prospective injury done to the ryot would be amply compensated for by the permission to hold at the rate fixed upon for 25 years. It may, however be again suggested that the scheme I advocate would possibly meet the circumstances of the ryot holding lands in districts where *jotes* may be had for the asking, and where, therefore the "prevailing rate" is low but would work excessive hardship on tenants holding lands in the more populated districts in Bengal, and especially in Behar. I have, however, anticipated this difficulty in the following suggestion:—When a zemindar institutes a suit for enhancement of rent on the ground of "*prevailing rate*" or "*rise in prices,*" I would in either case give the ryot the option to insist upon the zemindar calculating his enhanced rent in one of two ways; either on the "prevailing rates" of land in the vicinity, or upon the value of the "gross produce" of the land in question. Should the tenant insist upon the latter of these two alternatives, the Court should be directed to restrict the amount of rent, included the new enhancement, to five-sixteenths of such "gross produce." Putting this suggestion to a practical test, let us see the result. In the Maldah district, where lands are plentiful and ryots few, the tenant will infallibly choose to be enhanced under the "prevailing rate;" any *injustice* which he may suffer from the causes hinted at in paragraph 11 will be amply compensated to him by the privilege of holding his lands free from further enhancement for 25 years. In Behar, however, the tenant would naturally have recourse to the second of the two alternatives, and insist upon his rent being raised no further than five-sixteenths of the "gross produce" of his *jote*; such produce to be taken on the staple crop of the district in all cases where no particular crop is mentioned in the lease. If, however, the registered leases mention the area of the land held under sugarcane, mulberry, jute, tobacco, &c., the Court should calculate the "gross produce" on these crops if the zemindar so wishes it. The danger indicated in the possibility of "occupancy rates" being in time levelled up to "non-occupancy rates" will not make its influence felt in the Maldah district, for it is a fallacy to suppose that the "non-occupancy" pays a higher rent than the "occupancy" ryot. In this part of the country it is just the reverse the occupancy ryot pays from Re. 1 to Rs. 2 per bigha for lands over which he has a right of occupancy, while in respect of the new lands, over which he has yet acquired no right of occupancy, he seldom pays more than six or eight annas a bigha. And there are thousands of non-occupancy ryots in this district whose entire holding is held at a rental of 1 to 1[illegible] annas a bigha. *Competition* not *custom* regulates the rent. When land is plentiful and ryots few, rates are necessarily low; when, on the other hand, the population has begun to press upon the average of the country, the rates of rent for the fields that have been longer under the plough are generally higher. In districts like Maldah, where there was more land than cultivators, the "prevailing rate" would be in favour of the tenant, and with a 25 years lease it would be all that the tenant could expect, and all he would himself ask for. In Behar, however, where the "prevailing rate" might, owing to the pressure of the population be raised to a rack-rent, the tenant would protect himself by demanding that the rental fixed by the Court should not exceed five-sixteenths of the value of the "gross produce."

27. Five-sixteenths of the estimated average on the annual value of the "gross produce" of the staple crop may be a very reasonable proportion, taken with the object of protecting the tenants from a rack-rent in some parts of Bengal, especially in Behar; but in this district it would simply be useless, as it would confer no benefit on the ryot at all. The staple crop in this district is paddy, lands of the first quality yield two crops, *viz.*, paddy and mustard-seed The value of the *gross produce* would be as follows:—

5 maunds paddy, at Re. 1 per maund=Rs. 5;
2 „ mustard-seed, at Rs. 3 per maund=Rs. 6;

or Rs. 11 in all. Five-sixteenths of this sum would be Rs. 3-7. I have purposely placed the prices and the yield from each bigha as low as possible in order to get an average which will be beyond cavil. In this part of the district the highest rent paid by occupancy tenants is Re. 1-4 per bigha. It will be seen, however, that as far as this district is concerned, five-sixteenths of the gross produce would not only be useless, but worse than useless; while in Behar, on the other hand, the "prevailing rate" might be in excess of five-sixteenths of the *gross produce*. A grave objection against the practical working out of this suggestion lies in the difficulty which accompanies the attempt to ascertain the "gross produce" of each field The gain, however, to the ryot holding lands at an abnormally high rent in the choice left him to have such rent re-settled on the "gross produce" standard is so obvious, that some effort, I think (possibly based on the principle acted upon by the Irish Land Commissioners), might be adopted to minimise the effect of the difficulty indicated by me.

28. The Bill, as at present drawn, does not seem to have made any provisions for cases where an occupancy ryot holding lands in some distant part of the "*mousah*" (and this remark applies with additional force if the word "estate" be preserved), has only non-occupancy ryots as his neighbours in respect of those outlying lands. This is a circumstance frequently met with, and obviously the calculation for an enhanced rate must be made on the "prevailing rate" furnished by those non-occupancy holdings. The law at present would not permit this, some modification, therefore, seems necessary.

Government letter, paragraph 12. *Homestead or Bastu Lands.*

29 I have on more than one occasion reported that homestead land and lands in its immediate vicinity should not, in my opinion, in purely agricultural villages, be enhanced. These lands have been raised above flood-level and otherwise improved entirely at the ryot's own expense; and I deemed it but just that he should be allowed to enjoy the fruits of his own labour. So long as it is rendered impossible for the zemindar to enhance capriciously the rates payable for homestead lands, he cannot, while the land for culturable purposes remains in excess of the demand by tenants, bring undue pressure to bear upon his ryots: once the margin of exaction is overstepped, the ryot can relinquish his arable lands on the estate of the exacting zemindar and seek better terms elsewhere. Secure, so far as his homestead lands are concerned, he can do this with impunity, and thus indirectly prevent his zemindar from pushing his exaction to the point where the ryot's answer to his appeals for further contribution may be the reluctant relinquishment of his land. As was the case in this estate prior to his coming under the management of the Court of Wards, many of the ryots, impatient under the exaction of illegal cesses forced upon them by the late proprietor, sullenly refused to lease lands on the estate and constituted themselves "*pykast*" tenants of the neighbouring zemindar. The late proprietor had a remedy for this difficulty; taking advantage of the affection which is inherent in many ryots for his homestead lands, he arbitrarily raised the rates of these recalcitrant tenants in respect of their homestead lands to rates sometimes as much as four or five times in excess of the amount paid for these lands for the previous year, the object being to recoup himself for loss sustained by him through the fact of such tenants not choosing lands for cultivation within his estate.

30. The matter is of extreme practical importance in connection with ryots holding lands in this part of Bengal. For such ryot, his right of occupancy once assured in respect of his homestead lands, is emancipated from the necessity of submitting to exactions from his zemindar. Land is so plentiful that the ryot, leaving his homestead in security, might prefer to go out as a "*pykast*" tenant, and so cultivate lands under a more accommodating zemindar. Keeping this fact in view, I am strongly in favour of giving *all ryots* occupancy-rights in homestead lands after a residence of *three years*; this step, if adopted, would do more for the protection of ryots than any other provisions in the Bill. I would limit the right to enhance *bastu* lands to the sole ground that the original area held by the ryot has been increased. This precaution is necessary, as the ryot is often addicted to surreptitiously encroaching either on the surrounding waste lands or on an abandoned homestead lying contiguous to his own holding. Further, it might be a matter for consideration whether the right to enhance should not revive in the case of a ryot sub-letting a portion of his homestead lands.

Chapter , section 52, paragraph 14. Price-lists.

31. With regard to price-list. I see very many difficulties in the way. They are now prepared by the police, but assuming that they were perfect indices of the prices prevailing at the "hâts" or various local markets they would not, I think, be anything but misleading. It would, in my opinion, not be safe to attempt to collect the prices of every local market in the district. All these local markets feed one big market, and the prices of these local markets are ruled by the prices ranging in these big grain marts. It would be sufficient if the prices at these large markets were taken, and they would give a much better test as to any *general* rise in prices in the neighbourhood than those of the local markets which are influenced by temporary fluctuations owing to local causes. In this district, Rohanpore in the south would give an accurate indication of the prices current throughout the entire south of this district, while Hyatpore or Kiddergunge would furnish similar returns for not only the north of this district but the south-western portion of Dinagepore and the south-eastern portion of Purneah. In the same manner, Revelgunge, in my opinion, would meet the requirements for nearly the entire Patna Division, while the large grain mart at the mouth of the big Kusi river would answer for the entire west of Purneah and the east of Bhagulpore. It will be necessary, however, to make it quite clear that the calculation to be made by the Court with the aid of these *price-lists* should be based on the lowest prices indicated for each year. For it must be remembered that a tenant sells his crop at harvest-time to enable him to pay his rent, and prices at that time are at zero.

Chapter V, section 31.

32. Before leaving Chapter V, I desire to make a few remarks on the subject of ejectment, which, I note, has been omitted from the list of incidents given in section 31 of the new Bill. A ryot apparently under this section (31) may not be ejected from lands in which he has a right of occupancy for arrears of rent. This provision is based on the erroneous fact that the sale of all occupancy-tenures will enable the landlord to cover at least one year's rental; but it is notorious that this is not so, and I am only surprised how the Select Committee could have overlooked this fact. Out of 29,000 holdings on this estate, I have not the slightest hesitation in stating that if you were to put up 20,000 for sale to-morrow you would not get a year's rent—not even half year's rent for them. And if 12 years' residence is to entitle a ryot to right of occupancy in all lands held in that "estate," certainly 20,000 out of the 29,000 holdings would have to be treated as right of occupancy holdings. It seems to have been taken for granted that provisions which are suitable to one part of the country are equally suitable to all, and no greater mistake can be made as to Bengal. I have not the slightest doubt that

there are many districts in Bengal, especially those near Calcutta, where an occupancy-tenure would fetch 3, 4, or even 5 years' rental. I am aware that even in this district there are occupancy-tenures that have been valued and sold at 3 years' rental; but this is an exception and not the rule, and it stands to reason it must be so. In a district like Maldah, where there are large quantities of culturable land still unoccupied, what inducement would there be to a tenant to pay even one year's rental for a holding in those villages where there is still a large margin of unoccupied land when he can get as much land as he pleases with equal advantages as to situation and fertility for the mere asking, and almost invariably at a much lower rate? I attempted to realize decrees for arrears of rent by the sale of holdings on the estate, but I was forced in self-defence to resort to a body-warrant and other means open to me in execution of a large portion of the decrees obtained under the certificate demand (Act VII of 1880). A considerable number of the decrees are for small sums, and the costs often exceed the amount in arrear. In the 86 cases in which an attempt was made to realize the decree by the sale of the holding itself, the amount they fetched at the sale was not sufficient to cover even the actual out-of-pocket costs in the case. In the 86 cases mentioned above the actual arrear amounted to Rs. 463 and the actual out-of-pocket costs amounted to Rs. 349, while the sum realized by the sale was only Rs. 178. Mr. Reynolds states in his dissent attached to the report of the Select Committee, that the sale of tenants' holdings is "ample security" to the landlord for his rental. However true this may be for districts in Eastern Bengal, it is notorious it is not so in Maldah, and for the matter of that, in any district or portion of a district where the culturable land is in excess of the demand. Another and a very potent reason for the holding not fetching a higher price is, that these sales under the law must take place at the sudder station, it may be 20, 30, and even 60 miles away from the village where the lands are situate. The most likely purchasers of the *jote* are the resident cultivators of the village where the land is situate, and these are the very men who, it would be to the interest of the landlord, and for the matter of that the community at large, should purchase these *jotes* and thus enlarge the area of the existing holdings. But the sale takes place at a considerable distance from the village; the date of the sale is not advertised in the village where the lands are situate, and intending purchasers resident in the locality would hardly, if ever, be in a position to attend the sale, and so the holding is knocked down for a trifling sum far below the value set upon it in the village where the lands are situate. Thus, not only is the tenant deprived of the full value of his tenant-right, but the landlord is unable to realize his arrears. In cases where the holding is situate within a reasonable distance of the place of sale (the sudder station), the sums offered often exceed the amount in arrear. For instance, in 132 cases where the holdings put up for sale were within a distance of eight miles, or a day's journey of the sudder station, the amount realised at the sale of 64 cases amounted to Rs. 912, or sufficient to clear a year's rent and the costs of the suit; but in 68 cases the amount realised was only Rs. 52, or insufficient to cover the amount in arrear. I would retain the right to eject in the case of non-payment of rent; but I would allow no ejectment except in cases of arrear where some portion of the balance has been due for over 12 months. When a decree for arrears is given the landlord should be alllowed to claim an order for ejectment if the arrears are not paid up in 15 days from the date of the decree. The tenant, however, might claim a sale on depositing the amount of the decree in Court; this procedure would not only permit a tenant obtaining a full value of his holding, but would in many instances obviate the intolerable delay now attending the execution of a decree; and would effectually hinder a recusant tenant keeping possession of his holding, pending such execution, and by this means prevent the landlord from re-letting the lands to a more solvent ryot.

33. The only ground on which ejectment is permitted in the case of an occupancy holding, is for breach of registered contract. I am of opinion, and I hope I have now made the matter clear, that in respect of this part of the country, ejectment must be permitted for non-payment of rent. I am also of opinion that ejectment should be permitted for breach of contract. With respect to the proviso that such contract must be registered, I take it, the Bill refers to all future contracts that may be entered into subsequent to the passing of this Bill; it would act very unjustly on existing contracts if this were not so. Unless ejectment is allowed for breach of existing contracts, whether registered or not, what remedy has an indigo planter in the case where he has permitted his tenants to acquire rights of occupancy; it may be at a very much lower rate than that prevailing in the neighbourhood, on the understanding that the tenant sows a certain portion of that holding in indigo, and on his failing to do so he must relinquish his holding; and supposing after the passing of this Act the tenant refuses to sow indigo any longer? Then, again, it is the custom when a *Hari* or *Dome* (both low caste Hindus) wishes to settle in a village, that a clear understanding is come to that they are not to keep pigs unless the pigs are secured within an enclosure. This is found necessary not only to prevent damage to the tenant's crops, but on account of the Mahomedan tenants, who naturally object to the pigs coming about their homestead. A *Hari* and *Dome* disobeying such order is forthwith ejected from the village, but it will be difficult, if not impossible, to do so unless ejectment were allowed in cases where there is a clear breach of contract.

34. Some provisions will, I presume, have to be introduced into this Act, giving

the landlord, or it may be a body of tenants, the power to take up lands for the purposes of a new road, drainage, or other local improvements. Under the present law the right of the landlord over his own property is placed under such severe restrictions that it would be always possible for a ryot with the new privileges given him by the Act to interpose a successful opposition to the desire of his landlord or the larger number of his co-tenants to carry out these improvements when land for the purpose has to be taken up from ryot's holdings: some such procedure as directed under the Land Acquisition Act seems the best calculated to meet this difficulty. At present, a landlord can of his own motion provide lands for roads, drainage, burial grounds, sites for markets, and other local conveniences; he would probably find this impossible after the passing of the present Bill.

Government letter, paragraph 18, Chapter VII, section 61, clause 13.

35. An instalment of rent, or part of an instalment, not paid up on the due date, is under this section to be considered an arrear of rent. I have in a previous paragraph of this report (32) recommended the retention of the right to eject a tenure-holder or an occupancy tenant for arrears of rent. I would restrict the right to eject in suits for arrears of rent to those cases only where the balance due has been over 12 months in arrear. One of the causes which, in my opinion, has conduced to forcing many of the cultivating tenants into the hands of the money lender is the power granted to landlords to sue for instalments of rents. The capabilities of the tenant to meet the demand are seldom taken into consideration when fixing the dates on which each instalment should be paid. The dates fixed upon are, in most cases, determined solely to enable the landlord to meet the Government revenue payable on the 28th of June, 28th of September, 12th January, and the 28th March; and the dates fixed were determined on at a time when nearly all rents were paid in kind, and all the tenant had to do was to hand over a fixed portion of each crop as soon as it was reaped. Though the tenant in these days are expected to pay their rents in four instalments, arbitrarily fixed to enable the landlord to meet the Government demand, practically the tenants are only able to pay their rents in one, two or three instalments according to whether the lands occupied by them yield one, two or three rent-paying crops, and the most convenient date on which these instalments could be paid depends entirely on the rent-paying crops sown in any particular tract of country. In the generality of cases the dates on which the instalments of rent should be paid were fixed at a time when the tenant could only look to the local markets for the sale of his produce, and his entire rent was paid from the surplus produce of his rice-lands. But as new lines of communication have been opened up each year, and facilities for export created, the tenant is now able to raise crops to meet the demand of more distant markets. Such crops as jute, tobacco, oil-seeds, and wheat, which in former days were only sown, if at all, for home consumption, are now cultivated for export, and are the chief crops from which the rent is paid. For instance, a tenant who had hitherto paid his rent by the sale of his surplus produce of winter-rice, would find it most convenient to pay his rent in January or February; but if this same tenant had now placed the larger portion of his holding in wheat or oil-seeds, he would not be in funds till March, or it might be in April, some two months later than was previously the most convenient date to him for meeting his landlord's demand. Moreover, a tenant would much prefer to pay his rent from the sale-proceeds of such crops as jute, wheat, tobacco, mustard-seed, &c., &c., because for such crops there is at all seasons a demand and a fixed market-rate, while for rice the demand is confined to such seasons as will permit of the produce being exported by the cheapest means of export, *viz.*, boat traffic. Should the tenant be forced to sell during the dry season, he would have to carry his produce to a local money-lender, who would be able to make his own terms, owing to there being no competition. The tenant of the present day, therefore, pays the whole or the greater portion of his rent from such crops for which he can find a ready market, and keeps the produce of his rice-lands in stock, selling small quantities at each market-day to enable him to purchase his daily wants; and delays to dispose of the bulk of the crop till there is a rise in the market owing to competition of itinerant buyers who come up in boats when the floods are out.

Section 69, clause 2.

36. I would, in the interest of both landlord and tenant, insist that no payment be applied to any arrear above two years standing. Ryots, as a rule, never dream of appropriating their payments to any particular arrear of rent, and the zemindar naturally sets off such payment against a debt which may have already been barred by limitation; the insertion of a clause, such as I have suggested, will ensure accounts being made up every other year.

Section 69, clause 2.

37. I am decidedly of opinion that the word "shall" should be substituted for "may" in this section. I should make the award of damages compulsory instead of discretionary, the reason being that the Courts never exercise a discretion in the matter but invariably refuse to grant damages. If this matter were taken out of the discretion of the Court, and made imperative, it would facilitate the collection of arrears and thus indirectly give the zemindars a chance of getting in their arrears without difficulty. I speak from some experience in the matter, for I know numerous instances where a Court being induced in one or two suits to grant damages, the whole village has immediately paid up its arrears. I may also mention the case of an estate where the arrangement between the ryot and zemindar

that if the ryot paid up regularly he would be entitled to a receipt in full of all rent due under the registered *pottah*, although, as a matter of fact, the actual money was one-fourth less than the rent specified in the "*pottah*;" the result of this arrangement was, that throughout a period of seven years, the papers examined by me did not show arrear balances of more than five hundred rupees on a total demand of thirty-one thousand rupees.

Government letter, paragraph 28, section 88. Illegal cesses.

38. The question of cesses is a difficult one, and in the determination of which actual facts more than abstract ideas should be taken into consideration. At the time of the Permanent Settlement, the system introduced by Toder Mull of a measurement and re-settlement of lands held by each individual tenant or occupier after certain intervals of time, was in full force. After the Permanent Settlement, however, no necessity existed for the Government to trouble itself further in the matter; the duty was left to the zemindar, who was either too apathetic, or found it an easier task to increase his rental by the illicit imposition of "*abwabs*" and cesses to make it even desirable or politic himself to enforce a rigid re-measurement of the holdings within his property and establishing a periodical revision of the "*nerikbandi*." In fact, the desire to encourage periodical measurements and re-assessements of rates was absent from the zemindar as well as his tenant. The former, as has been already explained, found it easier to increase his rent-roll by the manner already indicated; and the latter was just as anxious to prevent the discovery of the excess quantity of lands which he had gradually added to the area of his original holdings. It is curious, and somewhat instructive, to remark how, throughout the long series of years since the Permanent Settlement, the system of extorting "*abwabs*" and cesses has flourished in spite of the folios of regulations directed by Government against the practice. If criticism may be regarded on this subject, I might point out that if some of the energy which expended itself so liberally in the manufacture of legislative enactments had been directed towards securing the appointment of some speedy and cheap Court, constituted possibly on the lines of the present Court of the Land Commissioners in Ireland, with the object of settling what should be a *fair* and *equitable* rent payable according to circumstances by each tenant to the zemindar, the imposition of "*abwabs*" would never have flourished and become, as it has done, one of the settled institutions of this country, overgrowing and, indeed in most districts, choking out of existence the ordinary and legitimate law relating to enhancement of rents. The zemindar's portion of the *unearned increment* has hitherto been obtained in these cesses. Any sudden determination on the part of the tenants to refuse payment of cesses that have been paid by them hitherto without demur, would deprive the landlords of a large portion of their rental, and force them to seek a remedy in a measurement of individual holdings, and assess the excess area it was known these tenants have hitherto enjoyed in consideration of "*abwabs*" and cesses paid by them. These measurements and consequent suits for enhancement will doubtless lead to a certain amount of friction between landlord and tenant, and will have to be carefully watched. The rates of rent in this district are, in my opinion, exceedingly moderate, and even if the cesses are taken into consideration, can in no way be looked upon as a rack-rent. Few zemindars, I believe, would object to a revision of rents by Government assessors, for there can be very little doubt that lands in most parts of Bengal Proper are not rack-rented, and a considerable average advance in the rental would be obtained; and I feel confident that a free use will be made of the provisions of Chapter X of the new Bill. It is not difficult to imagine what, under these circumstances, would be the result if all holdings were re-valued by disinterested authority. In the majority of instances, probably in nine cases out of ten in Bengal Proper, the rent would be increased in a large portion of the older holdings, giving rise to an amount of disappointment or discontent it might be awkward hereafter to deal with. The Government, I take it, has foreseen, and is prepared to meet this difficulty. I am, however, of the opinion that in cases where the landlord elects to have the rates fixed by the executive authorities under Chapter X, and a regular settlement is come to, that the rates so fixed should be binding (section 120) not for 15 years, as proposed in the Bill, but for at least 25 years, and I would be inclined to say 30 years. I do not see that the Government is called upon to incur all the odium, as it most assuredly will incur, in making a settlement of this kind, unless the settlement is to last more than 15 years.

Government letter paragraph 29, Chapter IX, section 88. Improvement.

39. I notice the law is very careful to lay down rules for the guidance of the Court for granting compensation for all improvements made by the tenant, who is to have full authority to make any improvements he may deem necessary without the least hinderance on the part of his landlord. But I do not observe any provision made in the law for cases where the tenant either *bonâ fide* or *mala fide* should, under cover of effecting improvements, destroy the face of the land or reduce its selling value and then relinquish his holding. If it is right, as I fully admit, that the tenant who has laid out money or labour on his holding and materially augmented its value, should be repaid for the permanent or unexhausted amount of this augmentation, according to an equitable scale, on receiving notice to quit, it is but a correlative and obviously fair proposition that the tenant who, on surrendering his holding shall have been found to have greatly deteriorated his landlord's soil, ought to be called upon to repay him for this deterioration. If I let a tenant 15 bighas of good rice land, and he destroys its character and impairs its value by digging it up

for mulberry field, and returns it to me after a number of years' occupancy overrun with weeds, the soil utterly ruined by the exhaustive nature of the crop, want of manure and a vicious system of husbandry, have I not an indefeasible claim against him for the damage done just as if he had actually annihilated a portion of the area instead of merely injured the whole area in quality? And is it not the case that instances of deterioration are at least as frequent in Bengal as instances of important tenants' improvement.

40. It is urged that as all improvements and reclamation of lands are habitually made by the tenant and not by the landlord it is unjust to permit the owner of the soil, at his pleasure, to dispossess the tenant before he has had time to reap the benefit of the labour and capital he has expended on his holding; granting the premises, the argument in the eye of justice is irresistible. There is, however, one class of expenditure on improvements wholly incalculable, but unquestionably very large, which has been strangely overlooked, yet with which many of the landlords of Bengal ought obviously to be credited, *namely*, the outlay of occupants who hold under "improving rents." The case is a very common one, and the equity of the matter is very clear as soon as it is stated. Two landlords in adjoining districts or pergunnahs, it is indifferent which, lease their lands on two distinct systems. The one follows the English plan; clears the land of jungle; raises a bund or cuts the drain, charging as rent the full estimated value of the holding: in a word, he does all the improvements and gets credit for them. The other, adopting the system which has prevailed in Bengal from time immemorial and which, for obvious reasons, is the only one suitable in districts where there is more land than cultivators, leaves his tenant to undertake all the outlay, *but fixes a lower rent in consideration of his doing so.* The former proprietor lets the land at Rs. 3 per bigah, the latter is content with Rs. 1-8 a bigah. It is clear, however, that the latter has virtually expended Re. 1-8 a bigah yearly on the land, or paid his tenant for doing so, and the former has probably done no more. Yet, not only is the one man praised as an improving landlord, and the other blamed as a stingy, grasping, or neglectful one, but in the latter case the tenant gains all the credit of the improvements made virtually with the landlord's capital, and it is now proposed to permit him to put forward claims for compensation on account of them if he is ever required to surrender his holding. Now this is no ingenious supposition; any one who has had any practical knowledge in the management of estates in Bengal knows scores of instances of under-rented lands of which no other explanation can be given, and the comparatively low rates mentioned in old leases were obviously, and sometimes avowedly, fixed on the understanding that the tenant, and not the landlord, should be responsible for the necessary expenditure of reclaiming the lands.

Government letter, paragraph 25, Chapter XIII. Distraint.

41. I would allow no distraint in the case of resident cultivators, as I am of opinion the landlord would have sufficient security in these cases in the right to eject for non-payment of rent and the sale of holding; but I would retain the right of distraint in the case of non-resident or "*pykast*" ryots. In the case of non-resident tenants, the crop on the ground is the only security the landlord has for his rent. There are, for instance, some non-resident ryots who come from a very great distance to cultivate land. They are locally known as "*dolewars*" or "*gangotees*." There are about 1,800 to 2,000 of these men who cultivate lands on the Chanchal Estate; some of these come from Bhagulpore and even from Durbhungah. They drive their cattle down as soon as the rivers begin to fall, buy their ploughs at the nearest market, and run up a small hut with the reeds growing on the bank of the river, and cultivate the newly-formed lands. Directly the river begins torise, these men return to their homes to cultivate their high lands for paddy. The only security landlord has in these cases is the crop on the ground, and unless the landlord is on the spot, he will lose his rent, as these men sell the produce to *mahajans* who come almost to their very fields in boats, and are away and out of the district without having paid a single pice of rent. I would, however, insist on a verified statement of the arrears due being filed in the Munsiff's Court at the same time as the distraint is made, and I would allow no distraint without an account showing clearly for what arrears the distraint is made. I would make a distraint without the filing of these accounts penal. Prior to the distraint an account must be served on the tenant showing the total amount due from him, and also the amount of current rent for which distraint is made. The notice of distraint to be in writing, and to contain the amount in arrear; the current and arrear balance shown separately; the number and boundaries of the field to be attached for the payment of such arrears. A duplicate of such notice to be posted to the Munsiff having jurisdiction on the same date on which the notice is served on the tenant.

Government letter, paragraph 28, Chapter XVII, section 213.

42. I think this section, as at present drafted, will work unfairly aginst the interest of ryot. If the "*mouzah*" instead of the "*estate*" be accepted as the unit within which occupancy rights may accrue, I do not see why any difference should be made between *decrah* as opposed to other lands in the matter of status or privileges of an occupancy ryot. It is more than necessary that when possible the ryot cultivating *decrah* lands should enjoy rights of occupancy. It is on lands of that class that the zemindar and indigo planter are specially anxious to secure a hold, and much of the oppressions suffered by the ryot through this cause is attributable to the weakness of his position as a tenant-at-will. The *decrah* ryot has never at time a very pleasant time of it, through in the

and he is in the some measure comforted by the richness of his crops. He has to struggle against evils of enforced labour as demanded from him by the planter; the oppressions of the zemindar; and the exactions of the *ameen* who comes twice a year to measure his crops: in addition, he has to submit to the wayward caprices of the river on whose banks his lands are situate, often being compelled to follow large slices of his fugitive holding to their even then transitory resting place on the further bank. These considerations ought, I think, to point to the absolute necessity for giving the *dearah* ryot the power to establish his right of occupancy over any future portion of the land forming part of the *mouzah* on which he had already secured a holding which had given him the status of an occupancy ryot. It would also tend greatly towards placing the ryot in a position to protect his interest, if the Bill were to make it perfectly clear (what I believe to be now the existing law in regard to tenures) that all accretions to the holding of ryot should be considered a part of his original holding over which he, if he so choose, may exercise the right of possession.

43. The necessity for an unmistakeable statement of the law in the manner indicated will be apparent from the following illustration:—The original holding of a ryot reaches down to the extreme verge of the river; the absolute edge of this holding is unculturable, but the soil nearest this narrow strip of useless land is the most valuable portion of his holding: as he proceeds further away from the edge, the land proportionately decreases in fertility, till you reach the further limit of the holding, which may be a barren ridge of sand. Both the zemindar and the indigo planter have no difficulty in discovering from the set of the stream on which side of its bank the river is likely to reform. All the ryot's holdings therefore which happen to comprise this strip of the bank become a keen object of attention. The *modus operandi* by which the zemindar or farmer secures his object, namely, the possession of the first, and as I have shown, the most fertile strip of land nearest the river, is as follows:—The ryot, who generally completes his sowings by November, lays down his crop as near the water edge as he can conveniently go; as may be supposed, however, between that time and the following June, when the river first begins to rise again, the gradual recession of the river has left a fringe of land for the time uncultivated. The landlord in due time steps in and scatters a few seeds on this unoccupied fringe; this is not done with the object of obtaining a crop, for the first rise of the river will destroy his plants, a fact very well known to him, and duly calculated upon. His intention, however, becomes apparent in the following year, when a further recession of the river leaves what was last year's lowest strip high-and-dry, the best portion of what would have been under ordinary circumstances the ryot's holding had not his landlord stepped in in the manner indicated and cut the ryot off from his right to enjoy the accretion to his own holding. The ryot with right of occupancy, and with the knowledge of the fact made clear to him by the law, that such accretion should belong to his holding, would be then strong enough to resist this act of high-handed oppression which, as things now stand, is constantly practised by many planters. The evil is a wide-reaching one, and the adoption of some remedy, similar to the one I have suggested, will do much to mitigate the injustice of what is an undoubted source of much discontent. I omitted to note in its proper place what is an important fact connected with this subject, and that is the gradual deterioriation which constantly is at work on the original holding of the ryot cut off from the river bank. Unless the ryot be allowed to follow the recession of the river year by year, and thus acquire new and fertile lands, he soon discovers that the original site of his old holding has lost its productive powers, and is no better than a waste of sand, useless till the next change in the course of the river covers it once more with a thick layer of fertile deposit. It, therefore, follows that the action of the planter or zemindar in cutting off the ryot from the river frequently results in eventually starving out the ryot from his original holding.

44. Under the *halhasilah* tenure, the tenant pays rent for only such lands as he may cultivate each year. The land is held year by year and the rent is regulated by the quantity of land cultivated each year. In earlier times the entire holding, with the exception of homestead lands, were relinquished and allowed to lie fallow every three years. The whole village acted in concert under the authority of the "mandal" or head-man. For instance, the lands to the east of the village were cultivated for three seasons, while the lands to the west lay fallow, and were used as a grazing ground for cattle. After a lapse of three years the land to the west was brought under cultivation, while the land to the east lay fallow, and so on, alternately. It is manifest that such a system can exist only where there is more land than cultivators, and must necessarily disappear where there is a greater demand for land, owing to the increase of population. Hitherto the quantity of culturable land lying fallow has made it a comparatively easy process for the tenants in this portion of the district to choose different plots of land for cultivation every three years. Each year, however, the demand for land is increasing, and the old custom of choosing varying sites for cultivation is being perforce discontinued or restricted to a very great extent, the tenant being in no way certain that the portion relinquished by him will not be occupied by another before the year is out. Gradually, as the population increased, it became necessary to retain some portion of the land under cultivation continuously, and as it may be supposed, the most advantageous qualities of land, either as to situation or fertility, were the first to be picked out. In this manner the more distant or the less fertile lands being exchanged as heretofore every year. The margin of land it is possible to exchange has been gradually decreasing each year, while the portion that has to be kept continuously

Paragraph 33, sections 213 & 214.

under the plough is increasing in equal proportions. The rent is generally paid in a lump, that is to say, Rs. 20 for 40 bigahs of land, giving an average rate of eight annas a bigah all round, and no attempt is made to assess each particular field. Consequently the tenants' *furruks* (annual rent-receipts) show clearly that the rental has fluctuated, if not every year, certainly every three years. And as the leases give no boundaries, nor make any attempt to identify the land, it is not possible for the tenant to show, except by parole evidence, what portion of his holding had been continuously in his possession for over 12 years; though it is evident from the description given above, that his homestead lands at least, has been in his possession continuously since the time when he first settled in the village, it may be 30 or 40 or even 60 years ago. And he would continue to hold a larger area of his holding continuously as the population increased each succeeding year. Eventually the position of the tenant would be much as follows:—In a holding of, say, 20 bigahs, he would have held two bigahs of his homestead lands, say for upwards of 30 years; another 5 bigahs he would have held for upwards of 12 years, while the remaining 13 bigahs he would have held for periods varying from 3 to 10 years.

45. The incidents of a *halhasila* tenure, however, vary according as the land, the subject of such tenure, is situate on the immediate banks, or remote from the proximity of a river. In the former case riparian holders never relinquish altogether their rights to the lands they cultivate year by year, the arrangement being that the tenant, in return for the privilege given him of retaining a lien over that portion of his holding he finds it inconvenient to cultivate, has to pay his landlord a small rental on each bigah of the unused lands, usually calculated on the supposition that the land has yielded a single crop during the year. The following illustration will convey my meaning more clearly. A riparian holder for the first year cultivates, say, a hundred bigahs of land; his rent for that land would be calculated on the fact as to whether he has taken one or more crops off his fields during the year. In the following year the tenant only cultivates 60 bigahs of his entire holding, leaving 40 bigahs fallow. If the holding were situate inland, and exposed only to the spill of the river, the zemindar in this case would have the right to possess himself of the 40 bigahs relinquished by the tenant, and to let them, if he could arrange to do so, to some other tenant; while on the other hand, if the holding comprised part of the bank of a river, the zemindar would be debarred from exercising this right, but as a recompense for the loss of this right he would be entitled to demand a rental for the unused lands, equal in amount to what the tenant would have had to pay had he reaped a single crop from these lands. It does not follow, however, that the incidents of a *halhasila* tenure, as already explained, are subject to no modification. In a variety of instances the custom which generally holds good in respect to riparian holdings is found existing further inland. A result which might naturally be said to accompany a tenure, in itself necessarily transitory, and affording ample opportunity to the zemindars and ryots to vary the nature of the implied contract between them in accordance with the circumstances of each case; giving an opportunity to the one or to the other to insist upon terms which it would be dangerous to refuse. When, for instance, the candidates for leases are plentiful, the zemindar can, and often does, insist upon a tenant, whatever be the situation of his land, paying the full rental for the entire holding held by him, whether under cultivation or not; while on the other hand, when tenants are scarce and the slightest pressure may drive a ryot out of the estate altogether, the zemindar, often in the case of riparian lands, has to accept such rent as the tenant chooses to pay; an amount generally limited to the number of bigahs in actual cultivation.

46. These being the principal facts connected with the *halhasila* form of tenure, it remains to be seen how they are affected by provisions of the new Rent Bill. Section 214 affords a concise answer to this question, and if I interpret the intention correctly, lands held on either of the systems known as the *utbandi* or *halhasila* tenures are excluded from the operation of the Bill altogether. The question naturally arises, if this be the case, under what law will the respective rights of zemindar and ryot in districts where the *halhasila* system prevails, be adjudicated? For instance, how is the question whether a *halhasila* ryot can obtain occupancy rights to be definitely settled. In connection with this subject I will quote some remarks made by me in a previous report which, although confined to the cases of ryots holding lands under my management, give a sufficiently clear description of the difficulties attendant upon establishing the ryot's legal position under the present law:—"The facts already stated point, I submit, to the conclusion that the *halhasila* ryots belong pre-eminently to a class of cultivators to whom the privilege of right of occupancy should be extended. In the position of original holders of the soil which they may have probably reclaimed from jungle, their rights, when secured, should be preserved to them with the most jealous care. But unfortunately, owing to the peculiar tenure under which they hold these lands, and furthermore from the custom of paying their rents in the lump, thus necessitating their holding being treated as a whole, and the fact that their annual rent receipts or '*furrucks*' show on the face of them constant fluctuation owing to the very nature of the tenure under which they hold their lands, making it difficult, if not impossible, to prove what portion of their lands has been in their continuous possession, it has come to be considered a matter which admitted of no argument, at least as far as this district was concerned, that under the *halhasila* system no right of occupancy could accrue. If under section 6 of Act VIII (B.C.) of 1869 (which defines the status of an "occupancy ryot") can be included tenants who lease lands under the *halhasila* tenure,* it

* Since these words were written I have recieved instructions from the Board of Revenue to consider *halhasila* tenants as capable of acquiring rights of occupancy.

may be roughly stated that at least two-thirds of the tenants of this estate have already obtained occupancy rights over a large portion of their holdings. There remains, of course, the initial difficulty which the ryot would have to meet in proving to the satisfaction of the Court the identity of the lands over which he asserted he had acquired occupancy rights. The rent-receipts obtained from the late proprietor would not avail him for this purpose; nor will the rent-receipts, obtained from the Court of Wards previous to the year his lands were measured and re-settled, help him in his difficulty. Receipts subsequently to this period granted by me bear on the face of them the numbers of each respective plots of the land held by the tenant, and those receipts might probably be utilized as evidence corroborative of his assertions. As a rule, however, the tenant is singularly careless in the matter of accumulating evidence with this object in view. He neglects, and even refuses when offered, to receive a written lease, generally asserting that he is quite satisfied with a parole engagement. Efforts have been made from time to time to remedy this defect, but it has been found impossible to induce the majority of the ryots to adopt the suggestion of the Court of Wards in this matter, and latterly I have, under instructions from the Board, desisted from all attempts to force upon the ryots the acceptance of a *pottah*, or the giving in return a *kabulyat*. I adopt the precaution, however, of insisting upon the ryots' signatures being invariably appended to the jamabandi papers. But as stated before, the yearly receipts contain the numbers of several plots in the occupation of the tenants for that year. A reference to the several yearly receipts would show clearly that plots had been in the tenant's possession for over 12 years.

47. These remarks, it should be remembered, were only intended to apply to tenants holding under the Court of Wards. The difficulties and dangers which assail the tenants' interests, in the manner already described, are intensified in the cases of ryots not holding under a landlord inspired by the benevolent solicitude which may fairly be said to characterise the policy of the Court of Wards towards their tenants. This difficulty will not be met, if indeed the subject is not further complicated, by the introduction of section 214 of the new Bill; the respective rights of zemindar and ryot being left in greater obscurity than before.

48. Although it may be asserted that these tenures carry in themselves the stamp of ultimate dissolution, it is nevertheless equally certain that throughout a large portion of the districts where this tenure prevails the amount of waste land still awaiting cultivation forbids the hope that the *kalkasila* system will not continue in vigorous existence for many decades to come. Further the modification of this system, peculiar to riparian lands, will probably continue as long as the rivers occupy their present sites. It therefore, I think, should be a matter for serious consideration whether an additional chapter in lieu of sections 213-214 should not be inserted into the present Bill, with the object of legislating in greater detail on the rights and customs of *kalkasila* and *utbandi* tenures. It is not easy to indicate the precise nature of the legislation requisite to meet the circumstances of the present case; I therefore make the following suggestions with hesitation. In the first place, I should not exclude *dearah* and *kalkasila* tenures from the operation of the Act (sections 213-214). Further, I should give every *kalkasila* ryot right of occupancy over lands which he cultivates; this, indeed, seems to have been in the minds of the framers of the Bill when they inserted clause 3 of section 26; and for my part the difficulty seems to be met by the simple process of striking sections 213-214 out of the Act. The third clause of section 26 ought, however, in my opinion, to be altered, so as to prevent any right of occupancy continuing in respect of lands relinquished by the tenants under the *kalkasila* system; that is, in all *kalkasila* tenures the right of occupancy should be made concurrent only with the period during which the tenant cultivates the land himself, and that the right determines so soon as the lands are relinquished. The following example will illustrate my suggestions more clearly.

49. A resident ryot, we will say, shortly after the passing of this Bill, takes a *jote* of 60 bigahs under the *kalkasila* system; the following year he only cultivates 30 bighas of the holdings, practically relinquishing the other moiety, which under the custom in vogue in regard to these tenures would revert back to the zemindar; but under the provisions of the Act such resident ryot would have already acquired a right of occupancy in those unused lands. The zemindar, therefore, could not get possession of them, though he might have a tenant at hand willing to lease those lands. The illustration, I hope, will make it clear that rights of occupancy, so far as *kalkasila* lands are concerned, should only be permitted to accrue in respect of those lands actually cultivated by the tenant, and that a relinquishment of a portion of the lands previously cultivated will destroy the right of occupancy in respect of the lands so relinquished.

50. In concluding this report I have only to add, that I have confined my remarks to such portions of the Bill where I considered my practical experience might possibly afford some assistance to the framers of the measure. I do not, however, desire to have it understood that my suggestions arise out of, or are meant to, apply beyond the local necessities of the districts in which I have passed a larger portion of my official life. I am aware that careful revision of this somewhat bulky report would enable me to exclude some unnecessary repetitions, and present my remarks in a more concise form. Time, however, being short, I have been in a measure compelled by press of work and other reasons to send in the report exactly in the shape in which I originally drafted it. One of the most prominent features discernible in the policy which has directed the constitution of the present Bill is, in my opinion,

an undue desire to lay down rules generally applicable to every part of the province. This determination has, however, been found to be impracticable, with the result that, in the attempt made to persevere in the original intention, tenancies in themselves most important, but subject to local customs, opposed as a rule to the ordinary incidents of ryoti land, have been unfairly excluded from the operation of the law. The justice of this remark is conclusively shown, I think, in the manner in which the right of *dearah* and *kalkasila* tenants have been practically ignored by the framers of the present Bill—rights, it should not be forgotten, inherently valuable to an important and widely ranging class of tenants, but peculiarly susceptible to the exaction of zemindar and planter, and therefore the more worthy of the protecting vigilance of the Legislature.

HERBERT R. REILY.

TOTAL .	399	28	6,247	4,647	181	12,109	8,701	1,500	44,309	37,201	10,603	1,13,967	74,138	17,023	57,305	42,137	29,335	2,33,937	1,66,824

It will be seen from the statement given above that out of the total number, 29,335 tenants, 17,023 or 58 per cent. hold less than 5 bigahs of land.

The 6th August 1884. HERBERT R. REILY.

Dated Camp Moorligunge, the 13th July 1884.

From—RAJAH HURBULLUB NARAYAN SINHA, BAHADUR, of Sonbursa,

To—The Private Secretary to the Lieutenant-Governor of Bengal.

I beg most respectfully to submit my memorandum regarding the Bengal Tenancy Bill, as revised by the Select Committee, for the information and kind consideration of His Honour the Lieutenant Governor of Bengal.

Memorandum by the Rajah Bahadur of Sonbursa regarding the Bengal Tenancy Bill.

I HAVE carefully read the Tenancy Bill and the report thereon, as settled by the Select Committee, which were submitted by them to the Government of India on the 14th March last. I dissent from the provisions of this Bill, on the simple ground that the present Bill, far from being like the former one, is harder than it was.

The object of the Tenancy Bill is twofold: *first*, to improve the status of and to define more clearly the rights of the ryots; and *secondly*, to improve the procedure for the collection of rents by the zamindars.

As regards the first, no necessity nor emergency has been shown, nor any political occasion has occurred, which would justify the changing of the present law (which has been in force since a number of years, alike liked by the zemindars and ryots, and by which the rights of the latter have been maintained), and enacting in its stead a law which is nearly like the Irish law (though the circumstances which necessitated its enactment do not exist here) for the helpless, loyal and empty-handed zemindars, who are not so trained up as the Irishmen are. In this Bill the rights of the ryots have been considered without the least attention being paid to those of the zemindars. It has been provided that nothing can be done by the zemindars mutually with the ryots regarding the settlement and collection of rent, except through the courts. Thus the rights vested in them by Regulation I of 1793 have been upset, and the status of the zemindar and the ryots, as settled under Regulation VIII of 1793, has been altogether nullified.

In Regulation I of 1793, it is distinctly stated that the zemindar, with whom the settlement has been made, shall enjoy exclusively the profits of the land and pay revenue for it to Government.

Regulation VIII of 1793 was passed to explain more clearly Regulation I of 1793, by which the status of the zemindar, dependent talookdar, jagirdar, khodkhast ryot, &c., has been fixed.

It has been said that this Bill may be made the law of the land in order to protect the ryots from the oppressions of the zemindars. Are not the rights of the zemindars mixed

up with those of the ryot? The right itself has originated from prescription, and this is alike acknowledged by all the nations in the world having religion or without any religion. In that part of the Bill where the rights of the ryots are considered, these have been recognized on account of their lengthened existence, since hundreds of years have not been so acknowledged. Granting even that the rights of the ryots have been in existence since a long time, yet those of the zemindars must have existed before the formation of the rights of the former.

There are many zemindars in Behar who trace their descent from about the Hindu Raj, and in such families there exist sunnuds granted by Mussulman Emperors. In my own family there is a firman granted by Emperor Arungzebe, in which occur the following words :— "That through the former sunnuds the rajgee and zemindari of the place are vested in Raja Kissen Singh's family," as stated in my note regarding the last Tenancy Bill. A copy of the sunnud in full, with translation, is annexed to this memorandum. Raja Kissen Singh was my ninth ancestor; why then have the rights of the ryots only been preferentially considered? Certainly both the zemindar, and the ryot's rights should have been equally considered in the Bill under notice.

It is said that custom, which is inconsistent with the Bill, is not to be recognized. Has the law no concern with custom? Is it to be simply the repository of orders? Can there be any law for the alteration of custom in force in any country? The Bill under notice has been framed in an extraordinary way. So far as regards the rights of the ryots, custom has been retained, and not so done as regards the rights of the zemindars.

It is a matter of regret that nothing has been said clearly regarding waste lands. Were not these lands settled at the time of the Decennial Settlement with the zemindars? It is said in the Bill that, if the zemindars fail to prove the other lands to be theirs, these will not be theirs. This appears to be very strange. What better proofs zemindars can give regarding them than the papers showing the quantity of jote lands of the ryots, and pointing out such cultivated lands of the ryot; and any lands which are other than these are to be called waste lands of the zemindar. Can it not be said by inspection which lands are waste? As said by Raja Siva Pershad in his speech regarding the subject in the Legislative Council, what is deposited in the Bank may be doled out to any number of men. I say by the above process something is given to a man's share, whereas by the procedure under comment complete destruction of the zemindar's right takes place. Even the malik of the land will not be able to get it after much fighting and litigation under the proposed law.

I do not understand why the law of contract, which is held to be proper, equitable and customary, has been partly maintained and partly abolished regarding the same man. In my opinion the rules regarding contract may remain in force, which may bring in amicable settlement of tenantry questions between the zemindar and the ryots, thus doing away with unnecessary lawsuits and waste of time, and allowing them to pursue each other's work honestly. If this is abolished, the complicated procedure prescribed by the proposed law will increase suits, and consequently both the zemindar and ryot will be ruined. Government abolishes contract on account of the lawlessness of the zemindars, *i.e.*, that the kabuliats are so worded that the occupancy rights are destroyed. Is it possible that a zemindar can take kabuliats by force from thousands of ryots and get them registered? Why did the ryots pay rent as fixed therein without objection? Why did they not sue the zemindars, and why did they keep quiet? Unless settled amicably and mutually, no kabuliats can be executed and registered.

At present the feelings of the zemindars are against the Bill, and so much injury is being done to the zemindar's work since the introduction of the Tenancy Bill, that if the zemindar wants to sell any portion of his estate he cannot get purchasers for the same.

The subject of the rent law has been before Government since the last 10 years. Good many reports on it have been sent to Government by many officers of Government and outsiders; nevertheless it appears from the Government letter that sufficient information has not been placed before it. I think it quite impossible to have the matter settled through reports. Under these circumstances, and without any parties asking for a law, a new law is to be passed, which has the object of kindling the fire of dispute between the zemindars and ryots to benefit the mahajan, the middle class ryot and vakil, and not the *asul* ryot and the zemindar. My own opinion, as well as that of all the Behar zemindars under the circumstances, is that there is no necessity for a new law, and the law now in force may be allowed to stand if the Government think it proper to make a new law. I would respectfully suggest that in each zilla of Bengal and Behar a commission be appointed, consisting of half zemindars and the other half officers of Government, to make enquiries and to take depositions of zemindars, and then to submit a report to Government together with the original depositions. Government will then be in possession of full details on the subject. Thus every man's right will be settled, and injury will be done to none.

At the request of the Select Committee the Government has called for information on the following points :—

2. *Firstly*, whether, with reference to landlords' improvements, it is desirable to empower revenue officers to arrange for the cutting of irrigation channels, &c., and the payment of compensation.

3. *Secondly*, whether the Summary Sale law for the putni tenure can be made applicable in cases of talooks.

4. *Thirdly*, whether the same procedure can be applied in cases of recovery of arrears of Road cess and Public Works cess of lakhraj tenures.

5. *Fourthly*, about the bastu or basdee lands.

6. *Fifthly*, about utbundee and hal hasilee tenure.

7. *Sixthly*, about the exemption of garu and guzasta holdings from pre-emption clauses.

8. *Seventhly*, about the improvement of price-lists for the last 12 years, and the effect of the enhancement to be based thereon.

9. About the first point, I beg to say that in cases where the zemindar constructs a canal, arranges for the storage of water and for the opening up or damming up the courses of water, giving powers to revenue officers would be tantamount to interfering with the profits of such person, and in this there will simply be wasting of time of the Government officers. The zemindar and the ryot will thereby be ruined, and there will be another evil, which is this, that the persons who used to do these works in consideration of the profit arising therefrom, will, on account of the untimely deputation of officers and the expensive procedure, be discouraged from undertaking such kind of work; but if the zemindar wants to construct similar works by borrowing money under the Land Improvement Act, in that case it would be proper to give so much authority to revenue officers as to see that the work for which the money was advanced has been done.

10. Second point. In the Behar portion of this division, there exists no talookdari system.

11. Third point. If the lakhraj tenures are summarily sold on account of the arrears of Road cess and Public Works cess, under the Putni law it would not only defeat the purpose for which this kind of tenure was created, but at the same time interfere with the proper discharge of the functions attached to such tenure. At present a lakhrajdar is faithful, and in consideration of service is subordinate to the zemindar. The proposed procedure, instead of simplifying matters, would give rise to another powerful class between the zemindar and ryot for the subversion of the zemindari right.

12. Fourth point. About the homestead lands.

It appears that in consequence of different customs in different parts of the country, the Select Committee have done away with the chapter regarding it from the present Bill. I am to say that in certain places rent is taken for such lands, and in some places the zemindar assigns a particular spot for the purpose, and it rests with the zemindar either to take rent or not, and therefore section 216 would not be sufficient. A chapter giving the detailed provisions regarding the same should be inserted in the Bill, as the taking of rent or not rests upon the will of the zemindar. It would be necessary, in case of dispute for the recovery of rent, for the non-paying ryot, if not settled amicably, to have recourse to the courts. The court shall allow rent to be taken according to the local custom. It would not be proper to give occupancy right to the ryot who does not pay rent, and if any ryot's right in any jote becomes extinct, it would not be proper to allow him occupancy right in his bastu lands. If in these cases occupancy right be allowed, it would make the ryot a sharer of the zemindar.

13. Fifth point. Utbundee and hal hasilee tenures. I do not understand which tenure is called utbundee, and this is not clear from the Government letter. I believe hal hasilee is that kind of land which has come out of the water and accreted to the jote of the ryot. Additional rent is taken for it as if from a new ryot, and in it that ryot has no right so as to prevent its being settled with him or some other ryot. I do not know whether I am right. I do not consider it proper to write anything more regarding it.

14. Sixth point. About guzasta or garu jotes. It is said that these jotes ought to be exempted from the pre-emption clause. Why in these cases right of pre-emption is not to be allowed if it is at all allowed. The pre-emption clause has come from the Mahomedan law, and in that law no exception has been made regarding any kind of right. It is held to be good with reference to any person with whom there is any concern, and therefore it is necessary that Huq suffa should hold good with reference to these jotes.

15. Seventh point. With reference to the price-lists for the last 12 years, I beg to say that these have been prepared through uninfluential and irresponsible men, and this is a guess-work: what trust can be put upon them. The price of grains is not now the same as it was five years ago, and if in first six months the price is Rs. 2 per maund, in another six months it is one rupee. Under such circumstances, if there be enhancement and decrease of rent, it would simply cause the waste of time and money of zemindars and ryots, bringing no good. I do not find any procedure for the correctness of such lists. If a zemindar, in order to enhance, says that so and so crops is Rs. 5 per maund, the ryot would say Rs. 2 per maund, and the court would be required to send officers to enquire and settle the point; their reports would contradict each other, as the value of crops is ever changeable.

16. As regards paragraph 4 of the letter of the Government of India, this will be settled by the Revenue officers, but thus far I say that, in consequence of heavy work, it is proposed to

been taken possession of by a ryot before 12 years, and therefore occupancy right has been allowed to him; then why he shall have the same right in all the pieces of land in the village or estate which have been settled at different times for some term less than 12 years, or for one day before the passing of this Act, and at different places, and why these should be considered as one holding.

28. *Clause 6, section 26.*—It is said that a person shall continue to be a settled ryot of a village or estate as long as he holds any land as a ryot in that village or estate, and for one year thereafter. But it has not been stated under what circumstances this will be done. On seeing paragraph 14 of Select Committee's report, it appears that any time the ryot is put out of possession he will continue to retain his right after a year. The ryoti settlement is made for rent; if the ryot without making arrangement of rent abandons it, then from whom the zemindar shall take rent it his right is continued? The zemindar will not be able to settle the land, nor anybody would take it. If the ryot takes back his land, his objection to non-liability for rent on account of non-cultivation would be good. This will be injurious to the zemindar.

29. *Clause 7, section 26.*—It is said in section 26 that, if a ryot abandons his jote, and recovers it after more than a year by suit, his right as settled ryot shall continue. If according to the provisions of the law, he has abandoned the land and the zemindar settled it with some other person who has improved it, or kept it in the same state as it was before, and if in consideration of improvement or some other cause or enmity with the zemindar and the new ryot, he, the old ryot, recovers this land after suit, would such a proceeding be proper by which two persons shall be put to trouble? If occupancy right be allowed to such a man again, it would unsettle the zemindari affairs.

30. *Section 27, Village and Estate.*—It is said in clause (*a*), section 27, that a village means the area included in a revenue survey map having fixed boundary. Where it is not procurable, the local Government is to settle it by deputing officers, and in clause (*b*) it is stated that, where two or more estates have been created by one or two butwarrahs, the area of the parent estate shall be deemed to be a single estate notwithstanding the butwarrah.

31. It would be better to retain village in lieu of estate, for the village has a definite boundary and known to all, whereas the estate may mean a large pergunnah or a talooka of large extent.

32. *Section 28*—It is said that, if the zemindar gets occupancy right of the ryot anyhow, it will be as regards mere contract, then it would be superfluous to give the zemindars the first right of bid in a sale or the right of pre-emption.

33. *Section 31.*—By clauses (*e*) and (*f*) of section 31, the ryot is empowered to surrender, or transfer and bequeath by will, his right of occupancy. With reference to this, if no provision is made in the law to take the consent of the zemindars, and freedom is allowed to the ryot, it would be injurious to the right of the zemindar, for the right of occupancy is in the land in which the zemindar has a malikana right, and therefore without the latter's consent no transactions of this kind need take place by which his work would be properly done and would put him to no trouble.

34. *Section 32.*—The object of giving the zemindar right of pre-emption is that this will save him the trouble which the free sale would entail upon him, *i.e.*, the bad ryot, mischief-making mahajan and men of some other profession, or outsiders taking lands in a village would be injurious to his interests. I find no advantage to the zemindar if he purchases the occupancy right out of fear, and there will be other concomitant evils, namely, out of every 100 zemindars, 95 are sunk in debt, and consequently they shall find difficulty in getting ready cash. Much more so in cases where 100 of the ryots unanimously ask the zemindars to buy their rights. The money thus spent would not fetch a profit, but generally loss. Again, under section 28 the zemindar does not get this right in full, and these disgusting proceedings will be before him over and over. If the ryot knows beforehand that certain land of his is likely to suffer on account of fluvial action and other causes, he with others numbering hundreds fix upon a tenure purchaser, and thus put the zemindar to trouble, or the ryots find out under the cover of this clause of law some other way of profitting at the expense of the zemindar, or making his relative or friend as a Furzee purchaser, reap himself the benefit of thus putting the zemindar to trouble. As I said over and over last year, the zemindar being the malik, why he shall take upon him the burden of the evil arising from the purchase of this kind.

35. *Sections 37 and 38.*—Restriction on sub-letting, as mentioned in sections 37 and 38, have already been commented upon in my remarks regarding chapter III. It appears to me that the shikmee would interfere with the right of the zemindar for distraining crops, notwithstanding the benefit of section 156. Shikmee pottahs under the circumstances stated in clause (*a*) may stand, but what advantage there is in creating such ryots who sub-let more than half their lands to tenure-holders. It is now the policy of Government to frame a stringent law for the few zemindars who have been stigmatised as oppressors. When the tenure-holders will be augmented in numbers, it will hereafter be troublesome task for the Legislature to enact great many laws for their lawlessness.

36. *Sections 39 to 50.*—Enhancement rules are stated in sections 39 to 50. Much restriction has been put in even as regard enhancement by private contract. It cannot be

expected then to have enhancement by any other way specified in the law through courts. It may be feasible to have an increase of rent on account of improvement of land and increase of productive powers by fluvial action, and much injury will be done by the restrictions; as an instance, there is a piece of waste land settled with a ryot under two consecutive terms or under special circumstances at 4 annas per bigha. According to the enhancement rule, not more than 5 annas will be increased, though the land is worth more than Rs. 5 or Rs 10, and the case of the adjoining lands being the same, the zemindar will be the loser by this rule. There is another point, *viz.*, that in matters of enhancement, the custom of caste is to be regarded where it is in vogue. Though it is not mentioned in any law since 1793 in Bengal, Behar, and Orissa, yet it may be expected that hereafter, in consideration of the high caste of the zemindars, it may be considered necessary to alter the same law as regards them, or the Encumbered Land Estates law may be put in force here.

37. *Section 51. Reduction of rent.*—About the reduction of rent provided in section 51, I am to state the suits on account of the lessening of the price of the food-crops in the bazar according to clause (*b*) would be increased.

38. *Section 2.*—About the preparation of the price-lists there will be more difficulty. It is said that, if within 15 days objection is raised to it by ryot or zemindar, then it will be considered. It is known to all that unless there is a suit, nobody pays attention to this matter, and who cares taking notice of *ishtehar* given in this or that place, and who will bear in mind the fact, if objection is not made within 15 days, the list will be held to be correct; and according to law of evidence, if the published lists are accepted as evidence, and if objection is raised to their correctness, what sort of attesting evidence would be given; and if these lists have been prepared by an irresponsible amlah, then what trust can be put upon them, and these will therefore do good to no party.

39. *Section 53.*—Buttia system has been in force since a long time, and is sanctioned by nature, and there is much advantage from it; if any injury is done to the crops on account of dryness, inundation, destruction by insects, fall of hailstones, the ryot is free from trouble, especially in times of famine, on account of liability for rent, and it saves him from enhancement and from suits from other causes, supposing that advantage has been gained by the commutation in any time in any instance, but it is not akin to the advantage gained by the buttia or half and half system.

CHAPTER VI.

Ryots having no Occupancy Right.

40. So much right has been given to the ryots of this class that, except on the grounds specified in section 58, they will not be ejected, but an important omission has been made in it, that is, where the ryots take lands under verbal contract, how they will be ejected on the expiration of the term of such verbal contract, or in case of enhancement after the expiration of such contract. This custom has been in force since a long time, why it has been omitted.

41. *Section 59.*—This section provides that, after the expiration of the term of a registered lease, it will be necessary to give the ryot a notice to quit the land six months before the expiration of the term of such lease, and the suit for ejectment shall be instituted after six months from the date of the expiration of such lease, otherwise the ryot will not be ejected. It is a matter of regret why any conditional terms were imposed upon the ryot.

42. *Section 60.*—Provides for ejectment of ryots for not giving enhancement of rent, and in which much favour and concession have been shown to the ryot, and why no real favour has been shown to the real malik in comparison to such ryots.

43. *Clause 7, section 60.*—Five years' term of lease would enable the ryot to get occupancy right, thereby falsifying his first contract, the ryot would take advantage at the expense of the malik. This is injurious to the zemindar.

CHAPTE RVIII.

44. I have said regarding clause 2 of section 64 in connection with chapter IV. I beg now to add here that in the Select Committee's report, it is stated that, when the proposed register of tenures has been prepared, this matter would be settled; but I strongly deprecate it, for it will open up the doors of litigation, which will ruin both, especially for the expenses of enquiry and for a decision.

45. *Clause 4 of section 64.*—I am to state that, if any ryot has land in a jote of this kind, and get other lands joined to it in which he has not the same permanency of rate, would it be, under such circumstances, supposed that such additional lands would be combining to their original state, or in other words permanent?

46. *Clause (b) of section 73.*—It is said that when a tenant bound to pay money on account of rent has reason to believe that, owing to dispute or ill-feeling, the person to whom his rent is payable will not be willing to receive it, and to grant him a receipt first, then he is to

deposit the money in the court. This will induce the ryot under an imaginary reason, whether the zemindar take the rent or not, to deposit it. It would be better to keep sections 46 and 47 of Act VIII of 1869 in force. This is not, nor will be, injurious to any.

CHAPTER IX.

47. The definition of improvement, as given in section 87, and the right given regarding improvement to the ryots holding at fixed rates in section 88, and those given to the ryots having rights of occupancy in section 89, and to non-occupancy ryots in section 90, all these are against the custom of the country and nature, and this custom has been in force since thousands of years in all the countries, unlike the customs which are in force in one part and not so in other parts of the country; and allowing such a right against the maliks' consent under an imaginary reason, which has since been made, and does away with the ancient custom, it is a matter of surprise that compensation has been allowed under section 93, and the heads of compensation have been settled in section 94. These persons, who have not had rights to do this kind of work some hundreds of years without the malik's consent, it is now said are to get compensation when in case of ejectment. This stringent provision is against the rights and privileges of the zemindars and terms of the Decennial Settlement.

CHAPTER X.

Record of Rights and Settlement of Rents.

48. It would not be proper to give authority to Local Government in this matter. There will be good deal of waste of time and money for the work of the survey, specification of rights, and settlement of rate of rent, and so many cases will occur as will require good deal of time for disposal. In support of this, I beg to cite the case of a butwarrah in which much time is spent, and generation after generation has been carrying on such a case. According to Act VIII of 1876, about the registry of the zemindars' rights, there were numbers of suits for the establishment of rights. I need not enter here into details of its workings, which are known to all. Measurement papers and maps are to be found in the sheristas of many zemindars, and there are survey maps too which are like those prepared by Government officers, and before this Act the zemindars have filed twice papers in the Road Cess Office giving lands and jumma thereof, and there is no precedent about the objection of the ryots to them, and many zemindars have pottahs and kabuliats for the settlement of any dispute which may arise regarding the area, jumma, &c., and therefore the Local Government need not be invested with any powers in the matter.

CHAPTER XI.

Table of Rates.

49. The provision made regarding the table of rates is impossible to be worked on, on the ground that the description of lands in one part of a village varies with that of the other. I say from my own experience that it is impossible to prepare one.

CHAPTER XII.

Record of Proprietor's Private Lands.

50. It is said that such lands as are known by the name of seer, zerait, nij, nijjote, kamat, which have been cultivated by hired labourers and held continuously by a proprietor for 12 years, shall be his private lands. Are not the lands other than these zemindars' property, and for the non-acknowledgment or otherwise of these lands, except Regulation I of 1793, is there any other law? If it is summarily disposed of that the aforesaid lands are his private property, and other lands cannot be his without proofs, would the zemindar's claim be restricted to such lands only? Why proofs shall be necessary regarding them? There are remaining more or less than 100 bighas of waste land at a particular place, can there be any other bodies' right in them than that of the zemindar? It is a matter of surprise that waste lands will be the property of anybody else if he asserts that he has a right in them, and the custom of a village is to be regarded on the point. If any land which has come to zemindar's possession as waste land at a time under 12 years, can anybody else have a right in it?

51. There are 5,000 acres of waste lands in a mouzah, and a royt holds certain piece of land near it. He says these lands are his and they look waste According to the provisions of this Bill, the zemindar will be called upon for proofs to contradict the ryots and the latter will not be called upon to show whether they have paid rents or not. If such a procedure is allowed, the papers for years regarding waste lands will be waste papers, and there are thousands and lakhs of bighas of lands. Burraree, *i.e.*, alluvial formation on the banks of rivers in which without ploughing crops are grown. Anybody who has right of occupancy or mukarraree near it, if he, before this Act comes into force, scatters seeds, then

the lands will be his, and the zemindar called upon to prove whether these lands are his or anybody else's bhoolee or otherwise. If feraree lands or lands under ejectment clauses come under his possession as his kumut for certain term of years, if the zamindar fails to give proof of 12 years' possession, would such feraree or ejected royts be the maliks of such lands? This shows interference with Regulation I of 1793.

CHAPTER XIII.

Distraint.

52. I would state that the authority to distrain (which was simpler), hitherto vested in the zamindar's, has been entirely taken from them, and now distraint should be made through the courts. Mere application would not do for getting distraint made; if the court thinks proper distraint can take place. There will be delay and expense. By the time the application is made, the crops will be *nil*, especially in jungly land, where the ryots remain for the harvest time, or the jote has been taken for a year or settled with a stranger or a ryot, who has his land, and who has no other property than this. In these cases, without authority of distraint, it is impossible to collect rent. When penal clauses for damages have been allowed, then why the authority from the zemindars shall be withdrawn? A zemindar who is rich and influential will be able to give damages in cases of unlawful distraint. Under Chowkidari Act, a tehsildar who is poor has the power of distraint in cases of ryots and also of zemindars. This man, though illiterate and poor, is trusted, and the educated and loyal zemindar, who is liberal-handed on public occasions, would like to take blame for dishonestly acting. In such trivial matters, why Government does not trust such classes of men, and why authority shall be withdrawn?

CHAPTER XV.

Sale.

53. The procedure for sale provided for in this Act, in execution of decree for arrears of rent, is contrary to former Act, and much discussion has occurred regarding it. I said on the point in detail in my note of the past year, and therefore I need add nothing more than this, that the procedure for sale has been based on the ground that the ryot takes the benefit by receiving surplus-sale proceeds; but it will be impossible for the ryot to get them easily on account of the proceedings of the court, and these surplus proceeds will be absorbed in the share of the mooktears. The zemindar, too, would not find the procedure of ejectment under the present law to be simpler.

CHAPTER XVII.

Contract and Custom.

54. By section 210, in certain exceptional cases, contract has been made void. This is against the principles of freedom of contract. Such a strong, well-grounded, religious, legal, and customary practice has been in force since and before the beginning of the British Raj, and it was under section 57 of Regulation VIII of 1793 that the practice of granting pottahs, *i.e.*, contracts, has been made the law of the land, and this practice has been supported by law since hundred years, and by religion since ancient times, and there are other enactments on the point. Thousands of sale proceedings have been effected and crores of pottahs and kabuliats have been executed and registered under it. Now this freedom of contract has been done away with, but the ryot has been allowed to contract regarding property, moveable and immoveable, with mahajan, and as regards the zemindars, it has been provided for him that, excepting the restricted cases, he, the royt can enter into contracts. Any ryot who abandons his jote or resigns it is allowed freedom in this; no restriction is placed on it. Freedom of contract is the natural right of all.

55. Under the Emigration Act a man has freedom as regards himself, though this is against the will of his friends, and his position under it is like that of a slave. This is allowed; but no freedom is allowed in zemindari transactions, which will bring loss only in all bargains of profit and loss. Written contracts settle the affairs between the two parties, cause less suits, and simplify the proceedings of the court

The restrictions in matters of contract have been made on the understanding that the ryots suffer much at the hands of zemindars of which no proof has been given. Against this I show in margin that by the contract rules enforced by me, the ryots have been benefitted. The name of the mouzah is Hurressurpur Dighee, area of which is bighas 1,184-7-15, and the jumma Rs. 918-14-6. This mouzah

Number.	Number of towji.	Name of Mehal.	Where according to survey.	Area for which rent is paid per local bigha.	Rent.	Rate per bigha.
					Rs. A. P.	Rs A. P.
1	675	Hurressurpur Dighee	1,331 3 4	1,184 7 15	918 14 6	0 12 3
2	675	Taluoka Pakulpoora	16,366 2 17	14,199 7 19	17,985 11 6	1 4 0

is in talooka Pakulpoora, towji No. 675, of which the area according to survey is 15,386 acres 2 roods 17 poles, out of which the cultivated area amounts to 14,199 acres 7 roods 19 poles. In the above talooka and mouzah, except tanks, roads, bustees, there are no uncultivated lands. The total mofussil rental of this talooka is Rs. 17,985-11-6. Paddy, rubbee and the ordinary crops are grown on it; on an average each bigha yields 20 maunds of grain; the rate of jumma is very low. If the mofussil rental of the whole talooka is calculated upon its entire area, the result would be Rs. 1-4 per bigha, and in Hurressurpur Dighee, under the same calculation, the rate per bigha would be annas 12-3; in this talooka no one has rights of occupancy or mokurraree right; the registered pottahs and kabuliats have been from time to time executed after the expiration of the of terms the pottahs on the same jumma.

56. From the above, it will be seen that no increase of rent has been taken after the expiration of the term of pottahs and the same jumma continued, and fresh pottahs given to them. I am prepared to show thousands of precedents on the point, and these are documentary, and lakhs of such precedents can be shown by other zemindars. Under the above circumstances, I strongly advocate for the retention of the system of freedom of contract, and I am sure there would be no disadvantage by its retention. I am against this chapter.

FIRMAN.

Be it known to the Hakim (officers) high in dignity and rank: Amarlan (Revenue officers) Kurpurdauzes of pergunnah Nirsingpur in Sircar Tirhoot, Sooba Behar, who have been exalted under the kind patronage of the Emperor, that the agent of Raja Kissen Singh memorialized to the effect that through former sunnuds obtained from the throne of this city that the zemindari and rajgee of the pergunnah in question are vested in Kissen Singh, that for some time the zemindars of the neighbourhood have been interfering with his rights, and that therefore an order which is elevated and high as the sky is hereby passed to the effect that the zemindari and rajgee thereof are hereby vested in Kissen Singh who is the best of his family and in his heirs; that the jagirdars and the revenue collectors of the present and past period try their best to keep this order, which is high, pure and exalted, in force invariably for ever that they do acknowledge the aforesaid person and his heirs as Rajas, and in no way do not make changes in their rajgee institutions, and on no account make any opposition to them. That the Raja do remain in enjoyment of the raj and for ever bless for the prosperity of the throne and call for no further firman and nothing shall be contrary to what has been written herein. Dated 10th Ciban month of Ilahi in the third year of the reign.

H. M. S.

No. 65, dated Chinsurah, the 18th September 1884.

Memo. by R. H. WILSON, Esq., Offg. Commissioner of the Burdwan Division.

COPY forwarded to the Secretary to the Government of Bengal, Revenue Department, in continuation of this office No. 480 of the 8th ultimo.

What is now wanted is not as I understand a discussion of the merits of the provision of the whole Bill, but a discussion merely of the points suggested in the letter of A. P. MacDonnell, Esq., Officiating Secretary to the Government of Bengal, Revenue Department, to the Commissioners of Divisions.

Although I consider the Bill to be a most objectionable one in many respects, I shall still confine my remarks only to the points raised in the letter above referred to.

Paragraph 4 of the letter.

The definition of raiyat as given in columns 2 and 3 of section 5 of the Bill is not exhaustive. A ryot is defined to be a person who holds land immediately under a proprietor or immediately under a tenureholder. A proprietor is defined as a person or a number of persons owning an estate. The definition of "estate" as given in the Bill has, I think, the effect of excluding unregistered lakhiraj lands as well as Government khas lands from its meaning. I therefore consider the definition of the word "raiyat" as given in the Bill objectionable on the ground that it does not include holders under unregistered lakhirajdars and tenants in Government khas mehals. Why the cultivators in Government khas mehals should not acquire a right of occupancy in the same way as under landlords other than Government it is difficult to understand.

(b) The effect of the presumption mentioned in section 5, clause 5 of the Bill, would be to shift the onus from the tenant to the landlord.

Occupancy holdings comprising more than 100 bighas are very rare in this district, and therefore so far as this district is concerned, the presumption would not be very objectionable. But the case would be different as regards some of the districts of Eastern Bengal where occupancy holdings exceeding 100 bighas are common. So far as this district is concerned the presumption referred to would, I think, be a fair one with reference to the existing practise.

(c) The object of converting an occupancy raiyat who sublets half his holding into a tenure-holder is, it has been said, two-fold.

Firstly, to discourage the purchase of occupancy holdings by money-lenders; and, secondly, where transfers were made, to afford protection from undue enhancement of rents to, and facilitate the acquisition of the right of occupancy by, the actual cultivators of the soil.

As regards the first mentioned object I am afraid that too much is now being made of the fear of money-lenders—most of them not being other than the well-to-do raiyats themselves. The conversion of the sub-letting occupancy holder into a tenure-holder, as provided in section 37 of the Bill, would not, I think, have the desired effect of deterring money-lenders from purchasing rights of occupancy on the ground that it would expose them to being summarily dealt with for arrears of rents, whilst curtailing their power to deal summarily with the raiyats. A *mahajun* who has got money in hand can easily pay off the arrears, and therefore need not be afraid of a summary sale. He will not suffer much from the facts of the rents being realized from him soon after they are due. As for his not being able to deal summarily with raiyats, that is not a new thing. Besides the interest which he will get from the tenant on the arrears would go to a certain extent to compensate him.

But a very great practical difficulty will arise in determining who are to be considered money-lenders within the meaning of this Bill. In villages many of the money-lenders are no other than the well-to-do raiyats themselves. The word money-lenders ought therefore, it seems, to be defined in the Bill.

I am of opinion that the danger of the occupancy rights falling into the hands of the money-lenders has not at present assumed a shape to demand legislative interference. Besides, the existence of money-lenders is to a certain extent a necessity. To diminish in their eyes the value of the securities on which they could lend money would be to make them unwilling to advance a loan when a ryot may urgently need it, and thus to increase ten times the difficulties of the latter.

The practical difficulty connected with the ascertainment and registration of sub-leases covering in the aggregate half the holding would, I think, be likely of a character to render the success of the scheme doubtful. It will necessitate enquiries, and may cause litigation between the landlord and the tenant. The ryot may not also like the trouble and expense attending the enquiry.

I now come to Chapter IV.

That the rule of 20 years' presumption embodied in section 64 of the Bill is certainly one of the most valuable presumptions in the interest of the raiyats admits of no doubt; but it cannot certainly be said that it throws on the landlord no greater burden of proof than he is ordinarily able to discharge. Few are the instances in which landlords can trace the ownership of the particular properties in their families from the date of the permanent settlement. Often they are purchasers in execution of decrees or purchasers by private sale from persons who have purchased in execution of decrees. They are seldom in possession of papers which would enable them to show that the tenures or holdings have not their origin from the date of the permanent settlement. That landlords in this district do, as a matter of fact, experience considerable difficulty in rebutting the 20 years' presumption, if unjustly pleaded, is certain. But whether practically they have been in a good many instances losers on account of this presumption is somewhat doubtful, considering the fewness of the cases in which civil courts have thought it fit to enhance the rents of ordinary occupancy holdings, in spite of the undoubted increase in the value of the produce.

Strictly speaking, it is upon the tenant that the burden ought to be thrown of proving that the holding can trace its origin from the date of the permanent settlement, and that its rent has not varied. But now that the raiyats have enjoyed the benefit of the 20 years' presumption for so many years, they ought not certainly to be deprived of it altogether. In the case of documents lapse of 30 years may justify a court in presuming their genuineness without any evidence, save that they have come from proper custody (see section 90, Evidence Act), the reason being the difficulty of proving a matter by oral evidence after such a long time. Similarly, it may be laid down that payment of rent at the same rate for 30 years may justify a presumption that the *jumma* is held at the same rate from the date of the permanent settlement.

CHAPTER V.

The definition of a settled raiyat, we are told, is no longer an open question for general discussion, but a definition more unfair or more disastrous to the interest of the landlords could hardly be conceived. The warmest and the staunchest advocates of the tenants' rights ought to be ashamed of going to the length the framers of the Bill have done in this respect. It is a most unjustifiable attempt to break through the pledge of the permanent settlement, to reduce the zemindars to the position of mere annuitants and to transfer the real proprietary right in the soil to the raiyats. To be consistent, the word zemindar (which means the lord of the soil) ought to be defined as a mere rent receiver with no real proprietary right to the land. Can any one who knows the real state of the country entertain the slightest doubt that the effect of this chapter of the Bill, if passed into law, would be to transfer the

real proprietary right in the soil from the landlords to the tenants? Every raiyat who has held a piece of land continuously for 12 years in a village or estate would be a settled raiyat of that village or estate though the land so held may have been different at different times. Ninety-nine per cent. of the villagers owning lands would at once therefore, as soon as the Bill is passed into law, be converted into settled raiyats, and whatever lands they will hold they will have a right of occupancy to The history of the administration of law for the last 15 years has shewn how very ineffectual are the provisions of law, at least as they are administered by our courts, so far as the enhancements of rents are concerned. Perhaps 4 per cent. of the cases are dismissed for some technical defect in the drafting of the notice, or what is called want of satisfactory proof of its service. Two cases of enhancement are hardly decreed in a district every year. Taking these facts into consideration, theer could be no doubt that the effect of this chapter, if passed into law, would be a sort of legislative declaration of the proprietary right in the soil being with the raiyats. But I need not dilate on so clear a point further.

To shew that it would be proceeding too far to extend over an entire estate the capacity of a settled raiyat to hold on an occupancy title land into the possession of which he has been let, I need perhaps only to state them. One estate in the towji of the Burdwan Collectorate alone extends over more than perhaps one-fourth of this district, and also over portions of Bankoora, Beerbhoom, Midnapore, and Hooghly. It is let out to a large number of putnidars. To give a raiyat under one of these putnidars a right of occupancy from the very first day of the lease to whatever lands may be let out to him for the first time by a different putnidar would be very inequitable indeed.

The word estate ought therefore, in my opinion, to be expunged from section 26 of the Bill. The present law for the acquisition of the right of occupancy ought not, in my opinion, to be extended, and I certainly cannot understand how lim iting the area of the estate within which a settled ryot can acquire a right of occupancy could be regarded as an injury to the "just rights" of a ryot. What just right could a ryot have to a piece of land situate miles away from his home and other lands? I should, on the other hand, think that to give a ryot from the very first day that certain lands are let out to him miles away from his home and other lands a right of occupancy therein, in spite of a contract to the contrary, and when no *bonus* is paid, is one of the strongest instances of injustice to the landlord which can be conceived.

Sections 28 and 29 (1)—Of the Bill, though not directly contradictory, are yet inconsistent in the principles involved therein. Strictly speaking both these sections ought not perhaps to find a place in the same Bill.

Where an occupancy ryot has purchased a share in the estate within which his holdings are situate, it is not fair to him that his right of occupancy to lands situate within that estate should cease, and that he should be a loser to the extent of the value of his occupancy holdings. There is no just reason why there should be this restriction on his power of purchasing a share of the estate, for such a provision will virtually amount to a restriction.

Section 31 (*b and g*).—I am of opinion that both the clauses ought to be retained in their present form. Sub-letting ought not to be discouraged. To do so would be to ruin a number of persons who have no other source of income. Suppose a ryot dies leaving an infant son or a widow. Not to allow such a person to sublet would lead to the land being kept uncultivated. There are many persons belonging to the middle class of society who have invested money in the purchase of occupancy rights, and sub-letting is their principal source of income. To discourage sub-letting would cause very great hardship to this class.

How a *mahajun* who has purchased a few *jumas* could be very exacting it is not very clear. If he demands for his lands a rate far higher than the prevailing rate, the only result would be that he would get no tenant. I think it is not difficult for a ryot to get lands at a fair rent in Bengal, and so it would be difficult for the *mahajun* to let out his lands at an exorbitant rate, even if he wishes.

As regards the grounds for the enhancement of the rent of occupancy holdings, the only thing that I need observe is that the last ground mentioned in section 18 of Act III of 1869 has been omitted when I think it should have been retained.

As regards the extent to which enhancements could be had the provisions seem to me to be objectionable.

In some cases the extent to which enhancements could be had is limited to four annas per rupee in the rent previously payable, and in others to double the amount. To shew that such provisions are not fair, I need only say that, strange as it may appear, in Baboo's Bazar, a Government khas mehal situate in the town of Cuttack, the rent of a holding of the Maharani of Burdwan was enhanced from Rs. 6-8 to Rs. 68 and odd annas per year.

There is a distinction in the Bill between the extent to which enhancement could be had *in* court and the extent to which it could be had out of court. This distinction may often prove injurious to the interests of the ryots. Even when a tenant clearly sees that the landlord will be entitled to get a decree for enhancement at the rate of eight annas per rupee, and that it would be useless to contest, he will still be precluded from coming to an amicable

settlement by the provisions of the law. He will, in addition to being made liable to enhancement as prayed for by the landlord, have to pay the costs of the suit and to dance attendance in courts. The distinction alluded to therefore ought to be done away with. Its effect would be to increase litigation. The ryots of a village are their mutual advisers. They can very easily obtain legal advice. It is a mistake to suppose that they are wholly without advisers, and cannot be trusted to know what is good for them and what is not. Enhancements are looked upon by the ryots as a serious matter, and they would seldom agree to it without consultation among themselves and with persons in whose judgment they trust.

As regards bastu lands there is no doubt that a higher rent is generally paid. I think these bastu lands ought not to be altogether exempted from enhancement, but every provision ought to be framed against landlords unduly enhancing the rent. Instances of ejectment of ryots from their homesteads are very rare in this country, and I believe instances of enhancement of the rent of bastus are not also very common.

Price currents for local markets, if properly made, would no doubt be of very great assistance to courts in determining questions of enhancements and abatement of rents. Provisions of the Bill on this point would be improvements upon the existing law.

Restrictions placed on the power of the occupancy ryot to sublet by section 38 of the Bill would not, I think, have any effect in checking the practice of subletting.

Power to make improvements, not inconsistent with the terms of the lease may well be given to ryots having occupancy rights. But a similar power to non-occupancy ryots except with express permission of the landlord is objectionable on many grounds. It would virtually give a tenant-at-will a right to the land against the consent of the landlord. Every landlord may not be able to pay for the improvements made by the tenant and so get back possession of the lands.

There is not the least doubt that very great inconvenience is likely to result if measurements be made by the English instead of the local system of mensuration. It would be absolutely impossible for the ryots and villagers generally to follow the proceedings of the amin if the local system of mensuration be not adopted.

In conclusion I beg to state that although the present Bill is in some respects less objectionable than the preceding one, yet it would be better if it were dropped altogether. A few amendments in the present law here and there are all that is needed. To introduce such wholesale changes in the relations of landlords and tenants as is contemplated in the Bill is not desirable.

The effect of the Bill would be in many cases to introduce dissensions where there is at present peace and amity. The interests of both the landlords and tenants require that the Bill should be rejected, and I hope the Legislature will ultimately see the advisability of doing this.

The Bill is so very one-sided from the beginning to the end that it hardly needs any argument to convince any impartial critic of the fact. If passed into law it would operate as a very great hardship on the zemindars, and deprive them of rights which they have justly enjoyed for centuries.

B. B. K.

No. 999G, dated Burdwan, the 9th September 1884.

Memo. by H. Fasson, Esq., Officiating Collector of Burdwan.

Forwarded in original to the Commissioner. Although sent in too late to be used in the Conference, the report, as conveying the opinions of the Dwaniraj of the Moharaja of Burdwan, cannot fail to be of interest.

Dated 21st September 1884.

From—Babu Kishori Lal Sarkar,

To—The Secretary to Government of India, Legislative Department.

Having on previous occasions had the honour of addressing you on the subject of the Rent question, I beg to say a few words on the present Bill.

Firstly, I shall say a few words on the question of enhancement. It seems to my humble self that the Bill, by failing to make a distinction between the case of enhancing the money-rents of individual raiyats and that of enhancing the general rates prevailing in a village or estate, has left the matter in a rather unsatisfactory state.

This distinction is one of great importance. The enhancement of an individual raiyat's rent in conformity with the prevailing rate, or on account of some reason which from the very nature of the case applies only to individual raiyats, deserves consideration of one kind. The enhancement of the prevailing rates on grounds applicable to entire villages and estates and perhaps to the whole province, deserves consideration of a more serious kind.

Clauses (*a*), (*c*) and (*d*) of section 43 give grounds which will not affect the general prevailing rates nor the general body of raiyats of any locality. But they are grounds which will affect only individual raiyats more or less in number.

But clause (*b*) of section 43 gives a ground which will affect the prevailing rates not only of a whole locality but probably of the whole province.

What I would humbly say is that in view of the above difference the procedure of working clause (*c*) should be more guarded, and that the law should show on the face of it the difference in importance between the one class of grounds and the other.

In the first place, I should desire to have in the Bill an interpretation of the expression "prevailing rates of a village or estate." The word "rate" (*nirikh*) is understood to mean so much rent per bigha of land of any particular quality. The Bill should interpret the word. When it is said 12 annas, 1 rupee and 1 rupee 4 annas are respectively the rates of third class, second class and first class paddy land of a village, it means that the majority of raiyats in the village pay for these three descriptions of land at the rate of 12 annas, 1 rupee and 1 rupee 4 annas per bigha. Therefore, the prevailing rates of a village or locality should be explained to mean the rates per bigha which the majority of raiyats of that village or locality pay for a specified class of land.

Now, suppose that, in a village where the rates I have supposed to prevail, one raiyat, say *A*, is found to pay at the rate of eight annas per bigha for the third class paddy land and 12 annas per bigha for the second class paddy land, his rent will be liable to enhancement to bring it up to 12 annas and one rupee per bigha respectively. This will be a case of clause (*a*), section 43. This enhancement will be based on the prevailing rates, and will not interfere with the prevailing rates.

Then, again, suppose that *A* held certain plots of land which when the rent was last settled was third class paddy land, but that either by the improvement effected by the landlord or by fluvial action these lands have become as fertile and productive as the second class paddy land. *A's* rent in respect of these lands will be enhanceable from 12 annas per bigha to one rupee per bigha. This will be by the operation of clauses (*c*) and (*d*) of section 43, and will not be a case in which the prevailing rates are disturbed.

But, as regards the operation of clauses (*c*) and (*d*), it may in some cases disturb the rates. For instance, it may result in the creation of intermediate rates, and also where, owing to improvement effected by the landlord or to fluvial action, any land has become more fertile and more productive than the land for which the existing highest rate is paid, the operation of clauses (*c*) and (*d*) may create a new rate higher than any existing. But the disturbance thus caused in the rates will be after all of a limited character, and will only add to, and not destroy, the existing rates.

But look to the operation of clause (*b*). If the market-price of staple food-grains has risen by 25 per cent., why, that will be a ground to raise the prevailing rates of the whole province all round. The procedure laid down is very simple, simple to a degree to be tempting; at all events, it will be much simpler than in any other case. But the subject itself is very serious, and involves many a complicated and difficult consideration.

There are many parts of the country in which the existing prevailing rates are already too high. There are again parts of the country in which the difficulty and the cost of cultivation are so great as to make the existing rates, whatever they are, too excessive. Again, there are parts of the country more favourably situated than either of the above parts. But how will clause (*b*) operate? There will be nothing to prevent enhancement of rates where they are already too high or excessive under the operation of the clause. In fact, by this clause, the higher the existing rates the greater will be the amount of enhancement. For, if the prevailing rate of a village be one rupee, it will be enhanceable to one rupee four annas. But if it were so high already as three rupees, it would be enhanceable to three rupees twelve annas, the increase in the second case being eight annas more than in the first.

My humble suggestion is that clause (*b*) of section 43 be made the subject of a separate section, and not be put along with clauses (*a*), (*c*) and (*d*), from which it differs in nature, and that some further precautionary provision be made to guard against the evils I have hinted at.

As one such precautionary provision I humbly suggest that the cases based on clause (*b*) should not be left to the ordinary Courts, but that there should be a provision for constituting temporary Courts of a special character presided over by more than one Judge.

As another precautionary step I would humbly suggest that some illustrations be amended to section 48, such as follows:—

"That, in acting under clauses (*b*) and (*c*) of section 45, the Court shall consider whether the existing rates are not already too high compared with the rates of other parts of the country, and whether for that reason the extent of enhancement should not be sufficiently below what might be given under the said clauses of section 45.

"That, in acting under the above clauses of section 45, the Court shall also consider whether the cost of cultivation as proved in the case is not too high compared with that in other parts of the country, and whether for that reason the extent of enhancement should not be sufficiently below what might be given under the said clauses of section 45.

"That the Court shall also consider, in the event of proof of both the rate being too high and the cost of cultivation too great, whether the claim for enhancement shall not be altogether disallowed for those reasons."

I humbly suggest illustrations of the above kind, as in the absence of them the Courts may not direct their attention to these grave matters. But the best safeguard against the evils should have been to fix an additional maximum in terms of the nett produce *quoad* this ground of enhancement. For instance, it may have been provided that the enhancement under this clause shall not be higher than a third, or say half, of the nett produce, as I have humbly insisted before this.

If the enhancement of prevailing rates be sufficiently guarded and narrowed, I might even not object to an additional ground of enhancement being provided by section 43 of a similar character with clauses (*c*) and (*d*) of that section. I mean that I should not in that case object to have a clause providing enhancement of the rent of lands, which are exclusively or chiefly used for growing other than staple food-crops, on the ground "that there has been a rise in the average price of such other crops in the locality," subject of course to the limitations provided in section 45. Such a ground, although it would create new rates, would only apply to particular lands, and are therefore not so seriously objectionable as that consisting in a rise of price of the staple crops.

Before leaving this subject I should say that in clause (*d*), section 43, the words "or by the cessation of fluvial action" should be added, for in some cases in which inundation leaves sandy deposit, the land improves when it gets out of the reach of inundations.

Secondly, on the question of the definition of occupancy-raiyats. The definition in section 26 is open to certain objections which I humbly think may be removed. On the one hand, the definition presents itself as a great and startling innovation, and involves certain points of a complicated character; on the other hand, it keeps the factor of time as an essential element of consideration in every case. The term "settled raiyat," meant to be a paraphrase of khudkhást raiyat, will not so appear to many, and will, therefore, fail to commend itself to them in the same manner that the words "khudkhást raiyat" would commend itself. I would therefore humbly suggest rather to have the old phraseology and the old idea with some expansion of meaning.

The real difference between a khudkhast raiyat and paikast raiyat of old consisted in the fact that the one was domiciled in the village and the other was not so domiciled. Whether one is domiciled in the village for a longer or shorter period was never deemed to be an essential consideration in the matter. But this is an old discussion, and it is too late to revive it. However, roughly speaking, I would humbly have occupancy-rights defined as follows :—

"A raiyat shall have rights of occupancy to any lands which being raiyati land he either—

"(*a*) held and cultivated for a period of 12 years; or which he

"(*b*) held and cultivated as a khudkhast raiyat;"

and I would have the following interpretations :—

"A raiyat shall be said to hold any land as a khudkhast raiyat—

"(*a*) when the land held is raiyati land of the village in which he is domiciled (*i.e.*, in which he has his permanent sole domicile) and forms part of his tenure or tenures for which he pays rent;

"(*b*) when the land held is raiyati land situate in any village contiguous to the village of his domicile and forms part of his tenure or tenures which he holds under the landlord of his domicile land and for which he pays rent."

The matter is so difficult that it is impossible for any one to make any suggestion with any degree of confidence. However, I would humbly desire that the authorities will consider whether or not, by putting the matter in the above form, you present it in a shape more like the received notions of the country and more in conformity with the received forms of language. As regards the substance, perhaps, there is not much difference between the above and the provisions of sections 25 and 26. If, on the one hand, I have left out the condition that the domicile must be 12 years old, as by section 26, I have on the other attempted to make the conditions of holding more definite and tangible, so that a raiyat may not really take an undue advantage of any vagueness in the provisions such as the zamindars may with some reason complain of as regards sections 25 and 26.

Then I beg to say one word as to restrictions on sub-letting by an occupancy-raiyat. It would appear that section 38 would work injustice to such sub-raiyats as may find it necessary to take a sub-lease from an occupancy-raiyat for dwelling purposes. The limitation of seven years would work hardship in such a case. In such a case even a sub-raiyat should be allowed to have a lease indefinite as to time.

Lastly, permit me to say that I earnestly wish that there should be an attempt to reduce the dimensions of the Bill if possible. There is no doubt as the Hon'ble Legal Member said in the Council, that in many cases long laws make short litigation. But unfortunately in this country it is not quite so. There are many causes, for which the people alone are not responsible, which convert long and complicated laws into huge machinery for litigation and dispute. I am afraid the complaint against the Bill that it may increase litigation is partially true. So if portions of the Bill could be omitted without compromising the essential points, and if such

omissions would in some measure satisfy the landlords, it would certainly be worth making an attempt in this direction. For instance, as regards the subject of transfer of occupancy-rights, I for one shall be satisfied for the present with a provision to the effect that occupancy-rights shall be transferable if locally there be no custom against it, and that the absence of any custom against the right of transfer shall be presumed unless the contrary be shown, provided that the transferee is a cultivating raiyat. Similarly, the detailed provisions about improvement of land might be left out of the present Bill, for this subject, together with the subject of takkavi advances, may well form the subject of a separate Act. The maxim "divide and conquer" may not altogether be without force in even legislative matters. I beg to conclude this humble note with the hope that if in some places I have used egotistic expressions I may be excused for it, as my object in using such forms of expression is to secure plainness and brevity.

(*Sd.*) KISHORI LAL SARKAR.

No. 87, dated Calcutta, the 23rd September 1884.

From—Babu Peary Mohun Mookerjee, Secretary, British Indian Association,
To—The Secretary to the Government of India, Legislative Department.

I am directed by the Executive Committee of the Central Committee of Landholders of Bengal and Behar to submit herewith for consideration by His Excellency the Viceroy and Governor-General and his Legislative Council 25 copies of the accompanying notes on the revised Bengal Tenancy Bill.

Notes on the Revised Bengal Tenancy Bill.

Section 3, Definition No. 5.—The definition of rent should be altered with a view to provide for cases in which the ryot is deprived of the use and occupation of the land by an act of dispossession committed by a third party, a circumstance which does not legally affect his liability to pay rent. Or it may be that a lease is taken, or an engagement of some kind is made for the use of land, but afterwards circumstances, not due to any act or neglect of the lessor, might intervene to prevent the lessee from using or occupying the land, such as want of capital to build a hut or to cultivate the land, and in such cases the penalty should rest with the party who fails, and not with him who is deprived of the rightful use of his land by the failure of the defaulter.

Definition No. 10.—"Transfer" should not include mortgage, otherwise a mortgagee without possession would have the right of getting his name registered in the zemindar's sherista.

Section 5 (1).—For reasons stated under Section 37 the words commencing with "and the persons" should be omitted.

(2). The words "subject to Section 37" should be omitted; and the title of successors of those who originally acquired land for the purpose of cultivating it to be themselves called ryots should be qualified by the condition of his holding the land for agricultural purposes. A person who has established a mart or a factory on his land, or who uses it for the purpose of brick-making, would, under this definition, be a ryot if his ancestor came into the possession of the land for the purposes of agriculture.

(4) and (5): These clauses would simply tend to create confusion, as to the meaning of "a tenureholder" and a "ryot." "The definition of the terms given in clauses (1) and (2) is, subject to the observations made above, clear enough, and is consonant to the use of the terms in ordinary practice. It is essential that there should be a clear line of distinction between the two classes, and no inducement should be given to efface that distinction and to create complications by allowing evidence to be gone into, of the existence of the alleged custom or of the area of land in a holding which has been sub-let. A tenure is and must necessarily be a creation of the proprietor or of a superior tenure-holder, and as a ryoti holding is inferior to the interest of a tenure holder, it would be an anomaly if a tenure could ever be created by an act of the ryot. These two clauses should therefore be omitted.

Section 7 (1).—The word "prevailing" should be substituted for the word "customary" in this clause. The word used would not only be unjust to the zemindars but would also lead to vexatious enquiries which may be easily avoided.

Section 7 (3).—The margin of profits proposed to be given to tenure-holders is very large, much larger than what the courts have been accustomed to give them. Besides, an enquiry into the particulars mentioned in this clause will simply lead to increase of litigation and introduce considerations, as *e. g.*, "risk of collection" which have been hitherto reckoned to be altogether foreign to the enquiry.

Section 9.—Provision for gradual enhancement of rent is altogether incompatible with the very nature of the case. When a landholder is declared entitled to get enhanced rent, he should get it without delay. It would be difficult to determine what considerations should influence the court on the ground of hardship to the tenure-holder. It was very properly remarked by Lord Bramwell that he could not see "what could be taken into account really under such a clause as that." This section should therefore be omitted.

Section 15—(3).—Nothing would be easier for a transferer or transferee of a tenure to

allege refusal on the part of the landholder to register the transfer and thus to recover from him a heavy penalty. It is due to the landholder that no suit should lie for the recovery of the penalty until after a notice of application for registration has been served through court.

The Bill is altogether silent with reference to an important point connected with registration of transfers. The number of persons, male and female, owning shares in a tenure or holding is often very large. Should the landholder be bound to register the names of all who shall apply to him for registration? It should be remembered that in suits for arrears of rent he would be bound to sue all persons whose names are on his record, and that a rule for registration of names without any limit of number would indefinitely prolong the trial of rent suits and increase the costs of litigation.

Section 20 (1).—The decree mentioned in this clause is evidently a decree for arrears of rent due in respect of a tenure and not any decree for money; the languages should be made clear and unequivocal.

Section 20 (3).—As provided in section 15 (3) a corresponding provision for recovery by the landholder of penalty from the transferee for neglecting to register the transfer or succession should be made.

Section 23 (*a*). The proposal to give ryots holding at fixed rents or rates of rent the privilege mentioned in (*a*) and (*b*) is fraught with incalculable confusion and mischief. If it were provided that the privileges in question would attach to all ryoti holdings which are by virtue of registered contracts protected from enhancement, or which have been declared so by judicial decision, the matter would have been different, but as it is, who is to judge whether a ryoti holding is or is not held at a fixed rent or fixed rate of rent? In 999 suits for enhancement of rent out of every 1,000 the ryots claim their holdings to be protected under Section 4 of the Rent Law. No occupancy ryot would be so unmindful of his own interest as to admit his holding without any sort of struggle to be not protected from enhancement by giving his landlord a right of pre-emption when he wishes to transfer his holding. The effect of the provision under notice would therefore be that with the exception of that inconsiderable number of holdings which have been judicially declared to be not protected from enhancement, all other holdings will be capable of being freely transferred in spite of the landholder. The landholder will have no pre-emption in such cases. He may of course contest by a suit the validity of such transfers, but to what an alarming position would he be drifted if he were called upon without a moment's notice to prove scores, perhaps hundreds, of holdings to be not protected from enhancement? He will not be allowed his own time to decide when he will sue a ryot for enhancement of rent. He must, without any notice, accept a stranger as his ryot, and also give up for ever his right to enhance the rent of a holding, or institute suits to establish his right to enhance with the inevitable prospect of a defeat.

Section 25.—The rights vested in what are called settled ryots are clear infringements of the rights of landholders, and they are as such very objectionable. All the evil effects of these new provisions it is not possible to foresee at once. It is clear that one of the effects of the instantaneous growth of a right of occupancy in a settled ryot in regard to all land let to him would be (see Section 96) to create great uncertainty of title in ryoti land, and therefore to increase litigation to an alarming extent.

Section 26.—This section gives settled ryots rights much larger than those proposed to be given by the original Bill. In joint Hindoo and Mahomedan families, the number of co-sharers, male and female, in a ryoti holding is usually very large, and some of them may be living for years far away from their ancestral homes. The extension of this privilege of a settled ryot to each and every one of them would not only lead to great confusion and conflict of rights to the detriment of the ryots themselves, but it would also be a novel and very objectionable encroachment upon the rights of landholders. Again, clause (6, goes much further than the provision contained in Section 96. In proposing that after a ryot has ceased to hold land in a village as a ryot, he shall continue to be a settled ryot of the village, the clause involves a clear anomaly. A person cannot cease to be a ryot and be a ryot at one and the same time. But Section 96 does not allow the ryot to return to his holding in every case before the expiration of a year. Even if the ryot abandons his residence after the middle of a year and fails to cultivate, &c., the landlord would have a right to enter or let the holding to another. The following clause is still more objectionable: it would lead to results which it is easy to foresee. A ryot may sue to recover possession of land just before the expiry of the period of two years, and the final determination of a suit so instituted may take years, during which time a new ryot, if a settled ryot of the village, has acquired rights and perhaps spent money in making improvements. The proposal to raise a presumption of occupancy in favor of the ryot in every suit or proceeding involves a novel inroad upon the rights of landholders. Nothing is more easy for a ryot than to prove residence in a village or possession of a land for 12 years, not at a remote period but immediately before suit, and yet the Bill proposes to raise an unjust presumption and to throw the burden of proving a negative on the landholder.

If the right of occupancy is to be extended at all, *domicile* and *cultivation* should be made two joint conditions precedent to the acquisition of the right of occupancy instead of mere domicile as in the Bill.

Section 27 (*a*).—The word "village" should be more accurately defined with reference to its fiscal constitution. It frequently happens that the geographical boundaries of a village

contain the lands of a second and third village belonging to a different estate and owner, or separate and defined parts of a village belong to different estates and owners. The definition of the word here given would therefore give as against a proprietor a right of occupancy and that of a settled ryot to persons who had never before held land in the village or estate belonging to that proprietor. This would be an extension of the right which is neither sanctioned by the Secretary of State nor contemplated by the framers of the Bill. Many villages have so grown up as to have combined into one, bearing in such cases a compound of two or three names, and others may do so; some have grown up into towns of considerable size, whereas the principle on which the provision is justified is, that the holdings are contained in the same village or part of a village as is owned by a single proprietor. Clause (*b*) of the section shows this clearly, but with a different object as objectionable as this.

Section 27 (b).—Considering the purposes to which the word estate has been used in subsequent sections, the definition of the word here given is very objectionable. The arbitrary meaning, opposed to the hitherto prevailing acceptation of the term and to its definition in Section 3, attached to the word by this clause, will lead to great confusion, while the inroad into proprietory rights which it involves is great. The effect of this section would be, that a person who has never held any land under A, but who has held land for 12 years under B, perhaps an enemy of A, will be deemed a settled ryot of A's estate, if at any time subsequently to 1853, the two estates formed, or formed part of, a parent estate. Some estates which formerly comprised lands in two or more districts have, subsequently to 1853, been partitioned, but on that very ground this section would deem a ryot of a village in Burdwan a settled ryot of a village in Hooghly, which is more than 60 miles apart, and which he has very likely never seen in his life. The danger of a theoretical rule, conceived in utter ignorance of existing circumstances, could not have been better illustrated. What again would be the effect of the interpretation in question with reference to section 25? It would be simply this, that a person who has held land under a landholder for a few days would acquire a right of occupancy if he had held land for 12 years in a distant estate which once formed a part of the same estate as his. An examination of the nature and origin of estates would show how harmful the proposed definition would be. An estate of the Maharaja of Burdwan is composed of villages scattered in 5 or 6 districts. The Bill certainly distorts the views on this point of the Secretary of State, who evidently refers to partitions of estates in future when he remarks, "It will be necessary in actual legislation to provide that this right is not forfeited by any subdivision of estates and alteration of village boundaries." The bearing of the law in regard to the subdivided estates called Sikmis or Lots, created by Government, will be even more injurious. One great objection to this section, and the portion of the Bill which depends upon it, is that in reality it seeks to give rights to pyecast ryots at the expense of khodecast ryots.

In section 30 the word "lease" should be omitted if the principle that the right of occupancy should not be allowed to grow on domain lands be correct why confine the operation of the principle to cases where there is a lease.

Section 31 (a).—If a raiyat establishes a mart on his land, or sets up a *Surkee* mill upon it, he will not lose his right to the land, because by such act he does not render the land "unfit for the purposes of the tenancy." This is opposed both to existing law and custom. A raiyat should not have it in his power to use the land for other than the purposes for which it was let. Again a raiyat may use the land in a manner which does not render it unfit for the purposes of the tenancy, but nevertheless deteriorates the quality and value of the land. For obvious reasons such deterioration should not be allowed.

Section 31 (d).—In omitting to provide for ejectment for non-payment of rent the Bill takes away a remedy which landholders have not only all along enjoyed, but which is necessary for the recovery of their rents. It would be found on enquiry, if one were made, that in a very small number of cases indeed have the landholders availed themselves of this remedy, and that in a large majority of the cases in which decrees were obtained for ejectment, the lands have been relet to defaulting raiyats after some arrangement for the payment of the arrears have been come to. It is the existence of the remedy which serves as a check to habitual and wilful non-payment of rent, and its absence cannot but give rise to mischief.

Section 31 (f).—This section gives raiyats a right of free sale of occupancy holdings. This would be as unjust to the zemindars as it would be ruinous to the ryots. It deprives the landholder of his right of choosing his own ryots. It requires no great experience of mofussil life to see that the learned Chief Justice is quite right in considering this to be "far from a sentimental grievance." A provision which allows ryots to thrust upon a landholder as his tenants persons who are his avowed enemies, or who are notorious bad characters, and who would therefore in all likelihood create disaffection and combination among his other ryots, place obstacles in the collection of rent, commit breaches of the peace, and sow the seeds of discord among a peaceful community, affects most materially the proprietary rights of the landholders.

Nor are the evils apprehended, or likely to arise from the working of the law, to be confined to the landholder only. The ryot is for certain to suffer from them even more grievously. Whereas now they have permanent tenures which they cannot be deprived of in any way, except by their own default in paying rent, and their sons and grandsons and successors without limit may inherit, and always remain owners of their ancestral fields; under the new law they

will be liable to, and practically will soon be reduced to day-laborers, and their fields will pass to middlemen, thus defeating the primary and professed object of Government, namely to better the condition of the raiyats. Our conviction in this respect is firm, formed as it is by our thorough personal experience of the country and the condition of the poorer classes. Nor is this belief unshared by the governing classes. Mr. Ilbert, when introducing the Bill in adverting to the power of sub-letting, remarked, "The powers of sub-letting which the Bill recognises may in time lead to a state of things in which the great bulk of the actual cultivators would be not occupancy ryots but under-ryots, with but little protection of the law" (page 291). The power of free sale will greatly hasten this consummation. Simple occupancy rights are held by persons who are in a majority of cases very poor, and who have no resources to fall back upon in seasons of agricultural distress. The result of such a rule would be that within a few years the holdings will change hands, a number of middlemen will come into possession of the greater part of the holdings of every village, while the original raiyats themselves, who are believed to be the objects of so much tender solicitude on the part of the Legislature, will be reduced to the condition of day-laborers, or of under-tenants paying rack-rents to their superior holders.

The learned Chief Justice has observed, "that to give a poor population like the Bengal ryots the means of selling or mortgaging their tenures at pleasure is a very certain means of making them improvident. I should have thought that the most effectual way of protecting such people, and preventing them from wasting their substance, would be to secure them a permanent interest in their property, by prohibiting the alienation of it in any shape or way." The truth of these observations have been painfully illustrated in a large number of cases. Whatever may be the custom in some of the eastern districts, the sale of ryoti holdings, even with the consent of the landlord, is very limited in the western districts. It is mostly those holdings in respect to which the right of sale is expressly reserved by a lease that are now and then sold in the western districts; but when the landholder neglects his own interests, or when the proprietor is an infant or a widow, or when by reason of long-continued litigation among the different co-sharers of property, the management is left entirely in the hands of the local agents, it is then that opportunity is taken by money-lenders, traders, and others to buy up ryoti holdings, not for the purposes of cultivation but for letting the lands, in most cases to their vendors themselves, at a large profit. The purchasers become middlemen and the original ryots become korfa or under-tenants with no rights at all, and are placed entirely at the mercy of their superior holders. In the Resolution of His Honour the Lieutenant-Governor on the administration of Sonthal Pergunnahs, dated 21st July 1884, and published in the Supplement to the *Calcutta Gazette*, of 23rd July last, His Honour remarks:—

"The attempts to restrict the transfer of tenancies by cultivators are stated, however, to have been fruitless. On this point the Deputy Commissioner observes that 'the evil has attained such magnitude, and constitutes such a real danger, that nothing short of the extension of the prohibition against transfers prevailing in the Damin-i-Koh to all Sonthal land in the district will now cope with it.' An interesting account of the origin of this practice is given by Mr. Oldham in paragraphs 34—44 of his report. Previous to 1878, sales of land by Sonthals, or by mere cultivators, except in one parganna of the Rajmehal sub-division, were unknown, the reason being apparently that in the Damin-i-Koh transfers were prohibited, while in other parts the cultivators were either mere tenants-at-will, or, if they had rights, could find no purchasers. In the year above mentioned, however, Mr. Boxwell, the then Deputy Commissioner, reported that sales of this kind were taking the place of borrowing. A report was called for; all the old officers who were consulted questioned the correctness of the statement, though admitting that the ryot's credit had increased. On this ground interference was deprecated, but in 1881 and 1882 it become known that these sales had largely taken place, and that in many cases the Sonthals were working as labourers on lands on which they had formerly held rights. "All these changes," writes Mr. Oldham, "due to the suddenly enhanced credit, have occurred in the years since 1876, all distinguished not only by good harvests, but by prices most favourable to the producers. In the present season, when credit is wanted, there is none, and in my recent tour through Hendue and Passai, I was followed by crowds clamouring for the restoration of their lands, and complaining that they could get no advances. * * * Were the buyers fellow tenants, or even proprietors intent on merging tenancies, there would be nothing to be said. But they are not. They are all either Bengali traders and money-lenders from Beerbhoom and Burdwan, or the far more dangerous class, Bhagat traders from Bhojpur. * * * It is impossible to describe their greed for land and their daring in pursuit of it." As a proof of the extent to which these sales have been effected, it is stated in tappa Hendue (about 450 square miles) 10 annas of the Sonthal lands have been sold, and in pargana Passai (about 300 square miles) 12 annas. How much is mortgaged has apparently not been ascertained. The statement of the Deputy Commissioner that in these transactions the purchasers are always Bengali traders or money-lenders from other districts, is not borne out by the returns now before the Lieutenant-Governor from the Registration Department. These returns would seem to show that, though a considerable number of the sales have been made to mahajans and traders, in the great majority of cases the purchasers are ryots in the Sonthal parganas. The figures for 1883-84 are 691 sales to money-lenders, and 1,932 to ryots. The purchases of holdings by the zemindars themselves are very few. But whatever the facts may be as to the persons who by the ryots' tenures, Mr. Rivers Thompson is of opinion that it is of

the utmost importance to the civil administration of the Sonthal parganas that the Sonthalis should retain possession of their lands. The growth of a large class of Sonthali labourers working for interlopers on lands once their own must be checked by every legitimate means as being dangerous to the peace of the country and of benefit only to a few individuals who are actuated in their dealings with the people by mere mercenary motives, and who consequently are the greatest obstacles to the prosperity of the country. The question is, however, one of much difficulty.

* * * * * * * * *

The Lieutenant-Governor is therefore not prepared to issue a rule on the subject until the matter has been fully considered in connection with the larger question which has been raised as to the right of transfer of occupancy holdings under the Bengal Tenancy Bill now before the Legislative Council, upon which a final decision will shortly be made.

It is needless to add that small middlemen are worse than useless factors in Indian social economy, and that as a general rule the ryots of large zemindars are much better off than those under small middlemen. The evil would increase a hundredfold if a right of free sale were given to the ryot. If the present law were left untouched in this respect matters would adapt themselves to local conditions and circumstances. The custom which has grown up in some of the eastern districts has nothing pernicious in it. There the holdings are large, cultivation is mostly carried on by hired labour, and the transfer of the holding causes therefore no change for the worse in the condition of the tenant. The lesson given by the Deccan ryots should be a warning to the extension of the right of free sale to other places. "The saleable value of the land greatly increased the credit of the ryot, and encouraged beyond measure the national habit of borrowing, which I have before observed on."—Secretary to the Government of India, to the Secretary to the Government of Bombay, dated 29th February 1879.

Section 31 (h).—A provision making right of occupancy heritable like other immovable property is objectionable on many grounds. It would lead to minute divisions and subdivisions of the right to an extent wholly undesirable on all economic grounds It would create great confusion in matters relating to registration of names, and place landholders in great difficulty in suits for recovery of rent by reason of the number of persons, who, as heirs under the Hindu or Mahomedan law, may claim a share in the land. The provision on this point in the Rent Law of the N.-W. P. 1873, is much more reasonable. Section 9 provides that "no collateral relative of the deceased who did not then share in the cultivation of his holding shall be entitled to inherit under this section."

Sections 32-36.—The right of pre-emption proposed to be given to landholders on the sale of occupancy rights, is as inappreciable as it would be ineffectual in palliating the wrong done to them by making the right transferable. The right of pre-emption would go for nothing if the ryot chooses to think, it would be preposterous to assume he would do otherwise, that this holding is protected from enhancement, and one therefore which under section 23 is not subject to the landlord's right of pre-emption. If the landholder wishes to assert his right of pre-emption, he must go to court prepared to prove the holding liable to enhancement, or that it is a simple occupancy holding, and *that* within six months from the date of sale, gift or bequest. Nothing would be, however, more easy than for the ryot to defeat the landholder's right of preemption by keeping the transfer a secret from him for a period of six months, after the lapse of which the landlord would have no right or remedy whatever in respect of the transfer. The case would be much worse if the raiyats combine against their landlord at the instigation of a neighbouring and unfriendly landholder, and call upon him to exercise his right of pre-emption at once in respect to a large number of holdings. Few landholders in Bengal have the means of meeting such a call. With rare exceptions therefore they will be placed in such a case at the mercy of their raiyats. In cases of sales in execution of decrees the Bill does not provide for any service of notice of intended sales upon the landlord, but he is expected to make himself cognizant of all such sales and to bid at the sales, a provision which shows further how worthless is the right of pre-emption proposed to be given to landholders. The Bill makes no provision whatever for cases in which one or two of several joint-owners claim jointly or in rivalry to exercise the right of pre-emption in opposition to the wishes of the rest.

There is no pre-emption in cases of gift, a tenant may therefore evade the rule as to pre-emption by making a nominal gift while actually making a sale. The Select Committee in their Report admit this—See para. 21, Select Committee's Report.

Section 37.—The provisions contained in this section involves, in the first place, an inroad upon the rights of landholders. A raiyat will have it in his power to convert himself into a tenure-holder, and thus to evade the provisions as to distraint, and the landholder's right of pre-emption. The proposals are in the crudest possible state. Great uncertainty will arise by reason of the extent of disability by disease or accident being left as a matter for determination by the court. It is moreover indefinite as to whether the converted tenure-holder will lose his right of occupancy as regards the portions of his lands which have not been sub-let, and what rights will accrue to his superior landlord with regard to that portion of the land. Again, the dependence of the provision upon the future enactment of a law of which the vaguest indication has been given in the Bill will leave the section a dead letter for an indefinite period of time.

Section 41.—The restrictions placed by this section upon enhancement of rent are most arbitrary. In none of the Bills previously framed was the maximum limit reduced to less than double the existing rent, and in none did the minimum currency of the enhanced rent exceed ten years, but this section would limit the maximum enhancement to 25 per cent. of the existing rent and extend the minimum currency to fifteen years.

The powers which the Bill proposes to give to the Registering officer in clause 2 of section 41 are very large. No guarantee is given against their abuse. There ought to be a provision made for appeal to the District Registrar and a civil suit as in section 77 of the Registration Act. Supposing there is an enquiry by the Registrar, who is to be saddled with the costs?

Section 42.—When any land comes to the khas possession of the landholder it is usually let to some one of his raiyats. It is in rare cases that a stranger comes to rent the land, or the landholder has the inclination to let it to one whose antecedents are unknown to him. For all practical purposes therefore the landholder's right to let will be materially restricted even in respect to land which we have been accustomed to regard as land over which he has absolute control. He would not be able to rent the land at a higher rent than what was previously paid for it, unless by a registered contract approved by the registering officer, who should see not merely that the contract rent is not more than what the law allows, but also to satisfy himself "that it is fair and equitable, and that the raiyat in entering into it acts as a free agent." The climax of the evil is reached in cases in which the landholder lets out land which has come to his possession by virtue of the right of pre-emption. Payment of the highest price available for the land does not give him an iota of right in excess of that restricted right he would have in respect of land which has come to his possession by relinquishment, forfeiture or death.

Section 43.—The changes proposed to be made on the grounds on which a landlord may sue for enhancement of rent will make matters much worse than at present. The introduction of the words "staple food crops" will place additional difficulties in the way of the landholder, and make enhancement of rent dependent on what the Local Government or of the Board of Revenue may choose to call staple crops. Again, in proposing that the landlord shall not be entitled to increased rent on the ground of improvement of the productive powers of the land, except on proof that such improvement was effected by the landlord, or by fluvial action, the Bill circumscribes the ground on which landholders have been hitherto considered entitled to claim enhancement of rent. There is no reason why the landholder should be deprived of the benefit of all improvements not effected by the agency or at the expense of the ryots. It is a proposal which strikes at the root of their proprietary title.

Section 44.—The arbitrary limit which this section imposes on enhancement of rent is wholly uncalled for. If a ryoti rent is below the prevailing rate of rent, it should, on all equitable grounds, be raised to the limit of that rate. It is difficult to understand why under such circumstances the rent should not be enhanced to more than 8 annas in the rupee.

Sections 45 to 47.—The rules in restriction of enhancement of rent contained in these sections are new and wholly unwarranted. They will simply introduce greater complications than at present in investigations relating to enhancement of rent and make the trial of enhancement suits much more expensive both to the landholder and the raiyat. The infringement of the rights of landholders which these sections involve are great, and in this respect the revised Bill does them much greater injustice than any of the previous Bills.

Section 49.—When a landholder gets a decree for enhancement of rent, it is on the ground that he is entitled to it by reason of the increase in the productive powers of the land, or of a rise in the value of produce as determined by an examination of the produce, or prices, of a number of preceding years. The decree is for what the ryot has been withholding from the zemindar. It is not the case of a poor debtor who is unable to meet the creditor's demand, unless the court allows him to pay the creditor by instalments. The provision for gradual enhancement is therefore unjust and uncalled for. Again, section 169 gives the court a discretion to fix the date from which a decree for enhancement shall take effect. The two provisions taken together will give the courts a power to render any decree of enhancement abortive. Progressive rents are necessary only with regard to waste and jungle lands, which cannot be cultivated all at once.

Section 53.—Payment of rent in kind is a method of payment which saves the raiyat the trouble and expense of taking his produce to the market, and of contesting the zemindar's claim for enhancement of rent, while it saves the latter the trouble and expense of periodically asserting and proving his claim to enhanced rent. It is a self-regulating system which adjusts itself to the variations in the price of produce, and one therefore which is best fitted to give to each of the interested parties his just rights without the interference of laws and courts, and is on that account eminently deserving the support and fostering care of Government. To use the words of a Government Settlement Officer, "It gives the landlord a fair profit in any improvement he may make; the rents are self-adjusting; the tenant is not driven into debt to meet a fixed demand; if he borrows, he borrows from his landlord, a less exacting creditor than the village banker; a feeling of mutual inter-dependence and self-interest is created between landlord and tenant; the former is more than a mere rent-collector, his own prosperity depends on that of the cultivator.

The ultimate loss to the zemindars, if such commutation were allowed, would be in other

respects very heavy. After the rent has been commuted into money-rent, the raiyat need only reliquish the holding, and he or his neighbours would be able to compel the landholder to re-let the land at what the court will consider to be a fair and equitable rent. Payments in kind also secure to poor landholders their requisite supply of food grain for consumption throughout the year, and it would be a source of great inconvenience and hardship to them if the raiyat be allowed to change them into money-rent at his pleasure. It should, moreover, be recollected that it is in respect of lands, which are more than ordinarily subject to the risks of cultivation, and which the raiyats do not venture to take at a fixed annual money-rent, that rent is paid in kind. Our legislators should think twice before they recommend a change which may ultimately injure those most for whose benefit they now wish it. It should also be borne in mind that in the two districts of Behar where bhowly rent obtains to a large extent, the cultivation of land is carried on, on the co-operative system. Both in Patna and Gya the cultivation of land mainly depends on the landholder. It is with his money that embankments must be raised and maintained, and it is with his money that *pynes*, or water-courses, must be cut and kept clear, before the land can be cultivated. The raiyats are altogether powerless to execute and maintain these works, and any measure which would throw the entire responsibility of cultivation on them would be their ruin.

Section 59.—Suppose a non-occupancy raiyat holds a lease for 11½ years, a notice is to be given on the 11th year of the lease, and he is sued for ejectment on the 12th year. When a right of occupancy has accrued, he becomes thus an occupancy tenant by force of legislation.

Sections 55—61.—In the face of the great anxiety expressed by the Secretary of State that the principle which allows no right of occupancy to accrue except by possession for 12 years should not be abandoned, and his emphatic declaration that he attached great importance to it, this chapter proposes to give raiyats who have admittedly no right of occupancy, as good a right as that created by Act X of 1859, if not one much more damaging to the landholder. The rent of such a raiyat cannot be raised at the will and pleasure of the landholder; he cannot be ejected, except for breach of a condition of a written contract; his rent cannot be enhanced without a notice having been previously served upon him and a decree having been obtained against him, and the measure of enhancement must be determined by court. These are rights much greater than what an occupancy raiyat enjoys at present. The whole of this chapter, trenches most injuriously on the rights of landholders.

Sections 62 & 63.—These rules relating to under-raiyats are altogether new. It is not difficult to foresee that the operation of these rules will bring on great confusion regarding the rights of under-ryots of different grades.

Section 64 (2).—This rule of presumption has placed the zemindars at a great disadvantage, and they have complained of it most bitterly. Sir Richard Garth truly observes that "this section has undoubtedly operated very unjustly against the landholders;" and further on—"But in the case of rent it might well be that for 20 years no ground for enhancing it had ever occurred; or from the fact of the landlord being a minor, or female or over lenient with his tenants, any opportunity for enhancement might not have been taken advantage of, and in such cases it would be hard to presume against the landlord that because the rent had not been enhanced for 20 years, it has been fixed from the time of the Permanent Settlement." The experience of the last 24 years has shown that in 95 per cent. of suits for enhancement of rent landlords were unable to rebut the presumption thus raised, and how could they? Those who have come into possession of estates and taluks by purchases at sales for arrears of revenue, or rent, or in execution of decrees, did not get a scrap of paper belonging to the former proprietors, while those who purchased at private sales were in no better plight, considering the great difficulty of preserving from white ants and other causes of destruction, massive collection papers of a period more than 30 or 40 years old. It is impossible therefore for landholders to adduce evidence, except in rare cases, to rebut the presumption, and it was this consideration which induced Mr. Reynolds to suggest an amendment to the effect that no such presumption should be raised unless the ryot succeeded in proving uniform payment from 1839, *i.e.*, 20 years before the date of the passing of Act X of 1859, which for the first time enacted the rule. The observations made by Mr. Reynolds in support of the change are unexceptionable. "Allowing all due weight to the arguments of the Commission, it is to be remembered," he said, "that the presumption was first introduced by Act X of 1859, and that it was then necessary for the tenant to prove a uniform rate from 1839. It is now only necessary to prove such uniform payment from 1861. As there is reason to think that rent receipts have been much more regularly given, and much more carefully preserved, during the last 20 years, than during the 20 years which preceded then, it seems to follow that the lapse of time has made it more and more easy to raise the presumption, and more and more difficult to rebut it. Nor can it be denied that auction purchasers labor under a special grievance in this matter. If it be said that they may be expected to regulate their bids accordingly, it may be replied that it is not for the public interest that estates should sell below their value on the ground that the circumstances of the sale facilitate the advancement of fraudulent claims by the tenant." It behoves the Legislature to enquire how very easy it is for raiyats with the aid and connivance of former talukdars and their gomastas to produce rent receipts showing uniform payment for 20 years. The injustice of the rule of presumption is clear from the fact that Government with all its prestige and resources wish to keep clear of it in respect of temporarily settled estates. The exception which section 20 of the Bill makes with reference to such estates

proves beyond all manner of doubt the necessity of a change of the law for the behoof of the landholders. The remarks made by Mr. Reynolds on this head are conclusive. He says, "The exception in the case of tenures in an estate not permanently settled is stigmatized by Babu Joykissen Mookerjee as an invidious distinction which shows the injustice perpetrated on the holders of permanently settled estates. A little consideration will show that the exception is perfectly reasonable."

Section 64 (3).—The money value of rent in kind varies in different years with the price of agricultural produce. Payments in kind cannot therefore be reckoned as uniform payments of rent. The effect of this section would, therefore, be to extend the rule of presumption to cases where there has admittedly been no uniform payment of rent. This would be most objectionable. It would in that case be in the power of every ryot to prevent enhancement of rent on the ground of a rise in the value of produce which payments in kind secure to the landholder.

Section 67.—Such a variety of objections have lately been taken in the trial of rent-suits as to the instalments by which rent is payable, and so many capricious decisions have been passed on the subject, that some simple rule on the subject has become very desirable; instead of that, however, the Bill would make matters worse. In the case of tenure-holders the Bill would give free scope in the first instance to the terms of any agreement between the parties, then to custom, and lastly to such rules as may be framed on the subject by the Government. In the case of a large majority of the ryots, *viz.*, the occupancy ryots, the Bill provides that the number of instalments should on no account exceed four. It is a fact borne out by the Regulations that Government revenue was formerly collected in monthly instalments, subject to a penalty of 25 per cent. for default. By the custom of the country, the rents of ryots are even now collected by monthly instalments, and all the leases evidencing creation of tenures, putni and other, contain stipulations for monthly payments. A reduction of the number of kists would therefore be unjust to the zemindars and tenure-holders. Mr. Reynolds' Bill effected a compromise in the matter. He proposed in his Bill to fix only four instalments, the date of each of which was timed just one month before the dates on which the four instalments of Government revenue are payable. A definite rule like this would be much simpler and more conducive to peace and harmony than a procedure which is sure to cause useless trouble and expense to suitors.

Section 68.—The proviso to this section is new, and it proposes a mode of payment of rent which is wholly unjustifiable. A Postal money order does not state anything beyond the amount and the names of the sender and payee. How is the landlord to ascertain for what year the rent is paid, whether it includes the cesses and interest, and for which holding the rent is paid, supposing the sender to have more than one holding in his possession?

Section 69.—This section ignores a long established practice. It offers a direct incentive to arrears accumulating, so that after the lapse of the statutory period of three years, the ryot may wash himself clean of all liability to arrears. On the other hand, it compels the landholder to resort to the civil court for every default, without showing any consideration to his tenant. In fact it is a premium on hard-heartedness and discount on mercy. A zemindar should unquestionably have the right of crediting payments of rent to the account of arrears, if there be any, and the ryot should have no right to demand that it should be credited to a particular year and instalment if the rent of previous years be in arrears. The rule in question being opposed to the established practice should be omitted.

The compulsory specification of area in rent receipts, which is evidently contemplated in this section (*vide* Form in Schedule 11), will operate as a great hardship in cases where the landlord has never measured his estate, or has not measured it recently, and ryots have encroached on waste lands and thus increased the size of their holdings, as also in cases in which the parties are at issue as regards the area of land comprised in a holding.

Section 70.—In providing for receipts for rent by the landlord, the Bill evidently means receipts by his authorised agents. It would be well, however, if the meaning be made clear. The amount of rent and the amount of arrears would be shown in the annual account. Why then require them to be repeated every time the rent would be paid? It should be also borne in mind that in the case of *ut-bandi* and some other tenures, the annual rent payable on account of a land is not determined till at the close of the year when the land is measured and the crop on it valued. If the introduction of any change be at all desirable, the Legislature should see whether the *hatchita* system may not be introduced for the purpose of evidencing payments of rents. It has several considerations to recommend it. But whatever the form of the receipt that might be adopted, it is necessary in the interests of both the parties that the counterfoil of each receipt should be signed by the ryot.

Sections 73-76.—A ryot is at present allowed to deposit rent in court on his verified statement to the effect that the landholder's agent has refused to receive the amount tendered to him and that the amount is all that is due by the ryot up to the date of deposit. Nothing can be more reasonable than this provision. The Bill, however, proposes changes in the matter of deposit of rent which are unjust to the landholders, and quite uncalled for by the circumstances of the case. It proposes to allow deposits of rent to be made if the ryot has reason to believe (without an actual tender) that his rent would not be accepted; or if he is unable to obtain a joint receipt from all the co-sharers of a property, or if he entertains a *bonâ fide* doubt as to who is entitled to receive the rent. The Bill would therefore make the ryot the

judge of his landlord's title and of his inmost intentions. It would give the ryot the power to convert the office of the Collector or such other officer as may be appointed in this behalf into his landlord's kutchery, and to compel his landlord to bring an expensive suit to establish his title against any person of the street who the ryot may choose to think has a rival title in the property. The proposition is so opposed to all recognised principles of law and so dangerous in its effects, that in providing for inter-pleader suits by stake-holders the Code of Civil Procedure has expressly excluded (section 474) tenants from the category of persons, who, as stake-holders, may compel rival claimants to interplead in a suit in court. The immediate effect of this would be to empower the officer to assume the functions of a Civil Court, and adjudicate in an informal but quite effective manner regarding rights to one's property on the issue of a few rupees, and put the actual possessor out of possession on the alleged right of third parties. The Bill, moreover, would give a ryot much greater rights than what the Procedure Code gives to any other stake-holder. It would save the ryot from the expenses of a suit, but allow him to compel his landlord to plunge into an expensive and, in most cases, fruitless litigation. Provisions like these are calculated simply to breed ill-feeling, create animosity, harass both the interested parties, and give rise to endless litigation.

The provision for the service of notice on landholders is anything but satisfactory. In most cases no personal notice would be served, and the landholder, however poor he may be, and the great bulk of them are poor, is expected to have an agent always present at all the Revenue offices of the district, to inform himself of the fact of deposit by any ryot from the notification required to be affixed at the Revenue office. The provision for payment of the amount deposited is equally objectionable. The Revenue officer may pay the amount to any person he thinks entitled to get it, and then the party aggrieved may recover the amount by a regular suit. In matters like these, in which the rights of parties are not involved, and in which legislation may go a great way to foster good feeling between the parties, a provision which will unnecessarily set class against class is wholly unwarrantable. The present law relating to deposit of rent is about as good as a law can be. If a time be fixed within which notice of deposit should be served on the landholder, and if a provision be made for the transmission of the money by a Postal money order to the landholder, all the improvement that it needs will have been made. The party depositing should be made responsible for due service of notice to the party or parties who are believed to be entitled to the money.

Section 78, Clause 3.—The present law prescribes 15 days only, no case has been made out for the extension of the statutory indulgence. Under any circumstances, the record of reasons should be made obligatory, and there should be a provision for appeal.

Section 79.—The introduction of evidence of usage for determining rates of interest on arrears of rent would prove simply harassing to the parties, and the proposal that interest shall not run until after the expiration of a year is anything but just. The present law on the subject is equitable and should be retained.

Section 85.—Both Sir G. Campbell and Major Baring classed some so-called impositions under the head of abwabs, or illegal cesses, which are no abwabs at all. The salamies, for instance, which a landholder gets from a ryot for making excavations and taking earth for making bricks, for hewing trees, for excavating fish-ponds, &c., are not impositions in any sense of the term, but consideration money for special privileges, which he is entitled to exact on every equitable ground. These acts of the ryot [illegible] deteriorate the letting value of the land, and are therefore such as landholders are [illegible] lawfully entitled to receive compensation for. Such salami or compensation land[illegible]holders have in several cases recovered by suits in court. Indeed, the words *abwab* [illegible] and *mathut* used in the section would not have covered them at all, but from the [illegible] fact of some such payments being made annually or at recurring periods, or so long as the special advantages are enjoyed; and because the concluding part of the section declares all additions to the actual rent to be illegal, and the next section imposes a heavy penalty. It cannot and should not be the intention of Government to prohibit special charges for special benefits; and it is necessary therefore that the term abwab should be clearly defined and exceptions should be expressly made with regard to such compensatory charges. In several places the imposition of abwabs has taken the place, and superseded the necessity, of enhancement of rent. It is in fact a moral adjustment of rent in consequence of the increased value of produce, and is in that light not so objectionable as it is supposed to be. In many cases it is only a rate added to rent at so much per rupee, and distinguished from the previous rent by a special designation. It is unquestionable that ryots agree to pay these cesses much more readily than enhanced rent. The cry against them arose at a time when it was necessary for fiscal purposes to ascertain the actual collections of the landholders, and is simply meaningless at the present moment. Nay, the prejudice against these moderate increments to rent prevent their being consolidated into *neat* sums which would be so much the more convenient to discuss about in Courts of Justice. The only other remark which need be made with reference to this subject is, that our legislators are evidently ignorant of the fact that what is called the mathut is a village fund raised by ryots for their own behoof, and not a fund raised by the landholder for his own benefit. The fund is made up of small contributions from all the ryots of a village, and is spent under the direction of the Punchayet or committee of Mundles of the village in churruck or other poojahs, in paying annual perquisites to the police, in village festivities, &c.

Sections 87-94.—The power which these sections give to ryots, not having a right of occupancy, of building houses and out-offices on the land without the permission of their

landlords, of compelling their landlords to make improvements, and of making the improvements themselves on default of their landlords, is inconsistent with the very notion of a tenancy. The provisions for the award of compensation for improvements made by ryots are altogether foreign to this country. Improvements are rarely made by ryots. Nothing is more true than what fell from His Excellency the Viceroy on the subject in the course of the debate on the Central Provinces Tenancy Bill. All these provisions should therefore be omitted. These sections provide for the award of compensation to ryots for improvements made by them. In most cases the amount of outlay would be more than repaid by the advantages which the ryots would enjoy by reason of such improvements, and it would in such cases be unreasonable to give them any compensation for exhausted improvements. The limitation prescribed in this respect by the Rent Commission was an equitable one. They suggested that no compensation should be awarded after a certain number of years from the making of the improvement.

Section 96.—This section provides that a ryot must cease to hold land for the full period of one year before his title to the land expires. In the meantime the land will remain fallow, and the landholder will have no security whatever for his rent. Very often pyecast ryots who wish to relinquish their holdings simply absent themselves during the cultivating season, and such absence is reckoned as an act of relinquishment without a regular petition to that effect. It would not be at all unreasonable if it were held that a ryot's title would cease by his absenting himself from the village up to the end of the cultivating season, without making any provision for the payment of the rent payable by him. By the Central Provinces Act an absence of 30 days operates to extinguish the ryot's title.

Section 97.—The section as it is does not cover cases of transfer by fractional shareholders of a holding. The words "a fractional share of the holding or" should be added after the word "landlord" in the fifth line.

Section 100.—This section provides for cases in which a ryot occupying a land refuses to attend the measurement and point out the boundaries, but the Bill takes no notice whatever of the important class of cases provided for by the present law, in which the landholder, usually a new purchaser, is unable to ascertain the names of the ryots or persons who are in possession of particular holdings in his estate. In such cases a landholder is placed in a situation which entitles him to as much help from a public officer as in any other. It is a situation which purchasers of estates and tenures at auction-sales are frequently placed in. The Bill should provide for such cases, as well as impose penalties for determined attempts on the part of the ryots to thwart the Collector's attempt at a measurement of the land, as provided for by Section 10 of Act VI of 1862, B. C.

Sections 102-109.—A provision which gives the owner of a minute fractional share in a property, or a single ryot the right of applying to the District Judge for taking it out of the hands of the proprietors thereof and placing it in charge of a joint manager, would be productive of very great mischief. Such an interference with the rights of private property can be justified only on the ground of public good, which certainly does not mean that if certain tenants of a locality who happen to be opposed to their landlord in questions of private property, and it is only in exceptional cases, as when mismanagement of the zemindar interfered with the well-being of third parties—that is, parties other than landlord or tenant—that a District Judge should be empowered to appoint such a manager, but a provision empowering him to do it whenever a dozen ryots choose to allege that such a course would lead to public convenience, or the owner of $\frac{1}{16}$th share represents that it would conduce to his benefit, would be a most unwarrantable and officious piece of legislative interference with private property. The most objectionable feature of the law is the power it virtually gives to the Judge to adjudicate questions concerning possession in an indirect manner and without due precaution. The proviso attached to the section is intended to serve as a safeguard, but as in all disputes of the kind the real contention will be about possession, either the law must fail, or the Judge must take up the question of possession in an indirect manner. Much of the objectionable character of this provision would be removed if it were provided that no joint manager should be appointed, unless the owners of more than half the share of the property apply for the same, while upon this subject it may be mentioned that interference of this kind on the part of Government has not been wholesome in the N.-W. Provinces. There the Government makes the coparceners to elect a hereditary lumbardar, and it is now found that the heirs of this common manager having become numerous, the old state of disorder has revived. In Bengal the separation of shares and partition of estates which prevail will, on consideration, be found to be the natural and best solution of the difficulty.

Section 110.—For obvious reasons no record of rights should be undertaken in any tract of country on the application of landholders and ryots. The first ground laid down in sub-section 2 (*a*) of this section should therefore be omitted. If it were allowed to stand, it would be in the power of the ryots of any village to ruin their landlord by compelling him to meet all at once their claims to fixity of tenures and fixity of rents, and such other rights as they might choose to claim.

The whole of the provisions with regard to the framing of a record of rights is open to the gravest objection. The machinery available to Government, namely the agency of the Revenue Officers, is obviously inadequate for the satisfactory discharge of so difficult a task.

It should be remembered that that task is no less than that of adjudicating upon the status and rights of all tenants in a given area, and this will involve judicial investigations for which very few Deputy Collectors would be qualified. The experiment was tried in the Sonthal Pergunnahs under Regulation III of 1872, and it miserably failed. That Regulation was called the settlement Regulation, and it was justly observed that it unsettled everything.

Sections 123-134.—The first attempt made since 1793 to regulate enhancement of rent by the enactment of definite rules has failed, and it requiries no great foresight to see that the elaborate rules laid down in the Bill for the preparation of tables of rates would make matters much worse. It is anything but reasonable to expect public officers wholly ignorant of the conditions of the people, of the nature of the soil, of the different kinds of crops, and of the agricultural capabilities of a village, would ever succeed in fixing proper rates of rent for different classes of land. They must err on one side or the other. Did not our judicial officers make confusion worse confounded by decreeing (before they ceased to decree any rates at all) a variety of rates for the same class of land in a village? The most feasible way of meeting the difficulty appears to be the legal recognition of the indigenous system of the country. Let the preparation of a table of rates for each village be entrusted to a punchayet consisting of a number of mandals on one side and the zemindar's gomashta of the village on the other, and some provision made for cases of difference of opinion. A table or jamabundee so prepared would be more satisfactory to the parties concerned than any table prepared by a public officer, and all the trouble, expense and loss of time to the detriment of cultivation which it involves, would be avoided.

A provision for the payment by zemindars and ryots of the costs of preparation of a table of rates, including the salaries and portions of salaries of officers employed in the work, is under the circumstances unjust and unwarrantable. A suitor paying high institution and other fees is entitled to have his suit tried and decided, otherwise the salaries of Judges and Munsiffs may, with equal justice, be made payable by him in addition to what he pays by way of institution and process-fees. The payment of the cost of preparation of tables of rates would not relieve suitors of the costs of suit. After they have paid for the preparation of tables of rates, they would have to pay the costs of suit all the same. Again, after a table of rates have been prepared at an enormous cost, what use will it come to? In the adjudication of suits for enhancement of rent the Court is required by section 134 not to rely solely on the table, but to adjudge the rate of enhancement on a variety of considerations. The condition of the land, the changes made in it, the persons by whom the changes were made, and the proportion of cost incurred by each contending party in making the change, would have to be enquired into, and latitude should also be given to custom and contract to vary the rates mentioned in the table. The great difficulty which officers would experience in preparing correct tables of rates, the enormous expenditure which the work would entail, the double costs which the procedure would throw on landholders and ryots, and the little practical use the table will come to in suits for enhancement of rent, are all considerations against the feasibility of this ill-judged measure.

Section 138.—The application of the 12 years' rule to domain lands as provided for in clause I (*a*), section 138, is unjust. The landlord is the owner,—why should it be presnmed that land is ryoti till the contrary is shewn, and this presumption is sought to be legislatively created by sub-section 2, section 138.

Sections 139-158.—Distraint of crops for the realization of rents is an indigenous institution of the remotest antiquity. It enables the landholder to collect his rents by the agency of his permanent establishment, without adding in the least to his own expenses, or saddling any cost on the ryot. It prevents the ryots on the other hand from cheating their landlords of their just rents, and in so far acts as a check to fraud and improvidence. If in some cases the power has been abused, the fact is so easy to prove, and the penalties for offences committed in connection with it are so heavy, that the law might be left safely to vindicate itself. In Bengal at least, cases of abuse of the power of distraint have been very exceptional. It was the majority of the members of the Rent Commission who, labouring under an error, assumed the institution to be an offset of the English law, and suggested a radical modification of it on purely theoretical grounds. The framers of the present Bill have improved upon the alterations in the law suggested by the Rent Commission, and drafted, under the head of distraint, a number of provisions which not only bear no resemblance to the institution of distraint, and amounts practically to a total abolition of the law of distraint, but actually deprives the landholder of even some of the rights which an ordinary creditor enjoys under the law of the land. Distraint has always been understood to be an act of a landlord as distinguished from attachment which must be act of a constituted authority. But the Bill provides that if a landholder wishes the crops of a ryot to be distrained for recovery of his rent, he must make an application to Court for the purpose; that such an application must contain all the particulars required for plaints, if not more; that it should be signed and verified like a plaint; that the amount of arrears should be proved as in suit for arrears of rent; that the Court may then either admit or reject the application; and that, if admitted, an officer of the Court would be deputed to distrain the crops. Where, in the first place, is the necessity of laying down all these elaborate provisions when it is open to the landholder to have, like any other plaintiff, the crops of a defaulting ryot attached before judgment under section 483 of the Code of Civil Procedure, immediately after bringing a suit for recovery of rent? What facility would the

Tenancy Act give the landholder over the ordinary procedure of Civil Courts when he would have to pay the Court-fee, adduce evidence, and pay the expenses of attachment all the same? What inducement would there be to the landholder to apply for such an attachment in regard to a poor ryot paying a small rent, when the cost of suits and attachment are likely to eat up the whole value of the crops? What would the officer of Court attach after all costs have been incurred, if the ryot has removed or sold the crops in the meantime, and of what benefit would these provisions be to any ryot who would be thus unnecessarily saddled with a large amount of costs? Consistently with the other provisions under this head, the Bill provides for heavy penalties and punishments for certain acts in connection with attachment of crops. But why should any penalties be at all imposed beyond what the ordinary law provides for attachments made by order of the Court, by an officer of the Court, and after proof to the satisfaction of the Court of the justice of the claim?

The primary object of an amendment of the rent law, according to the repeated promise of the Bengal Government, was to provide facilities to landholders for the realisation of rent, and the section under notice deprives them of one of the important facilities they now possess, without supplying them with any substitute whatever.

Section 168.—As regards rent-suits, it is a great mistake to suppose that suits for small amounts are of no moment. They form the largest number of suits in the Courts, and they are often suits of great importance. In suits in which the amount of rent annually payable by a ryot is in dispute, the High Court has held that no appeal lies to that Court, inasmuch as no question of title is involved, although the point adjudicated affects matters which in reality give rise to a constantly recurring cause of action. In such cases an appeal should be allowed in the interests of both parties, and the proposal to make the decision of the first Court final in suits of the kind for sums not exceeding Rs. 50 should be abandoned.

Section 169.—This section gives the Court a discretion to fix the date from which a decree for enhancement of rent should take effect. The Bill provides for so many and so divers limitations in the way of enhancement of rent, that it would be a matter of great difficulty to a landholder to get enhanced rent. Why unnecessarily increase the difficulty by giving the Court an arbitrary discretion which will place an additional obstacle in his way? Were it the policy of Government to prohibit enhancement, the various provisions in question would practically carry it into effect without such policy being openly declared; but as we believe such is not the case, we consider the difficulties thrown in the way of enhancement are, as they would practically make it, not worth the while to seek it by reason of the trouble, annoyance and heavy cost, unsound on economic grounds and unfair towards the landholders, who have the right of protection in common with all other classes of the community.

Section 171 enormously increases the difficulty in the way of the landlord. If ejectment is to be obtained by proceedings in court, why should not the tenant be forewarned, and why should he not avoid sowing or manuring land the subject-matter of ejectment?

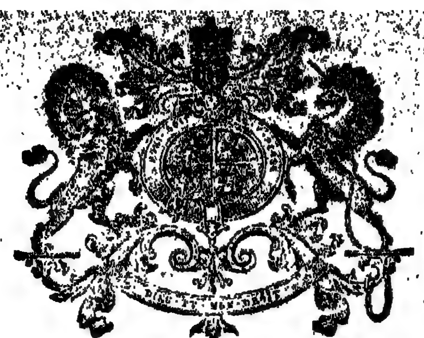
Section 172, Clause 2.—This clause practically neutralizes the provision as to the right of re-entry and renders it valueless. An investigation by a Revenue Officer will be a ruinous thing.

Section 176.—This section is very objectionable. It is an encroachment on the rights of auction purchasers at sales for arrears of rent which they have all along enjoyed. The effect of item (*e*) would be to deprive the purchaser of the right of avoiding a mookuraree or other permanent lease created by the defaulting tenant. Such a provision is opposed to the fundamental principles which regulates sales for arrears of rent, *viz.*, that they restore the tenure to the condition in which it was at the time of creation, and give it to the purchasers free of all incumbrances created by the out-going tenant. Section 66, Act VIII of 1869 provides for the sale of tenures free of all such incumbrances. The proposition is also one which would give rise to fraud and litigation, inasmuch as every defaulting tenant will try to make the best of their incumbency by creating mookuraree leases in favour of relatives and dependants.

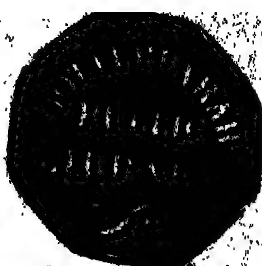
Section 180.—The provision for the sale of tenures for arrears of rent subject to registered incumbrances in the first place, and then if necessary, free of such incumbrances, would simply increase the costs of litigation which will ultimately fall on the ryot, deter intending purchasers from bidding at sales, lead to inadequate prices being offered for the tenures, and thus cause material injury at every step both to the landholders and the ryot. The scale should always be, as at present, free from all incumbrances.

Section 210.—The provision against freedom of contract in respect to the accrual and to the incidents of the right of occupancy is indefensible on all grounds, rational and economical. The ryot is a free agent in all other concerns of life. He may sub-let his lands at any rent, however small; he may borrow money at a ruinous rate of interest; he may relinquish, mortgage, or sell whenever he pleases, and convert himself into a day-labourer; but he must not consent to forget the acquisition of right of occupancy even in regard to land which he requires for temporary purposes, or to pay enhanced rent to his landlord at a rate which he has not the least disinclination to pay. The ryots are unquestionably a much more intelligent class of men

than day-labourers; but although the latter are free to contract away their liberties for service in an unknown land for years, the freedom of the former must be restricted, in the opinion of our legislators, in matters in which they are the best judges of their own interests. The result of such a restriction would be that landholders would not come to terms with ryots who will fail to compensate by payment of *salamy*, or otherwise his loss in rent, and let out the land to those who would be able to do so. The poorer portion of the ryots would thus be turned into labourers. It is freedom of contract alone which can rescue them from serfdom. The argument drawn from section 58 of Regulation VIII of 1793 in support of the proposed restriction is at best fallacious. That section required the form only of the potta to be submitted for approval once for all, and let the adjustment of the conditions, terms and details to the parties concerned. Section 56 of that Regulation clearly shows that no sort of restriction whatever was intended to be placed in the way of the contracting parties.



The objections to the restrictions to freedom of contract apply with double force to contracts relating to rent which the contracting parties with an eye to their own interests will enter into. Whenever a ryot agrees to pay a certain amount of rent for a plot or plots of land, he does so after taking into consideration the situation and capabilities of the land and the profits it or they will fetch him. He is the best judge of his own interests in the matter; he has his remedy in all cases in which the least coercion has been used, and yet this section restricts his rights as a free agent and makes the registering officer the guardian of his interests. But will any amount of legislative precaution prevent the parties from entering into any contract for rent they might agree upon? The futility of such attempts was made abundantly clear by the experience of the usuary laws. The result of such a law would be that honest zemindars would suffer, while those whose exorbitant demands for rent it is intended to limit would be able to carry everything in their own way.



Sections 194-208, 13, 14, Schedule.—The attempt to incorporate in the proposed Act the law relating to putni tenures should be abandoned. These sections should therefore be omitted. The present law on the subject is a masterpiece of legislative wisdom. It has stood the test of experience for more than 60 years, and has always been found to be a complete and satisfactory law on the subject.

In section 224, provision should be made for giving opportunities to representatives of landed interests to be heard before rules are framed.

Section 228.—The proposal to exempt Khasmehals and Wards' estates from the operation of the proposed law is anything but reasonable. It is but only fair that the rights of all tenure-holders and ryots should be regulated by one code of laws. Nothing would create a greater confidence in the minds of the people in the justness of an Act defining the rights and obligations of landlords and tenants than the fact that it applies equally to Government as landlord and to private landlords. There is no difference in the position and character of the subordinate agency employed by Government and by private landlords in the collection of rent and management of estates, and yet the State has secured to itself a special and summary procedure for the recovery of rent. In the matter of rights and obligations relating to land, however, the people have a right to expect that there should not be one law for private landlords, and another for the strongest and most irresponsible of landholders—the State.

PART IV.

Acts of the Governor General's Council assented to by the Governor General.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

[Third publication]

The following Act of the Governor General of India in Council received the assent of His Excellency the Governor General on the 3rd October, 1881, and is hereby promulgated for general information :—

ACT No. XVI OF 1881.

An Act to provide more effectually for the suppression of certain forms of Gaming in British Burma.

WHEREAS it is expedient to provide more effectually for the suppression of certain forms of gaming in British Burma; It is hereby enacted as follows :—

Short title, extent and commencement.

1. *(1)* This Act may be called the Burma Gaming Act, 1881.

(2) It extends to all the territories for the time being under the administration of the Chief Commissioner of British Burma; and

(3) It shall come into force at once.

Application of Act III of 1867 to game of *ti* and like games.

2. *(1)* Taking part in the game of "*ti*," or in any other game or pretended game of a like nature, shall be deemed gaming and playing within the meaning of Act III of 1867.

(2) Every house, walled enclosure, room or place, whether public or private, where any such game or pretended game is carried on, shall, for the purposes of that Act, be deemed a common gaming-house, and all expressions referring to the use of any such house, enclosure, room or place as a common gaming-house shall include the use thereof for any such game or pretended game on a single occasion.

(3) All boxes, receptacles, lists, papers, tickets and forms used for the purpose of any such game or pretended game shall be deemed instruments of gaming within the meaning of the said Act.

Penalty on conducting game of *ti* and like games.

3. Whoever conducts or assists in conducting the game of "*ti*" or any other game or pretended game of a like nature, as manager, stakeholder or *daing*, or who is according to the rules of the game or pretended game entitled to receive the surplus proceeds, or any part of the surplus proceeds, of the stakes, after deducting the amount payable to the successful player or players, or who promotes the game or pretended game by soliciting or collecting stakes or otherwise, shall be punished with imprisonment for a term which may for a first offence extend to six months, and for a subsequent offence to two years, or with fine, or with both.

Power to extend local application of Act III of 1867 within British Burma.

4. *(1)* The Chief Commissioner may, from time to time, by notification published in the official Gazette, extend to the whole or any part of the territories for the time being under his administration any such of the provisions of Act III of 1867 as do not for the time being extend thereto.

(2) From the date of any such extension so much of any rule having the force of law in operation in the territories to which the extension is made as is inconsistent with or repugnant to any provision so extended shall cease to have effect in those territories.

Power to invest 2nd class Magistrate with powers under Act III of 1867, section 5.

5. The Local Government may authorize any Magistrate of the second class to exercise the powers conferred by section 5 of Act III of 1867 on the Magistrate of the District.

Amendment of Act III of 1867, section 13.

6. In section 13 of Act III of 1867—

(*a*) for the words "public street, place or thoroughfare," where they first occur, the words "street or thoroughfare or place to which the public have access" shall be substituted, and

(*b*) in the last clause, for the words "such public place" the words "such place" shall be substituted.

7. A police-officer may arrest without warrant any person soliciting or collecting stakes for the game of *ti*, or any other game or pretended game of a like nature, in any street or thoroughfare or place to which the public have access.

Power to arrest without warrant.

8. Whenever a District Magistrate, Sub-divisional Magistrate or, when he is specially empowered in this behalf by the Local Government, a Magistrate of the first class receives information that any person within the local limits of his jurisdiction earns his livelihood, wholly or in part, by carrying on, or assisting in carrying on, the game of *ti*, or any other game or pretended game of a like nature, he may deal with such person as nearly as may be as if the information received about him were of the description mentioned in section 110 of the Code of Criminal Procedure; and for the purposes of any proceeding under this section the fact that a person earns his livelihood as aforesaid may be proved by evidence of general repute or otherwise.

Power to demand security.

19. Notification of appointments, &c.

Conduct of Business.

20. Time for holding meetings.
21. Ordinary and special meetings.
22. Quorum.
23. Chairman of meeting.
24. Vote of majority decisive.
25. Resolutions to be recorded and published.
26. Language of committee.
27. Power to make rules as to conduct of business.
28. Extraordinary powers of president and vice-president in case of emergency.

Joint Committees.

29. Joint committee of two or more committees or cantonment authorities.

Defects in Constitution and Irregularities.

30. Vacancies and irregularities not to invalidate proceedings.

Officers and Servants.

31. Appointment of secretary.
32. Employment of other officers and servants.
33. Power to prevent extravagance in establishments.
34. Pensions of Government officials serving the committee.
35. Pensions of other officers and servants.

Contracts and Transfers of Property.

36. Mode of executing contracts and transfers.
37. Penalty on member, officer or servant of committee being interested in contract made with committee.

Acquisiiton of Land.

38. Acquisition of land under Act X of 1870.

Privileges and Liabilities.

39. Suits against committee and its officers.
40. Liability for loss, waste or misapplication.

CHAPTER IV.

TAXATION.

General Provisions.

SECTIONS.

41. Taxes which may be imposed for general purposes of Act.
42. Water-tax.
43. Lighting-tax.
44. Scavenging-tax.
45. Procedure in imposing such taxes.
46. Power to abolish or reduce tax.
47. Power to Local Government to suspend levy of tax.
48. Power to make rules for assessment, collection and remission of taxes.
49. Taxes not invalid for defect of form.
50. Taxes leviable under Act VII of 1874 to be deemed to be taxes under this Act.

Taxes on Immoveable Property.

51. Preparation of assessment-list.
52. Publication of notice of assessments.
53. Public notice of time fixed for revising assessment-list.
54. Settlement of list.
55. Further amendments of assessment-list.
56. New list need not be prepared every year.
57. Remission of tax on unoccupied immoveable property.
58. Taxes under section 41, clauses (*a*), (*b*) and (*c*), from whom due.
59. Tax under sections 42, 43 and 44 payable by occupier.

CHAPTER V.

FUNDS AND PROPERTY.

60. Municipal fund constituted.
61. Application of fund.
62. School fund.
63. Custody of, and disbursements from, funds.
64. Investment of same.
65. Property vested in municipality.
66. Management of public institutions.
67. Transfer to Crown of property vesting in Committee.

CHAPTER VI.

POWERS FOR SANITARY AND OTHER PURPOSES.

Streets and Buildings.

68. Power to acquire land for building-sites adjoining new streets.
69. Power to close streets.
70. Power to permit temporary occupation of streets, &c.
71. Power to attach brackets for lamps.
72. Names of streets and numbers of buildings.
73. Roofs and external walls not to be made of inflammable materials.
74. Power to regulate line of buildings.
75. Notice of new buildings.
76. Removal of projections and obstructions.

Bathing and Washing Places.

77. Bathing and washing places.

Deposit of Offensive Matter and Slaughter-places.

78. Removal and deposit of offensive matter.
79. Places for slaughter of animals.

SECTIONS.

Burial and Burning Places.

80. Powers in respect of burial and burning places.
81. Removal of corpses.

Inflammable Materials.

82. Inflammable materials.

Powers of Entry and Inspection.

83. Inspection of drains, privies and cesspools.
84. Power to enter and inspect buildings, &c.
85. Other powers of entry on buildings or land.
86. Power to enter for discovery of vehicles or animals liable to taxation.
87. Power to inspect places for sale of food or drink, &c., and to seize unwholesome articles exposed for sale.
88. Power of entry for purpose of scavenging.
89. Precautions to be observed in entering dwelling.

Water-pipes, Privies and Drains.

90. Troughs and pipes for rain-water.
91. Provision of privies, &c.
92. Repair, alteration and closing of drains, privies and cesspools.
93. Unauthorized buildings [illegible]r drains, &c.
94. Removal of latrines, &c[illegible]ar any source of water-supply.
95. Power to require drainage, &c., of unwholesome tanks, &c.

Dangerous Buildings and Places.

96. Power to require buildings, wells, tanks, &c., to be secured.
97. Buildings, &c., in ruinous or dangerous state.

Buildings and Grounds in unsanitary Condition.

98. Power to require owner to clear away noxious vegetation.
99. Power to trim hedges and trees bordering on streets, wells, &c.
100. Cleansing of filthy buildings or land.
101. Power to prohibit use for human habitation of buildings unfit for such use.
102. Power to require untenanted buildings becoming a nuisance to be secured or enclosed.
103. Cultivation, use of manure or irrigation injurious to health, after prohibition.

Offensive and Dangerous Trades.

104. Regulation of offensive and dangerous trades.
105. Power to prohibit such trades.

Power to make Rules.

106. Power to make rules.
107. Penalty for infringement of rules.
108. Confirmation of rules.

Supplemental.

109. Execution of acts required to be done by any notice.
110. Recovery of costs of execution.
111. Compensation out of municipal fund.
112. Appeals against certain orders of committee.

CHAPTER VII.

OFFENCES AFFECTING THE PUBLIC HEALTH, SAFETY OR CONVENIENCE.

SECTIONS.

113. Depositing or throwing earth or materials or refuse, rubbish or offensive matter on roads or into drains.
114. Throwing corpse or carcass into river, &c.
115. Discharging sewage.
116. Non-removal of filth, &c.
117. Making or altering drains without authority.
118. Penalty for making or keeping latrines, &c., near any source of water-supply.
119. Keeping animals in disregard of orders.
120. Feeding animals on deleterious substances.
121. Driving vehicles without proper lights.
122. Discharging fire-arms, &c.
123. Suffering dogs to be at large.
124. Altering, obstructing or encroaching upon streets, &c.
125. Quarrying, blasting, cutting timber or building.
126. Penalty on exposure of infected persons and things.
127. Penalty on failing to provide for disinfection of public conveyance.
128. Picketing animals and collecting carts.
129. Keeping corpses or carrying corpses by prohibited routes or so as to cause annoyance.
130. Destroying direction-posts, lamp-posts, &c.
131. Penalty for disobedience to orders of committee under last chapter.
132. Prosecution to be suspended in certain cases.

CHAPTER VIII.

CONTROL.

133. Control by Commissioner and Deputy Commissioner.
134. Power to suspend action under Act.
135. Extraordinary powers of Deputy Commissioner in case of emergency.
136. Powers of Local Government in case of default of committee.
137. Power of Local Government to supersede committee in case of incompetency, persistent default or excess or abuse of powers.
138. Disputes.
139. Annual reports and statements.
140. Estimates of receipts and expenditure.
141. Sanction to works.
142. Powers of Commissioner.
143. Additional power of Local Government to frame forms and make rules.

CHAPTER IX.

SUPPLEMENTAL.

Criminal Procedure.

144. Powers and duties of police in respect of offences against Act and rules, and assistance to municipal authorities.
145. Prosecutions.
146. Member not to be deemed interested in prosecution.
147. Saving of prosecutions under other laws.

Rules.

148. Procedure for making rules under section 7,

SECTIONS.

Recovery of Money.

150. Recovery of money.

Notices.

151. Authentication, service and validity of notices.
152. Mode of giving notice to owner or occupier of property.
153. Publication of public notices.

Alteration of Municipal Limits.

154. Notification of intention to alter limits of municipality.
155. Alteration of limits of municipality.
156. Effect of exclusion of local area from municipality.
157. Effect of including local area in municipality.

Powers to except Municipalities from Provisions of Act.

158. Power to except municipality from provisions of Act unsuited thereto.

Miscellaneous.

159. Saving of Act XI of 1879.
160. Powers of Governor General in Council and of Local Government exerciseable from time to time.
161. Decision of questions as to whether persons are "inhabitants."

An Act to amend the law relating to Municipalities in British Burma.

WHEREAS it is expedient to amend the law relating to Municipalities in British Burma; It is hereby enacted as follows:—

CHAPTER I.

PRELIMINARY.

Short title, local extent and commencement.

1. *(1)* This Act may be called the Burma Municipal Act, 1884.

(2) It extends to the territories for the time being under the administration of the Chief Commissioner of British Burma; and

(3) It shall come into force on such date as the Local Government may, by notification in the official Gazette, appoint in this behalf.

Definitions.

2. In this Act, unless there is something repugnant in the subject or context,—

"municipality" means a local area declared under Chapter II to be a municipality;

"inhabitant" includes any person ordinarily residing or carrying on business, or owning or occupying immoveable property, in any local area which is declared to be a municipality under this Act or which the Local Government has by notification proposed to declare a municipality under this Act; and

"street" means any street, road, thoroughfare, passage or place over which the public have a right of way; and includes the surface-soil and sub-soil of any such street, and the footway and drains of any such street, and any bridge,

Burma Municipal Act, 1884.
(Chapter II.—Constitution of Municipalities.—Sections 3-5.)
(Chapter III.—Organization of Municipal Committees.—Sections 6-9.)

CHAPTER II.

CONSTITUTION OF MUNICIPALITIES.

Proposal to create municipality.

3. *(1)* The Local Government may, by notification published in the official Gazette and in such other manner as the Local Government may determine, propose to declare any town, or any group of towns in the immediate neighbourhood of one another, a municipality under this Act.

(2) Every notification under this section shall define the limits of the town or group of towns to which it refers, and may include within these limits any railway-station, village, building or land in the vicinity of any such town:

Provided that it shall not, without the previous consent of the Governor General in Council, so include any part of a military cantonment.

Creation of municipality.

4. *(1)* Any inhabitant of a local area in respect of which a notification has been published under section 3 may, if he objects to anything therein contained, submit his objection in writing to the Local Government within six weeks from the publication of the notification in the Gazette, and the Local Government shall take his objection into consideration.

(2) When six weeks from the publication of the notification in the Gazette have expired and the Local Government has considered the objections (if any) which have been submittted under sub-section (*1*), the Local Government may, by a notification in the official Gazette, declare the local area to be a municipality under this Act.

Application of Act to existing municipalities.

5. *(1)* The Local Government may, by notification in the official Gazette, declare any local area which is a municipality established under the British Burma Municipal Act, 1874, to be a municipality under this Act, and shall, within three months from the date on which this Act comes into force, so declare every such local area, unless, before the expiration of that period,—

(*a*) that local area is comprised in some local area declared to be a municipality under section 4; or

(*b*) the Local Government has declared, by a notification in the official Gazette, that the provisions of this Act are unsuited to that local area.

I of 1874.

(2) The Local Government may, by the notification issued under this section in respect of any local area, direct that the members and the president and vice-president of the committee for that local area appointed *ex officio*, by nomination and by election under the said British Burma Municipal Act, 1874, and then in office, shall, on and from a day fixed by the notification, be deemed respectively to have been appointed by virtue of an office and by name and elected under this Act as members, president and vice-president of a municipal committee for the local area, and shall hold office as such members, president and vice-president for such term as may be fixed by the notification.

I of 1874.

CHAPTER III.

ORGANIZATION OF MUNICIPAL COMMITTEES.

Constitution of Committees.

Committee to consist of elected and appointed members.

6. There shall be established for each municipality a municipal committee having authority over that municipality, and consisting of—

(*a*) so many inhabitants of the municipality as may be determined by the Local Government elected in manner next hereinafter prescribed to represent wards of the municipality or particular classes of the inhabitants; and

(*b*) such person or persons (if any), not exceeding in number one-fourth of the committee, as the Local Government may appoint by name or by virtue of an office in this behalf:

Provided that—

(1) when the circumstances of the municipality are, in the opinion of the Local Government, such as to require it, the Local Government may appoint a larger proportion of, or all, the members of the committee; and

(2) when any places on a committee are required to be filled by election, and a sufficient number of members is not elected, the Local Government may fill those places by appointment.

Power to Local Government to make rules regarding election.

7. *(1)* The Local Government shall, for every municipality in which a system of election is introduced, make rules regulating the following matters, namely:—

(*a*) the division of the municipality into wards, or of the inhabitants into classes, or both;

(*b*) the number of representatives proper for each ward or class;

(*c*) the qualifications of electors and of candidates for election;

(*d*) the registration of electors;

(*e*) the nomination of candidates, the time of election and the mode of recording votes; and

(*f*) any other matters relating to the system of representation and of election for which it may seem expedient to provide.

(2) The Local Government may, after the municipal committee has come into existence as herein after provided, amend, after consulting the committee, the rules made under this section; but any amendment made under this sub-section shall not take effect until six months after it has been published in the official Gazette.

(3) Elective members of the committee shall be elected in accordance with the rules made under this section and for the time being in force.

Term of office of members.

8. *(1)* A member of a municipal committee, when appointed by virtue of an office, shall, unless and until the Local Government otherwise directs, continue to be a member of the committee while he continues to hold that office.

(2) The term of office of all other elected and appointed members of a committee shall be fixed by the Local Government by rules made under this Act, and may be so fixed as to provide for the retirement of members by rotation, but shall not exceed three years.

(3) An outgoing member may, if otherwise qualified, be again elected or appointed.

Resignation of member of committee.

9. A member of a municipal committee may resign by notifying in writing to the Local Government his intention to do so, and, on his resignation being accepted by the Local Government, he shall be deemed to have vacated his office.

Burma Municipal Act, 1884.
(Chapter III.—Organization of Municipal Committees.—Sections 10-18.)

Removal of member.

10. *(1)* The Local Government may remove any member of a municipal committee who ceases to be an inhabitant of the municipality, or refuses to act, or becomes in the opinion of the Local Government incapable of acting, or is declared insolvent, or is convicted of any such offence, or subjected by a Criminal Court to any such order, as implies, in the opinion of the Local Government, a defect of character which unfits him to be a member, or who without sufficient excuse neglects for more than three consecutive months to be present at the meetings of the committee.

(2) A person removed under this section on any ground except that first mentioned shall be disqualified for election until the Local Government otherwise directs.

Filling of casual vacancies.

11. *(1)* When the place of an elected member of a municipal committee becomes vacant by the resignation or removal of the member, or by his death, a new member shall be elected in manner prescribed under section 7 to fill the place.

(2) When the place of a member of a municipal committee appointed by name becomes vacant as aforesaid, the Local Government may, if it thinks fit, appoint a new member to fill the place.

(3) A person elected or appointed under this section to fill a casual vacancy shall hold office until the person whose place he fills would regularly have gone out of office, and shall then go out of office, but may be again elected or appointed.

Incorporation of municipal committee.

12. Every municipal committee shall be a body corporate by the name of the municipal committee of its municipality, shall have perpetual succession and a common seal, with power, subject to the provisions of this Act, to acquire and hold property, both moveable and immoveable, and to transfer any property held by it, and to contract and to do all other things necessary for the purposes of its constitution, and may sue and be sued in its corporate name:

Provided that a committee shall not transfer any immoveable property except in pursuance of a resolution passed at a special meeting and approved by the Local Government.

Time for committees coming into existence.

13. A municipal committee shall come into existence at such time as the Local Government may, by notification in the official Gazette, appoint in this behalf:

Provided that a committee constituted under section 5, sub-section (2), shall come into existence on the day fixed under that sub-section.

Consequences of establishment of municipal committee where municipal committee under Act VII of 1874 exists.

14. When a municipal committee comes into existence under section 13 for a municipality constituted under this Act, and that municipality is or comprises within its limits a local area which is a municipality under the British Burma Municipal Act, 1874, the following consequences shall ensue, namely:—

(a) the said Act shall cease to apply to the local area;

(b) the municipal committee (if any) constituted under that Act for the local area (hereinafter called the old committee) shall cease to exist;

(c) all property vested in the old committee shall for the purposes of this Act vest in the committee constituted under this Act (hereinafter called the new committee), subject to all rights (if any) existing over, and all debts, liabilities and obligations (if any) affecting, that property;

(d) every right and liability belonging to or incurred by the old committee may be enforced by and against the new committee in like manner as it might have been enforced by and against the old committee if this Act had not been passed;

(e) a Government officer employed by the old committee at the time when the new committee comes into existence shall be deemed to be similarly employed by the new committee and shall not be dismissed from that employment without the sanction of the Local Government; and

(f) the new committee shall be substituted for the old committee in all legal proceedings by or against the old committee pending at the time when the new committee comes into existence.

Member of municipal committee to be municipal commissioner.

15. Every member of a municipal committee constituted under this Act shall be deemed to be a municipal commissioner within the meaning of every enactment for the time being in force.

President and Vice-president.

Election of president and vice-president.

16. A municipal committee shall, from time to time, at a special meeting, elect one of its members to be president, and may, from time to time, at a like meeting, elect another of its members to be vice-president:

Provided that in such municipalities, if any, as the Local Government may, by notification in the official Gazette, exempt from the operation of this section, the president shall, until the notification is rescinded by a like notification, be appointed by the Local Government from among the members of the committee.

Term of office of president and vice-president.

17. *(1)* The term of office of a president or vice-president shall be one year, and on the expiration of that period he may be again elected or appointed.

(2) Nothing in this section shall affect section 5, sub-section (2).

Casual vacancies in office of president or vice-president.

18. *(1)* If a president elected by a municipal committee or a vice-president dies, ceases to be a member of the committee or resigns his office, the committee shall, at a special meeting, elect another of its members to be president or vice-president.

(2) If a president appointed by the Local Government dies, ceases to be a member of the committee or resigns his office, the Local Government shall appoint another president.

(3) A person elected or appointed under this section to fill a casual vacancy shall hold office

Burma Municipal Act, 1884.
(Chapter III.—Organization of Municipal Committees.—Sections 19-28.)

until the person whose place he fills would regularly have gone out of office, and shall then go out of office, but may, if otherwise qualified, be again elected or appointed.

Notification of Elections, Appointments and Removals.

Notification of appointments, &c.

19. All elections and appointments of presidents and vice-presidents, and all elections, appointments and removals of members, of municipal committees, shall be notified in the local official Gazette, and no such election or appointment shall take effect until it is so notified.

Conduct of Business.

Time for holding meetings.

20. *(1)* A municipal committee shall meet for the transaction of business at least once in every month, at such time as may, from time to time, be fixed by the rules made under section 27.

(2) The president, or, in his absence, the vice-president, may, whenever he thinks fit, and shall, on a requisition made in writing by not less than one-fifth or two of the members of the committee, convene an ordinary or a special meeting at any other time.

Ordinary and special meetings.

21. *(1)* A meeting of a municipal committee shall be either ordinary or special.

(2) Any business may be transacted at an ordinary meeting unless it is required by this Act or the rules made under this Act to be transacted at a special meeting.

Quorum.

22. *(1)* The quorum necessary for the transaction of business at a special meeting of a municipal committee shall be one-half of the whole committee:

Provided that, when the committee consists of less than six members, the quorum shall be three.

(2) The quorum necessary for the transaction of business at an ordinary meeting of a municipal committee shall be such number, not less than three, as may, from time to time, be fixed by the rules made under section 27:

Provided that, if at any ordinary or special meeting of the committee a quorum is not present, the chairman shall adjourn the meeting to such other day as he thinks fit, and the business which would have been brought before the original meeting if there had been a quorum present shall be brought before and transacted by the adjourned meeting whether there is a quorum present thereat or not.

Chairman of meeting.

23. *(1)* At every meeting of a municipal committee the president, if present, shall preside as chairman.

(2) If, when any meeting is held, the office of president is vacant, or the president is absent from the meeting and the vice-president is present, he shall preside as chairman.

(3) In any case not provided for in the foregoing portion of this section, the members present shall elect one of their number to be chairman of the meeting.

Vote of majority decisive.

24. *(1)* Except as otherwise provided by this Act or by any rule made under this Act, all questions coming before any meeting of a municipal committee shall be decided by a majority of the votes of the members present.

(2) In case of an equality of votes, the chairman at the meeting shall have a second or casting vote.

Resolutions to be recorded and published.

25. Every resolution passed by a municipal committee at a meeting shall be recorded in a book kept for the purpose, shall be signed by the chairman of the meeting or of the next ensuing meeting, shall be open to inspection by the public at the municipal office at all reasonable times without charge, and shall be published in some local English or Vernacular newspaper, or in such other manner as the Local Government may direct.

Language of committee.

26. The discussions and proceedings of a municipal committee shall be conducted and recorded either in English or in Burmese, as the committee at a special meeting may, from time to time, decide:

Provided that, if the discussions and proceedings are conducted and recorded in English, the committee shall provide for interpreting and translating them into Burmese for the benefit of members who do not understand English.

Power to make rules as to conduct of business.

27. *(1)* A municipal committee may, from time to time, at a special meeting, make rules consistent with this Act as to—

(*a*) the time and place of its meetings;

(*b*) the manner in which notice thereof is to be given;

(*c*) the quorum necessary for the transaction of business at ordinary meetings;

(*d*) the conduct of proceedings at meetings, and the adjournment of meetings;

(*e*) the person or persons to be primarily responsible for the current executive administration and their powers; that is to say, what portion of the executive authority shall be exercised by the president, by the vice-president, by sub-committees, by individual members and by officers or servants of the committee;

(*f*) the persons by whom receipts may be granted on behalf of the committee for money paid under this Act; and

(*g*) any other similar matters.

(2) A rule made under clause *(e)* shall not take effect until it has been confirmed by the Local Government, and no rule made under this section shall take effect until it has been published in such manner as the Local Government may direct.

Extraordinary powers of president and vice-president in case of emergency.

28. In cases of emergency the president, or in his absence the vice-president, may direct the execution of any work or the doing of any act, which the committee is empowered to execute or do, and the immediate execution or doing of which is, in his opinion, necessary for the service or safety of the public, and may direct that the expense of executing the work or doing the act shall be paid from the municipal fund:

Provided that—

(a) he shall not act under this section in contravention of any order of the committee passed at a meeting; and

(b) where he acts under this section, he shall report his proceedings to the next following meeting of the committee.

Burma Municipal Act, 1884.

(Chapter III.—Organization of Municipal Committees.—Sections 29-38.)

Joint Committees.

Joint committee of two or more committees or cantonment authorities.

29. A municipal committee may, from time to time, concur with any other municipal committee or cantonment authority, or with more than one such committee or authority, in appointing, out of their respective bodies, a joint committee for any purpose in which they are jointly interested, and in appointing a chairman of the joint committee, and in delegating to any such joint committee any power which might be exercised by either or any of the committees or authorities, and in framing and modifying regulations as to the proceedings of any such joint committee, and as to the conduct of correspondence relating to the purpose for which it is appointed.

Defects in Constitution and Irregularities.

Vacancies and irregularities not to invalidate proceedings.

30. Anything done or any proceeding taken under this Act shall not be questioned on account of any vacancy in a municipal committee or joint committee, or on account of any defect or irregularity not affecting the merits of the case.

Officers and Servants.

Appointment of secretary.

31. *(1)* A municipal committee shall, from time to time, at a special meeting, appoint one of its members or some other person to be its secretary, and may at a like meeting remove any person so appointed.

(2) If a secretary is a member of the committee, he shall receive no remuneration in respect of his services. If he is not a member of the committee, the committee may, with the previous sanction of the Commissioner, assign to him any such pay as it thinks fit.

Employment of other officers and servants.

32. Subject to the other provisions of this Act, and to such rules as the Local Government may make prescribing the qualifications requisite in the case of persons appointed to offices requiring professional skill, a municipal committee may appoint and remove, in addition to its secretary, such other officers and servants as may be necessary or proper for the efficient execution of its duties, and may assign to those officers and servants such pay as it thinks fit.

Power to prevent extravagance in establishments.

33. If, in the opinion of the Commissioner, the number of persons employed by a municipal committee as officers or servants, or whom the committee propose to employ as such, or the remuneration assigned by the committee to those persons or any of them, is excessive, the committee shall, on the requirement of the Commissioner, reduce the number of those persons or the remuneration, as the case may be:

Provided that the committee may appeal against any such requirement to the Local Government, and the decision of the Local Government on any such appeal shall be final.

Pensions of Government officials serving the committee.

34. In the case of a Government official, a municipal committee may—

(1) if his services are wholly lent to it, subscribe for his pension or gratuity and leave-allowances in accordance with the rules of the Government Civil Pension and Leave Codes for the time being in force; and

(2) if he devotes only a part of his time to the performance of duties in behalf of the committee, contribute to his pension or gratuity and leave-allowances in such proportion as may be determined by the Government.

Pensions of other officers and servants.

35. In the case of an officer or servant not being a Government official referred to in section 34, a municipal committee may—

(1) grant him leave-allowances and, if he is employed under the committee appointed under the British Burma Municipal Act, 1874, when this Act comes into force, and is not entitled to pension, or if his monthly pay is less than ten rupees, a gratuity; and

VII

(2) if empowered in this behalf by the Local Government—

(a) subscribe in his behalf for pension or gratuity under the rules of the Government Civil Pension and Leave Codes for the time being in force; or

(b) purchase for him from the Government or otherwise an annuity on his retirement:

Provided that no pension, gratuity, leave-allowance or annuity shall exceed the sum to which, under the Government Civil Pension and Leave Codes for the time being in force, the servant would be entitled if the service had been service under Government.

Contracts and Transfers of Property.

Mode of executing contracts and transfers.

36. *(1)* When a contract made by or on behalf of a municipal committee exceeds in value or amount one hundred rupees, it must be in writing, and must be signed by the president or vice-president and at least one other member of the committee.

(2) A transfer of immoveable property belonging to the committee must be made by an instrument in writing, executed by the president or vice-president and by at least two other members of the committee.

(3) If any such contract or transfer is executed or made otherwise than in conformity with the provisions of this section, it shall not be binding on the committee.

Penalty on member, officer or servant of committee being interested in contract made with committee.

37. *(1)* If any member, officer or servant of a municipal committee is, otherwise than with the permission in writing of the Commissioner, directly or indirectly interested in any contract made with the committee, he shall be deemed to have committed an offence under section 168 of the Indian Penal Code.

XL

(2) A person shall not, by reason of being a shareholder in, or member of, any incorporated or registered company, be held to be interested in any contract entered into between the company and the committee, but he shall not take part in any proceedings of the committee relating to any such contract.

Acquisition of land.

Acquisition of land under Act X of 1870.

38. Where any land, whether within or without the limits of a municipality, is required by a municipal committee for the purposes of this Act or for any other object which it is em-

Burma Municipal Act, 1884.
(Chapter III.—Organization of Municipal Committees.—Sections 39-40.)
(Chapter IV.—Taxation.—Sections 41-43.)

powered to carry out under any other enactment for the time being in force, the Local Government may, at the request of the municipal committee, proceed to acquire it under the provisions of the Land Acquisition Act, 1870; and, on payment by the committee of the compensation awarded under that Act and of the charges incurred by the Government in connection with the proceedings, the land shall vest in the committee.

Privileges and Liabilities.

Suits against committee and its officers.

39. No suit shall be instituted against a municipal committee or against an officer of any such committee in respect of an act purporting to be done by him in his official capacity until the expiration of one month next after notice in writing has been, in the case of a committee, delivered to or left at its office, and in the case of an officer, delivered to him or left at his office or place of abode, stating the cause of action and the name and place of abode of the intending plaintiff; and the plaint must contain a statement that such notice has been so delivered or left:

Provided that this section shall not apply to any suit instituted under section 54 of the Specific Relief Act, 1877.

Liability for loss, waste or misapplication.

40. Every person shall be liable for the loss, waste or misapplication of any money or other property belonging to a municipal committee, if the loss, waste or misapplication is a direct consequence of his neglect or misconduct while a member of the committee, and a suit for compensation may be instituted against him by the committee or by the Secretary of State for India in Council.

CHAPTER IV.

TAXATION.

General Provisions.

Taxes which may be imposed for general purposes of Act.

41. *(1)* Subject to any general rules or special orders which the Governor General in Council may make in this behalf, a municipal committee may, for the purposes of this Act, impose, with the sanction hereinafter specified in each case, and in manner prescribed by section 45, any of the following taxes, namely:—

(A) with the previous sanction of the Local Government—

(a) a tax on buildings and lands situate within the municipality or any part thereof, not exceeding five per centum of the annual value of the buildings and lands;

(b) a tax on lands covered by buildings and situate as aforesaid, at a rate not exceeding one pie per square foot per annum;

(c) a tax on houses situate as aforesaid, according to the number of posts in each, at rates not exceeding the following, namely:—

	Rs. A.	
For a house having not more than 2 posts ...	0 8	per annum.
For a house having 3 posts ...	1 8	"
For a house having 4 posts ...	2 8	"
For a house having 5 posts ...	4 0	"
For a house having 6 posts ...	7 0	"
For a house having 7 posts ...	10 0	"

and when a house has more than seven posts, four rupees eight annas additional per annum for each post above seven;

(d) a tax on vehicles, boats and animals used for driving, riding, draught or burden, and dogs, kept within the municipality or any part thereof;

(B) with the previous sanction of the Local Government and of the Governor General in Council, any other tax:

Provided as follows:—

(e) only one of the taxes mentioned in clauses *(a)*, *(b)* and *(c)* shall be imposed in respect of the same property; and

(f) in assessing a house to the tax mentioned in clause *(c)*, only posts facing a road or street shall be counted, except in the case of bázárs or large buildings extending through from street to street, in which case the posts contained in one row from street to street, instead of those facing streets, may, in the discretion of the assessing authority, be counted.

(2) In this section "annual value" means the gross annual rent for which buildings and lands liable to taxation may reasonably be expected to let, and in the case of houses, may be expected to let unfurnished;

Provided that, in the case of land assessed to land-revenue or of which the land-revenue has been wholly or in part released, compounded for, redeemed or assigned, if the Local Government so directs, the annual value shall be deemed to be double the amount of the land-revenue for the time being assessed on the land, whether such assessment is leviable or not; or, when the land-revenue has been wholly or in part compounded for or redeemed, double the amount which, but for such composition or redemption, would have been leviable.

Water-tax.

42. *(1)* Besides the taxes imposed under section 41, a municipal committee, with the previous sanction of the Local Government, may, for the purpose of constructing or maintaining works for the supply of water to the municipality or any part thereof, or paying the principal or interest of any loan raised for the construction of such works, impose in manner prescribed by section 45, a tax, to be called the water-tax, upon buildings or lands which are so situated that their occupiers can benefit by the works.

(2) The rate or amount of the tax so imposed on different buildings or lands may be determined with reference, among other considerations, to their distance from the nearest point at which the water is deliverable by the works and to their level; but in fixing it regard shall be had to the principle that the total net proceeds of the tax, together with the estimated income from payments for water supplied from the works under special contracts or otherwise, should not exceed the amount required for the said purpose.

Lighting-tax.

43. Besides the taxes imposed under the foregoing sections, a municipal committee, with the previous sanction of the Local Government, may, for the purpose of lighting the public streets throughout the municipality or any part thereof, or paying the principal or interest of any loan raised for the construction of works required for lighting those streets, impose, in manner prescribed by section 45, a tax, to be called the lighting-tax, upon buildings and lands situate

within the municipality or that part thereof, as the case may be:

Provided that in fixing the rate or amount of the tax regard shall be had to the principle that the total net proceeds thereof should not exceed the amount required for the said purpose.

Scavenging-tax.

44. When a committee has, in exercise of the powers conferred by this Act, provided for the performance, with regard to any buildings or lands, by its agents of the duties usually performed by sweepers, it may, with the previous sanction of the Local Government, impose, in manner prescribed by section 45, upon those buildings and lands, in addition to any other tax imposed upon them under this Act, a tax to be called the scavenging-tax, at such rate or of such amount as it thinks fit:

Provided that in fixing the rate or amount regard shall be had to the principle that the total net proceeds of the tax should not exceed the cost of the performance of the said duties.

Procedure in imposing such taxes.

45. *(1)* A municipal committee may resolve, at a special meeting, to propose the imposition of any tax under section 41, 42, 43 or 44.

(2) When a resolution has been passed under sub-section (1), the committee shall publish a notice defining the persons or property proposed to be taxed, the amount or rate of the tax to be imposed and the system of assessment to be adopted.

(3) Any person likely to be directly affected by the proposed tax and objecting to the same may, within thirty days from the publication of the notice, submit his objection in writing to the committee; and the committee shall, at a special meeting, take his objection into consideration.

(4) If no objection is received within the said period of thirty days, or if the objections received, having been considered as aforesaid, are deemed insufficient, the committee may submit its proposals to the Local Government, with the objections (if any) which have been submitted as aforesaid and its decision thereon.

(5) The Local Government, on receiving such proposals may sanction the same, or refuse to sanction them, or return them to the committee for further consideration.

(6) When the Local Government sanctions any such proposals which require the further sanction of the Governor General in Council, it shall submit those proposals to the Governor General in Council with the objections (if any) received through the committee; and the Governor General in Council may sanction the proposals, or refuse to sanction the same, or return them to the Local Government for further consideration.

(7) When the proposals of a municipal committee in respect of a tax have been sanctioned by the Local Government, or by the Local Government and the Governor General in Council, as the case may be, the committee may, at a special meeting, direct the imposition of the tax in accordance with those proposals.

(8) In giving such direction the committee shall fix a date from which the tax shall come into force:

Provided that—

(a) no tax shall come into force until it has been notified;

(b) no tax leviable by the year shall come into force except at the commencement of the year by which it is leviable; and

(c) no other tax shall come into force less than six months from the date of the meeting at which its imposition is directed.

(9) A notification of the imposition of a tax under this Act shall be conclusive evidence that the tax has been imposed in accordance with the provisions of this Act.

Power to abolish or reduce tax.

46. A municipal committee may, at a special meeting, with the sanction of the Local Government, abolish or reduce in amount any tax imposed under the foregoing sections.

Power to Local Government to suspend levy of tax.

47. *(1)* If it at any time appears to the Local Government, on complaint made or otherwise, that any tax imposed under the foregoing sections is unfair in its incidence, or that the levy thereof or of any part thereof is injurious to the interests of the general public, it may require the municipal committee to take, within a specified period, measures to remove the objection; and, if within that period the requirement is not complied with to the satisfaction of the Local Government, the Local Government may, by notification, suspend the levy of the tax or of any part thereof until the objection has been removed.

(2) The Local Government may at any time by a like notification, rescind any such suspension.

Power to make rules for assessment, collection and remission of taxes.

48. *(1)* The Local Government may make rules for the assessment, collection and remission of taxes leviable under this Act and preventing evasion of the same:

Provided that every such rule shall be consistent with the provisions of this Act and with the proposals sanctioned in respect of the tax under section 45.

(2) In making any rule under this section the Local Government may direct that a breach of any provision thereof shall be punishable with fine which may extend to fifty rupees.

Taxes not invalid for defect of form.

49. No tax imposed under this Act shall be invalid merely for defect of form; and it shall be enough in any such tax on property, or any assessment of value for the purpose of the tax, if the property taxed or assessed is so described as to be generally known; and it shall not be necessary to name the owner or occupier thereof.

Taxes leviable under Act VII of 1874 to be deemed to be taxes under this Act.

50. All taxes leviable in any local area under the British Burma Municipal Act, 1874, at the time when a municipal committee having authority over that local area comes into existence under this Act, shall, so far as their imposition and assessment are consistent with this Act and within the powers conferred thereby, be deemed to have been imposed and assessed under this Act.

Taxes on Immoveable Property.

Preparation of assessment-list.

51. *(1)* The committee shall cause an assessment-list of all buildings and lands on which any tax is imposed to be prepared, containing—

(a) the name of the street or division in which the property is situate;

(b) the designation of the property, either by name or by number, sufficient for identification;

(c) the names of the owner and occupier, if known;

(d) the annual value, area or number of posts on which the property is assessed; and

(e) the amount of the tax assessed thereon by the committee.

(2) For the purpose of preparing the list, the committee may require the owners or occupiers of the buildings or lands to furnish it with returns of the measurements or number of posts or of the rent or annual value.

Publication of notice of assessments.

52. When the assessment-list has been completed, the committee shall give public notice thereof, and of the place where the list or a copy thereof may be inspected; and every person claiming to be either owner or occupier of property included in the list, or the agent of any such person, shall be at liberty to inspect the list and to make extracts therefrom without charge.

Public notice of time fixed for revising assessment-list.

53. *(1)* The committee shall at the same time give public notice of a time, not less than one month from the publication of the notice, when it will proceed to revise the assessment; and in all cases in which any property is for the first time assessed, or the assessment thereof is increased, it shall also give notice thereof to the owner or occupier of the property.

(2) All objections to the assessment shall be made in writing before the time fixed in the notice or orally or in writing at that time.

Settlement of list.

54. *(1)* After the objections have been enquired into and the persons making them have been allowed an opportunity of being heard either in person or by authorized agent as they think fit and the revision of the assessment has been completed, the amendments made in the list shall be authenticated by the signatures of not less than two members of the committee, who shall at the same time certify that no valid objection has been made to the assessment contained in the list, except in the cases in which amendments have been entered therein; and, subject to such amendments as may thereafter be duly made, the tax so assessed shall be deemed to be the tax for the whole year by which it is leviable next following that in which the assessment is made.

(2) The list when amended under this section shall be deposited in the committee's office, and shall there be open during office-hours to all owners and occupiers of property comprised therein, and a public notice that it is so open shall forthwith be published.

Further amendments of assessment-list.

55. *(1)* The committee may at any time amend the list by inserting the name of any person whose name ought to be inserted, or by inserting any property which ought to have been inserted, or by altering the assessment on any property which has been insufficiently assessed through mistake, oversight or fraud, after giving notice to any person interested in the amendment of a time, not less than one month from the date of service of such notice, at which the amendment is to be made.

(2) Any person interested in any such amendment may tender his objection to the committee in writing before the time fixed in the notice, or orally or in writing at that time, and shall be allowed an opportunity of being heard in support of the same in person or by authorized agent as he thinks fit.

New list need not be prepared every year.

56. It shall be in the discretion of the committee to prepare a new assessment-list every year; or to adopt the assessment contained in the list for any year, with such alterations as may in particular cases be deemed necessary, as the assessment for the year following, giving the same notice of the assessment as if a new assessment-list had been prepared.

Remission of tax on unoccupied immoveable property.

57. When a tax payable under section 41, clause (*a*), (*b*) or (*c*), or under section 42, 43 or 44, is payable in one sum in respect of an entire year, and the property in respect of which it is payable is unoccupied throughout the year, or when such a tax is payable in instalments and the property is unoccupied throughout the period in respect of which an instalment is payable, the amount payable in respect of the property for the year, or the instalment, as the case may be, shall be remitted:

Provided that it shall be in the discretion of the committee to direct that no remission shall be granted unless notice in writing of the vacancy has been given to it within such time from the beginning of the year or of the period as it may, from time to time, fix in this behalf.

Taxes under section 41, clauses (*a*), (*b*) and (*c*), from whom due

58. Every tax payable under section 41, clause (*a*), (*b*) or (*c*), shall be due jointly and severally from all persons who have been in occupation of the building or land assessed at any time during the year of assessment, or, when the tax is payable by instalments, at any time during the period in respect of which the instalment is payable, and from all persons who have held under them as tenants, mortgagees or conditional vendees.

Tax under sections 42, 43 and 44 payable by occupier.

59. Every tax leviable under section 42, 43 or 44 shall be payable by the occupier of the building or land in respect of which it is payable.

CHAPTER V.

FUNDS AND PROPERTY.

Municipal fund constituted.

60. There shall be formed for each municipality a municipal fund, and there shall, except as by this Act provided, be credited thereto—

(a) all sums received by or on behalf of the committee under this Act or otherwise;

(b) all fines realized in cases in which prosecutions are instituted under this Act or the rules made hereunder or under section 34 of Act V of 1861 for offences committed within the municipality;

(c) any sums which the Local Government may annually assign, as it is hereby empowered to do, to the municipal fund from the port fund of any port abutting on or within the municipality as being in its

opinion a just and reasonable contribution towards the expenditure rendered necessary by the resort to the municipality of seamen from ships lying in the port; and

(*d*) when there has been included within the municipality a municipality constituted under the British Burma Municipal Act, 1874, the balance (if any) standing at the credit of the funds of that municipality at the time when the municipal committee came into existence.

Application of fund.

61. *(1)* The committee shall set apart and apply annually out of the municipal fund—

(*a*) *first*, such sum as may be required for the payment of any amounts falling due on any loan legally contracted by it;

(*b*) *secondly*, such sum as may be required to meet the charges of its own establishment, including such subscriptions and contributions as are referred to in sections 34 and 35,

(*c*) *thirdly*, such sum as may be required to pay the expenses of pauper lunatics sent to public asylums from the municipality, the expenses incurred in auditing the accounts of the committee, and such portion of the cost of the Provincial Departments for Education, Sanitation, Vaccination, Medical Relief and Public Works as may be held by the Local Government to be equitably debitable to the committee in return for services rendered to it by these Departments.

(2) Subject to the charges specified in subsection (1) and to such rules as the Local Government may make with respect to the priority to be given to the several duties of the committee, the municipal fund shall be applicable to the payment, in whole or in part, of the charges and expenses incidental to the following matters within the municipality, and with the sanction of the Commissioner outside the municipality, when such application of the fund is for the benefit of the inhabitants, namely:—

(*a*) the construction, maintenance, improvement, cleansing and repair of streets, and of public bridges, embankments, drains, latrines, tanks and water-courses;

(*b*) the watering and lighting of the streets or any of them;

(*c*) the construction, establishment and maintenance of schools, hospitals and dispensaries, and other institutions for the promotion of education or for the benefit of the public health, and of rest-houses, zayats, wharves, poor-houses, markets, encamping-grounds, pounds and other works of public utility, and the control and administration of public institutions of any of these descriptions;

(*d*) grants-in-aid to schools, hospitals, dispensaries, poor-houses, leper asylums and other educational or charitable institutions;

(*e*) the training of teachers and the establishment of scholarships;

(*f*) the giving of relief and the establishment and maintenance of relief-works in time of famine or scarcity;

(*g*) the supply, storage and preservation from pollution of water for the use of men or animals;

(*h*) the planting and preservation of trees;

(*i*) the taking of a census, the registration of births, marriages and deaths, public vaccination and any other sanitary measure;

(*j*) the holding of fairs and industrial exhibitions; and

(*k*) all acts and things likely to promote the safety, health, welfare or convenience of the inhabitants.

School fund.

62. *(1)* There shall be formed for each municipality a school fund. To this fund shall be credited—

(*a*) the fees levied in schools maintained at the cost of the school fund;

(*b*) any assignment that may be made to the school fund from provincial funds or from any district or local fund;

(*c*) any other funds or income that may be entrusted to the municipality for the promotion of education; and

(*d*) any sums assigned for educational purposes from the municipal fund.

(2) The Local Government may fix for any municipality the minimum proportion of the municipal fund that shall be yearly assigned to the school fund under clause (*d*): Provided that the minimum so fixed shall not exceed 5 per cent. on the gross annual income of the municipality.

(3) No expenditure, except expenditure for the promotion of education, shall be charged against the school fund. In case of doubt the Commissioner shall decide whether any expenditure is or is not for the promotion of education.

Custody of, and disbursements from, funds.

63. *(1)* The balances standing to the credit of the municipal fund and school fund shall, if there is a Government treasury or sub-treasury or a bank to which the Government treasury business has been made over situate within the municipality, be kept in that treasury, sub-treasury or bank. In any other case, the bulk of the funds shall be kept in the nearest Government treasury or sub-treasury or bank as aforesaid, and such money as may be required for current expenditure shall be kept by the committee in a strong box in such place and under such precautions as the committee may, from time to time, direct.

(2) No disbursement of such funds or any part thereof shall be made except under the signature of the president or vice-president and one other member of the committee.

Investment of same.

64. *(1)* A municipal committee may, from time to time, with the previous sanction of the Local Government, invest any portion of its municipal fund or school fund in securities of the Government of India or such other securities as the Governor General in Council may approve in this behalf, and vary such investments for others of the like nature.

(2) The income resulting from the securities and the proceeds of the sale of the same shall be credited to the municipal fund or school fund, as the case may be.

Burma Municipal Act, 1884.
(Chapter V.—Funds and Property.—Sections 65-67.)
(Chapter VI.—Powers for Sanitary and other Purposes.—Sections 68-74.)

Property vested in municipality.

65. Subject to any special reservation made by the Local Government, all property in a municipality of the nature hereinafter specified shall be vested in and belong to the municipal committee, and shall, with all other property which may become vested in the committee, be under its direction, management and control, and shall be held and applied by it for the purposes of this Act, that is to say:—

(a) all public townhalls, gates, markets, slaughter-houses, manure and night-soil depôts and public buildings of every description which have been constructed or are maintained out of municipal funds;

(b) all public streams, tanks, reservoirs, cisterns, wells, springs, aqueducts, conduits, tunnels, pipes and other waterworks, and all bridges, buildings, engines, works, materials and things connected therewith or appertaining thereto, and also any adjacent land (not being private property) appertaining to any public tank or well;

(c) all public sewers and drains, and all sewers, drains, tunnels, culverts, gutters and watercourses in, alongside or under any street, and all works, materials and things appertaining thereto;

(d) all dust, dirt, dung, ashes, refuse, animal-matter or filth, or rubbish of any kind, collected by the committee from the streets, houses, privies, sewers, cesspools or elsewhere;

(e) all public lamps, lamp-posts and apparatus connected therewith or appertaining thereto;

(f) all land or other property transferred to the committee by the Government or by gift or otherwise for local public purposes; and

(g) all streets, and the pavements, stones and other materials thereof, and also all trees, erections, materials, implements and things provided for such streets.

Management of public institutions.

66. (1) The management, control and administration of every public institution maintained out of municipal funds shall vest in the committee:

Provided that the extent of the independent authority of the committee in respect of any such institution may be prescribed by the Local Government.

(2) When any public institution is placed under the direction, management and control of the committee, all property, endowments and funds belonging thereto shall be held by the committee in trust for the purposes to which such property, endowments and funds were lawfully applicable at the time when the institution was so placed.

Transfer to Crown of property vesting in committee.

67. The committee may, with the sanction of the Local Government, transfer to Her Majesty any property vesting in the committee under section 65 or section 66, but not so as to affect any trusts or public rights subject to which the property is held.

CHAPTER VI.

POWERS FOR SANITARY AND OTHER PURPOSES.

Streets and Buildings.

Power to acquire land for building sites adjoining new streets.

68. When any land is required for a new street or for the improvement of an existing street, the committee may proceed to acquire, in addition to the land to be occupied by the street, the land necessary for the sites of the buildings to be erected on the sides of the street.

Power to close streets.

69. The committee may close temporarily any street vested in it or any part thereof for the purpose of repairs, or for the purpose of constructing or repairing any sewer, drain, culvert or bridge, or for any other public purpose; and may divert, discontinue or permanently close any such street, and sell the land or such part thereof as is not required for the purposes of this Act.

Power to permit temporary occupation of streets, &c.

70. The committee may grant permission in writing for the temporary occupation of any street or land vested in it for the purpose of depositing any building materials or making any temporary excavation therein or erection thereon, subject to such conditions as it may prescribe for the safety or convenience of persons passing by or dwelling or working in the neighbourhood, and may charge fees for such permission, and may at its discretion withdraw the permission.

Power to attach brackets for lamps.

71. The committee may attach to the outside of any building brackets for lamps in such manner as not to occasion any injury thereto or inconvenience.

Names of streets and numbers of buildings.

72. (1) The committee at a meeting may cause a name to be given to any street, and to be affixed on any building in such place as it thinks fit, and may also cause a number to be affixed to any building; and in like manner may, from time to time, cause such names and numbers to be altered.

(2) Whoever destroys, pulls down or defaces any such name or number, or puts up any different name or number from that put up by order of the committee, shall be punishable with fine which may extend to twenty rupees.

Roofs and external walls not to be made of inflammable materials.

73. The committee at a meeting may direct that, within certain limits, to be fixed by it, the external roofs and walls of huts or other buildings shall not be made or renewed of bamboos, grass, mats, leaves or other highly inflammable materials unless with the permission of the committee in writing; and the committee may, by written notice, require any person who has disobeyed any such direction to remove or alter the roofs or walls so made or renewed as it may think fit.

Power to regulate line of buildings.

74. (1) If any building or part of a building projects beyond the regular line of a public street, either existing or determined on for the future, or beyond the front of the building on either side thereof, the committee may, whenever the building or part has been either entirely or in greater part taken down or burnt down, or has fallen down, by notice require the building or part, when being rebuilt, to be set back to or towards the said regular line or the front of the adjoining buildings; and the portion of the land added to the street by such setting back or removal shall become part of the public street and shall vest in the committee:

Provided that the committee shall make full compensation to the owner for any damage he may sustain in consequence of his building or any part thereof being set back.

Burma Municipal Act, 1884.

(Chapter VI.—Powers for Sanitary and other Purposes.—Sections 75-80.)

(2) The committee may, on such terms as it thinks fit, allow any building to be set forward for the improvement of the line of the street.

Notice of new buildings.

75. *(1)* Every person intending to erect or re-erect any building shall, if required to do so by rule made by the committee in this behalf, give notice in writing of his intention to the committee, and shall, if required to do so, submit a plan showing the levels at which the foundation and lowest floor are proposed to be laid, and specifications of the works intended to be constructed, and the materials to be used, and shall obey all written directions consistent with this Act given by the committee within one month after receiving such notice, either prohibiting the erection or re-erection, if deemed likely to be injurious to the inhabitants of the neighbourhood, or in respect of all or any of the matters following, namely:—

(*a*) free passage or way in front of the building;

(*b*) space to be left about the building to secure free circulation of air and facilitate scavenging;

(*c*) ventilation and drainage;

(*d*) level and width of foundation, level of lowest floor and stability of structure; and

(*e*) the line of frontage with neighbouring buildings, if the building abuts on a street or public thoroughfare:

Provided that the committee shall make full compensation to the owner for any damage he may sustain in consequence of the prohibition of the erection or re-erection of any building, or of its requiring any land belonging to him to be added to the street.

(2) If any such building is begun or erected without giving notice, or without submitting particulars as aforesaid when required, or in contravention of the legal orders of the committee issued within one month, the committee may by notice require the building to be altered or demolished, as it may deem necessary.

Explanation.—The expression "erect any building" includes all additions or alterations which involve new foundations or increased superstructure on existing foundations, or the conversion into a dwelling-house of any building not originally constructed for human habitation, or the conversion into more than one dwelling-house of a building originally constructed as one dwelling-house only.

Removal of projections and obstructions.

76. *(1)* It shall not be lawful, unless with the written permission of the committee, for the owner or occupier of any building in a public street to add to, or place against or in front of, the building any projection or structure overhanging, projecting into or encroaching on the street or into or on any drain, sewer or aqueduct therein.

(2) The committee may, by notice, require the owner or occupier of any building to remove or alter any projection, encroachment or obstruction built or placed against or in front thereof if the same overhangs or projects into or encroaches on any public street, or projects into or encroaches on any drain, aqueduct or sewer in the street:

Provided that, in the case of a projection, encroachment or obstruction being lawfully in existence at the time of the passing of this Act, the committee shall make reasonable compensation to any person who suffers damage by the removal or alteration.

(3) The committee may give written permission to the owners or occupiers of buildings in public streets to put up open verandahs, balconies or rooms projecting from any upper storey thereof to an extent beyond the line of the plinth or basement-wall, and at a height from the level of the ground or street, to be specified in the written permission.

Bathing and Washing Places.

Bathing and washing places.

77. The committee may set apart suitable places for the purpose of bathing, and may specify the times at which, and the sex of the persons by whom, such places may be used, and may also set apart suitable places for washing animals or clothes, or for any other purpose connected with the health, cleanliness or comfort of the inhabitants; and may, by public notice, prohibit bathing, or washing animals or clothes, in any public place not so set apart, or at times or by persons other than those so specified, and all other acts not so permitted by which water in public places may be rendered foul or unfit for use.

Deposit of Offensive Matter and Slaughter-places.

Removal and deposit of offensive matter.

78. The committee may fix places within or, with the approval of the Deputy Commissioner, beyond the limits of the municipality for the deposit of refuse, rubbish or offensive matter of any kind or for the disposal of the dead bodies of animals, and may by public notice give directions as to the time, manner and conditions at, in and under which such refuse, rubbish or offensive matter or dead bodies of animals may be removed along any street and deposited at such places.

Places for slaughter of animals.

79. *(1)* The committee may, with the approval of the Deputy Commissioner, fix and abolish places either within or without the limits of the municipality for the slaughter of animals for sale, or of any specified description of such animals, and may with the like approval grant and withdraw licenses for the use of such places, or, if they belong to the committee, charge rent or fees for the use of the same.

(2) When such places are fixed by the committee beyond municipal limits, it shall have the same power to make rules for the inspection and proper regulation of the same as if they were within those limits.

(3) When any such place has been fixed, no person shall slaughter any such animal for sale within the municipality at any other place.

(4) Whoever slaughters any such animal for sale at any other place within the municipality shall be punishable with fine which may extend to twenty rupees.

Burial and Burning Places.

Powers in respect of burial and burning places.

80. *(1)* The committee may, by public notice, order any burial or burning ground which is, in its opinion, dangerous to the health of persons living in the neighbourhood, to be closed, from a date to be specified in the notice, and shall, in such case, if no suitable place for burial or burning exists within a reasonable distance, provide a fitting place for the purpose.

Burma Municipal Act, 1884.
(Chapter VI.—Powers for Sanitary and other Purposes.—Sections 81-89.)

(2) Private burial-places in such burial-grounds may be excepted from the notice, subject to such conditions as the committee may impose in this behalf:

Provided that the limits of such burial-places are sufficiently defined, and that they shall only be used for the burial of members of the family of the owner thereof.

(3) No burial or burning ground, whether public or private, shall be made or formed, after the passing of this Act, without the permission in writing of the committee.

(4) If any person buries or burns, or causes or permits to be buried or burnt, any corpse in any burial or burning ground made or formed contrary to the provisions of this section, or after the date fixed thereunder for closing the same, he shall be punishable with fine which may extend to fifty rupees.

81. The committee may, by public notice, prescribe routes for the removal of corpses to burial or burning places.

Removal of corpses.

Inflammable Materials.

82. The committee may, where it appears to it to be necessary for the prevention of danger to life or property, by public notice, prohibit all persons from stacking or collecting bamboos, dry grass, straw or other inflammable materials, or placing mats or thatched huts or lighting fires in any place or within any limits specified in the notice.

Inflammable materials.

Powers of Entry and Inspection.

83. (1) The committee, by any person authorized by it in this behalf, may, after giving six hours' notice in writing to the occupier of any land or building in which any drains, privies or cesspools are situated, inspect any such drains, privies and cesspools at any time between sunrise and sunset, and may, if necessary, cause the ground to be opened where the committee or person may think fit for the purpose of preventing or removing any nuisance arising from the privies, drains or cesspools.

Inspection of drains, privies and cesspools.

(2) If, on such inspection, it appears that the opening of the ground was necessary for the prevention or removal of a nuisance, the expenses thereby incurred shall be paid by the owner or occupier of the land or building; but if it is found that no nuisance exists, or but for such opening would have arisen, the ground shall be closed and made good as soon as may be, and the expense of opening, closing and making it good shall be borne by the committee.

84. The committee, by any person authorized by it in this behalf, may, after giving twenty-four hours' notice to the occupier, or, if there is no occupier, to the owner, of any building, at any time between sunrise and sunset enter and inspect the building, and may by notice direct all or any part thereof to be forthwith internally or externally lime-washed, disinfected or otherwise cleansed for sanitary reasons.

Power to enter and inspect buildings, &c.

85. The committee, by any person authorized by it in this behalf, may, after giving twenty-four hours' notice to the occupier, or, if there is no occupier, to the owner, of any building or land, at any time between sunrise and sunset—

Other powers of entry on buildings or land.

(a) enter on and survey and take levels of any land;

(b) enter, inspect and measure any building for the purpose of valuation;

(c) enter into any building or on any land for the purpose of examining works under construction, of ascertaining the course of sewers or drains, or of executing or repairing any work which it is by this Act empowered to execute or maintain.

86. The committee, by any person authorized by it in this behalf, may, at any time between sunrise and sunset, enter and inspect any stable, coach-house or other place wherein there is reason to believe that there is any vehicle or animal liable to taxation under this Act and which has not been so taxed.

Power to enter for discovery of vehicles or animals liable to taxation.

87. The committee, by any person authorized by it in this behalf, may at all reasonable times enter into and inspect any market, building, shop, stall or place used for the sale of food or drink for man, or as a slaughter-house, or for the sale of drugs, and inspect and examine any food or drink, drug or animal which may be therein; and, if any article of food or drink or any animal therein appears to be intended for the consumption of man and to be unfit therefor, may seize and remove the same, or may cause it to be destroyed or to be so disposed of as to prevent its being exposed for sale or used for such consumption;

Power to inspect places for sale of food or drink, &c., and to seize unwholesome articles exposed for sale.

and, in case any drug is reasonably suspected to be adulterated in such manner as to lessen its efficacy or to change its operation or to render it noxious, may remove the same, giving a receipt therefor, and may cause it to be brought before a Magistrate for enquiry whether any offence has been committed in respect thereof, and for his orders as to its disposal.

88. (1) The committee may provide for the performance by its agents of the duties usually performed by sweepers in respect of any buildings or lands, or of any privies, drains, cesspools or other receptacles for offensive matter pertaining to buildings or land, with the consent of the occupier of the building or land, or without such consent if the occupier fails to make arrangements to the satisfaction of the committee for the performance of such duties.

Power of entry for purpose of scavenging.

(2) When the committee has undertaken to provide for the performance by its agents of such duties as aforesaid, the persons employed by it to perform the same may enter on the property at all reasonable times so far as may be necessary for the proper discharge of those duties; and the committee, by any person authorized by it in this behalf, may enter on the property at all reasonable times for the purpose of ascertaining that such duties have been duly performed.

89. When any building, used as a human dwelling, is entered under this Act, due regard shall be paid to the social and religious sentiments of the occupiers; and before any apartment in the actual occupancy of any woman, who, according to custom, does not appear in public, is entered under this Act, notice shall be given to

Precautions to be observed in entering dwelling.

Burma Municipal Act, 1884.
(Chapter VI.—Powers for Sanitary and other Purposes.—Sections 90-101.)

her that she is at liberty to withdraw, and every reasonable facility shall be afforded to her for withdrawing.

Water-pipes, Privies and Drains.

Troughs and pipes for rain-water.

90. The committee may, by notice, require the owner of any building in any street to put up and keep in good condition proper troughs and pipes for receiving and carrying the water from the roof and other parts thereof and for discharging the same so as not to inconvenience persons passing along the street.

Provision of privies, &c.

91. *(1)* The committee may, by notice, require the owner of any building to provide any privy or cesspool, or additional privies or cesspools, which should in its opinion be provided for the building, in such manner as the committee directs.

(2) The committee may, by notice, require any persons employing more than twenty workmen or labourers to provide such latrines and urinals as it may think fit, and to cause the same to be kept in proper order and to be daily cleaned.

(3) The committee may, by notice, require the owner or occupier of any building or land to have any privy provided for the same shut out by a sufficient roof and wall or fence from the view of persons passing by or dwelling in the neighbourhood, or to remove or alter, as the committee directs, any door or trapdoor of a privy opening on to any street or drain.

Repair, alteration and closing of drains, privies and cesspools.

92. *(1)* The committee may, by notice, require the owner or occupier of any building or land to repair or alter and put in good order any drain, privy or cesspool, or to close any cesspool, belonging thereto.

(2) The committee may, by notice, require any person who constructs any new drain, privy or cesspool without its permission in writing, or contrary to its directions or regulations or to the provisions of this Act, or who constructs, rebuilds or opens any drain, privy or cesspool which it has ordered to be demolished or stopped up or not to be made, to demolish the drain, privy or cesspool, or to make such alteration therein as it thinks fit.

Unauthorised buildings over drains, &c.

93. The committee may, by notice, require any person who without its permission in writing newly erects or rebuilds any building over any sewer, drain, culvert, watercourse or water-pipe vested in the committee to pull down or otherwise deal with the same as it thinks fit.

Removal of latrines, &c., near any source of water-supply.

94. The committee may, by notice, require any owner or occupier on whose land any drain, latrine, urinal, cesspool or other receptacle for filth or refuse for the time being exists within fifty feet of any spring, well, tank, reservoir or other source from which water is or may be derived for public use, to remove or close the same within one week.

Power to require drainage, &c., of unwholesome tanks, &c.

95. The committee may, by notice, require the owner or occupier of any land or building to cleanse, repair, cover, fill up or drain off any private tank, well, reservoir, pool or excavation therein which appears to the committee to be injurious to health or offensive to the neighbourhood:

Provided that, if for the purpose of effecting any drainage under this section it is necessary to acquire any land not belonging to the person who is required to drain his land or to pay compensation to any other person, the committee shall provide the land or pay the compensation.

Dangerous Buildings and Places.

Power to require buildings, wells, tanks, &c., to be secured.

96. If any building, or any well, tank or other excavation, is for want of sufficient repair, protection or enclosure, dangerous to persons passing by or dwelling or working in the neighbourhood, the committee may, by notice, require the owner or occupier thereof to repair, protect or enclose the same; and, if it appears to it to be necessary in order to prevent imminent danger, it shall forthwith take such steps as are necessary to avert the danger.

Buildings, &c., in ruinous or dangerous state.

97. If any building, wall, structure or anything affixed thereto is deemed by the committee to be in a ruinous state or in any way dangerous, it may, by notice, require the owner or occupier thereof forthwith either to remove the same or to cause such repairs to be made to the building, wall or structure as the committee consider necessary for the public safety; and, if it appears to it to be necessary in order to prevent imminent danger, the committee shall forthwith take such steps as are necessary to avert the danger.

Buildings and Grounds in unsanitary Condition.

Power to require owner to clear away noxious vegetation.

98. The committee may, by notice, require the owner or occupier of any land to clear away and remove any thick or noxious vegetation, jungle or undergrowth which appears to the committee to be injurious to health or offensive to the neighbourhood.

Power to trim hedges and trees bordering on streets, wells, &c.

99. The committee may, by notice, require the owner or occupier of any land, within three days, to cut or trim the hedges thereof bordering on any street, or branches of trees growing thereon which overhang any street and obstruct the same or cause danger thereto, or which so overhang any well, tank or other source from which water is derived for public use as to be likely to pollute the water thereof.

Cleansing of filthy buildings or land.

100. If the owner or occupier of any building or land suffers the same to be in a filthy or unwholesome state, the committee may, by notice, require him within twenty-four hours to cleanse the same or otherwise put it in a proper state.

Power to prohibit use for human habitation of buildings unfit for such use.

101. If any building appears to the committee to be unfit for human habitation in consequence of the want of proper means of drainage or ventilation or other sufficient reason, the committee may, by notice, prohibit the owner or occupier thereof from using the same for human habitation or suffering it to be so used, until the committee is satisfied that it has been rendered fit for such use.

Burma Municipal Act, 1884.
(Chapter VI.—Powers for Sanitary and other Purposes.—Sections 102-106.)

102. The committee may, by notice, require the owner or person claiming to be the owner of any building or land which, by reason of abandonment or disputed ownership or other cause, remains untenanted and thereby becomes a resort of idle and disorderly persons or otherwise a nuisance, to secure or enclose the same within a reasonable time fixed in the notice.

Power to require untenanted buildings becoming a nuisance to be secured or enclosed.

103. *(1)* The committee, on the report of the Sanitary Commissioner that the cultivation of any description of crop or the use of any kind of manure or the irrigation of land in any specified manner in any place within the limits of the municipality is injurious to the health of persons dwelling in the neighbourhood, may, with the previous sanction of the Local Government, by notification prohibit the cultivation of the crop, the use of the manure or the irrigation so reported to be injurious, or regulate it by imposing such conditions thereon as may prevent the injury:

Cultivation, use of manure or irrigation injurious to health, after prohibition.

Provided that when on any land to which the notification applies that description of crop has been cultivated, that kind of manure has been used or irrigation has been practised in that manner during the five years preceding the notification with such continuity as the ordinary course of husbandry admits of, compensation shall be paid from the municipal fund to all persons interested in that land for any damage caused to them by the prohibition or regulation.

(2) If any person cultivates, uses manure or irrigates in disregard of the prohibition or conditions notified under sub-section *(1)*, he shall be punishable with fine which may extend to fifty rupees, and with a further fine which may extend to five rupees for every day after the first during which the offence is continued.

Offensive and Dangerous Trades.

104. *(1)* The owner or occupier of every place within the municipality used for any of the following purposes, namely:—

Regulation of offensive and dangerous trades.

melting tallow;

boiling bones, offal or blood; or

as a soap-house, oil-boiling house, dyeing-house or tannery; or,

as a brickkiln, pottery or limekiln; or

as any other manufactory or place of business from which offensive or unwholesome smells arise; or

as a yard or depôt for trade in hay, straw, thatching-grass, wood or coal, or other dangerously inflammable material; or

as a store-house for kerosine, petroleum, naphtha or any inflammable oil, spirit or explosive substance;

shall register the same in a book to be kept by the committee for the purpose.

(2) No place shall be newly used for any of the said purposes except under a license from the committee, which shall be renewable annually.

(3) The license shall not be withheld unless the committee considers that the business which it is intended to establish or maintain would be offensive or dangerous to persons residing in, or frequenting, the immediate neighbourhood.

(4) The committee may impose such conditions in respect of such license as it may think necessary.

(5) Whoever, without such registration or without a license, uses any place for any such purpose shall be punishable with fine which may extend to fifty rupees, and with further fine not exceeding ten rupees for every day during which the offence is continued after he has been convicted of such offence.

105. (1) If it is shown to the satisfaction of the committee, at a meeting, that any place registered or licensed under the last preceding section is a nuisance to the neighbourhood or likely to be dangerous to life, health or property, it may, by notice, require the occupier thereof to discontinue the use of the place, or to use it in such manner as will, in the opinion of the committee, render it no longer a nuisance or dangerous.

Power to prohibit such trades.

(2) Whoever, after such notice has been given, uses the place or permits it to be used in such a manner as to be a nuisance to the neighbourhood or dangerous, shall be punishable with fine which may extend to two hundred rupees, and with further fine not exceeding forty rupees for every day during which the offence is continued after he has been convicted of such offence.

Power to make Rules.

106. A committee may, from time to time, at a special meeting, make rules—

Power to make rules.

(*a*) for rendering licenses necessary for the proprietors or drivers of vehicles, boats or animals plying for hire within the limits of the municipality, and fixing the fees payable for such licenses and the conditions on which they are to be granted and may be revoked;

(*b*) for limiting the rates which may be demanded for the hire of any carriage, cart, boat or other conveyance, or of animals hired to carry loads, or for the services of persons hired to carry loads, and the loads to be carried by such conveyances, animals or persons, where they are hired within the municipality for a period not exceeding twenty-four hours, or for a service which would ordinarily be performed within twenty-four hours;

(*c*) for securing a proper registration of births, marriages and deaths, and for the taking of a census;

(*d*) for fixing, and from time to time varying, the number of persons who may occupy a building or part of a building which is let in lodgings or occupied by members of more than one family;

for the registration and inspection of such buildings;

for promoting cleanliness and ventilation in such buildings;

for the notices to be given and the precautions to be taken in the case of any infectious disease breaking out in such buildings;

and generally for the proper regulation of such buildings;

(*e*) for the inspection and proper regulation of encamping-grounds, pounds, zayáts, wharves not within the limits of any port, markets and slaughter-houses;

(*f*) for the holding of fairs and industrial exhibitions within the municipality and under its control;

(*g*) for controlling and regulating the use and management of burial and burning grounds;

(*h*) for the supervision and regulation of public wells, tanks, springs or other sources from which water is or may be made available for public use; and

(*i*) for carrying out the purposes of this Act:

Provided that the committee of a municipality in which the Hackney Carriage Act, 1879, is in force shall not make rules under clauses (*a*) and (*b*) in respect of any vehicles to which that Act applies.

Penalty for infringement of rules.

107. In making any rule under section 106 the committee may direct that a breach of it shall be punishable with fine which may extend to fifty rupees, and, when the breach is a continuing breach, with a further fine which may extend to five rupees for every day after the first during which the breach continues. In lieu of, or in addition to, such fine the Magistrate may require the offender to remedy the mischief so far as within his power.

Confirmation of rules.

108. No rule made under section 106 shall come into force until it has been confirmed by the Local Government and published for such time and in such manner as the Local Government may prescribe in this behalf.

Supplemental.

Execution of acts required to be done by any notice.

109. *(1)* When any notice under this chapter requires any act to be done for which no time is fixed by this Act, it shall fix a reasonable time for doing the same.

(2) When the owner or occupier of any land or building fails to comply with the terms of any notice under this chapter requiring him to do any act upon that land or building, the committee may, after six hours' notice, by its officers, cause the act to be done.

Recovery of costs of execution.

110. *(1)* Where, under this Act, the owner or occupier of property is required by the committee to execute any work and makes default in complying with the requirement, and the committee executes the work, the committee may recover the cost of the work from the person in default.

(2) If the person in default is the owner, the committee may, by way of additional remedy, recover the whole or any part of the cost from the occupier, and in such case the occupier may deduct any sum paid by him under this sub-section from the rent from time to time becoming due from him to the owner of the property in respect of which the payment is made, or otherwise recover it from the owner.

(3) Provided that an occupier shall not be required to pay, under the last sub-section, any greater sum than the amount of rent which is for the time being due from him to the owner, or which, after demand for payment of the money payable by him to the committee and notice not to pay rent without first deducting the amount so demanded, becomes payable by him to the owner, unless he refuses on application to him by the committee truly to disclose the amount of his rent and the name and address of the person to whom it is payable; but the burden of proof that the sum so demanded by the committee from the occupier exceeds the rent due at the time of the demand, or which has since accrued due, shall lie on the occupier.

(4) All money recoverable by a committee under this section may be recovered either by suit, or on application to a Magistrate having jurisdiction within the municipality by distress and sale of the moveable property of the person from whom the money is recoverable, and if payable by the owner of property shall, until it is paid, be a charge on the property.

(5) Nothing in this section shall affect any contract between an owner and an occupier.

Compensation out of municipal fund.

111. *(1)* The committee may make compensation out of the municipal fund to any person sustaining any damage by reason of the exercise of any of the powers vested in the committee, its officers and servants, under this Act, and shall make such compensation where the person sustaining the damage was not himself in default in the matter in respect of which the power was exercised.

(2) If any dispute arises touching the amount of any compensation which the committee is required by this Act to pay for injury to any building or land, it shall be settled in such manner as the parties may agree, or in default of agreement in the manner provided by the Land Acquisition Act, 1870, sections 3, 8 to 42, 51 to 53, and 56 to 59, so far as they can be made applicable.

Appeals against certain orders of committee.

112. *(1)* Any person aggrieved by any order made by a committee under the powers vested in it by sections 80, 101 or 105 may appeal within thirty days from the date thereof to the Commissioner or to the Deputy Commissioner as the Local Government may prescribe in this behalf; and no such order shall be liable to be called in question otherwise than by such appeal:

Provided that, if the Deputy Commissioner is himself a member of the committee, the appeal shall lie to the Commissioner or other officer empowered by the Local Government in this behalf.

(2) The appellate authority may, for sufficient cause, extend the period hereby allowed for appeal.

(3) The order of the appellate authority confirming, setting aside or modifying the order appealed against shall be final:

Provided that the order appealed against shall not be modified or set aside until the appellant and the committee have had reasonable opportunity of being heard.

CHAPTER VII.

OFFENCES AFFECTING THE PUBLIC HEALTH, SAFETY OR CONVENIENCE.

Depositing or throwing earth or materials or refuse, rubbish or offensive matter on roads or into drains.

113. Whoever, without the permission of the committee or in disregard of its orders, throws or deposits, or permits his servants or members of his household under his control to throw or deposit, earth or materials of any description, or refuse, rubbish or offensive matter of any kind, upon any public street or place, or into any public sewer or drain or any drain communicating therewith, shall be punishable with fine which may extend to twenty rupees.

Throwing corpse or carcass into river, &c.

114. Whoever throws or causes to be thrown any corpse or carcass or any part thereof into any river, stream, well, lake, canal, tank or any other such place shall be punishable with fine which may extend to twenty rupees.

Discharging sewage.

115. Whoever, without the permission of the committee, causes or allows the water of any sink, sewer or cesspool, or any other offensive matter, to flow, drain or be put upon any public street or place, or into any sewer or drain not set apart for the purpose, shall be punishable with fine which may extend to twenty rupees.

Non-removal of filth, &c.

116. Whoever, being the owner or occupier of any building or land, keeps or allows to be kept for more than twenty-four hours, or otherwise than in some proper receptacle, any carcass, dirt, dung, bones, ashes, night-soil or filth or any noxious or offensive matter in or upon such building or land, or suffers any such receptacle to be in a filthy or noxious state, or neglects to employ proper means to cleanse and purify the same, shall be punishable with fine which may extend to fifty rupees.

Making or altering drains without authority.

117. Whoever, without the permission of the committee, makes or causes to be made, or alters or causes to be altered, any drain leading into any of the sewers or drains vested in the committee shall be punishable with fine which may extend to fifty rupees.

Penalty for making or keeping latrines, &c., near any source of water-supply.

118. Whoever makes, without the permission of the committee, or keeps for a longer time than one week after notice to remove issued under section 94, any drain, latrine, urinal, cesspool or other receptacle for filth or refuse within fifty feet of any spring, well, tank, reservoir or other source from which water is or may be derived for public use, shall be punishable with fine which may extend to twenty rupees, and, when a notice has issued, with a further fine not exceeding five rupees for each day during which the offence is continued after the lapse of the period allowed for removal.

Keeping animals in disregard of orders.

119. Whoever keeps any swine, buffaloes, cows, oxen, sheep or goats in disregard of any orders which the committee may give to prevent them from becoming a nuisance, shall be punishable with fine which may extend to twenty rupees, and with a further fine which may extend to five rupees for every day after the first during which the offence is continued.

Feeding animals on deleterious substances.

120. Whoever feeds or allows to be fed any animal which is kept for dairy purposes or may be used for food on deleterious substances, filth or refuse of any kind, shall be punishable with fine which may extend to fifty rupees.

Driving vehicles without proper lights.

121. Whoever drives any vehicle after dark in any public street or thoroughfare unless the vehicle is properly supplied with lights or there is sufficient moonlight to render lights unnecessary, shall be punishable with fine which may extend to twenty rupees.

Discharging fire-arms, &c.

122. Whoever discharges fire-arms or lets off fireworks or fire-balloons, or engages in any game, in such a manner as to cause or be likely to cause danger to persons passing by or dwelling or working in the neighbourhood, or risk of injury to property, shall be punishable with fine which may extend to twenty rupees.

Suffering dogs to be at large.

123. Whoever, being the owner or person in charge of any dog which is likely to annoy or intimidate passengers, neglects to restrain it so that it shall not be at large without a muzzle in any public street or place, shall be punishable with fine which may extend to twenty rupees.

Altering, obstructing or encroaching upon streets, &c.

124. Whoever, without the permission of the committee, alters, obstructs or encroaches upon any public street, thoroughfare, sewer, drain or water-course, or displaces, takes up or alters the pavement or other materials or the fences or posts of any public street, place or thoroughfare, or deposits building-materials or makes any hole or excavation on or in any public street or thoroughfare, shall be punishable with fine which may extend to fifty rupees.

Quarrying, blasting, cutting timber or building

125. Whoever quarries, blasts, cuts timber or carries on building-operations in such a manner as to cause, or be likely to cause, danger to persons passing by or dwelling or working in the neighbourhood, shall be punishable with fine which may extend to fifty rupees.

Penalty on exposure of infected persons and things.

126. Any person who—

(1) while suffering from any dangerous infectious disorder wilfully exposes himself without proper precautions against spreading the said disorder in any street, public place, shop or public conveyance, or enters any public conveyance without previously notifying to the owner, conductor or driver thereof that he is so suffering; or,

(2) being in charge of any person so suffering, so exposes the sufferer; or

(3) gives, lends, sells, transmits or exposes, without previous disinfection, any bedding, clothing, rags or other things which have been exposed to infection from any such disorder,

shall be liable to a penalty not exceeding fifty rupees; and a person who, while suffering from any such disorder, enters any public conveyance without previously notifying to the owner or driver that he is so suffering, shall in addition be ordered by the Court to pay the owner and driver

the amount of any loss and expense they may incur in carrying into effect any measures requisite for disinfection of the conveyance:

Provided that no proceedings under this section shall be taken against persons transmitting with proper precautions any bedding, clothing, rags or other things for the purpose of having the same disinfected.

Penalty on failing to provide for disinfection of public conveyance.

127. Every owner or driver of a public conveyance shall immediately provide for the disinfection of the conveyance after it has to his knowledge conveyed any person suffering from a dangerous infectious disorder, and if he fails to do so he shall be liable to a penalty not exceeding fifty rupees; but no such owner or driver shall be required to convey any person so suffering until he has been paid a sum sufficient to cover any loss or expense incurred by him in carrying into effect the provisions of this section.

Picketing animals and collecting carts.

128. Whoever, contrary to the orders of the committee, pickets animals or collects carts on any public ground, or uses any such ground as a halting-place for vehicles or animals of any description or as a place of encampment, or causes or permits animals to stray, shall be punishable with fine which may extend to twenty rupees.

Keeping corpses or carrying corpses by prohibited routes or so as to cause annoyance.

129. Whoever, without the permission of the committee, keeps a corpse or causes it to be kept in or on any building or land when seventy-two hours after death have elapsed, or carries a corpse along a route prohibited by the committee or in a manner likely to cause annoyance to the public, shall be punishable with fine which may extend to ten rupees.

Destroying direction-posts, lamp-posts, &c.

130. Whoever, in any public place, without being authorised by the committee, defaces or disturbs any direction-post or lamp-post or fence, or injures any tree, or extinguishes any light shall be punishable with fine which may extend to ten rupees.

Penalty for disobedience to orders of committee under last chapter.

131. Whoever disobeys any lawful directions given by the committee by public notice under the powers conferred upon it by the last preceding chapter, or any written notice lawfully issued by it under the powers so conferred, or fails to comply with the conditions subject to which any permission was given by the committee to him under those powers, shall, if the disobedience or omission is not an offence punishable under any other section, be punishable with fine which may extend to fifty rupees, and, in the case of a continuing breach, with a further fine which may extend to five rupees for every day after the first during which the breach continues:

Provided that, when the notice fixes a time within which a certain act is to be done and no time is specified in this Act, it shall rest with the Magistrate to determine whether the time so fixed was a reasonable time within the meaning of this Act.

Prosecution to be suspended in certain cases.

132. Any prosecution for an offence under section 80, or section 105, or under section 131, when the order which has been disobeyed is appealable, shall be suspended, when the Magistrate learns that an appeal has been instituted, pending the decision of the appeal; and if the order is set aside on appeal, disobedience thereto shall not be deemed an offence against those sections.

CHAPTER VIII.

CONTROL.

Control by Commissioner and Deputy Commissioner.

133. The Commissioner or the Deputy Commissioner may—

(a) enter on and inspect, or cause to be entered on and inspected, any immoveable property situate within the limits of his division or district respectively and occupied by any municipal committee or joint committee, or any work which is in progress within those limits under the direction of any such committee or joint committee;

(b) call for and inspect any book or document in the possession or under the control of any such committee or joint committee having authority within those limits;

(c) require any such committee or joint committee to furnish such statements, accounts, reports and copies of documents relating to the proceedings or duties of the committee or joint committee, as he may think fit to call for; and

(d) record in writing, for the consideration of any such committee or joint committee, any observations he may think proper in regard to the proceedings or duties of the committee or joint committee:

Provided that—

(1) when the Deputy Commissioner is a member of a committee or joint committee, he shall not exercise, in respect of that committee or joint committee, the powers conferred upon him by this section; and

(2) in any of the municipalities of Rangoon, Maulmain, Akyab and Bassein, and any other municipalities to which the Local Government may extend this clause, the said powers shall be exercised by the Local Government and not by any authority mentioned in the foregoing part of this section.

Power to suspend action under Act.

134. *(1)* The Commissioner or the Deputy Commissioner may, by order in writing, suspend within the limits of the division or district (as the case may be) the execution of any resolution or order of a municipal committee or joint committee, or prohibit the doing within those limits of any act which is about to be done, or is being done, in pursuance of or under cover of this Act, if, in his opinion, the resolution, order or act is in excess of the powers conferred by law, or the execution of the resolution or order, or the doing of the act, is likely to lead to a serious breach of the peace, or to cause serious injury or annoyance to the public or to any class or body of persons.

(2) When a Commissioner or Deputy Commissioner makes any order under this section, he shall forthwith forward a copy thereof, with a statement of his reasons for making it, and of any representations regarding it submitted to him by the municipal committee, to the Local Government, which may thereupon rescind the order

or direct that it continue in force with or without modification, permanently or for such period as it thinks fit.

Extraordinary powers of Deputy Commissioner in case of emergency.

135. *(1)* In cases of emergency, the Deputy Commissioner may provide for the execution of any work, or the doing of any act, which a municipal committee is empowered to execute or do, and the immediate execution or doing of which is in his opinion necessary for the service or safety of the public, and may direct that the expense of executing the work or doing the act shall be forthwith paid by the committee.

(2) If the expense is not so paid, the Deputy Commissioner may make an order directing the person having the custody of the balance of the municipal fund to pay the expense, or as much thereof as is, from time to time, possible, from the balance in priority to any or all other charges against the same.

(3) The Deputy Commissioner shall forthwith report to the Commissioner every case in which he uses the powers conferred upon him by this section.

Powers of Local Government in case of default of committee.

136. *(1)* If at any time it appears to the Local Government that a municipal committee has made default in performing any duty imposed on it by or under this or any other Act for the time being in force, the Local Government may, by order in writing, fix a period for the performance of that duty.

(2) If that duty is not performed within the period so fixed, the Local Government may appoint the Deputy Commissioner to perform it, and may direct that the expense of performing it shall be paid, within such time as it may fix, to the Deputy Commissioner by the committee.

(3) If the expense is not so paid, the Deputy Commissioner with the previous sanction of the Local Government, may make an order directing the person having the custody of the balance of the municipal fund to pay the expense, or so much thereof as is from time to time possible, from the balance in priority to any or all other charges against the same.

Power of Local Government to supersede committee in case of incompetency, persistent default or excess or abuse of powers.

137. *(1)* If a municipal committee is not competent to perform, or persistently makes default in the performance of, the duties imposed on it by or under this or any other Act for the time being in force, or exceeds or abuses its powers, the Local Government may, with the previous approval of the Governor General in Council, by an order published, with the reasons for making it, in the local official Gazette, declare the committee to be incompetent or in default or to have exceeded or abused its powers, as the case may be, and supersede it for a period to be specified in the order.

(2) When a committee is so superseded, the following consequences shall ensue :—

(a) All members of the committee shall, as from the date of the order, vacate their offices as such members.

(b) All powers and duties of the committee may, during the period of supersession, be exercised and performed by such person or persons as the Local Government appoints in that behalf.

(c) All property vested in the committee shall, during the period of supersession, vest in the Local Government.

(3) On the expiration of the period of supersession specified in the order, the committee shall be reconstituted, and the persons who vacated their offices under clause *(a)* shall not be deemed disqualified from being members.

Disputes.

138. *(1)* If any dispute, for the decision of which this Act does not otherwise provide, arises between two or more committees constituted under this Act, or between any such committee and a cantonment authority, the matter shall be referred—

(a) to the Deputy Commissioner, if the local authorities concerned are in the same district;

(b) to the Commissioner or Commissioners of the division or divisions, if the local authorities concerned are in different districts; and

(c) to the Local Government, if the local authorities concerned are in different divisions and the Commissioners of those divisions cannot agree.

(2) The decision of the authority to which any dispute is referred under this section shall be final.

(3) If in the case mentioned in clause *(a)* the Deputy Commissioner is a member of one of the committees concerned, his functions under this section shall be discharged by the Commissioner.

(4) "Local authority" in this section means a municipal committee or cantonment authority.

Annual reports and statements.

139. *(1)* A municipal committee shall, at the close of each year or of such other period as may, from time to time, be fixed by the Local Government in this behalf, submit to the Local Government a statement of its receipts and disbursements, in such form as the Local Government may prescribe, and a general report of its proceedings during that period :

Provided that separate accounts shall be submitted of—

(a) all receipts of the water-tax, lighting-tax and scavenging-tax, and of all expenditure on the purposes for which those taxes are levied, respectively; and

(b) all income under the heads mentioned in section 62, and all expenditure on educational purposes.

(2) Accounts submitted under this section shall be examined or audited in such manner as the Local Government prescribes.

Estimates of receipts and expenditure.

140. *(1)* A municipal committee shall submit before such date in each year as may be directed by the Local Government, for the sanction of such authority as the Local Government may appoint in this behalf, an estimate of its probable receipts for the financial year next following, with proposals for its expenditure, and may, from time to time, submit in like manner further estimates or proposals amending the same.

(2) No expenditure shall be incurred by the committee unless it is provided for in a proposal sanctioned under this section.

(3) An abstract of the annual estimate and proposals submitted and sanctioned as required by this section shall be published in such manner as the Local Government directs.

Sanction to works.

141. (1) No new work, the estimated cost of which exceeds five hundred rupees, shall be begun by a municipal committee, nor shall any contract be entered into by it in respect of any such work, until a plan and estimate thereof have been approved by the committee at a meeting.

(2) If the estimated cost of any such new work has not been specifically provided for in proposals submitted and sanctioned in manner mentioned in section 140, or exceeds—

twenty thousand rupees in the case of the municipalities of Rangoon, Maulmain, Bassein and Akyab, or

one-tenth of the estimated annual income of the municipal fund in the case of any other municipality,

it shall not be begun, nor shall any contract be entered into in respect of it, until the plan and estimate have been submitted to and approved by the Local Government, or by an officer empowered by the Local Government in this behalf.

Powers of Commissioner.

142. In all matters connected with the administration of this Act a Commissioner shall have and exercise the same authority and control over a Deputy Commissioner subordinate to him as he has and exercises over the Deputy Commissioner in the general and revenue administration.

Additional power of Local Government to frame forms and make rules.

143. The Local Government may frame forms for any proceeding of a municipal committee for which it considers that a form should be provided, and may, in addition to any other powers to make rules conferred by this Act, make rules consistent with this Act—

(a) as to the intermediate office or offices, if any, through which correspondence between municipal committees and the Local Government or officers of that Government and representations addressed to the Local Government under this Act shall pass;

(b) as to the preparation of estimates of receipts and expenditure of committees, and as to the conditions subject to which such estimates may be sanctioned;

(c) as to the returns, statements and reports to be submitted by committees; and

(d) generally for the guidance of committees and public officers in all matters connected with the carrying out of this Act.

CHAPTER IX.

SUPPLEMENTAL.

Criminal Procedure.

Powers and duties of police in respect of offences against Act and rules, and assistance to municipal authorities.

144. (1) Every police-officer employed in a municipality shall give immediate information to the committee of any offence committed against this Act or the rules made thereunder, and shall be bound to assist all members, officers and servants of the committee in the exercise of their lawful authority.

(2) Any such police-officer may arrest any person committing in his view any offence against this Act or the rules made thereunder—

(a) if the name and address of the person are unknown to him, or

(b) if the person declines to give his name and address, or if there is reason to doubt the accuracy of the name and address if given.

(3) A person arrested under this section may be detained until his name and address are correctly ascertained:

Provided that no person so arrested shall be detained longer than is necessary for bringing him before a Magistrate unless the order of a Magistrate for his detention is obtained.

Prosecutions.

145. Prosecutions for offences against this Act or the rules made under it shall not be instituted except by order of or with the approval of the municipal committee.

Member not to be deemed interested in prosecution.

146. A Judge or Magistrate shall not be deemed to be a party to or personally interested in any such prosecution within the meaning of section 555 of the Code of Criminal Procedure merely because he is a member of the committee by the order or with the approval of which it has been instituted.

X of 1882.

Saving of prosecutions under other laws.

147. Nothing in this Act shall prevent any person from being prosecuted under any other law for any act or omission which constitutes an offence against this Act or the rules made under it, or from being liable under that other law to any other or higher punishment or penalty than that provided by this Act or the rules made under it:

Provided that a person shall not be punished twice for the same offence.

Rules.

Procedure for making rules under section 7, 48, 106 or 113.

148. (1) The authority empowered to make rules under section 7, 48, 106 or 113 shall, before making them, publish, in such manner as may in its opinion be sufficient for giving information to persons interested, a draft of the proposed rules, together with a notice specifying a date at or after which the draft will be taken into consideration; and shall, before making the rules, receive and consider any objection or suggestion which may be made by any person with respect to the draft before the date so specified.

(2) Every rule made under any of those sections shall be published in the local official Gazette in English and in such other language or languages as the Local Government may direct; and such publication shall be conclusive evidence that the rule has been made as required by this section.

Continuance of existing rules.

149. (1) The Local Government may by notification in the official Gazette, direct that any rules made under the British Burma Municipal Act, 1874, and in force in any local area being, or comprised in, a municipality

VII of 1874.

constituted under this Act at the time the municipal committee for that municipality comes into existence under section 13, shall, so far as they are consistent with this Act and within the powers conferred thereby, be deemed to have been made under this Act, and shall continue in force until repealed by new rules so made.

(2) The authority empowered to make such new rules shall, as soon as may be, make them and take such action as may be requisite for bringing them into force.

Recovery of Money.

150. All fees and all rents and other sums due on account of property for the time being vested in or managed by the municipal committee, and all arrears of taxes and other money due for water supplied or otherwise under this Act, may be recovered as if they were arrears of land-revenue.

Recovery of money.

Notices.

151. *(1)* Every notice issued by a committee under this Act or under any rule made thereunder shall be in writing, and shall be sufficiently authenticated by the signature of the president or secretary, and may be served on the person to whom it is addressed, or left at his usual place of abode or business with some adult male member or servant of his family, or, if it cannot be so served, may be posted on some conspicuous part of his place of abode or business.

Authentication, service and validity of notices.

(2) If the place of abode or business of the person to whom the notice is addressed is not within the limits of the municipality, the notice may be served by posting it in a registered cover addressed to his usual place of abode.

(3) If the place of abode or business of the owner of any property is not known, every such notice addressed to him as such owner may be served on the occupier.

(4) If the place of abode or business of the occupier of any property is not known, every such notice addressed to him as such occupier may be served by posting it on some conspicuous part of the property.

(5) No notice issued by the committee under this Act or under any rule made thereunder shall be invalid for defect of form.

152. When any notice is, under the provisions of this Act, to be given to, or served on, the owner or occupier of any property and he is unknown, it may be given or served—

Mode of giving notice to owner or occupier of property.

(a) by delivering a written notice to some person on the property, or, if there is no person on the property to whom it can be delivered, by fixing it on some conspicuous part of the property; or

(b) by putting into the post a prepaid letter containing a written notice, and addressed by the description of the "owner" or "occupier" of the property (naming it) in respect of which the notice is given, without further name or description.

153. Every public notice given by a committee under this Act or under any rule made thereunder shall be published by proclamation or in such other manner as the Local Government may, by rule, direct.

Publication of public notices.

Alteration of Municipal Limits.

154. The Local Government may, by notification published in the official Gazette, and in such other manner as the Local Government may determine, declare its intention—

Notification of intention to alter limits of municipality.

(*a*) to exclude from a municipality any local area comprised therein and defined in the notification, or

(*b*) to include within a municipality any local area in the vicinity of the same and defined in the notification :

Provided that, where the local area is a military cantonment or part of a military cantonment, a notification shall not be published under this section in respect of it without the previous consent of the Governor General in Council.

155. *(1)* Any inhabitant of a municipality or local area in respect of which a notification has been published in the official Gazette under section 154 may, if he objects to the alteration proposed, submit his objection in writing to the Local Government within six weeks from the publication of the notification in the official Gazette, and the Local Government shall take his objection into consideration.

Alteration of limits of municipality.

(2) When six weeks from the publication of the notification in the official Gazette have expired, and the Local Government has considered the objections (if any) which have been submitted under sub-section (1), the Local Government may, by a notification in the official Gazette, exclude the local area from the municipality or include it therein, as the case may be.

Effect of exclusion of local area from municipality.

156. *(1)* When a local area is excluded from a municipality under section 155—

(a) this Act, and all rules, orders, directions and powers made, issued or conferred under this Act, shall cease to apply thereto; and

(b) the Local Government shall, after consulting the municipal committee, frame a scheme determining what portion of the balance of the municipal and school funds and other property vested in the municipal committee shall vest in Her Majesty for the benefit of the local area, and in what manner the liabilities of the committee shall be apportioned between the committee and the Secretary of State for India in Council; and, on the publication of the scheme in the local official Gazette, the property and liabilities shall vest and be apportioned accordingly.

(2) All property vested in Her Majesty under sub-section (1) shall be applied under the orders of the Local Government to discharging the liabilities imposed on the Secretary of State for India in Council under that sub-section, or for the promotion of the safety, health, welfare or convenience of the inhabitants of the local area.

157. When a local area is included in a municipality under section 155, this Act, and, except as the Local Government may otherwise, by notification in the official Gazette, direct all rules, orders, directions and powers made issued or conferred under this Act and in force

Effect of including local area in municipality.

throughout the whole municipality at the time the local area is so included, shall apply to the local area.

Powers to except Municipalities from Provisions of Act.

Power to except municipality from provisions of Act unsuited thereto.

158. *(1)* If the circumstances of any municipality are such that, in the opinion of the Local Government, any of the provisions of this Act are unsuited thereto, the Local Government may, by notification in the official Gazette, except the municipality from the operation of those provisions; and thereupon those provisions shall not apply to the municipality until again applied thereto by like notification.

(2) While the exception remains in force, the Local Government may make rules for the guidance of the committee and public officers in respect of the matters excepted from the operation of the said provisions.

Miscellaneous.

Saving of Act XI of 1879.

159. Nothing in this Act shall affect the Local Authorities Loans Act, 1879. XI of 1879

Powers of Governor General in Council and of Local Government exercisable from time to time.

160. All powers conferred by this Act on the Governor General in Council or on the Local Government may be exercised from time to time as occasion requires.

Decision of questions as to whether persons are "inhabitants."

161. If any question arises whether a person or persons of a specified class is or are an inhabitant or inhabitants of a local area within the meaning of this Act, the decision thereon of the Local Government shall be conclusive.

D. FITZPATRICK,
Secy. to the Govt. of India.

GOVERNMENT OF INDIA.

72. Refund of fee paid on application for revision.
73. Saving of certain appointments, rules and forms, notifications, powers and orders.
74. Amendment of Act X of 1870, section 3.
75. Amendment of Act XXVIII of 1868, section 42.

THE SCHEDULE.—ACTS REPEALED.

An Act to amend the Law relating to Courts in the Panjáb.

WHEREAS it is expedient to amend the law relating to Courts in the Panjáb; and whereas the Secretary of State for India in Council has given his previous sanction to the passing of this Act; It is hereby enacted as follows:—

CHAPTER I.

PRELIMINARY.

Short title, local extent

1. *(1)* This Act may be called the Panjáb Courts Act, 1884;

(2) It extends to the territories for the time being under the administration of the Lieutenant-Governor of the Panjáb; and

(3) it shall come into force on the first day of November, 1884.

(4) Any power conferred by this Act to make rules or to issue orders creating territorial divisions, establishing Courts, appointing and posting officers, or fixing the pecuniary or local limits of their jurisdiction or conferring powers may be exercised at any time after the passing of this Act; but a rule or order so made or issued shall not take effect until the Act comes into force.

Repeal of Acts.

2. On and from that day the Acts mentioned in the schedule hereto annexed shall be repealed to the extent specified in the third column thereof.

Definitions.

3. In this Act, unless there is something repugnant in the subject or context,—

(1) "Assistant Commissioner" includes Extra Assistant Commissioner:

(2) "Revenue Court" means the Court of a Financial Commissioner, of a Commissioner, of a Deputy Commissioner, of an Assistant Commissioner, of a Tahsíldár or of a Náib Táhsíldár exercising jurisdiction in suits of any of the classes mentioned in section 45:

(3) "small cause" means a suit of the nature cognizable in a Court of Small Causes constituted under Act XI of 1865, and any other suit not being a suit of any description specified in section 19 of the Presidency Small Cause Courts Act, 1882, which the Chief Court, with the sanction of the Local Government, may direct to be treated as a small cause for the purposes of appeal:

(4) "land" means land assessed or liable to be assessed to the land-revenue or whereof the land-revenue has been wholly or in part released, compounded for, redeemed or assigned, and all land the property of Government not within the site of any town or village:

(5) "rent" means whatever is payable by an occupant of land on account of the use or occupation thereof:

(6) "tenant" means any occupant of land liable to pay rent therefor, but does not include an under-proprietor:

(7) "landlord" means any person entitled to receive rent paid by a tenant; and

(8) "value", used with reference to a suit, means the amount or value of the subject-matter of the suit.

CHAPTER II.

THE CHIEF COURT.

Constitution of Chief Court and appointment and tenure of Judges.

4. There shall continue to be a Chief Court consisting of three or more Judges, who shall be appointed by the Governor General in Council and shall hold their offices during his pleasure, and of whom one at least shall always be a barrister of not less than five years' standing.

Rank and precedence of Judges of Chief Court.

5. The Judges of the Chief Court shall have rank and precedence according to the seniority of their appointments as such Judges:

Provided that a Judge permanently appointed

The Panjáb Courts Act, 1884
(Chapter II.—The Chief Court—Sections 6-11)

Civil appellate jurisdiction

6 The Chief Court shall be deemed, for the purposes of all enactments for the time being in force, to be the highest Civil Court of appeal in the territories to which this Act extends.

Criminal jurisdiction

7. The Chief Court shall be the highest Court of criminal appeal or revision in the said territories, and shall have power, as a Court of original jurisdiction, to try European British subjects committed to it for trial

Delegation of powers to members of Court

8. *(1)* Except as by this Act or by any other enactment for the time being in force otherwise provided, the Chief Court may make rules to provide in such manner as it thinks fit for the exercise by one or more of its Judges of any of its powers

Provided that no decree, sentence, decision or order of any Court, not being an order within the meaning of the Code of Civil Procedure, shall be reversed or modified by any Judge of the Chief Court sitting alone.

182

(2) When the Chief Court consists of more than three Judges, it may make rules determining what number of Judges [illegible] the time [illegible] constitute a full bench of the Court, and may by these rules [illegible] the mode [illegible] manner in which Judges shall [illegible] full bench when a full bench [illegible] sitting [illegible]

(3) Subject to the provisions of [illegible] section [illegible] the Senior Judge [illegible] determine [illegible] Judge [illegible] each case shall [illegible] and which Judges of the Court shall constitute any bench

Appellate jurisdiction [illegible] Court

9 Except [illegible] provided by any enactment [illegible] for the time being in force [illegible] an appeal shall [illegible] order made by the Chief Court—

(a) in exercise of its original jurisdiction [illegible] withdrawn from other Courts under section [illegible] of the Code of Civil Procedure, [illegible]

882

(b) in exercise of any other original jurisdiction of a civil nature to which the Chief Court may by rule extend this section,

shall lie in the cases and in manner following (that is to say) —

(1) if the decree or order is made by a single Judge, the appeal shall be either to a bench consisting of two other Judges or to a full bench as the Court may, by general rule or special order, direct,

(2) if the decree or order is made by a bench of Judges not being a full bench, and the Judges differ in opinion, the appeal shall lie to a full bench.

Rule of decision when Judges differ

10 Except as otherwise provided by any enactment for the time being in force,

(1) when there is a difference of opinion among the Judges composing any bench of the Chief Court, the decision shall be in accordance with the opinion of the majority of those Judges,

(2) If there is no such majority, then—

(a) if the bench is a full bench, or is exercising original [illegible] jurisdiction, the decision shall be in accordance with the opinion of the Senior Judge;

(b) in other cases, the bench before which the question has arisen shall refer the question to a full bench and shall dispose of the case in accordance with the decision of the full bench.

Power to refer questions to full bench

11 Any single Judge of the Chief Court and any bench of Judges of that Court, not being a full bench, may in any case refer for the decision of a full bench any question of law or custom having the force of law, or the construction of any document, or the admissibility of any evidence arising before the Judge or bench, and shall dispose of the case in accordance with the decision of the full bench on the question.

Ministerial officers

12. *(1)* The Chief Court may appoint a Registrar and Deputy Registrar, and such other ministerial officers as may be necessary for the administration of justice by the Court, and for the exercise and performance of the powers and duties conferred and imposed on it by this Act.

(2) The appointment of the Registrar shall be subject to the sanction of the Local Government.

(3) The officers appointed under this section shall exercise such powers and discharge such duties of a non-judicial or quasi-judicial nature as the Chief Court may direct.

(4) Any such officer may be suspended or dismissed from his office by order of the Chief Court

Provided that neither the Registrar nor the Deputy Registrar shall be dismissed without the previous sanction of the Local Government.

[illegible]

13 The general superintendence and control over all other Civil Courts shall be vested in, and all such Courts shall be subordinate to, the Chief Court

Power to make rules

14 *(1)* The Chief Court may make rules consistent with this Act and any other enactment for the time being in force —

(a) providing for the translation of any papers filed in the Chief Court and copying or printing any such papers or translations, and requiring from the persons at whose instance or on whose behalf they are filed payment of the expenses thereby incurred;

(b) declaring what persons shall be permitted to practise as petition-writers in the Courts of the Panjab, and regulating the conduct of persons so practising,

(c) determining in what cases persons practising in those Courts shall be permitted to address the Court in English,

(d) prescribing forms for seals to be used by those Courts,

(e) regulating the procedure in cases where any person is entitled to inspect a record of any such Court or obtain a copy of the same, and prescribing the [illegible] payable by such persons [illegible]

(f) conferring [illegible] [illegible] it thinks [illegible] the mode in which [illegible] conferred and imposed [illegible]

The Panjáb Courts Act, 1884.
(Chapter II.—The Chief Court.—Sections 15-16.)
(Chapter III.—The Subordinate Civil Courts.—Sections 17-24.)

(*g*) prescribing forms for such books, entries, statistics and accounts as it thinks necessary to be kept, made or compiled in those Courts or submitted to any authority;

(*h*) providing for the inspection of those Courts and the supervision of the working thereof; and

(*i*) regulating all such matters as it may think fit, with a view to promoting the efficiency of the judicial and ministerial officers of those Courts and maintaining proper discipline among those officers.

(2) A rule made under clause (*a*), (*b*), (*c*), (*f*) (*g*), (*h*) or (*i*) shall not take effect until it has been sanctioned by the Local Government and has been published in the official Gazette.

(3) Whoever breaks any rule made under clause (*b*) shall be punished with a fine which may extend to fifty rupees.

Registers, books, accounts and statements to be kept and furnished by Chief Court.

15. *(1)* The Chief Court shall keep such registers, books and accounts as may be necessary for the transaction of the business of the Court, and shall submit to the Local Government such of those registers, books and accounts, and such statements of the work done in the Court, as may be required by the said Government.

(2) The Chief Court shall also comply with such requisitions as may be made by the Governor General in Council, or by the Local Government, for certified copies of, or extracts from, the records of the Chief Court and the Courts subordinate thereto.

Procedure of Chief Court in exercise of civil jurisdiction.

16. *(1)* The Chief Court, when sitting as a Court of civil judicature, shall take evidence and record judgments and orders in such manner as it, by rule, directs, and may frame forms for any proceeding in the Court in the exercise of its civil jurisdiction.

(2) The following provisions of the Code of Civil Procedure shall not apply to the Chief Court in the exercise of its original civil jurisdiction, namely, sections 119, 182 to 185 (both inclusive), 187, 189 to 191 (both inclusive), 192 (so far as it relates to the manner of taking evidence), 198, 200 to 204 (both inclusive), and so much of section 409 as relates to the making of a memorandum.

(3) Section 579 of the said Code shall not apply to the Chief Court in the exercise of its appellate jurisdiction.

CHAPTER III.

THE SUBORDINATE CIVIL COURTS.

Classes of Courts.

Classes of Courts.

17. Besides the Chief Court, the Courts of Small Causes established under Act XI of 1865 and the Courts established under any other enactment for the time being in force, there shall be the following classes of Civil Courts (namely):—

(*a*) the Divisional Court;

(*b*) the Court of the District Judge;

(*c*) the Court of the Subordinate Judge;

(*d*) the Court of the Munsif.

Territorial Divisions.

Civil divisions and districts.

18. *(1)* For the purposes of this Act the Local Government shall divide the territories under its administration into civil divisions, and each civil division into civil districts.

(2) The Local Government may alter the limits or the number of these divisions and districts.

Divisional and District Courts.

Establishment of Divisional Courts.

19. *(1)* The Local Government shall appoint as many persons as it thinks necessary to be Divisional Judges, and shall for each civil division establish a Divisional Court consisting of one or more such Judges.

(2) The Local Government may, where a Divisional Court consists of more than one Judge, by general rule or special order determine which of them shall be deemed to be the senior.

Establishment of District Courts.

20. The Local Government shall appoint as many persons as it thinks necessary to be District Judges, and shall post one such person to each district as District Judge of that district:

Provided that the same person may, if the Local Government thinks fit, be appointed to be District Judge of two or more districts.

Distribution of business in Divisional Court.

21. The Chief Court may, subject to the provisions of this Act and any other enactment for the time being in force, make rules to provide for the exercise of any of the powers of a Divisional Court consisting of more than one Judge by one or more Judges of the Court:

Provided that no decree, decision or order of any Court, not being an order within the meaning of the Code of Civil Procedure, shall be reversed or modified by a single Judge of a Divisional Court consisting of more than one Judge.

Original jurisdiction of Divisional and District Courts in suits.

22. Except as otherwise provided by any enactment for the time being in force, the Divisional Court and the Court of the District Judge shall have jurisdiction in original civil suits without limit as regards the value.

District Court to be principal Civil Court of original jurisdiction.

23. Except as otherwise provided by any enactment for the time being in force, the Court of the District Judge shall be deemed to be the District Court or principal Civil Court of original jurisdiction in the district:

Provided that—

(*a*) for the purposes of the Indian Divorce Act, the Divisional Court shall be deemed to be the District Court for all districts comprised in the division; and

(*b*) the Local Government may direct that the Divisional Court shall for any other purpose be deemed to be the District Court or principal Civil Court of original jurisdiction for any district comprised in the division.

Subordinate Judges and Munsifs.

Appointment of Subordinate Judges.

24. The Local Government may appoint as many persons as it thinks necessary to be Subordinate Judges.

The Panjáb Courts Act, 1884.
(Chapter III.—The Subordinate Civil Courts.—Sections 25-34.)

25. *(1)* The Local Government may fix the number of Munsifs to be appointed, and, when there is any vacancy in that number, the Chief Court may, subject to the rules (if any) made under sub-section (2), appoint such person to the same as it thinks fit.

Appointment of Munsifs.

(2) The Chief Court may, with the previous sanction of the Local Government, make rules as to the qualifications of persons to be appointed Munsifs.

26. *(1)* The jurisdiction to be exercised in original civil suits as regards the value by any person appointed to be a Subordinate Judge or Munsif shall in the case of a Subordinate Judge be determined by the Local Government, and in the case of a Munsif by the Chief Court, either by including him in a class or grade, or otherwise as it thinks fit.

Pecuniary limits of jurisdiction of Subordinate Judges and Munsifs.

(2) The jurisdiction in the case of a Subordinate Judge may be without limit, but in the case of a Munsif shall not extend to suits the value of which exceeds one thousand rupees.

27. *(1)* The local limits of the jurisdiction of a Subordinate Judge shall be such as the Local Government may define.

Local limits of their jurisdiction.

(2) The local limits of the jurisdiction of a Munsif shall be such as the Chief Court may define.

(3) When the Local Government posts a Subordinate Judge or the Chief Court posts a Munsif to a district, the local limits of the district shall, in the absence of any direction to the contrary, be deemed to be the local limits of his jurisdiction.

28. *(1)* The Local Government may confer on any person all or any of the powers conferable under this Act on a Subordinate Judge or Munsif with respect to particular classes of cases, or with respect to cases generally in any local area, and may withdraw, or suspend the exercise of, any powers so conferred.

Special Judges and Benches.

(2) The Local Government may direct any uneven number of persons invested with powers of the same description and exercisable within the same local area under this section to sit together as a bench; and those powers shall, while the direction remains in force, be exercised by the bench so constituted, and not otherwise.

(3) The decision of the majority of the members of a bench constituted under this section shall be deemed to be the decision of the bench.

(4) Persons on whom powers are conferred under this section shall be called Special Judges, and such persons and the benches constituted under this section shall be deemed for the purposes of this Act to be Subordinate Judges or Munsifs, as the Local Government may direct.

29. *(1)* The Chief Court may, by order, authorize any District Court to transfer to a Subordinate Judge or Munsif under its control any of the following proceedings or any class of such proceedings specified in the order, and then pending or thereafter instituted before the District Court (that is to say):—

Power to transfer to Subordinate Judge or Munsif certain proceedings pending before District Court.

(a) applications for certificates under Act XXVII of 1860 *(for facilitating the collection of debts on successions, and for the security of parties paying debts to the representatives of deceased persons)*;

(b) proceedings under Act XL of 1858 *(for making better provision for the care of the persons and property of Minors in the Presidency of Fort William in Bengal)* or Act IX of 1861 *(to amend the law relating to Minors)*.

(2) The District Court may withdraw any proceedings so transferred, and may either itself dispose of them, or, with the previous sanction of the Chief Court, transfer them to any other Subordinate Judge or Munsif under its control.

(3) All proceedings so transferred shall be disposed of by the Subordinate Judge or Munsif (as the case may be) subject to the rules applicable to like cases when disposed of by the District Court.

Small Cause Jurisdiction.

30. The Local Government may confer, within such local limits as it thinks fit, upon any District Judge, Subordinate Judge or Munsif the jurisdiction of a Judge of a Court of Small Causes under Act XI of 1865 for the trial of suits cognizable by such Courts up to such value, not exceeding five hundred rupees, as it thinks fit, and may withdraw any jurisdiction so conferred.

Power to confer Small Cause Court jurisdiction.

Suspension and Removal.

31. *(1)* Any Divisional Judge, District Judge or Subordinate Judge may be suspended or removed from office by the Local Government.

Suspension and removal.

(2) Any Munsif may, subject to the control of the Local Government, be suspended or removed from office by the Chief Court.

Valuation of Suits.

32. When the subject-matter of suits of any class is such that in the opinion of the Chief Court it does not admit of being satisfactorily valued, the Chief Court may, with the previous sanction of the Local Government, direct that suits of that class shall, for all or any of the purposes of this Act, be treated as if their subject-matter were of such value as the Chief Court thinks fit to specify in this behalf.

Valuation of suits.

Administrative Control.

33. *(1)* Subject to the general superintendence and control of the Chief Court, every Divisional Court shall control all other Civil Courts in the division.

Controlling powers of Divisional and District Courts.

(2) Subject as aforesaid and to the control of the Divisional Court, every District Court shall control all other Civil Courts in the district.

34. *(1)* Every Divisional Court may exercise, as regards the Courts under its control, the same powers of withdrawal, trial and transfer as are conferred by section 25 of the Code of Civil Procedure on a District Court.

Power of Divisional Court to transfer business.

(2) The Court trying any suit withdrawn under this section from a Court of Small Causes shall, for the purposes of the suit, be deemed to be a Court of Small Causes.

XIV

The Panjáb Courts Act, 1884.
(Chapter III.—The Subordinate Civil Courts.—Sections 35-38.)
(Chapter IV.—Appellate Jurisdiction in Civil Cases.—Sections 39-43.)

Power to distribute business.

35. Notwithstanding anything contained in the Code of Civil Procedure, every Divisional Court and District Court may, by written order, direct that any civil business cognizable by it and the Courts under its control shall be distributed among those Courts in such manner as it thinks fit:

Provided that no direction issued under this section shall empower any Court to exercise any powers or deal with any business beyond the limits of its proper jurisdiction.

Ministerial officers of Subordinate Courts.

36. *(1)* The ministerial officers of the Divisional and District Courts and Courts of Small Causes shall be appointed, and may be suspended and dismissed, by the Judges of those Courts respectively.

(2) The ministerial officers of all Courts controlled by a District Court, other than Courts of Small Causes, shall be appointed, and may be suspended and dismissed, by the District Court.

(3) Every appointment under this section shall be subject to such rules as the Local Government prescribes in this behalf, and, in dealing with any matter under this section, a District Court or a Judge of a Court of Small Causes shall act subject to the control of the Divisional Court.

Power to fine ministerial officers.

37. *(1)* A Divisional or District Court or any Court under the control of a District Court may fine, in an amount not exceeding one month's salary, any ministerial officer of the Court for misconduct or neglect in the performance of his duties.

(2) The District Court, subject to the general control of the Divisional Court, may, on appeal or otherwise, reverse or modify an order made under sub-section (1) by any Court under its control other than a Court of Small Causes, and may of its own motion fine up to the amount of one month's salary any ministerial officer of any Court under its control other than a Court of Small Causes.

Delegation of District Judge's powers.

38. A District Court may, with the previous sanction of the Local Government, delegate to any Subordinate Judge in the district the powers conferred on a District Court by sections 33, 35 and 36 of this Act, and section 25 of the Code of Civil Procedure, to be exercised by the Subordinate Judge in any specified portion of the district subject to the control of the District Court.

CHAPTER IV.

APPELLATE JURISDICTION IN CIVIL CASES.

First appeals to whom to lie.

39. *(1)* Appeals from the decrees of a Munsif in small causes shall, when such appeals are allowed by law, and the value of the suit does not exceed [illegible] rupees, lie to the District Judge.

(2) Appeals from the decrees of a District or Subordinate Judge in original suits, when the value of the suit exceeds five thousand rupees, and appeals from the decrees of the Divisional Court in original suits, shall, when such appeals are allowed by law, lie to the Chief Court.

(3) Appeals from decrees in original suits, not hereinbefore or by any other enactment for the time being in force provided for, shall, when such appeals are allowed by law, lie to the Divisional Court.

Further appeal from Divisional Court.

40. A further appeal shall lie to the Chief Court in the following cases from an appellate decree of a Divisional Court on any ground which would be a good ground of appeal if the decree had been passed in an original suit, namely:—

(*a*) if the value of the suit exceeds five hundred rupees; or

the decree involves directly some claim to, or question respecting, property of like value;

(*b*) if the Divisional Court consists of a single Judge and the decree varies or reverses the decree of the Court below;

(*c*) if in a Divisional Court consisting of more than one Judge the appeal is heard by two or more Judges, and there is not a majority of those Judges concurring in the decree passed by the Divisional Court;

(*d*) if on the application of any party a Judge of the Divisional Court certifies that there is a question of law or custom or of general interest involved, and that the case is in his opinion of sufficient importance to justify a further appeal:

Provided that—

(1) an application under clause (*d*) shall not be received after the expiration of thirty days from the date on which the decree of the Divisional Court is passed, unless the applicant satisfies the Judge that he had sufficient cause for not presenting it within that period; and

(2) no further appeal shall lie in any small cause when the value of the suit does not exceed five hundred rupees.

Appellate decision of District or Divisional Court otherwise final.

41. Subject to the provisions of section 40 of this Act and sections 595 and 622 of the Code of Civil Procedure, a decree of the District or Divisional Court passed in appeal shall be final.

Power to confer appellate jurisdiction on Subordinate Judge.

42. *(1)* The Local Government may confer on a Subordinate Judge the powers of a District Judge for the purpose of hearing appeals from the Courts of Munsifs in any local area, and withdraw those powers.

(2) A Subordinate Judge shall for purposes connected with the exercise of powers so conferred be deemed to be a District Judge.

Period of limitation for appeal.

43. *(1)* The period of limitation for an appeal under section 39 or section 40 shall run from the date of the decree appealed against, and shall be as follows, that is to say:—

(*a*) when the appeal lies to the District or Divisional Court—sixty days;

(*b*) when the appeal lies to the Chief Court—ninety days.

(2) In computing these periods of sixty and ninety days, and in all respects not herein specified, the limitation of the appeals shall be governed by the provisions of the Indian Limitation Act, 1877:

The Panjáb Courts Act, 1884.
(Chapter IV.—Appellate Jurisdiction in Civil Cases.—Section 44.)
(Chapter V.—Revenue Courts.—Sections 45-47.)

Provided that, in computing the period of ninety days for an appeal under section 40, clause (*d*), the time during which the application under that clause has been pending shall be excluded.

References to Chief Court under section 617 of Code of Civil Procedure.

44. For the purposes of section 617 of the Code of Civil Procedure, every appeal to a Divisional Court under this chapter shall, except when the value of the suit exceeds five hundred rupees, be deemed to be an appeal in which the decree is final

---

CHAPTER V.

REVENUE COURTS.

Certain classes of suits cognizable by Revenue Courts only.

45. Suits of any of the classes comprised in the following groups instituted on and after the date on which this Act comes into force, shall be instituted, heard and determined in Revenue Courts and not otherwise :—

First Group.

(*a*) Suits by tenants to establish a claim to a right of occupancy.

(*b*) Suits by landlords under section 6 of the Panjáb Tenancy Act, 1868, to prove that a tenant presumed to have a right of occupancy under that section has no such right.

(*c*) Suits for enhancement or abatement of rent under Chapter III of the same Act.

(*d*) Suits for ejectment of a tenant.

(*e*) Suits under section 25 of the said Act to contest liability to be ejected when notice of ejectment has been served.

Second Group.

(*f*) Suits for arrears of rent on account of land, or of any payments due on account of rights of pasturage, forest-rights, fisheries or the like.

(*g*) Suits for the recovery of any over-payment of rent.

(*h*) Suits by lambardárs for arrears of land-revenue, payable through them by the co-sharers, or for village-expenses or other dues for which the co-sharers may be responsible to the lambardár.

(*i*) Suits by co-sharers for their share of the profits of an estate or part thereof after payment of the land-revenue and village-expenses, or for a settlement of accounts.

(*j*) Suits by assignees of land-revenue for arrears of revenue due to them as such.

(*k*) Suits by superior proprietors for arrears of revenue due to them as such.

(*l*) Suits under section 9 of the Specific Relief Act to recover possession of land.

(*m*) Suits to determine disputes regarding boundaries of land which have been fixed by a Court or Revenue-officer :

Provided that the Local Government may, after consulting the Chief Court, direct that suits of any of these classes arising in any local area shall be heard and determined by the Civil Courts and not by the Revenue Courts, and cancel any such direction.

Original jurisdiction of Deputy Commissioner and his subordinates in suits.

46. (*1*) A Deputy Commissioner shall have power to try suits of any of the classes mentioned in section 45.

(*2*) An Assistant Commissioner or Tahsíldár shall have power to try suits of such classes mentioned in the second group of the same section, and within such limits as regards value, as may be determined by the Local Government either by including him in a class or grade, or otherwise as it thinks fit.

(*3*) The Local Government may invest a Náib Tahsíldár with power to try suits of the classes mentioned in section 45, clauses (*f*), (*g*), (*h*), (*i*) and (*k*), when the value does not exceed one hundred rupees.

(*4*) The powers conferred by this section shall be exercised within such local limits as the Local Government may direct, and in the absence of any such direction throughout the district or tahsíl to which the officer is posted.

Appeals from original decrees.

47. An appeal shall lie from a decree passed in an original suit of any of the classes mentioned in section 46 as follows, namely :—

(*a*) when the decree is passed by a Deputy Commissioner and the value of the suit exceeds five thousand rupees—to the Financial Commissioner ;

(*b*) when the decree is passed by a Deputy Commissioner in a suit of the first group and the value of the suit does not exceed five thousand rupees, or

in a suit of the second group and the value of the suit exceeds one hundred rupees but does not exceed five thousand rupees—to the Commissioner ;

(*c*) when the decree is passed by an Assistant Commissioner, Tahsíldár or Náib Tahsíldár—to the Deputy Commissioner :

Provided that—

(*1*) no appeal shall lie from a decree passed in a suit of the class mentioned in section 45, clause (*l*) ;

(*2*) the Local Government may direct that no appeal shall lie from the decree of any Assistant Commissioner or class or grade of Assistant Commissioners designated by it in this behalf in any suit of the classes specified in clauses (*f*) to (*k*), both inclusive, of section 45, unless—

(*a*) the value of the suit exceeds such sum, not being more than one hundred rupees, as the Local Government may fix in this behalf, or

(*b*) the decree has decided a question of title to land or to some interest in land as between parties having conflicting claims thereto or as to the amount of some rent or revenue or other payment to which there is a recurring claim or as to the principle on which revenue, profits or village-expenses or other dues should be apportioned.

(*3*) The Local Government may direct that appeals shall lie from the decrees of an Assistant Commissioner or any class of Assistant Commissioners as if those decrees were passed by a Deputy Commissioner.

The Panjáb Courts Act, 1884.
(Chapter V.—Revenue Courts.—Sections 48-56.)

48. A further appeal shall lie from a decree passed on appeal in a suit of any of the classes mentioned in section 45 on any ground which would be a good ground of appeal if the decree had been passed in an original suit as follows, namely:—

Further appeals from appellate decrees.

(*a*) when the decree is passed by a Commissioner in a suit of the first group and reverses or modifies the original decree—to the Financial Commissioner;

(*b*) when the decree is passed by a Deputy Commissioner and the value of the suit exceeds five thousand rupees—to the Financial Commissioner;

(*c*) when the decree is passed by a Deputy Commissioner and the value of the suit exceeds one hundred rupees but does not exceed five thousand rupees—to the Commissioner.

49. Except as provided by the foregoing sections, no appeal shall lie from a decree passed under this chapter.

No appeals except under the foregoing sections.

50. *(1)* The period of limitation for an appeal under section 47 or 48 shall run from the date of the decree appealed against, and shall be as follows, that is to say:—

Limitation of appeals under this chapter.

(*a*) when the appeal lies to the Court of the Deputy Commissioner or of the Commissioner—sixty days;

(*b*) when the appeal lies to the Financial Commissioner—ninety days.

(2) In computing those periods of sixty and ninety days, and in all respects not herein specified, the limitation of the appeals shall be governed by the provisions of the Indian Limitation Act, 1877. [XV] of 1877.

51. (*1*) The Local Government may confer on any person all or any of the powers, original or appellate, of a Financial Commissioner, Commissioner or Deputy Commissioner under this chapter, and may withdraw the powers so conferred.

Power to confer powers of Financial Commissioner, Commissioner and Deputy Commissioner.

(*2*) Any person on whom powers are conferred under this section shall exercise those powers within such local limits and in such classes of cases as the Local Government may direct, and, except as otherwise directed by the Local Government, shall for all purposes connected with the exercise of the same be deemed a Financial Commissioner, Commissioner or Deputy Commissioner, as the case may be.

52. *(1)* The Local Government may, if it thinks fit, appoint a second Financial Commissioner, who shall hold his office during the pleasure of the Local Government.

Appointment of second Financial Commissioner.

(2) When a second Financial Commissioner is appointed, the Local Government may make rules as to the distribution of business between the two Financial Commissioners, and, until such rules are made and subject to such rules, the Financial Commissioner who is senior in respect of his appointment as such may transfer such business as he thinks fit to the other Financial Commissioner for disposal, and may withdraw and himself dispose of any business so transferred and not disposed of.

53. *(1)* The Local Government may, with the previous sanction of the Governor General in Council, make rules consistent with this Act for regulating the procedure of Revenue Courts in matters under this chapter for which a procedure is not prescribed thereby; and may, by any such rule, direct that any provisions of the Code of Civil Procedure shall apply, with or without modification, to all or any classes of cases before Revenue Courts. XIV of 1882.

Procedure of Revenue Courts how to be regulated.

(2) Until such rules are made, and subject to such rules when made and to the provisions of this Act,—

(*a*) the provisions of the Code of Civil Procedure shall, so far as applicable, apply to all proceedings whether before or after decree in cases under this chapter; and XIV of 1882.

(*b*) the Court of the Financial Commissioner shall, in respect of such cases, be deemed to be the High Court within the meaning of the said Code, and shall exercise, as regards the Courts under its control, all the powers of a High Court under the said Code. XIV of 1882.

54. (*1*) If, in any suit pending before a Revenue Court exercising original appellate or revisional jurisdiction under this chapter, it appears to the Court that any question in issue is more proper for decision by a Civil Court, the Revenue Court may, with the previous sanction of the Revenue Court (if any) to the control of which it is immediately subject, by order in writing, require any party to the suit to institute, within such time as it may fix in this behalf, a suit in the Civil Court with a view to obtaining a decision on the question, and, if he fails to comply with the requisition, may, if it thinks fit, decide the question against him.

Power to refer party to Civil Court.

(*2*) If he institutes such a suit, the Revenue Court shall dispose of the suit pending before it in accordance with the final decision of the Civil Court of first instance or appeal (as the case may be).

55. (*1*) When a question of the description mentioned in section 617 of the Code of Civil Procedure arises before the Financial Commissioner in the exercise of any of his powers under this chapter, he may refer the question for the decision of the Chief Court in manner prescribed by that section: XIV of 1882.

Power for Financial Commissioner to refer question to Chief Court.

Provided that he shall not be bound to express any opinion thereon.

(*2*) On a reference being made under sub-section (1), the subsequent proceedings in the case shall be, as nearly as may be, in conformity with the provisions of sections 618, 619 and 620 of the said Code, and the Chief Court may return for amendment the statement received from the Financial Commissioner if it is not sufficient to enable the Court to determine the question referred. XIV of 1882.

Administrative Control.

56. (*1*) The general superintendence and control over all other Revenue Courts shall be vested in, and all such Courts shall be subordinate to, the Court of the Financial Commissioner.

Controlling powers of Financial Commissioner, Commissioner and Deputy Commissioner.

(2) Subject to the general superintendence and control of the Financial Commissioner, every Commissioner shall control all other Revenue Courts in his division.

(3) Subject as aforesaid and to the control of the Commissioner, every Deputy Commissioner shall control all other Revenue Courts in his district.

57. Every Commissioner and Deputy Commissioner may exercise, as regards the Courts under his control, the same powers of withdrawal, trial and transfer as are conferred by section 25 of the Code of Civil Procedure on a District Court.

Power to transfer business.

1882.

58. Every Commissioner and Deputy Commissioner may, by written order, direct that any business cognizable under this chapter by his Court and the Courts under his control shall be distributed among those Courts in such manner as he thinks fit:

Power to distribute business.

Provided that no direction issued under this section shall empower any Court to exercise any powers or deal with any business beyond the limits of its proper jurisdiction.

59. *(1)* The ministerial officers of the Courts of the Financial Commissioner, Commissioner and Deputy Commissioner shall be appointed, and may be suspended and dismissed, by the Judges of those Courts, respectively.

Ministerial officers of Courts.

(2) The ministerial officers of all Courts controlled by a Deputy Commissioner shall be appointed, and may be suspended and dismissed, by the Deputy Commissioner.

(3) Every appointment under this section shall be subject to such rules as the Local Government prescribes in this behalf; and in dealing with any matter under this section a Commissioner shall act subject to the control of the Financial Commissoner, and a Deputy Commissioner subject to the control of the Commissioner.

60. *(1)* A Commissioner or Deputy Commissioner and the presiding officer of every Court under the control of a Deputy Commissioner may fine, in an amount not exceeding one month's salary, any ministerial officer of his Court for misconduct or neglect in the performance of his duties.

Power to fine ministerial officers.

(2) The Deputy Commissioner, subject to the general control of the Commissioner, may, on appeal or otherwise, reverse or modify any order made under sub-section (1) by the presiding officer of any Court under his control, and may of his own motion fine up to the amount of one month's salary any ministerial officer of any such Court.

61. A Deputy Commissioner may, with the previous sanction of the Local Government, delegate to any Assistant Commissioner in the district the powers conferred on Deputy Commissioners by sections 56, 57, 58 and 59 to be exercised by the Assistant Commissioner in any specified portion of the district subject to the control of the Deputy Commissioner.

Delegation of Deputy Commissioner's powers.

CHAPTER VI.

SETTLEMENT COURTS.

62. *(1)* The Local Government may, by notification in the official Gazette, declare that a settlement of land-revenue is in progress in any local area, and invest any officer making or controlling the settlement with all or any of the powers of any Court constituted under this Act for the purpose of trying all or any specified class of suits and appeals relating to land, or the rent, revenue or produce of land, arising in the local area.

Power to invest Settlement-officers with powers of Civil or Revenue Courts in certain cases.

(2) The publication of a notification under this section shall be conclusive evidence that a settlement of land-revenue is in progress in the local area to which the notification refers.

(3) The Local Government may cancel any such notification.

(4) While the notification continues in force, the powers specified in it shall be exercised by the officers so invested, and not otherwise:

Provided as follows:—

(*a*) the Local Government may, by order published in the official Gazette, direct that any jurisdiction with which any officer has been invested by the notification shall be exercised solely by the Courts by which the jurisdiction would have been exercised if the notification had not been published; and

(*b*) any cases pending before any officer under the notification when it is cancelled may, notwithstanding the cancellation, be disposed of by him as if it continued in force, unless the Local Government directs (as it is hereby empowered to do) that those cases shall be transferred for disposal to the Courts by which they would have been disposed of if the notification had not been published.

63. For the purposes of section 62 the Local Government may, notwithstanding anything in this Act, from time to time direct that any of the Courts mentioned in this Act (except the Chief Court and the Court of the Financial Commissioner) shall, in respect of any specified class of cases, be subordinate to, or subject to the control or superintendence of, any authority other than those specified in this Act.

Power to alter subordination of Courts for purposes of section 62.

CHAPTER VII.

SUPPLEMENTAL PROVISIONS.

64. Except as otherwise provided by this Act, the Local Government may, when it is empowered by this Act to make any appointment or confer any powers, appoint, or confer the powers on any person specially by name or by virtue of his office.

Mode of appointment and conferring powers.

65. All powers conferred by this Act may be exercised, from time to time, as occasion requires.

Powers exercisable from time to time.

66. *(1)* The Local Government may fix the place or places at which any Court under this Act is to be held.

Place of sitting of Courts.

The Panjáb Courts Act, 1884.

(Chapter VII.—Supplemental Provisions.—Sections 67-75. The Schedule.)

(2) The place or places so fixed may be beyond the local limits of the jurisdiction of the Court.

(3) Except as may be otherwise provided by any order under this section, a Court under this Act may be held at any place within the local limits of its jurisdiction.

Vacations.

67. *(1)* Subject to the approval of the Local Government, the Chief Court shall prepare a list of days to be observed in each year as holidays in the Chief Court and the Civil Courts subordinate thereto, and the Financial Commissioner shall prepare a like list for his Court and the Courts subordinate thereto.

(2) Every such list shall be published in the official Gazette.

Pending proceedings.

68. *(1)* All cases or proceedings pending in the Chief Court on the day when this Act comes into force shall be disposed of as if this Act had not been passed.

(2) All cases or proceedings pending in any Civil Court subordinate to the Chief Court on that day shall be disposed of as if this Act had not been passed:

Provided that the Chief Court may direct that any such cases or proceedings shall be transferred for disposal to any Civil Court established under this Act which would have had jurisdiction if it had been in existence when the cases or proceedings were instituted.

(3) In the case of an appeal pending on the said day, the following shall, for the purposes of sub-section (2), be deemed to be the Court which would have had jurisdiction as aforesaid, namely:—

(a) when the value of the suit exceeds five thousand rupees,—the Chief Court;

(b) when the appeal is one in a small cause, and is pending before the Deputy Commissioner or an officer invested with the appellate powers of a Deputy Commissioner and the value of the suit does not exceed five hundred rupees,—the District Court;

(c) in other cases,—the Divisional Court.

Appeals after Act comes into force against decrees, &c., passed before.

69. Appeals from decrees, orders and decisions passed by Civil Courts and not appealed against before the date on which this Act comes into force shall lie and be disposed of as if this Act had not been passed and not otherwise:

Provided that the Courts to which such appeals shall lie shall be as follows:—

(a) when the appeal would before the said date have lain to the Chief Court, or the value of the suit exceeds five thousand rupees,—the Chief Court;

(b) in small causes when the value of the suit does not exceed five hundred rupees, and the appeal would before the said date have lain to the Deputy Commissioner, or an officer exercising the appellate powers of a Deputy Commissioner,—the District Court;

(c) in other cases,—the Divisional Court.

Modification of section 622 of Civil Procedure Code.

70. Section 622 of the Code of Civil Procedure, in its application to the territories to which this Act extends, shall be read as if the words "illegally or" were omitted, and for the purposes of that section no appeal shall be deemed to lie from the appellate decree of a Divisional Court to the Chief Court when the case does not fall under clause *(a)*, clause *(b)* or clause *(c)* of section 40, and an application under clause *(d)* of that section has been refused.

Amendment of the first schedule annexed to the Court-fees Act, 1870.

71. In the first schedule annexed to the Court-fees Act, 1870, after No. 12, the following shall be inserted:— VII of 1870.

NUMBER.		PROPER FEE.
13. Application to the Chief Court or the Court of the Financial Commissioner of the Panjáb for the exercise of its revisional jurisdiction under section 622 of the Code of Civil Procedure.	When the amount or value of the subject-matter in dispute does not exceed twenty-five rupees.	Two rupees.
	When such amount or value exceeds twenty-five rupees.	The fee leviable on a memorandum of appeal.

Refund of fee paid on application for revision.

72. If the Court, on an application under section 622 of the Civil Procedure Code, on which a fee has been paid under the last preceding section, sets aside or modifies the decree or order of a Subordinate Court, or remands the case for a fresh decision, it may grant to the applicant a certificate authorizing him to receive back from the Collector the full amount of fee paid on the application, or any smaller amount which, with regard to the circumstances of the case, it may think proper to order to be refunded. XIV of 1882.

Saving of certain appointments, rules and forms, notifications, powers and orders.

73. All appointments made under sections 5 and 22 of Act XVII of 1877, directions given under section 23, rules and forms made and prescribed under sections 19, 26 and 27, and notifications published, powers conferred and orders issued under section 49, of the same Act, shall, so far as may be, be deemed to have been respectively made, given, prescribed, published, conferred and issued under this Act.

Amendment of Act X of 1870, section 3.

74. In the Land Acquisition Act, 1870, section 3, before the words "British Burma," in both places where they occur, the words "the Panjáb" shall be inserted. X of 1870.

Amendment of Act XXVIII of 1868, section 42.

75. In the Panjáb Tenancy Act, 1868, section 42, for the words "and thirty-one" the words "thirty-one and forty" shall be substituted. XXVIII of 1868.

THE SCHEDULE.

ACTS REPEALED.

(See section 2.)

Number and year.	Title of Act.	Extent of repeal.
Act IV of 1869	The Indian Divorce Act.	So much of section 3 as defines "District Judge" in the Panjáb to mean the "Commissioner of a Division."
Act XIV of 1875.	The Panjáb Judicial Administration Act, 1875.	So far as it relates to civil or criminal judicial powers.
Act XVII of 1877.	The Panjáb Courts' Act, 1877.	The whole, except section eighteen.

Secy. to the Govt. of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

[Second publication.]

The following Act of the Governor General of India in Council received the assent of His Excellency the Governor General on the 10th October, 1884, and is hereby promulgated for general information:—

ACT No. XIX OF 1884.

THE RANGOON WATER-WORKS ACT, 1884.

CONTENTS.

CHAPTER I.

PRELIMINARY.

SECTIONS.

1. Short title and commencement.
2. Definitions.

CHAPTER II.

VESTING OF PROPERTY.

3. Vesting of Royal Lake and cisterns, &c., in Committee.

CHAPTER III.

CONSTRUCTION AND MAINTENANCE OF WATER-WORKS.

4. Duty of Committee to construct works for supply of water.
5. Duty of Committee to erect stand-pipes.
6. Power for Committee to execute works.
7. Power for Committee to break up streets.

CHAPTER IV.

SUPPLY OF WATER.

A.—Supply of Water for domestic purposes to Occupiers of Houses or Lands.

8. Right of occupier to certain supply of water for domestic purposes.
9. Right of occupier paying water-tax to have water brought into his house or land.
10. Construction of communication-pipes.

SECTIONS.

11. Inspection of works, pipes and fittings before connection with service-pipes.
12. Connection with service-pipes to be executed only by an officer of the Committee.
13. Power for officer of Committee to enter premises.
14. Power for Committee to turn off water when pipes are out of repair.

B.—Supply for gratuitous use in Stand-pipes.

15. Duty of Committee to supply water for gratuitous use in stand-pipes.

C.—Supply of Water for extinguishing Fires and cleansing Sewers and Streets.

16. Duty of Committee to fix fire-plugs in mains.
17. Duty of Committee to supply water for cleansing sewers and drains.

D.—Supply of Water for other than Domestic Purposes.

18. Supply for other than domestic purposes.

E.—Pressure of Water supplied.

19. Pressure at which water must be kept.

CHAPTER V.

RECIPROCAL RIGHTS OF OWNERS AND OCCUPIERS TO SUPPLY OF WATER TO HOUSES.

20. Power for occupier of house to require owner to provide works for water-supply.
21. Power for occupier to make works in default of owner.
22. What works are sufficient for supply of water to house.
23. Estimate and specification of works to be sent.
24. Power to refer to Committee.
25. Fee on reference.
26. Duty of owner to keep works in repair.
27. Power for owner to recover sums payable by occupier.
28. Saving of contracts between owners and occupiers.

CHAPTER VI.

RULES.

29. Power for Chief Commissioner to make rules.
30. Power for Committee to make rules.
31. Procedure for making rules.
32. Publication of rules.

CHAPTER VII.

Arrears and Offences.

Sections.

33. Arrears of water-rents.
34. Power for Committee to turn off water on neglect to pay water-tax or water-rent.
35. Penalty for obstructing, diverting or wasting water.
36. Penalty for unauthorized application of water.
37. Penalties for causing the water of the Committee to be fouled, &c.
38. Prosecutions.

An Act to confer powers and impose duties on the Municipal Committee for the Town of Rangoon in respect to the construction and maintenance of Water-works and the supply of Water in that Town.

Whereas a scheme has been settled and to some extent carried out for the construction and maintenance of water-works and the supply of water to the Town of Rangoon by the Municipal Committee for that town;

And whereas it is necessary for the purposes of the scheme that the Royal Lake at Rangoon, and all existing tanks, cisterns, springs, wells, pumps, reservoirs, conduits, aqueducts, hydrants, standpipes and works, and all land, bridges, buildings, engines, works, materials and things connected therewith or appertaining thereto, should vest in, and be under the control of, the Municipal Committee for that town;

And whereas it is expedient that powers should be conferred and duties imposed upon the said Municipal Committee with respect to the construction and maintenance of the proposed water-works and the supply of water to the Town of Rangoon, and otherwise in relation thereto, and that all acts already done by the said Municipal Committee which could have been lawfully done if this Act had been in force should be validated;

It is hereby enacted as follows:—

CHAPTER I.

Preliminary.

Short title and commencement.

1. *(1)* This Act may be called the Rangoon Water-works Act, 1884; and

(2) It shall come into force on such date as the Chief Commissioner may, by notification in the official Gazette, fix in this behalf.

(3) All acts done before the passing of this Act which could have been lawfully done if this Act had been in force shall be deemed to have been lawfully done.

Definitions.

2. In this Act, unless there is something repugnant in the subject or context,—

(1) "town" means the local area for the time being comprised within the municipal limits of the Town of Rangoon:

(2) "street" means any street, road, thoroughfare, passage for place over which the public have a right of way; and includes the surface-soil and sub-soil of any such street, and the footway and drains of any such street, and any bridge, culvert or causeway forming part of any such street:

(3) "owner" includes—

(a) the person who is for the time being entitled to the rent of the house or land in respect of which the word is used and who is not liable to pay rent for that house or land to any other person;

(b) an agent of that person; and

(c) a trustee for that person:

(4) "house" includes schools; also factories and other buildings in which persons are employed:

(5) "water-works" includes all lakes, streams, tanks, cisterns, springs, wells, pumps, reservoirs, conduits, aqueducts, hydrants, standpipes and works, and all land, bridges, buildings, engines, works, materials and things for supplying, or used for supplying, water under this Act to the Town of Rangoon:

(6) "the Committee" means the Municipal Committee for the Town of Rangoon:

(7) "water-rent" includes any rent, reward or payment to be made to the Committee in connection with the supply of water under this Act, but does not include the water-tax leviable under the Burma Municipal Act, 1884: and

(8) a "supply of water for domestic purposes" does not include a supply of water for cattle, or for horses, or for washing carriages, where the cattle, horses or carriages are kept for sale or hire or by a common carrier, or a supply for any trade, manufacture or business, or for watering gardens, or for fountains or for any ornamental purpose.

CHAPTER II.

Vesting of Property.

Vesting of Royal Lake and cisterns, &c., in Committee.

3. There shall vest in, and be under the control of, the Committee, freed and discharged of and from all manner of rights, titles, privileges or claims whatsoever of any other person,—

(a) the Royal Lake at Rangoon; and

(b) all existing tanks, cisterns, springs, wells, pumps, reservoirs, conduits, aqueducts, hydrants, standpipes and works, used or intended to be used for supplying water to the public in the town, and all land, bridges, buildings, engines, works, materials and things connected therewith, or appertaining thereto:

Provided as follows:—

(1) Any person may at any time, subject to such rules as the Committee make in this behalf, row, sail or fish on or in the waters of the Royal Lake:

(2) Nothing in this section shall affect the land adjacent to the Royal Lake and known as the Dalhousie Park, but that land shall be preserved as a public park for the use of the public.

CHAPTER III.

CONSTRUCTION AND MAINTENANCE OF WATER-WORKS.

Duty of Committee to construct works for supply of water.

4. Subject to rules to be made under this Act by the Chief Commissioner, the Committee shall cause such mains and pipes to be laid, and such water-works to be constructed, as may be necessary for the supply of pure and wholesome water sufficient for the use of the inhabitants for domestic purposes in all parts of the town:

Provided that the Chief Commissioner may, by order in writing, from time to time exempt any part of the town from the provisions of this section, and cancel any such exemption.

Duty of Committee to erect stand-pipes.

5. The Committee shall cause such stand-pipes or pumps to be erected, at such intervals as the Chief Commissioner, by rules made under this Act, prescribes, in all the chief streets in those parts of the town in which mains or pipes have been laid under the last foregoing section.

Power for Committee to execute works.

6. The Committee may, for the purpose of constructing or maintaining any water-works for the supply of water to the town, enter upon any land and take levels of the same, and set out such parts thereof as they think necessary, and dig and break up the soil of the land:

Provided that, in the exercise of these powers the Committee shall do as little damage as may be, and shall make full compensation to all persons interested for all damage sustained by them through the exercise of these powers, and the amount of such compensation shall be determined as nearly as may be in accordance with the provisions of the Land Acquisition Act, 1870.

Power for Committee to break up streets.

7. The Committee may open and break up the soil and pavement of the streets, and lay down and place pipes, conduits and other works and engines, and, from time to time, repair, alter or remove the same, and do all other acts which the Committee, from time to time, deem necessary for supplying water to the town.

CHAPTER IV.

SUPPLY OF WATER.

A.—Supply of water for domestic purposes to Occupiers of Houses or Lands.

Right of occupier to certain supply of water for domestic purposes.

8. *(1)* Every occupier of a house or land situate in a part of the town not exempted under the proviso to section 4 shall be entitled to have free of further charge, through the communication-pipes constructed as hereinafter provided, a supply to the house or land of fifteen hundred gallons of pure and wholesome water for domestic purposes for every rupee paid to the Committee for water-tax on account of the house or land.

(2) If the Committee have reason to believe that the occupier of any house or land consumes more water than he is entitled to have free of further charge under this section, they may provide a water-metre at their own expense, and attach it to such part of the communication-pipes as they think fit.

(3) If the occupier consumes any water over and above the quantity to which he is entitled free of further charge under this section, he shall pay for it at the rate of one rupee for every fifteen hundred gallons, or part of fifteen hundred gallons.

Right of occupier paying water-tax to have water brought into his house or land.

9. Every occupier of a house or land who is entitled to a supply of water free of further charge under the last foregoing section shall, subject to the provisions of this Act, be entitled to have communication-pipes laid down from the service-pipes of the Committee, for bringing into his house or land a reasonable supply of water:

Provided that the Committee may cut off the supply of water to any house or land while the house or land is unoccupied.

Construction of communication pipes.

10. The communication-pipes leading the water from the service-pipes of the Committee into the house or land of any occupier, and the pipes and works within the house connected therewith, shall be of such character, dimensions and material as the Committee fix and approve, and shall be constructed at the expense of the person requiring them.

Inspection of works, pipes and fittings before connection with service-pipes.

11. *(1)* Before a connection for the supply of water from the service-pipes of the Committee to any house or land is sanctioned by the Committee, the Committee shall cause all the works, pipes and fittings within the house or land to be inspected by such officer as the Committee appoint in this behalf.

(2) The cost of an inspection under this section shall be payable in advance by the person applying for the connection, at such rate as the Committee, at a special meeting, from time to time, direct.

(3) Until the officer has certified that the works, pipes and fittings have been executed and put up in a satisfactory manner, a connection with the Committee's service-pipes shall not be permitted.

Connection with service-pipes to be executed only by an officer of the Committee.

12. *(1)* The connection with the service-pipes of the Committee, and the laying of communication-pipes under any street, shall be executed by an officer of the Committee authorized in that behalf.

(2) The expense of making the connection shall be payable in advance by the person applying for the same, at such rate as the Committee, at a special meeting, from time to time, direct.

Power for officer of Committee to enter premises.

13. *(1)* The officer authorized in that behalf by the Committee may, between the hours of seven in the forenoon and five in the afternoon, enter into or on any house or land

supplied with water as aforesaid in order to examine all pipes, works and fittings connected with the supply of water, and to ascertain if there is any waste or misuse of the water.

(2) If any such officer at any such time is refused admittance into any such house or land for the purposes aforesaid, or is prevented from making such examination as aforesaid, the Committee may forthwith turn off or cut off the water from the house or land.

Power for Committee to turn off water when pipes are out of repair.

14. If any pipes, works or fittings connected with the supply of water to any house or land are at any time found, on examination by any officer of the Committee authorized in that behalf, to be out of repair to such an extent as to cause any waste of water, the Committee may, after the expiry of twenty-four hours from the service of notice in writing to this effect, cause the water to be turned off or cut off from the house or land, and may recover the expense incurred for turning off or cutting off the water from the occupier of the house or land.

B.—Supply for gratuitous use in Stand-pipes.

Duty of Committee to supply water for gratuitous use in stand-pipes.

15. The Committee shall cause a sufficient quantity of pure and wholesome water to be supplied for the gratuitous use of the inhabitants of the town for domestic purposes in the stand-pipes to be erected by the Committee under section 5.

C.—Supply of water for extinguishing Fires and cleansing Sewers and Streets.

Duty of Committee to fix fire-plugs in mains.

16. The Committee shall fix and renew and keep in effective order such fire-plugs in such of the mains and other pipes laid by them, and shall deposit keys of the fire-plugs at such places, as the Chief Commissioner by rules made under this Act, directs.

Duty of Committee to supply water for cleansing sewers and drains.

17. In all the mains and pipes to which any fire-plug is fixed, the Committee shall provide and keep constantly laid on, unless prevented by unusual drought or other unavoidable accident, a sufficient supply of water for use with fire-engines, for cleansing the sewers and drains, and for cleansing and watering the streets.

D.—Supply of Water for other than domestic purposes.

Supply for other than domestic purposes.

18. *(1)* The Committee may, from time to time, supply any person with water by measurement for other than domestic purposes, for such remuneration and on such terms and conditions as shall be agreed on between the Committee and the person :

Provided that—

(a) notwithstanding any such agreement, a person shall not be entitled to such a supply whenever and as long as the Committee are of opinion that the supply would interfere with the proper supply of water for domestic purposes under this Act; and

(b) the Committee shall not be liable, in the absence of express stipulation under any such agreement, to any forfeiture, penalty or damages for not supplying the water if the want of the supply arises from unusual drought or other unavoidable cause or accident.

(2) When any such agreement has been entered into by the Committee with any person, the Committee may, subject to such charges or rates as may have been fixed by the Committee at a special meeting, lay down, or allow to be laid down, the necessary communication-pipes and works, of such dimensions and character as may be fixed by the Committee, for supplying the person with water in accordance with the terms of the agreement.

E.—Pressure of Water supplied.

Pressure at which water must be kept.

19. From such a day as the Chief Commissioner, by notification in the local official Gazette, directs in this behalf, the supply of water in the mains and pipes which the Committee are required to lay under this Act shall be laid on at such pressure as the Chief Commissioner, by rules made under this Act, prescribes.

CHAPTER V.

Reciprocal Rights of Owners and Occupiers to supply of Water to Houses.

Power for occupier of house to require owner to provide works for water-supply.

20. *(1)* Any occupier holding direct from the owner of a house may, by notice in writing signed by him, require the owner of the house to construct all such works as may be necessary for bringing into the house a supply of water for domestic purposes.

(2) Every notice under this section shall contain an undertaking on the part of the occupier to pay interest at the rate of one per centum per mensem, calculated from the date of the completion of the works, on the cost of the works during the residue of his term of occupation.

(3) If the house, or the land attached thereto, does not abut upon a street in which there is a supply-main, the occupier shall undertake to pay the cost of connecting the house with the nearest supply-main.

Power for occupier to make works in default of owner.

21. *(1)* If the owner does not, within three months from the service of the notice mentioned in the last foregoing section, cause such works as aforesaid to be completed, the occupier may cause the works to be completed, and may by way of additional remedy deduct the cost of the works from the rent payable by him in respect of the house :

Provided that the occupier shall not recover on account of the cost—

(a) a sum exceeding the amount of six months' rent ; or

(b) where the house or the land attached thereto does not abut upon a street in which there is a supply-main, the cost of connecting the house with a supply-main.

The Rangoon Water-works Act, 1884.
(Chapter VI.—Rules.—Sections 29-31.)

(2) The deduction which an occupier is authorized to make under this section shall be made by six equal monthly instalments.

(3) Interest on each instalment shall be payable to the owner by the occupier at the rate of one per centum per mensem from the time when it is deducted.

What works are sufficient for supply of water to house.

22. The works shall not be deemed sufficient for bringing into the house a supply of water for domestic purposes unless the following taps, with the necessary works in connection therewith, are provided, namely :—

(*a*) two taps in the house;

(*b*) one tap in the cook-room of, or other building attached to, the house, and

(*c*) one tap in or near the stables or other outhouses belong to the house :

Provided that, if the annual rent of the house with the buildings and land attached thereto is less than three hundred rupees, it shall be sufficient to provide one tap only, together with the necessary works in connection therewith, within the house and the buildings and land attached thereto.

Estimate and specification of works to be sent.

23. Works for introducing a supply of water to a house shall not be commenced by the owner without sending a specification and estimate of the cost thereof to the occupier, nor by the occupier without sending such a specification and estimate to the owner.

Power to refer to Committee.

24. If there is any difference between the owner and the occupier respecting the cost or the sufficiency of the proposed works, either the owner or the occupier may refer the difference to the Committee, and the written award of any officer authorized by the Committee in this behalf shall be final and binding on the owner and the occupier.

Fee on reference.

25. There shall be payable by the person making a reference to the Committee under the last foregoing section a fee (not exceeding ten rupees) at the rate of two rupees for every hundred rupees of the monthly rent of the house in respect of the water-supply to which the difference has arisen.

Duty of owner to keep works in repair.

26. *(1)* The owner of any house or land shall keep all works connected with the supply of water to the house or land in substantial repair.

(2) If the owner fails to put any such works in substantial repair after being requested by the occupier to do so, the occupier may cause the necessary repairs to be made, and may by way of additional remedy deduct the cost of the repairs from the rent payable by him in respect of the house or land.

Power for owner to recover sums payable by occupier.

27. Any owner to whom any sum is payable under section 20 or section 21 may recover the sum from the person liable to pay it as if it were rent payable by that person for the house in respect of which the expenses have been incurred.

Saving of contracts between owners and occupiers.

28. Nothing in this chapter shall affect any contract in writing between the owner and occupier of any house or land.

CHAPTER VI.

RULES.

Power for Chief Commissioner to make rules.

29. The Chief Commissioner may, from time to time, make rules consistent with this Act—

(*a*) to prescribe the size and nature of the mains and pipes to be laid and the water-works to be constructed by the Committee for the supply of water under this Act;

(*b*) to prescribe the size and nature of the stand-pipes or pumps to be erected by the Committee under this Act, and the intervals at which they must be erected;

(*c*) to prescribe the mains or pipes in which fire-plugs are to be fixed, and the places at which keys of the fire-plugs are to be deposited, by the Committee under this Act;

(*d*) to prescribe the pressure at which the water supplied by the Committee under this Act is to be laid on either generally or at specified times; and

(*e*) generally to define and regulate the powers and duties of the Committee under this Act.

Power for Committee to make rules.

30. *(1)* The Committee may, from time to time, at a special meeting, make rules consistent with this Act—

(*a*) for regulating rowing, sailing and fishing on or in the Royal Lake; and

(*b*) for preventing the waste or misuse of water supplied by them, and for defining the nature of the pipes, casks, cisterns and other apparatus to be used by every person supplied by them with water.

(2) In making a rule under this section the Committee may direct that a breach of it shall be punishable with fine which may extend to fifty rupees, and, when the breach is a continuing one, with a further fine of five rupees for every day after the first during which the breach continues.

(3) If any person, having or requiring a supply of water from the Committee, fails to comply with any rules made under clause (*b*) of this section, the Committee may refuse to supply water to him, and may cut off the water supplied to him, unless and until the rules are complied with :

Provided that the stopping or cutting off the supply of water shall not relieve any person from any penalties or liabilities which he has otherwise incurred.

Procedure for making rules.

31. *(1)* The Chief Commissioner or Committee shall, before making any rules under section 29 or section 30, publish a draft of the proposed rules for the information of persons interested.

(2) The publication shall be made—

(*a*) in the case of rules under section 29, in such manner as in the opinion of the Chief Commissioner is sufficient; and

The Rangoon Water-works Act, 1884.
(Chapter VII.—Arrears and Offences.—Sections 33-38.)

(*b*) in the case of rules under section 30, in such manner as the Chief Commissioner, by order, directs.

(3) A notice shall be published with the draft rules specifying a date at or after which the draft shall be taken into consideration.

(4) The Chief Commissioner or Committee shall, before making the rules, receive and consider any objection or suggestion which is made by any person with respect to the draft before the date so specified.

Publication of rules.

32. Every rule made under section 29 or section 30 shall be published in the local official Gazette in English and in such other language or languages as the Chief Commissioner directs, and such publication shall be conclusive evidence that the rule has been made as required by section 31.

CHAPTER VII.

ARREARS AND OFFENCES.

Arrears of water-rents.

33. All arrears of water-rents under this Act may be recovered, on application to such Revenue-officer as the Local Government may appoint in this behalf, as if they were arrears of land-revenue.

Power for Committee to turn off water on neglect to pay water-tax or water-rent.

34. If any person supplied with water neglects to pay—

(*a*) the water-tax leviable under the Burma Municipal Act, 1884, or

1884.

(*b*) any water-rent payable by him to the Committee,

the Committee may turn off or cut off the water from the house or land in respect of which the water-tax or water-rent is payable, by cutting off the pipe to the house or land, or by such other means as the Committee think fit, and may recover in manner provided by the last foregoing section the expense of turning off or cutting off the water from that person:

Provided that the stopping or cutting off the supply of water shall not relieve any person from any penalties or liabilities which he has otherwise incurred.

Penalty for obstructing, diverting or wasting water.

35. If any person unlawfully obstructs the flow of, fouls, draws off, diverts or takes, water from any water-works belonging to, or under the management or control of, the Committee, or from any water or streams by which those water-works are supplied, or wastes any water supplied to him under this Act, he shall be punished with fine which may extend to one hundred rupees.

Penalty for unauthorized application of water.

36. If any person—

(*a*) uses for other than domestic purposes any water supplied under this Act for domestic purposes; or

(*b*) where water is supplied under section 18 for a specified purpose, uses that water for any other purpose,

he shall be punished with fine which may extend to fifty rupees, without prejudice to the right of the Committee to recover from him the price of the water misused.

Penalties for causing the water of the Committee to be fouled, &c.

37. *(1)* If any person—

(*a*) bathes in, at or upon any water-works, or washes, throws or causes to enter therein any dog or other animal, or

(*b*) throws any rubbish, dirt, filth or other noisome thing into any water-works, or washes or cleanses therein any cloth, wool, leather or skin of any animal, or any clothes or other thing, or

(*c*) causes the water of any sink, sewer or drain, or of any steam-engine or boiler, or any other filthy water belonging to him or under his control, to turn or be brought into any water-works, or does any other act whereby the water in any water-works is fouled, or likely to be fouled,

he shall, for every such offence, be punished with fine which may extend to one hundred rupees, and to ten rupees in addition for each day (if more than one) during which the offence continues.

Prosecutions.

38. Prosecutions under this Act or the rules made under this Act may be instituted by the Committee or any person authorized by them in this behalf, and not otherwise.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

[Second publication.]

The following Act of the Governor General of India in Council received the assent of His Excellency the Governor General on the 10th October, 1884, and is hereby promulgated for General information:—

ACT No. XX OF 1884.

An Act to amend the Indian Salt Act, 1882.

WHEREAS it is expedient to exclude the Province of Sindh from the operation of those portions of the Indian Salt Act, 1882, which do not extend by their own operation to the whole of British India; It is hereby enacted as follows:—

XII of 1882.

Repeal of words "to the Province of Sindh" and "Province" in section 1 of Act XII of 1882.

1. From such day as the Governor of Bombay in Council, by notification in the official Gazette, fixes in this behalf, the words "to the Province of Sindh" and the word "Province," in paragraphs three and four respectively of section 1 of the Indian Salt Act, 1882, shall be repealed.

PART V.

Bills introduced into the Council of the Governor General for making Laws and Regulations, or published under Rule 22.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

[Third publication.]

The following Bill was introduced into the Council of the Governor General of India for the purpose of making Laws and Regulations on the 2nd October, 1884:—

No. 14 OF 1884.

A Bill to repeal the Straits Settlements Emigration Act, 1877, and to amend the Indian Emigration Act, 1883.

WHEREAS it is expedient to repeal the Straits Settlements Emigration Act, 1877, and to amend the Indian Emigration Act, 1883, in manner hereinafter appearing; It is hereby enacted as follows:—

1. The Straits Settlements Emigration Act, 1877, is repealed.

2. For section 102 of the Indian Emigration Act, 1883, the following section shall be substituted:—

New section substituted for section 102 of Act XXI of 1883.

"102. On and from such a date as the Governor General in Council may, by notification in the *Gazette of India*, fix in this behalf, a Native of India who departs by sea out of British India under an agreement to labour for hire in any protected Native State adjoining the Straits Settlements to which the notification refers shall not be deemed to emigrate within the meaning of this Act."

Power for Governor General in Council to exempt emigration to Native States adjoining the Straits Settlements from Act.

STATEMENT OF OBJECTS AND REASONS.

THE main object of this Bill is to repeal Act V of 1877 (the Straits Settlements Emigration Act, 1877), which extends only to the Madras Presidency. It is dictated by the policy which recently led to the enactment of Act VII of 1883, (to repeal the British Burma Labour Law, 1876.) As in the case of Burma, it is found that there is a system of "free emigration" to the Straits which not only competes with, but altogether distances, the Government system for which Act V of 1877 provides. From the information before it, the Government of India is of opinion that that Act has impeded instead of promoting emigration, that labour flows as naturally to and from the Straits as it does between Burma and India, and that attempts to control its movement in British territory merely induce it to seek an outlet from the French ports of Pondicherry and Karikal. Such provisions as in the opinion of the Government are necessary for the protection and control of the Indian immigrant after his arrival in the Straits have been embodied in a revised Labour Regulation, which is now before the Straits legislature, and will, it is expected, shortly become law. Under these circumstances, the Government of India considers that emigration from India to the Straits should be uncontrolled by law in this country save as regards the requirements of the Native Passengers Ships Act.

2. The repeal of Act V of 1877 necessitates, however, an amendment of section 102 of Act XXI of 1883 (the Indian Emigration Act, 1883). The first sub-section of that section provides for the extension of Act V of 1877 to other parts of British India. As the Act is itself now being repealed, it is clear that this sub-section should be repealed also. The second and third sub-sections of that section give the Governor General in Council power by notification to include any of the protected Native States adjoining the Straits Settlements within

the scope of any law relating to emigration to those Settlements, and exempt, on and from the date of any such notification, emigration to the protected State specified therein from the operation of Act XXI of 1883. Though there will no longer be any special law relating to emigration to the Straits, it is deemed desirable to retain the power, which these sub-sections confer, of exempting emigration to the protected States from Act XXI of 1883. A new section has therefore been substituted by section 2 of the Bill for section 102 of Act XXI of 1883 empowering the Governor General in Council to exempt emigration to the protected States from that Act whenever he considers such exemption to be desirable.

The following Report of the Select Committee on the Bill to provide more effectually for the suppression of certain forms of Gaming in British Burma was presented to the Council of the Governor General of India for the purpose of making Laws and Regulations on the 25th September, 1884:—

We, the undersigned members of the Select Committee to which the Bill to provide more effectually for the suppression of certain forms of Gaming in British Burma was referred, have considered the Bill and the papers noted in the margin, and have now the honour to submit this our Report.

From Officiating Secretary to Chief Commissioner, British Burma, No. 289-1L., dated 9th September, 1884 [Paper No. 1].
Telegram from Chief Commissioner, British Burma, dated 15th September, 1884 [Paper No. 2].

2. The following is an extract from the Chief Commissioner's telegram of the 15th instant:—

"Opinions received on Burma Gaming Bill induce me to urge following points:—

"*First*, we must make touts for *ti* punishable; so please, after word 'players' in section 4, insert words 'or who promotes the game by soliciting or collecting stakes or otherwise.'

"*Second*, I fear Courts may unduly restrict meaning of word 'place'; therefore, for first eight words in clause (2), section 3, please substitute words 'every place, whether enclosed or unenclosed.'

Thirdly, our 1st class Magistrates are few; therefore please add clause as follows:—

'The Local Government may specially authorize any Magistrate of the 2nd class to exercise the powers conferred by section 5 of Act III of 1867 on the Magistrate of the district.'

Fourthly, we want power to arrest touts in public places; therefore please add clause as follows:—

'A police-officer may apprehend without warrant any person soliciting or collecting stakes for *ti* or any other game of like nature in any public street, place or thoroughfare.'

"*Fifthly*, on advice of officers consulted, I agree that section 2 of Bill may be omitted."

3. We have adopted all these suggestions except the second; and, though the Chief Commissioner adds that he lays much stress on that suggestion, we do not think it would be possible to adopt it, at least in the shape in which he proposes it. It must be remembered that the Bill is not an independent measure, but is to be read with Act III of 1867; and, if the provisions of that Act relating to common gaming-houses be referred to, it will, we think, be found that some at least of them are such that if every "place," without any distinction or limitation whatever, was to be made a "common gaming-house," they could not fairly or reasonably be applied. It may indeed be doubted whether, apart from all consideration of the harshness which the proposed amendment would involve, some of those provisions could be applied to every "place" indiscriminately without giving rise to something approaching an absurdity.

4. We have, we need hardly say, considered whether it might not be desirable to give some extension to the definition of "common gaming-house" short of that proposed by the Chief Commissioner; but we think, having regard to English decisions on the provisions of Statutes worded in a manner somewhat similar to Act III of 1867 and the

present Bill, that the definition is as wide as it is desirable to make it. We think we may reasonably count on its being held, with reference to those decisions, to include all places which are sufficiently analogous to a house, walled enclosure or room to admit of being reasonably and fairly treated as gambling-houses for the purposes of the Act.

5. It must be remembered that the question here involved has little or no importance in practice except in its bearing on the position of persons who are induced to take tickets in the *ti;* for the managers and their assistants will in all cases be subject to severe penalties under separate provisions, which are completely independent of the definition of common gaming-house; and, as regards mere ticket holders, it appears to us that it is sufficient if they are punishable under the common gaming-house provisions of the Bill and the Act as they now stand, and under the 13th section of the Act for gambling in public. We have, however, amended the last-mentioned section so as to give it a somewhat wider range in British Burma than it has elsewhere.

The following Report of the Select Committee on the Bill to amend the Law relating to Local Self-government in British Burma was presented to the Council of the Governor General of India for the purpose of making Laws and Regulations on the 25th September, 1884:—

WE, the undersigned Members of the Select Committee to which the Bill to amend the law relating to Local Self-government in British Burma was referred, have considered the Bill and the papers noted in the margin, and have now the honour to submit this our Report.

From Officiating Secretary to Chief Commissioner, British Burma, No. 678-8R.M., dated 27th September, 1883, and enclosures [Papers No. 1].
From Officiating Junior Secretary to Chief Commissioner, British Burma, No. 88-8R.M., dated 4th October, 1883, and enclosures [Papers No. 2].
From Officiating Junior Secretary to Chief Commissioner, British Burma, No. 348-8R.M., dated 17th October, 1883, and enclosures [Papers No. 3].
From Officiating Junior Secretary to Chief Commissioner, British Burma, No. 537-8R.M., dated 27th December, 1883, and enclosure [Papers No. 4].
Office Memorandum from Home Department, No. 762, dated 9th May, 1884, and enclosures [Papers No. 5].
From Officiating Secretary to Chief Commissioner, British Burma, No. 481-1G.M., dated 17th June, 1884, and enclosure [Papers No. 6.

2. The Bill as now amended by us will be seen at a glance to differ considerably from the Bill as introduced. The difference is due chiefly to three causes.

3. In the first place, there has been a change in the main plan and scope of the measure. As explained in the Statement of Objects and Reasons, the original Bill was framed with a view to the inclusion within municipalities of adjoining rural areas. This course was taken, on the advice of the Local Government, in order to meet the requirements of certain rural tracts, until such time as it might be found possible to establish a system of local boards for rural districts.

From the papers since submitted, however, it appears that, upon fuller consideration, the weight of opinion is against the attempt to include in one municipality urban and rural tracts; and the Chief Commissioner now recommends that the Bill be confined, as we believe all the Municipal Acts on our Statute-book are, to urban tracts, the matter of local self-government in rural tracts being left to be dealt with separately hereafter.

In this recommendation we concur. The difficulty of framing the provisions of the Bill so as to fit in with conditions so essentially different as those of the towns and the adjoining tracts of country has turned out to be greater than was anticipated, and the call for the establishment of a system of local self-government in the rural tracts of British Burma is not so pressing as to justify our running the risk of passing an unsatisfactory measure for the sake of at once meeting it. We have accordingly reduced the Bill to the form of a Municipal Bill pure and simple.

4. Another difference between the original Bill and the present Bill is due to our having, at the request of the Chief Commissioner, adopted the course taken by the Select Committee on the Panjáb Municipal Bill of substituting for wide general powers to make rules detailed provisions regarding nuisances and other matters affecting the public health, safety and convenience. It is in this way that most of the new sections contained in Chapters VI and VII of the amended Bill are to be accounted for.

5. Lastly, the greater light thrown upon the needs of municipal government and on the difficulties likely to present themselves in the application of a Municipal Act by the prolonged discussions which took place in the Select Committee on the Panjáb Bill has led to numerous amendments in, or additions to, the Bill of minor importance. As examples we may refer to—

Section 27 (*e*) (distribution of executive powers and duties);

Section 28 (extraordinary powers of president and vice-president in case of emergency);

Sections 44 and 88 (powers to impose a scavenging-tax and to undertake the scavenging of private premises);

Sections 51-57 (special rules applicable to taxation of immoveable property);

Sections 60 and 61 (constitution and application of the municipal fund);

Sections 65-67 (provisions relating to municipal property);

Section 138 (settlement of disputes);

Sections 151-153 (relating to notices); and

Section 158 (which confers a power to exempt a municipality from any provisions of the Act which appear unsuitable to it).

This last section, we may observe, is specially necessary in view of the numerous and somewhat elaborate provisions now contained in Chapters VI and VII, some of which would probably be unsuitable in small municipalities.

6. We have now to notice such of the more important alterations of the Bill as are not accounted for by the foregoing remarks, or as otherwise seem to call for explanation.

7. Section 12 of the original Bill, which required a member of the municipal body to vacate his seat when appointed to a salaried municipal office, and section 29, which provided for the payment of fees to members for attendance at meetings, have been omitted; the former because it is not thought advisable that any person while a member of a committee should be appointed to a salaried office under the committee, and the latter because a municipal area can now comprise only a town and its immediate suburbs, and the members of the committee, being residents of that area and not having to travel any distance to the meetings, may reasonably be expected to give their services gratuitously.

8. We have, following the course taken in the Panjáb Bill, limited the rates to be imposed for water, lighting and scavenging only by providing (in effect) that they shall not exceed what is requisite to defray the cost of the services for which they are levied; and we have, as in the Panjáb Bill, provided that the proceeds of these rates shall be carried to the one municipal fund, separate accounts only being kept, instead of constituting separate funds.

9. We have substituted for section 47 of the original Bill, which required a municipal committee to make grants-in-aid to schools in accordance with such rules as the Government might make, a section (62) specifically appropriating to educational purposes the income for schools and all sums acquired by the committee in trust for educational purposes, and further requiring the assignment for educational purposes from the general municipal revenues of such sum annually, not being more than 5 per cent. of the gross annual income of the municipality, as the Local Government may fix.

This section has been suggested by the Chief Commissioner with the view of meeting practical difficulties which have occurred in British Burma, and is, in his opinion, indispensable for the purpose of carrying out the educational policy which has recently been established in that province, and under which the municipalities, whilst relieved of police-charges, have been required to provide for the maintenance of local schools. It will be observed that the section, while it compels the committee to devote a certain minimum of its funds to educational purposes, imposes no such restriction as might have been imposed under the original section as regards the particular objects on which the money shall be spent.

10. The Chief Commissioner has in an unofficial communication proposed certain modifications in and additions to the new provisions introduced from the Panjáb Bill in Chapters VI and VII. Most of these are of minor importance, and we have in general adopted them, omitting only such as appeared to us superfluous or unnecessarily stringent. In one instance we, however, have found it necessary to omit a section of considerable importance proposed by the Chief Commissioner, namely, a section similar to section 14 of Act XLVIII of 1860 giving a certain power of control over brothels and other disorderly houses; but that section we have omitted merely because we think the matter is one to be dealt with by the Magistrates and police rather than by a municipal committee.

11. The only other point which appears to call for notice in connection with this portion of the Bill is that we have substituted two sections (126 and 127) based on similar sections in the Public Health Act, 1875, for a section proposed by the Chief Commissioner, to guard against the spread of infectious diseases through the medium of public conveyances.

12. Sections 49 to 51 of the original Bill provided for the exercise by a municipal committee or its members of certain magisterial powers in nuisance cases. We have omitted these sections for the same reasons that have led to the omission of the corresponding sections of other Municipal Bills recently before the Council, namely, that a section like section 49 could have little practical effect, and that it is not desirable that the powers given by the other two sections should be conferred.

13. We have not thought it advisable to adopt a proposal made by the Chief Commissioner that the Local Government should be empowered to invest municipal officers with the powers of police-officers for the purposes of section 34 of the Police Act (V of 1861).

14. We have added a clause to section 133 providing that the powers of control over municipalities, conferred by that section on the Commissioner and Deputy Commissioner, shall, in the case of the municipalities of Rangoon, Moulmein, Akyab and Bassein, be exercised not by those officers but by the Local Government.

15. Lastly, we have to state that we have considered a proposal of the Chief Commissioner to the effect that the appropriation provisions of the Bill should be modified in such a manner as to admit of a municipal committee subscribing to a public band or contributing to fireworks or the like on great occasions. We have not adopted this proposal, because the objects in question appear to us to lie beyond the sphere of the purposes for which municipal taxation is raised in this country.

Extract from the *Civil and Military Gazette* of 21st August, 1884 [Paper No. 10].
From President, Indian Association, Lahore, dated 30th August, 1884, and enclosure [Papers No. 11].
Extract from the *Tribune* of 23rd August, 1884 [Paper No. 12].
Extract from the *Civil and Military Gazette* of 25th August, 1884 [Paper No. 13].
From Officiating Secretary to Government, Panjáb, No. 4478., dated 4th September, 1884, and enclosure [Papers No. 14].
From Officiating Secretary to Government, Panjáb, No. 4158., dated 6th September, 1884, and enclosure [Papers No. 15].
Endorsement by Officiating Under-Secretary to Government of India, Home Department, No. 1215, dated 15th September, 1884, and enclosures [Papers No. 16].

2. We have rearranged the provisions of the Bill in a manner which we trust will make them more readily intelligible; and in the following remarks we shall as far as possible take the sections in their new order.

CHAPTER II.

THE CHIEF COURT.

3. It will be observed that under the proviso to section 8, sub-section (1), a single Judge of the Chief Court is prohibited from revising or modifying any proceeding of a lower Court except an "order" within the meaning of the Code of Civil Procedure. The restriction thus imposed does not, we believe, differ to any important extent from that contained in the corresponding provision (section 21, proviso) of the original Bill, and it relieves us of the necessity of using the phrase "interlocutory order," to which some difficulty attached.

4. We have also modified the last sub-section of section 8 by placing in the hands of the Senior Judge the power of determining which Judges of the Chief Court shall sit alone and which shall constitute benches, instead of leaving the power to be delegated by the Court to such Judge as it might think fit.

5. We have in section 14 added to the matters in respect of which the Chief Court is empowered to make rules—

(1) the translation of papers filed in the Chief Court and copying or printing any such papers or translations, and the payment by parties of the expenses thereby incurred; and

(2) the procedure in cases where a person is entitled to inspect a record of any Court or obtain a copy of it, and the fees payable for searches and copies.

We believe that these matters have long been dealt with by the Chief Court at its discretion, and we think it well that the power to deal with them should be placed on a legal basis.

CHAPTER III.

THE SUBORDINATE CIVIL COURTS.

6. The enumeration of the subordinate Civil Courts in section 17* differs from that in section 4 of the original Bill, but the substantive changes involved are smaller than might at first sight be supposed.

* (a) The Divisional Court.
(b) The Court of the District Judge.
(c) The Court of the Subordinate Judge.
(d) The Court of the Munsif.

The Divisional Court corresponds, with certain modifications, which we shall presently have to notice, to the Divisional Court of the original Bill.

7. The District Judge corresponds to the Assistant Judge of the original Bill, but his position as controlling the administration of civil justice in the district in somewhat the same manner as the District Magistrate under the Criminal Procedure Code controls the administration of criminal justice is more clearly brought out; and (section 23) his Court is, subject to certain exceptions, made the District Court for the purposes of those Acts which confer special powers on a District Court.

8. The Subordinate Judge corresponds to the Subordinate Judge of the first class of the original Bill, but we have, instead of fixing a pecuniary limit to his jurisdiction as in section 36 of the original Bill, empowered the Local Government to do so (section 26). It will thus be in the power of the Local Government to limit the jurisdiction of a Subordinate Judge to any sum it thinks fit, or to confer upon him the unlimited jurisdiction exercised by a District Judge in original suits.

9. The Munsif of the amended Bill is intended to comprise the second, third and fourth classes of Subordinate Judges of the original Bill, and his powers in original suits have been dealt with in a manner similar to that just described; that is to say, it is left (section 26) to the Chief Court to invest each Munsif with such powers as it thinks fit, provided that the limit of value does not exceed Rs. 1,000, which was the limit for Subordinate Judges of the second class under section 36 of the original Bill.

10. It will be observed that section 19 introduces an important change as regards the constitution of the Divisional Court; but as that change will be more conveniently explained when we come to speak of the appellate jurisdictions, it only remains to notice here that we have in the proviso to section 21 put the restriction on the powers of one of several Judges of a Divisional Court sitting alone on the same footing as the similar restriction in the case of the Chief Court (*supra*, paragraph 3).

11. We have inserted a new section (29), similar to section 27 of the Bengal Courts Act, providing for the transfer to a Subordinate Judge or Munsif of business under Act XXVII of 1860, Act XL of 1858 and Act IX of 1861.

12. In the section (now 30) which empowers the Local Government to confer the powers of a Small Cause Court Judge on certain judicial officers, we have, as in other cases, omitted all minute specification of pecuniary limits, and simply provided that the Local Government may confer such powers as it thinks fit within the limit of Rs 500.

13. In dealing with a Bill of this description it is impossible to overlook the difficulties which present themselves in connection with the valuation of certain classes of suits for the purpose of determining the original jurisdiction and the course of appeal. The question of the simplest mode of valuing suits for the recovery of land is at present under the consideration of the Government of India, and we have not accordingly felt ourselves called upon to take it up; but there are certain other classes of suits which in the absence of any special provision for their valuation would be left in a very unsatisfactory position, namely, suits the subject of which does not admit of valuation on any intelligible basis. Such suits are usually valued at some low figure, and consequently may be heard without any reference to their importance or difficulty by Courts of the inferior grades. The necessity for making some special provision for them on the present occasion is the greater, inasmuch as, under the present Bill, the course of appeal will depend to a greater extent than before on the valuation.

We have accordingly introduced a new section (32) providing that, where the subject-matter of suits of any class is such that in the opinion of the Chief Court it does not admit of being satisfactorily valued, the Chief Court may, with the previous sanction of the Local Government, direct that such suits shall be treated as if the subject-matter were of such value as the Chief Court thinks fit to specify in this behalf.

14. The only other provision of this chapter which appears to call for notice is section 38. As we have explained, it is intended that the District Judge should have the general control of the administration of civil justice throughout his district; but there may be cases, as *e.g.*, that of Kulu, in which it would be convenient to delegate this control to a Subordinate Judge in some outlying portion of the district in somewhat the same way as certain powers of a District Magistrate are delegated to a Sub-divisional Officer under the Code of Criminal Procedure; and accordingly a power to effect such a delegation has been taken.

CHAPTER IV.

APPELLATE JURISDICTION IN CIVIL CASES.

15. We have omitted the words in the opening section of this chapter which conferred a power to place other classes of suits on the same footing as mufassal small causes for the

purposes of appeal, the object in view being now sufficiently met by the new definition of "small cause" (in section 3), which gives power to place small causes within the meaning of the Presidency-towns Small Cause Courts Act on the same footing as mufassal small causes.

16. We have, moreover, restricted this section, as we have the entire chapter, to appeals from decrees as distinguished from orders, the latter being sufficiently provided for by the Code of Civil Procedure.

17. The subject of further appeals, which is dealt with in the following section, is one which has given rise to much discussion, and which is surrounded on all sides with difficulties of a serious nature. We have given to it the most careful and prolonged consideration, and have come to the conclusion that the right of further appeal allowed by the Bill as introduced must be extended in some important particulars.

The Bill as introduced allowed a further appeal from the appellate decree of a Divisional Bench only in two cases, namely, if the Judges differed or if some question of law or custom or of general interest was involved; and in these cases it did not allow the appeal as a matter of right, but only if both Judges, or when one had left the Court, the remaining one, certified that the case was of sufficient importance to justify a further appeal. Under the Bill as now amended a further appeal will lie as a matter of right and without any certificate from a Divisional Bench in all cases where the Judges differ. There will, moreover, be a further appeal in all cases in which any one Judge certifies that there is a question of law or custom or general interest involved, and that the case is in his opinion of sufficient importance to justify a further appeal. And lastly, there will be a further appeal in cases of a class altogether new and not contemplated in the original Bill, namely, where the value of the suit exceeds Rs. 500.

The proviso barring a further appeal in small causes when the value does not exceed Rs. 500 is retained.

18. We have, as already indicated, made another alteration which is of considerable importance, and which it is convenient to notice here.

The Bill as introduced required that the Divisional Courts should consist in all instances of at least two Judges, that except as expressly provided no decision should be reversed except by a bench of two Judges, and that the restrictions on further appeal which we have described should apply to all Divisional Courts. To that objection was taken on the ground that there may be a difficulty in finding in the Punjab a sufficient number of competent officers to furnish two Judges for each of the Divisional Courts proposed. We need hardly say that if the objection were well-founded it would be a serious one, inasmuch as the strict limitations on the right of further appeal to the Chief Court imposed by the original Bill were framed in reliance on the strength of the Divisional Benches; and though those limitations have now been relaxed in the important particulars already described, the Bill still proceeds on the assumption that a Divisional Bench will be a stronger, more reliable and more satisfactory tribunal than the Court of a Commissioner ordinarily now is.

19. It is of course impossible for us to say whether the precise number of competent officers required to constitute Benches in all the proposed Divisions is to be found in the Punjab at this moment, but we understand that the Lieutenant-Governor has no misgivings on the point, and we think it may be safely affirmed that the difficulty of procuring a sufficient number of competent officers for the Benches has been much exaggerated.

In order, however, to guard against every possibility of miscarriage, we have now modified the Bill in such a way that, if the Lieutenant-Governor finds at any time that the materials required for establishing a Bench in any particular Division are not immediately available, he can make the Divisional Court there consist of a single Judge (section 19), and in the event of his doing so a further appeal will, subject only to the proviso as to small causes contained in section 40, lie from that Judge's appellate decrees precisely as they lie at present from the appellate decrees of a Commissioner [section 40, clause (*d*)].

CHAPTER V.

REVENUE COURTS.

20. We have recast this chapter, assimilating it in form and arrangement to the portion of the Bill relating to Civil Courts, and supplying certain omissions in detail, as, *e. g.*, provisions relating to ministerial officers, which it seems unnecessary to notice more particularly.

21. We have omitted from the list of suits cognizable by Revenue Courts given in the first section the so-called suits under section 40 of the Panjab Tenancy Act, inasmuch as we find on reference to that Act that the proceedings in question are not suits but applications, and we think that the proper mode of dealing with them is to include them among the applications to be heard on the revenue side which are specified in section 42 of that Act, and from which they were apparently omitted by an oversight. We have accordingly added a section (75) to the Bill amending section 42 of the Tenancy Act so as to include them.

22. We have added to the list of suits cognizable by Revenue Courts "suits to determine disputes regarding boundaries of land" (*i.e.*, of agricultural land) "which have been fixed by

a Court or Revenue-officer." This addition has been advocated by several of the authorities consulted, and it appears to us to be a proper one, seeing that all that is ordinarily required for the decision of such disputes is the laying down on the ground of a boundary which is to be found in a map.

23. On the other hand, we have appended to the section a proviso which empowers the Local Government, after consulting the Chief Court, to retransfer to the Civil Courts the jurisdiction in any class of revenue cases cognizable in any part of the country where it appears desirable to do so.

24. We have for convenience sake divided the classes of suits into two groups, and at the instance of the Local Government included class (d), suits for ejectment of a tenant, in the group containing suits deemed to be of greater importance or difficulty.

25. We have in defining the powers of Assistant Commissioners and Tahsíldárs [section 46 (2)], following the same course as in the provisions relating to original civil jurisdiction, omitted all minute specification of pecuniary limits, and left it to the Local Government to fix those limits as it thinks fit.

26. We have for the same reason as in the preceding chapter omitted all reference to appeals from orders.

27. We have introduced a clause in the proviso to section 47, based on similar provisions in the Rent Laws of Bengal and the North-Western Provinces, giving power to bar appeals from decrees of certain classes of officers in money-suits when the amount involved does not exceed Rs. 100 and no question of importance, such as a question of title, is involved.

28. We have added a section (51) empowering the Local Government to confer on any person the judicial powers, original or appellate, of a Financial Commissioner, Commissioner or Deputy Commissioner under this chapter.

29. We have, in order further to provide a means of relieving the Revenue Courts of the necessity of disposing of particular matters which may be found to be more proper for consideration by the Civil Courts, introduced two new sections (54 and 55).

The first of these is copied with certain modifications from section 208A of the North-Western Provinces Rent Act, 1881, and is intended to take the place of section 49 of the original Bill, which has been the subject of adverse criticism. It empowers a Revenue Court, when it considers that any question in issue before it is more proper for decision by a Civil Court, to require any party to institute a suit in the Civil Court with a view to obtaining a decision on the question. If he fails to comply with the requisition, the Revenue Court is empowered to decide the question against him, but is not bound to do so, as under the corresponding provision of the North-Western Provinces Act. If the party institutes the suit in the Civil Court, the Revenue Court will follow the decision of that Court.

30. It has been suggested that any provision of this sort is superfluous, inasmuch as a Revenue Court being a Court of limited jurisdiction, and its decision in one case being accordingly, under section 13 of the Code of Civil Procedure, binding in other cases only to a limited extent, it may safely be compelled to decide all questions arising incidentally in any suit before it, even though they may be questions which would be obviously more proper for the consideration of a Civil Court.

To this view of the matter we are unable to assent.

31. It is undoubtedly true that in many cases, probably in the great majority of cases, it is best for all parties that the Revenue Court should take upon itself to decide all questions incidentally arising in the suit, even though some of them might be of a nature more proper for the consideration of a Civil Court. This would clearly be the right course for the Revenue Court to take when the question is a simple one and can be quickly disposed of, or when it is one not likely to arise subsequently between the parties in any other connection; but it seems equally clear that when, as must occasionally happen, some complicated and difficult question arises in a revenue-suit, and is certain to arise again between the parties unless it is finally settled, a Revenue Court ought to be allowed some discretion of the sort proposed. For, if some such discretion is not allowed, what must be the result? The question must be tried out at a great expenditure of time and money to all concerned by the Revenue Court, which *ex hypothesi* is not the best Court to try it. It may then go in appeal to the higher Revenue Courts, probably in the last resort to the Financial Commissioner, and, after all, as the decision obtained will not be binding except for certain limited purposes, the whole litigation may commence *de novo* and run a similar course through the Civil Courts.

It is in order to provide a means of avoiding scandals of this sort that we have introduced the section in question.

32. We are quite aware that the power it confers might be abused by an indolent Revenue-officer if he were free to resort to it at pleasure, but we have guarded against this by making the sanction of the immediately superior Court a condition precedent to its exercise.

33. Section 55, to which there is nothing corresponding in the original Bill, empowers the Financial Commissioner to refer to the Chief Court a point of law which he considers that Court is more competent to decide.

34. We trust that these two sections and the proviso which we have appended to section 45 (see *supra*, paragraph 23) will suffice to remove the apprehensions which have been expressed in some quarters that the Bill may force upon the Revenue Courts duties which they will be incompetent to discharge.

CHAPTER VII.

SUPPLEMENTAL PROVISIONS.

35. We have omitted section 63 of the original Bill, which provided for consultations between the two Financial Commissioners, as it is unnecessary to provide for such a matter by legislative enactment and the proposal to do so gave rise to some misapprehension.

36. We have likewise omitted section 66 of the original Bill, which expressly prohibited a judicial officer from disposing of a case in which he might appear to be interested. We are aware that such provisions have long found a place in our Courts Acts, but we think the matter is one on which legislation may well be dispensed with, the general principles applicable to it being perfectly well understood.

37. Section 68 of the original Bill, which reproduced section 48 of the present Panjáb Courts Act, gave power to the Government to appoint a single Judge to exercise the Chief Court's superintending functions. This power has never been exercised, and we are informed that the Government have no desire to retain it. We have accordingly omitted the section.

38. Sections 73 and 74 of the original Bill, which provide for the enhancement of the court-fees upon applications to the Chief Court for revision under section 622 of the Code of Civil Procedure, were introduced with a view to discouraging such applications. We fully approve of their provisions and have retained them in the revised Bill. From statistics put before us by our hon'ble colleague Mr. Barkley it appears that such applications have of late been increasing to a formidable extent in the Panjáb; and, as observed by him when he asked for leave to introduce the Bill, they are certain to increase with greater rapidity if the provisions of the Bill, which give greater finality to the decisions of the Lower Appellate Courts, become law. Moreover, from the circumstance that only about one-sixth of the applications now made to the Chief Court are successful, it may be gathered that Panjáb litigants when debarred from appealing are tempted to incur the serious trouble and expense involved in making such applications, even where there may not be the slightest prospect of success. This appears to us to be a serious evil, and the only question has been whether the increase of the court-fee proposed in the original Bill would be enough to check it. The better opinion appears to us to be that it would have but a slight effect in that direction, and that nothing short of an alteration of section 622 of the Code as applied to the Panjáb will suffice.

39. We find that a considerable divergence of opinion has arisen between some of the highest Courts in the country as to the nature of the grounds required to support an application under that section. A full bench of the Allahabad High Court has held (I. L. R. 3 All. 203) that any grounds on which a second appeal would lie are sufficient. The practical result of this, as admitted by two of the learned Judges, is that section 622 of the Code gives a second appeal in all those cases in which the earlier sections of the Code expressly deny it. It may, no doubt, be said that the Court has a discretion under section 622 to interfere or not as it thinks fit, but we apprehend that as a rule a High Court holding the opinion just referred to, and finding what would be a good ground for special appeal made out, would be in practically the same position as if it were considering a special appeal under section 551.

40. A view which is probably more in accordance with that of those who framed the section was taken by a full bench of the Bombay High Court in a case reported in I. L. R. 7 Bom. 341. The conclusion to which the Court came in that case may be stated to be that the jurisdiction conferred by section 622 of the Code is an extraordinary jurisdiction to be exercised only in extraordinary cases, and that the precise circumstances under which it is to be exercised is left to the discretion of the Court and cannot be defined.

The question has not yet come before a full bench of the Panjáb Chief Court. It is impossible to predict what the result of its being fully considered by that Court would be; and, having regard to its intimate connection with the working of the present Bill, we do not think the matter should be left in uncertainty.

41. The root of the difficulty which has sprung up in connection with the section appears to lie in that portion of the wording introduced into the Code by Act XII of 1879, which empowers the High Court to interfere on the ground that the Lower Court has acted "illegally." The Allahabad High Court has construed this as justifying the High Court's interference whenever the Court below has erred on a question of law, and it is on this point mainly that the Bombay Court has dissented from the Allahabad decision. The divergence of opinion will no doubt have eventually to be met by an amendment of the Code, but the matter is not very pressing, where, as in most parts of the country at present, the proportion of cases in which appeals to the High Court are barred is comparatively small and a tendency to resort recklessly to the section has not developed itself among litigants.

42. In the Panjáb, on the contrary, the question is already pressing, and will become more so if this Bill is passed. We are therefore compelled to deal with it separately for that province; and the conclusion to which we have come after the most careful consideration, and having regard to the special circumstances of the Province and the peculiar features of the appellate system now proposed, is that the extraordinary jurisdiction conferred by section 622 of the Code should be exerciseable only on the ground that the lower Court has exercised a jurisdiction not vested in it by law, or has failed to exercise a jurisdiction so vested, or has acted in the exercise of its jurisdiction with material irregularity. We propose, therefore (section 70 of the Bill), to limit the scope of section 622 of the Code in this way, and we believe that when so limited it will still be sufficiently wide to cover all cases which call for the exercise of revisional as distinguished from appellate jurisdiction.

43. The publication ordered by the Council has been made as follows :—

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House, Simla, on Thursday, the 9th October, 1884.

PRESENT:

His Excellency the Viceroy and Governor General of India, K.G., G.M.S.I., G.M.I.E., *presiding*.
His Excellency the Commander-in-Chief, G.C.B., C.I.E.
The Hon'ble J. Gibbs, C.S.I., C.I.E.
Lieutenant-General the Hon'ble T. F. Wilson, C.B., C.I.E.
The Hon'ble C. P. Ilbert, C.I.E.
The Hon'ble Sir S. C. Bayley, K.C.S.I., C.I.E.
The Hon'ble T. C. Hope, C.S.I., C.I.E.
The Hon'ble Sir A. Colvin, K.C.M.G., C.I.E.
The Hon'ble D. G. Barkley.
The Hon'ble J. W. Quinton.
The Hon'ble H. J. Reynolds.

RANGOON WATER-WORKS BILL.

The Hon'ble MR. ILBERT moved that the Report of the Select Committee on the Bill to confer powers and impose duties on the Municipal Committee for the Town of Rangoon in respect to the construction and maintenance of Water-works and the supply of Water in that Town be taken into consideration. He said :—"The only important alteration made by the Select Committee in the Bill is the omission of the financial clauses. The Committee agree with the Chief Commissioner in thinking that the arrangements for the imposition of a water-rate and for the constitution and management of the water-supply fund can be more conveniently dealt with under the financial sections of the recently passed Municipal Act than under the separate sections which it was originally intended to insert in this Bill."

The Motion was put and agreed to.

The Hon'ble MR. ILBERT also moved that in section 2, clause (1), of the Bill the words "and includes the Cantonment of Rangoon and the Central Jail" be omitted. He said that he was informed that the Chief Commissioner considered that these words were not necessary.

The Motion was put and agreed to.

The Hon'ble MR. ILBERT also moved that the Bill, as amended, be passed.

The Motion was put and agreed to.

INDIAN SALT ACT, 1882, AMENDMENT BILL.

The Hon'ble SIR A. COLVIN moved that the Bill to amend the Indian Salt Act, 1882, be taken into consideration.

The Motion was put and agreed to.

The Hon'ble SIR A. COLVIN also moved that the second section of the Bill and the second recital in the preamble be omitted. He said:—

"The preamble as originally framed ran thus:—

'WHEREAS it is expedient to exclude the Province of Sindh from the operation of those portions of the Indian Salt Act, 1882, which do not extend by their own operation to the whole of British India;'

and then it went on to say—

'Whereas it is also expedient to remove certain doubts which have been raised as to the meaning of the words 'importation of salt' in section 27 of the same Act, &c.'

And the second section of the Bill was as follows:—

'For the word 'importation' in section 27 of the same Act, the word 'bringing' shall be substituted.'

"The object of these words in the preamble, and in the second section of the Bill, was, as explained in the Statement of Objects and Reasons, and by me at the introduction of this Bill, to remove a doubt as to the meaning of section 27 of the Act, raised by a ruling of the Chief Court in Sindh, which had held that the words 'importation of salt' in that section covered only the bringing in of salt as merchandise for the purpose of commerce and in merchantable quantities; but did not apply to small quantities brought for other purposes. Since the introduction of the Bill, however, it has been brought to the notice of the Government of India that the Chief Court in deciding the later case of the *Crown* v. *Imambux Haji* gave reasons for holding that it would no longer be safe to act on the opinions expressed in the earlier decision; and that importation of salt includes the bringing of salt into British India in the smallest quantities. In other words, the later ruling of the Chief Court in Sindh has annulled the former, and cleared up any doubt that may have existed, and which it was the object of this section (2) to remove, thereby making the section unnecessary."

The Motion was put and agreed to.

The Hon'ble SIR A. COLVIN also moved that the Bill, as amended, be passed.

The Motion was put and agreed to.

The Council adjourned to Thursday, the 23rd October, 1884.

Read—

Summary of the Weather Reports for September 1884.

Over the greater part of the country the weather of the past September has been of an exceptionally wet and unsettled character. In August no travelling depressions of any importance made their appearance, while in September it was only for a short period in the middle of the month that the weather was uninfluenced by cyclonic conditions.

The majority of these cyclonic storms were formed over the head of the Bay of Bengal, whence they travelled inland in a west-north-westerly direction. Of these, some appear to have filled up and disappeared on reaching the Central Provinces, while others continued their course beyond. That of the 5th-9th passed right across the country, the centre leaving the Bay of Bengal on the 5th, and passing over Kutch on the 9th. Heavy falls of rain accompanied it in its passage, causing the extensive floods which occurred in the valleys of the Nerbudda and the Tapti in the early part of the month. The storm of the 18th-27th followed a different track. After travelling west-north-westward as far as Khandwa, the vortex suddenly turned northwards, and passed on to Jhansi and Agra, bringing heavy rain to all parts of Central and North-Western India.

In addition to these travelling vortices, small local disturbances originated in Northern Rajputana on the 1st and 2nd, and in Rohilkund on the 29th and 30th. In both cases, but particularly in the latter, heavy rain fell in the surrounding districts.

Assam, Behar, and North Bengal have been quite outside the influence of the disturbances, and, as a consequence, the reports show that the rainfall of the whole of those provinces has been decidedly deficient; all other parts of Northern India, as well as the more central parts of the country, have received much more than their average amount of rain.

Turning to the Peninsula, the returns show that the Konkan and Malabar Coasts have had about four inches more than their average rainfall, but that at the majority of stations in the Dekkan, Mysore, and the Karnatic the fall has been deficient. In Burma the differences from the average have been in general small and unimportant.

The greatest excess above the average occurred at Pachmarhi and Mount Abu, where the month's rainfall has been about 25 inches over the normal amounts; and the greatest deficiency occurred in Purneah and Dinagepore, where it amounted to about 12 inches.

The greatest number of wet days, 26, occurred in Burma. There were 24 in the Central Provinces and 23 on the Malabar Coast; only 11 in North Bengal, 9 in Mysore, and 3 or 4 in Sind. At Bellary rain fell only on 8 days throughout the entire month. In the south of the Peninsula, towards the close of the month, there occurred 3 or 4 days of consecutive rainfall, during which about one inch of rain fell at Tuticorin, after a spell of dry weather which had lasted since May 16th.

On the mean of the whole month, the pressure was slightly above the average over the Upper Provinces and as far east as Behar, but, with a few local

exceptions, it was below the average in Bengal, Burma, the whole of the central parts of the country and the Peninsula, as far south as Madras in the east and Mangalore in the west. To the southward of these stations the barometer again showed a slight excess.

The temperature of the whole month was somewhat in excess in Assam, North Bengal, Behar, Lower Sind, and at several stations in the south of the Peninsula, these being the regions where rain was deficient and the cloud proportion probably slight. Humidity shows the same agreement, being considerably in excess of the average, except in the provinces of Assam, North Bengal, Behar, and the south of the Peninsula.

The following table gives roughly the differences of rainfall from the average in the different districts of India:—

Districts.	Average rainfall in September.	Difference of rainfall of September 1884 from average September rainfall.
	Inches.	Inches.
Punjab, West	2·38	+ 2·34
Punjab, East	4·22	+ 3·57
North-Western Provinces, Trans-Gangetic Stations ...	7·29	+ 3·36
North-Western Provinces, Cis-Gangetic Stations ...	5·34	+ 6·90
Assam and Cachar	11·45	— 6·64
Behar	7·46	— 3·01
North Bengal	14·94	— 10·52
Lower Bengal and Chutia Nagpur	10·15	+ 2·22
Orissa, Northern Circars	8·69	+ 0·53
Central Provinces, South	9·16	+ 11·64
Berar and Khandesh	5·09	+ 8·21
Rajputana, Central India, Saugor, Nerbudda ...	6·05	+ 5·94
Sindh and Kutch	1·07	+ 2·46
Gujrat	4·82	+ 7·67
Konkan	10·90	+ 4·03
Dekkan and Hyderabad	5·48	— 1·25
Malabar Coast	10·82	+ 3·77
Mysore, Bellary	4·61	— 1·92
Karnatic	3·62	— 0·88
British Burma	16·41	+ 1·51

W. L. DALLAS,

Asst. Meteorological Reporter to the Govt. of India.

ORDER.—Ordered, that the above Summary be printed in the Supplement to the *Gazette of India.*

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 15th OCTOBER 1884.

GENERAL REMARKS.—There was rain in all districts of Madras during the week, and some improvement is noticed in those parts of the Presidency where prospects have hitherto been unsatisfactory. Rain has fallen generally all over the Province of Mysore, and the condition of the crops has been improved. In Coorg prospects continue favourable. Rain is still urgently wanted in several parts of the Deccan and Southern Mahratta Country, and crops are reported to be withering in the eastern talukas of Poona and parts of Belgaum. Fodder is also scarce in several talukas of Dharwar and Belgaum; elsewhere in the Presidency prospects are generally good.

There was no rain in the Central India and Rajputana States during the week, but prospects continue good. In the Berars and Hyderabad the condition of the crops is very favourable.

No rain fell in the North-Western Provinces and Oudh, except in Partabgarh and in the Punjab. In the former the *kharif* crops have been injured in some districts by heavy rain, but in the latter their condition is very favourable. The rains have ceased in the Central Provinces, and the prospects of the *kharif* are fair.

In Bengal the *amun* crop, which has been improved by the late rain, is expected to yield well if there is heavy rain shortly. In Assam prospects are generally good.

The last report of the Meteorological Department, dated 16th instant, states that rain has fallen over the whole of the Madras Presidency, with the exception of the Kurnool, Bellary, and Cuddapah districts, and that slight showers are reported from Mercara and from two districts in British Burma; elsewhere there has been no rain.

Harvesting continues in Madras, and ploughing and sowing for the *rabi* are in progress in Bombay, Bengal, North-Western Provinces and Oudh, Punjab, and the Central Provinces. The *kharif* is being harvested in Bombay and the Punjab.

The public health is generally good. Prices are fluctuating in Bengal and the Punjab; elsewhere they are generally stationary.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—(Oct. 15th)		
Bellary ...	·60 (average)	Pasture scanty. Two deaths from cholera.
Kurnool ...	·15 (average)	Standing crops good. Small-pox prevalent in three taluks and cattle-disease in two.
Ganjam ...	·05 (average)	Small-pox, cholera, and cattle-disease prevalent.
Kistna ...	·51 (average)	Standing crops generally good. Harvest dry crops, outturn below average. River 5·55 feet over anicut. Small-pox, fever, and cattle-disease in places; 4 deaths from cholera.
Chingleput (Madras) ...	1·06 (average)	Standing crops generally good. Harvest wet and dry crops, yield half the average. Small-pox in three taluks; 83 deaths from cholera.
Coimbatore ...	2·64 (average)	Standing crops benefited by recent rain; harvest wet and dry crops, outturn average in three and below average in eight taluks.
Tanjore ...	1·60 (average)	Standing crops generally good. Rivers 2 to 8 feet. Harvest wet and dry crops, outturn average. 63 deaths from cholera.
Madura ...	·98 (average)	Prospects fair in four taluks, elsewhere crops unsatisfactory from want of rain. 54 deaths from cholera.
Malabar ...	1·06 (average)	Operations for second crop cultivation progressing. Slight small-pox in seven taluks, and fever in two; 10 deaths from cholera.
Travancore ...	1·40	Second crop paddy progressing. Fever and small-pox prevalent; 2 deaths from cholera.
		General Remarks.—General prospects fair, except in Bellary, Anantapur, and parts of Madura, and Coimbatore. There has been some improvements in these tracts also during the week.
Bombay—(Oct. 15th)		
Karachi ...	No rain; total to date in Karachi, 7·65; Manora, 7·73; Kotri, 9·36; Thana Buta Khan, 7·49.	River at Kotri on 13th, 10 feet 4 inches against 7 feet 11 inches on same date last year. Fever in 9 talukas; cattle-disease in 9 talukas, some loss in 4 talukas; small-pox in 6 villages in the districts, no fresh cases or deaths, 9 remaining sick. Prices—wheat, red rice, and *bajri* in Karachi 26, 26 and 40; Dadu 36 and 40; Shahbandur 20, 32, and 32; and Tatta 26, 30, and 36 pounds per rupee, respectively.
Hyderabad ...	*Nil*	River at Kotri on 13th, 11 feet 4 inches against 7 feet 11 inches last year. *Rabi* operations in progress. Fever throughout the district; cattle-disease in 4, and small-pox in 4 talukas. Prices of grain steady.
Ahmedabad ...	*Nil*	Reaping of *bajri* commenced in some talukas; crops healthy. Fever in Dholka, Gogo, Dholira, and Viramgaum. Wheat 31 and *bajri* 33 pounds per rupee.

Presidency or Province and District.	Rainfall for week under report	State of agricultural prospects.
Bombay—*contd.*		
Baroda	*Nil*	Public health fair, cattle disease in Wadnagar, and crops in fair condition except in Korinar and Okhamandal, where they have been damaged by excessive rain. Reaping of *bajri* commenced in Kadi division. Prices—*bajri* 34 and rice 23 pounds per rupee.
Surat ..	*Nil*	Young crops healthy, preparations for *rabi* commenced in places. Fever in Pardi and Mandvi. *Juari* 29 and *nagli* 40 pounds per rupee.
Nasik .	*Nil*	Weather fair and dry. *Kharif* crops ripening, *rabi* sowing in progress. Public health generally good. 2 attacks and 1 death from cholera at Nasik, small-pox in Malegaon. Wheat 40, *bajri* 33½, and rice 21 seers per rupee.
Colaba (Bombay)	*Nil*	Abnormal temperature 0° to 2° warm. Vapour in air defective from 11th to 14th, abnormal wind easterly.
Poona ..	Rain in all talukas, maximum 50 at Junnar, minimum 01 at Sirur.	Crops withering in Indapur, Bhimthadi and parts of Sirur. More rain urgently wanted in the east. 3 deaths from cholera at Kenjal taluka. In Purandhar *bajri* 32 and *juari* 33, in Poona *bajri* 28 and *juari* 30 pounds per rupee.
Ahmednagar ..	Akola, 2 88, Sangamner, 2 72, Kopargaon, 1 35, Rahuri 1 7, Nagar 1 6, Parner 86, Newasa, 75, Jamkhed none, Shrigonda, Karjat, and Sheogaon, slight	*Kharif* crops in good condition, harvesting in progress in Shrigonda and Sheogaon, sowing of *rabi* completed in Nagar, Parner, Sheogaon, Rahuri, and Sangamner, and is in progress in the other talukas. More rain would be beneficial. *Juari*—maximum 60 pounds per rupee in Sangamner, minimum 33 in Karjat, *bajri*—maximum 49 pounds in Jamkhed, minimum 35 in Karjat.
Sholapur ...	6, Barsi none, Madha 19, Karmala 31, Pandharpur, 13, Sangola 31, Malsiras, 98	*Juari* 33 pounds 18 tolas and *bajri* 33 pounds 20 tolas per rupee. General prospects poor. No signs of more rain, which is greatly needed.
Dharwar .	Ranibennur, 3 57, Hangal 3 13, Ron, 2 16, Kod, 1 16, Mugad, 1 16, Navalgund, 1 9, Hubli, Gadag, Bankapur, and Karajgi nearly 35, Mundargi 10, Dharwar, Navalgund, and Kalghatgi, none	Sowing of late crops retarded in Hubli, Navalgund, Ranibennur, and Ron talukas for want of rain, which is very urgently required to save the early crops and enable late crops to be sown. Fodder and water becoming scarce in eastern talukas. Cattle disease in Mandargi, Petha, and Karajgi talukas are being removed to western talukas, cholera abating except in Navalgund taluka, deaths 47. Prices rising average, rice 26 and *juari* 41 pounds per rupee.
Kanara ...	Karwar, *nil*, Kumpta, 21, Sirsi, 14, Haliyal, 27.	Common rice at Karwar 15, district average 15½ seers per rupee. Small-pox—2 deaths in Supa, fever in Bhatkal and Sirsi. Rice harvest on cost[illegible]
Rajkot ..	... ...	General health good. Weather warm. Fever generally prevails, cholera in Dhoraji, Nawanagar and Porbandar villages. *Bajri* 18 and *juari* 5[illegible] pounds per rupee.
		General Remarks.—Good rain in parts of Ahmednagar, Poona, Dharwar, and Kaira, more still urgently wanted in several parts of the Deccan and Southern Maratha Country. Crops withering in the eastern talukas of Poona and in parts of Belgaum. Scarcity of fodder in several talukas of Dharwar and Belgaum. *Kharif* harvest and *rabi* sowing in progress in several districts. Fever reported in parts of 11 districts, small-pox and cattle-disease in a few places.
Bengal—(Oct 15th)		
Chittagong	20	Weather very sultry. Prospects of crops good. Prices somewhat low. Sporadic cases of cholera still reported, otherwise general health good.
Dacca ..	*Nil*	Damage to crops apprehended from failure of water and want of rain. Harvesting of *aus* paddy commenced, cultivation for *rabi* crops going on.
24 Pergunnahs (Calcutta	*Nil*	Prospects of *amun* paddy good, harvesting of *aus* over, with an out-turn of 12 annas, weeding of *amun* going on, lands being prepared for *rabi* crops. Price of common rice stationary. Cases of ordinary fever reported, otherwise general health good. State of river normal.
Moorshedabad .	1 25, no rain since Saturday night	Rain of last 3 weeks done much good to *amun*. Northerly winds setting in. *Amun* still requires at least one more heavy shower, in the *kalmatar* or lowlands almost a full yield expected, *kalai* sowings considerably damaged by late unexpected rise in rivers. Ploughing much facilitated by rain.
Rajshahye ..	03	Weather bright and clear. *Amun* still wants more rain. Prices rising. Health fair.
Burdwan ..	*Nil*	Rain wanted. Prices falling slightly in Raneegunge and Kulna. Prospects in Raneegunge fair, middle except in thana Kakra, prospects in Kutwa fair, but depend on further rain this month, elsewhere not good.
Rungpore ..	*Nil*	Weather fair. Prospects of crops not very favourable. Prices of grains rising. Malarious fever prevalent.
Bhagalpur ..	*Nil*	Late rain greatly improved prospects of standing paddy, more rain will be wanted by the end of the month, and there is every prospect of good *rabi* harvest. A very high flood in the Ganges destroyed a great deal of *kurthi* and *kalai*, and will greatly retard *rabi* sowings. Rice selling at 15 seers per rupee.

Presidency or Province and District	Rainfall for week under report.	State of agricultural prospects.
Bengal—*contd.*		
Purneah ..	*Nil*	Prospects of crops much improved since last rain, cultivation for *rabi* crops begun. Common rice 15 seers per rupee. Fever very bad
Patna ..	·26	Paddy looks well in some places, sowing of *rabi* commenced, but rain still wanted. Cholera in Behar sub division
Durbhunga ..	·42	*Rabi* sowings coming on well, paddy crops though much improved on places still in need of more rain. Prices stationary. Public health good
Hazaribagh ..	*Nil*	Harvesting of *bhadoi* completed except in one or two thanas, prospects of paddy generally fair, lands being prepared for winter crops in some places, sowing commenced. A few cases of small pox reported, public health generally good
Cuttack ..	*Nil*	Weather cloudy to-day. Early *sarad* ripening, late *sarad* growing well. Rain urgently wanted. *Rabi* being sown. Price of rice stationary. Cholera in some places
		General Remarks.—Late rain improved prospects of standing *aman* paddy and if heavy rain falls shortly a good crop expected. *Rabi* sowings commenced; harvesting of *aus* and jute still continues; poppy being sown in Sarun. Price of rice falling slightly in some districts. Fever prevails in several, and cholera still continues in two or three districts.
N. W. Provinces and Oudh—		
Benares (Oct. 13th)	No rain	*Bajra mung* and *urd* slightly damaged by previous rain, other crops good, sowing for *rabi* has commenced. Slight fever in city and Gangapur. Prices rising
Gorakhpur („ 11th)	... ..	Fine weather, but unusual floods throughout the district, and crops have been damaged in places. Cholera decreasing. Prices stationary
Fyzabad („ 13th)	No rain in week	Rain now ceased, sky clear. *Rabi* sowings commenced. Health excellent, cattle disease in part of district
Lucknow („ „)	No rain	Weather clear, west wind. Fields are being ploughed for *rabi* sowing, in some places it is being sown. Crops on low lands damaged by floods. Health of people good, slight cattle disease reported in tahsil Malihabad. Supplies sufficient. Prices rising slightly in tahsil Mohanlalganj

HENRY F. BLANFORD,
Meteorological Reporter to the Government of India.

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The "Indian Law Reports," published under the authority of the Governor General in Council, appear in monthly parts, published as soon as possible after the first of each month, at Calcutta,

Madras, Bombay, and Allahabad, and comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court The cases heard by the Privy Council on appeal from each High Court are reported in the series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series

The Calcutta Series is distributed by the Bengal Secretariat, the copies for subscribers registered by Messrs Thacker, Spink & Co, are distributed by that firm, and the Madras, Bombay and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad respectively

On and from the 1st January, 1884, the terms of subscription and sale will be reduced as follow:—

Terms of subscription, payable annually in advance.

	With out postage	With postage
For the Calcutta Series	R10 0	R12 8
" Madras "	" 5 0	" 6 0
" Bombay "	" 7 8	" 8 8
" Allahabad "	" 5 0	" 6 0
Complete set	" 20 0	" 22 8

A part of any series purchased separately, R1

Persons desiring to subscribe for or purchase the Reports should apply to—

Messrs Thacker Spink & Co Calcutta
" Thacker & Co Bombay
" Higginbotham & Co, Madras
The Government Central Book Depot Bombay
" " Book Depôt, Allahabad

Orders and subscriptions for 1881 should be at once remitted.

NOTICE.

Advertisements and Notices by Private Individuals and Corporations.

ROMAN RAILWAY COMPANY IN LIQUIDATION.

NOTICE.

EXCHANGE OF THE COMPANY'S SHARES.

Definite date of its effectuation in Florence, 31st December 1884.

The Liquidation Commission of the "Roman Railway Company, in Liquidation" (Società Anonima delle Strade Ferrate Romane) inform bearers of the Ordinary, Trentennial and Privileged (late Sienese) Shares of the above Company of the contents of Article 4 of the Additional Act of the Contract of right of purchase stipulated November 21st, 1877, as well as of Article 2 of the last Convention 26th April 1879; which Act and Convention were sanctioned by law 29th January 1880, No. 5249, Series 2nd.

Article 4th of the Additional Act, 21st November 1877:

"Three years from the promulgation of the Law sanctioning the Contract of right of purchase 21st November 1873, and the present additional act are allowed to possessors of Ordinary, Trentennial and Privileged Shares to present them for conversion. If not presented within the stated time such Shares will be valueless to all intents and purposes."

Article 2nd of the Convention, 26th April 1879:

"All and every article of the Convention 17th November 1873, rendered definite and irrevocable by law together with the Additional Act 21st November 1877 will be suspended up to the 31st December 1881."

Moreover the Liquidation Commission beg to inform the public that in accordance with the above articles the definite date for the presentation (in Florence) of the Ordinary, Trentennial, and Privileged Shares in order to avoid the consequences of the said articles and to have the right of enjoying the dividend of the amount that will be allotted by the Liquidation Commission to these Shares, according to their respective rights, falls due on 31st December 1884.

The sole Certificates to bearer, issued in accordance with Regulation 29th July 1882 by the Liquidation Commission in exchange for shares presented, shall continue to have value and be negotiable.

E. DEODATI,

The President of the Liquidation Commission.

FLORENCE,

The 15th June 1884.

NOTICE.—Those who may have mislaid or lost their Shares are hereby informed that Article 10th of the Company's Statute empowers all persons interested to demand from the Civil Tribunal of Florence, acting as Commercial Tribunal, the issue of new Shares in surrogation of the lost ones and this with all due cautions and formalities which are stated in the article.

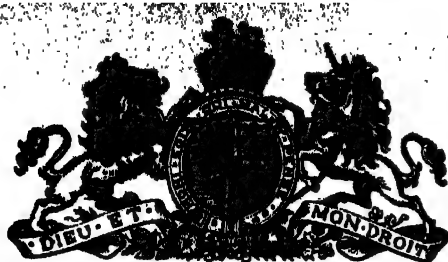
The possessors of Shares living out of Florence will have to arrange matters in such manner as to send the shares or have them sent in for presentation to the Liquidation Commission not later than 31st December 1884. All those interested who wish to obtain full information on the subject may apply to the Liquidation Commission at their office in Florence, No. 7, Piazza dell'Unità Italiana.

The National Bank in the Kingdom of Italy through the medium of their several chief Offices and Branch departments, as well as the General Italian Credit Mobilier Company at their offices in Florence, Genoa, Turin, and Rome, undertake in the behalf of Shareholders to do all and every kind of operation in connection with the exchange of the abovementioned shares.

PROMISSORY NOTES.

Lost.

The Government Promissory Note No. 059534, of the 4½ per cent. of 1879, for R25,000, originally standing in the name of the Chartered Bank of India, Australia, and China, has been lost. Payment of the above note and the interest thereupon have been stopped at the Public Debt Office, Bank of Bengal, and application made for the issue of a duplicate in favour of the proprietor, Mr. C. O. Eaton, Tolethorpe Hall, Stamford.



GISBORNE & Co.

Lost, Stolen, or Destroyed.

The Non-transferable Treasury Note No. 000062, of the 5 per cent. of 1872, for R500, originally standing in the name of Gopika Bai, Manager of Mandir Vittal Rookhmai of Ramtek, and last endorsed to Gopika Bai, Manager of Mandir Vittal Rookhmai, Ramtek, the proprietor, by whom it was never endorsed to any other person. Payment of the above note and the interest thereupon have been stopped at the Public Debt Office, Bank of Bengal, and application is about to be made for the issue of a duplicate in favour of the proprietor.

GOPIKA BAI,
Manager of Mandir Vittal Rookhmai, in Ramtek.

NAGPUR,
The 17th September 1884.

SUPPLEMENT TO

The Gazette of India.

No. 42.} CALCUTTA, SATURDAY, OCTOBER 18, 1884.

OFFICIAL PAPERS.

A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known.

Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of six Rupees per annum if delivered in Calcutta, or nine Rupees if sent by Post.

No Official Orders or Notifications, the publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.

CHAPTER VII.

ARREARS AND OFFENCES.

SECTIONS.
33. Arrears of water-rents.
34. Power for Committee to turn off water on neglect to pay water-tax or water-rent.
35. Penalty for obstructing, diverting or wasting water.
36. Penalty for unauthorized application of water.
37. Penalties for causing the water of the Committee to be fouled, &c.
38. Prosecutions.

An Act to confer powers and impose duties on the Municipal Committee for the Town of Rangoon in respect to the construction and maintenance of Water-works and the supply of Water in that Town.

WHEREAS a scheme has been settled and to some extent carried out for the construction and maintenance of water-works and the supply of water to the Town of Rangoon by the Municipal Committee for that town;

And whereas it is necessary for the purposes of the scheme that the Royal Lake at Rangoon, and all existing tanks, cisterns, springs, wells, pumps, reservoirs, conduits, aqueducts, hydrants, standpipes and works, and all land, bridges, buildings, engines, works, materials and things connected therewith or appertaining thereto, should vest in, and be under the control of, the Municipal Committee for that town;

And whereas it is expedient that powers should be conferred and duties imposed upon the said Municipal Committee with respect to the construction and maintenance of the proposed water-works and the supply of water to the Town of Rangoon, and otherwise in relation thereto, and that all acts already done by the said Municipal Committee which could have been lawfully done if this Act had been in force should be validated;

It is hereby enacted as follows:—

CHAPTER I.

PRELIMINARY.

Short title and commencement.

1. *(1)* This Act may be called the Rangoon Water-works Act, 1884; and

(2) It shall come into force on such date as the Chief Commissioner may, by notification in the official Gazette, fix in this behalf.

(3) All acts done before the passing of this Act which could have been lawfully done if this Act had been in force shall be deemed to have been lawfully done.

Definitions.

2. In this Act, unless there is something repugnant in the subject or context,—

(1) "town" means the local area for the time being comprised within the municipal limits of the Town of Rangoon:

(2) "street" means any street, road, thoroughfare, passage for place over which the public have a right of way; and includes the surface-soil and sub-soil of any such street, and the footway and drains of any such street, and any bridge, culvert or causeway forming part of any such street:

(3) "owner" includes—

(a) the person who is for the time being entitled to the rent of the house or land in respect of which the word is used and who is not liable to pay rent for that house or land to any other person;

(b) an agent of that person; and

(c) a trustee for that person:

(4) "house" includes schools; also factories and other buildings in which persons are employed:

(5) "water-works" includes all lakes, streams, tanks, cisterns, springs, wells, pumps, reservoirs, conduits, aqueducts, hydrants, standpipes and works, and all land, bridges, buildings, engines, works, materials and things for supplying, or used for supplying, water under this Act to the Town of Rangoon:

(6) "the Committee" means the Municipal Committee for the Town of Rangoon:

(7) "water-rent" includes any rent, reward or payment to be made to the Committee in connection with the supply of water under this Act, but does not include the water-tax leviable under the Burma Municipal Act, 1884: and XVII of 18[illegible]

(8) a "supply of water for domestic purposes" does not include a supply of water for cattle, or for horses, or for washing carriages, where the cattle, horses or carriages are kept for sale or hire or by a common carrier, or a supply for any trade, manufacture or business, or for watering gardens, or for fountains or for any ornamental purpose.

CHAPTER II.

VESTING OF PROPERTY.

Vesting of Royal Lake and cisterns, &c., in Committee.

3. There shall vest in, and be under the control of, the Committee, freed and discharged of and from all manner of rights, titles, privileges or claims whatsoever of any other person,—

(a) the Royal Lake at Rangoon; and

(b) all existing tanks, cisterns, springs, wells, pumps, reservoirs, conduits, aqueducts, hydrants, standpipes and works, used or intended to be used for supplying water to the public in the town, and all land, bridges, buildings, engines, works, materials and things connected therewith, or appertaining thereto:

Provided as follows:—

(1) Any person may at any time, subject to such rules as the Committee make in this behalf, row, sail or fish on or in the waters of the Royal Lake:

(2) Nothing in this section shall affect the land adjacent to the Royal Lake and known as the Dalhousie Park, but that land shall be preserved as a public park for the use of the public.

The Rangoon Water-works Act, 1884.
(Chapter III.—Construction and Maintenance of Water-works.—Sections 4-7.)
(Chapter IV.—Supply of Water.—Sections 8-13.)

CHAPTER III.

CONSTRUCTION AND MAINTENANCE OF WATER-WORKS.

Duty of Committee to construct works for supply of water.

4. Subject to rules to be made under this Act by the Chief Commissioner, the Committee shall cause such mains and pipes to be laid, and such water-works to be constructed, as may be necessary for the supply of pure and wholesome water sufficient for the use of the inhabitants for domestic purposes in all parts of the town:

Provided that the Chief Commissioner may, by order in writing, from time to time exempt any part of the town from the provisions of this section, and cancel any such exemption.

Duty of Committee to erect stand-pipes.

5. The Committee shall cause such stand-pipes or pumps to be erected, at such intervals as the Chief Commissioner, by rules made under this Act, prescribes, in all the chief streets in those parts of the town in which mains or pipes have been laid under the last foregoing section.

Power for Committee to execute works.

6. The Committee may, for the purpose of constructing or maintaining any water-works for the supply of water to the town, enter upon any land and take levels of the same, and set out such parts thereof as they think necessary, and dig and break up the soil of the land:

Provided that, in the exercise of these powers the Committee shall do as little damage as may be, and shall make full compensation to all persons interested for all damage sustained by them through the exercise of these powers, and the amount of such compensation shall be determined as nearly as may be in accordance with the provisions of the Land Acquisition Act, 1870.

I 1870.

Power for Committee to break up streets.

7. The Committee may open and break up the soil and pavement of the streets, and lay down and place pipes, conduits and other works and engines, and, from time to time, repair, alter or remove the same, and do all other acts which the Committee, from time to time, deem necessary for supplying water to the town.

CHAPTER IV.

SUPPLY OF WATER.

A.—Supply of water for domestic purposes to Occupiers of Houses or Lands.

Right of occupier to certain supply of water for domestic purposes.

8. *(1)* Every occupier of a house or land situate in a part of the town not exempted under the proviso to section 4 shall be entitled to have free of further charge, through the communication-pipes constructed as hereinafter provided, a supply to the house or land of fifteen hundred gallons of pure and wholesome water for domestic purposes for every rupee paid to the Committee for water-tax on account of the house or land.

(2) If the Committee have reason to believe that the occupier of any house or land consumes more water than he is entitled to have free of further charge under this section, they may provide a water-metre at their own expense, and attach it to such part of the communication-pipes as they think fit.

(3) If the occupier consumes any water over and above the quantity to which he is entitled free of further charge under this section, he shall pay for it at the rate of one rupee for every fifteen hundred gallons, or part of fifteen hundred gallons.

Right of occupier paying water-tax to have water brought into his house or land.

9. Every occupier of a house or land who is entitled to a supply of water free of further charge under the last foregoing section shall, subject to the provisions of this Act, be entitled to have communication-pipes laid down from the service-pipes of the Committee, for bringing into his house or land a reasonable supply of water:

Provided that the Committee may cut off the supply of water to any house or land while the house or land is unoccupied.

Construction of communication-pipes.

10. The communication-pipes leading the water from the service-pipes of the Committee into the house or land of any occupier, and the pipes and works within the house connected therewith, shall be of such character, dimensions and material as the Committee fix and approve, and shall be constructed at the expense of the person requiring them.

Inspection of works, pipes and fittings before connection with service-pipes.

11. *(1)* Before a connection for the supply of water from the service-pipes of the Committee to any house or land is sanctioned by the Committee, the Committee shall cause all the works, pipes and fittings within the house or land to be inspected by such officer as the Committee appoint in this behalf.

(2) The cost of an inspection under this section shall be payable in advance by the person applying for the connection, at such rate as the Committee, at a special meeting, from time to time, direct.

(3) Until the officer has certified that the works, pipes and fittings have been executed and put up in a satisfactory manner, a connection with the Committee's service-pipes shall not be permitted.

Connection with service-pipes to be executed only by an officer of the Committee.

12. *(1)* The connection with the service-pipes of the Committee, and the laying of communication-pipes under any street, shall be executed by an officer of the Committee authorized in that behalf.

(2) The expense of making the connection shall be payable in advance by the person applying for the same, at such rate as the Committee, at a special meeting, from time to time, direct.

Power for officer of Committee to enter premises.

13. *(1)* The officer authorized in that behalf by the Committee may, between the hours of seven in the forenoon and five in the afternoon, enter into or on any house or land

The Rangoon Water-works Act, 1884.
(Chapter V.—Reciprocal Rights of Owners and Occupiers to supply of Water to Houses.—Sections 20-21.)

supplied with water as aforesaid in order to examine all pipes, works and fittings connected with the supply of water, and to ascertain if there is any waste or misuse of the water.

(2) If any such officer at any such time is refused admittance into any such house or land for the purposes aforesaid, or is prevented from making such examination as aforesaid, the Committee may forthwith turn off or cut off the water from the house or land.

14. If any pipes, works or fittings connected with the supply of water to any house or land are at any time found, on examination by any officer of the Committee authorized in that behalf, to be out of repair to such an extent as to cause any waste of water, the Committee may, after the expiry of twenty-four hours from the service of notice in writing to this effect, cause the water to be turned off or cut off from the house or land, and may recover the expense incurred for turning off or cutting off the water from the occupier of the house or land.

Power for Committee to turn off water when pipes are out of repair.

B.—Supply for gratuitous use in Stand-pipes.

15. The Committee shall cause a sufficient quantity of pure and wholesome water to be supplied for the gratuitous use of the inhabitants of the town for domestic purposes in the stand-pipes to be erected by the Committee under section 5.

Duty of Committee to supply water for gratuitous use in stand-pipes.

C.—Supply of water for extinguishing Fires and cleansing Sewers and Streets.

16. The Committee shall fix and renew and keep in effective order such fire-plugs in such of the mains and other pipes laid by them, and shall deposit keys of the fire-plugs at such places, as the Chief Commissioner by rules made under this Act, directs.

Duty of Committee to fix fire-plugs in mains.

17. In all the mains and pipes to which any fire-plug is fixed, the Committee shall provide and keep constantly laid on, unless prevented by unusual drought or other unavoidable accident, a sufficient supply of water for use with fire-engines, for cleansing the sewers and drains, and for cleansing and watering the streets.

Duty of Committee to supply water for cleansing sewers and drains.

D.—Supply of Water for other than domestic purposes.

18. *(1)* The Committee may, from time to time, supply any person with water by measurement for other than domestic purposes, for such remuneration and on such terms and conditions as shall be agreed on between the Committee and the person :

Supply for other than domestic purposes.

Provided that—

(a) notwithstanding any such agreement, a person shall not be entitled to such a supply whenever and as long as the Committee are of opinion that the supply would interfere with the proper supply of water for domestic purposes under this Act; and

(b) the Committee shall not be liable, in the absence of express stipulation under any such agreement, to any forfeiture, penalty or damages for not supplying the water if the want of the supply arises from unusual drought or other unavoidable cause or accident.

(2) When any such agreement has been entered into by the Committee with any person, the Committee may, subject to such charges or rates as may have been fixed by the Committee at a special meeting, lay down, or allow to be laid down, the necessary communication-pipes and works, of such dimensions and character as may be fixed by the Committee, for supplying the person with water in accordance with the terms of the agreement.

E.—Pressure of Water supplied.

19. From such a day as the Chief Commissioner, by notification in the local official Gazette, directs in this behalf, the supply of water in the mains and pipes which the Committee are required to lay under this Act shall be laid on at such pressure as the Chief Commissioner, by rules made under this Act, prescribes.

Pressure at which water must be kept.

CHAPTER V.

RECIPROCAL RIGHTS OF OWNERS AND OCCUPIERS TO SUPPLY OF WATER TO HOUSES.

20. *(1)* Any occupier holding direct from the owner of a house may, by notice in writing signed by him, require the owner of the house to construct all such works as may be necessary for bringing into the house a supply of water for domestic purposes.

Power for occupier of house to require owner to provide works for water-supply.

(2) Every notice under this section shall contain an undertaking on the part of the occupier to pay interest at the rate of one per centum per mensem, calculated from the date of the completion of the works, on the cost of the works during the residue of his term of occupation.

(3) If the house, or the land attached thereto, does not abut upon a street in which there is a supply-main, the occupier shall undertake to pay the cost of connecting the house with the nearest supply-main.

21. *(1)* If the owner does not, within three months from the service of the notice mentioned in the last foregoing section, cause such works as aforesaid to be completed, the occupier may cause the works to be completed, and may by way of additional remedy deduct the cost of the works from the rent payable by him in respect of the house :

Power for occupier to make works in default of owner.

Provided that the occupier shall not recover on account of the cost—

(*a*) a sum exceeding the amount of six months' rent ; or

(*b*) where the house or the land attached thereto does not abut upon a street in which there is a supply-main, the cost of connecting the house with a supply-main.

The Rangoon Water-works Act, 1884.
(Chapter VI.—Rules.—Sections 29-31.)

(2) The deduction which an occupier is authorized to make under this section shall be made by six equal monthly instalments.

(3) Interest on each instalment shall be payable to the owner by the occupier at the rate of one per centum per mensem from the time when it is deducted.

What works are sufficient for supply of water to house.

22. The works shall not be deemed sufficient for bringing into the house a supply of water for domestic purposes unless the following taps, with the necessary works in connection therewith, are provided, namely :—

(*a*) two taps in the house;

(*b*) one tap in the cook-room of, or other building attached to, the house, and

(*c*) one tap in or near the stables or other out-houses belong to the house :

Provided that, if the annual rent of the house with the buildings and land attached thereto is less than three hundred rupees, it shall be sufficient to provide one tap only, together with the necessary works in connection therewith, within the house and the buildings and land attached thereto.

Estimate and specification of works to be sent.

23. Works for introducing a supply of water to a house shall not be commenced by the owner without sending a specification and estimate of the cost thereof to the occupier, nor by the occupier without sending such a specification and estimate to the owner.

Power to refer to Committee.

24. If there is any difference between the owner and the occupier respecting the cost or the sufficiency of the proposed works, either the owner or the occupier may refer the difference to the Committee, and the written award of any officer authorized by the Committee in this behalf shall be final and binding on the owner and the occupier.

Fee on reference.

25. There shall be payable by the person making a reference to the Committee under the last foregoing section a fee (not exceeding ten rupees) at the rate of two rupees for every hundred rupees of the monthly rent of the house in respect of the water-supply to which the difference has arisen.

Duty of owner to keep works in repair.

26. *(1)* The owner of any house or land shall keep all works connected with the supply of water to the house or land in substantial repair.

(2) If the owner fails to put any such works in substantial repair after being requested by the occupier to do so, the occupier may cause the necessary repairs to be made, and may by way of additional remedy deduct the cost of the repairs from the rent payable by him in respect of the house or land.

Power for owner to recover sums payable by occupier.

27. Any owner to whom any sum is payable under section 20 or section 21 may recover the sum from the person liable to pay it as if it were rent payable by that person for the house in respect of which the expenses have been incurred.

Saving of contracts between owners and occupiers.

28. Nothing in this chapter shall affect any contract in writing between the owner and occupier of any house or land.

CHAPTER VI.

RULES.

Power for Chief Commissioner to make rules.

29. The Chief Commissioner may, from time to time, make rules consistent with this Act—

(*a*) to prescribe the size and nature of the mains and pipes to be laid and the water-works to be constructed by the Committee for the supply of water under this Act;

(*b*) to prescribe the size and nature of the stand-pipes or pumps to be erected by the Committee under this Act, and the intervals at which they must be erected;

(*c*) to prescribe the mains or pipes in which fire-plugs are to be fixed, and the places at which keys of the fire-plugs are to be deposited, by the Committee under this Act;

(*d*) to prescribe the pressure at which the water supplied by the Committee under this Act is to be laid on either generally or at specified times; and

(*e*) generally to define and regulate the powers and duties of the Committee under this Act.

Power for Committee to make rules.

30. *(1)* The Committee may, from time to time, at a special meeting, make rules consistent with this Act—

(*a*) for regulating rowing, sailing and fishing on or in the Royal Lake; and

(*b*) for preventing the waste or misuse of water supplied by them, and for defining the nature of the pipes, casks, cisterns and other apparatus to be used by every person supplied by them with water.

(2) In making a rule under this section the Committee may direct that a breach of it shall be punishable with fine which may extend to fifty rupees, and, when the breach is a continuing one, with a further fine of five rupees for every day after the first during which the breach continues.

(3) If any person, having or requiring a supply of water from the Committee, fails to comply with any rules made under clause (*b*) of this section, the Committee may refuse to supply water to him, and may cut off the water supplied to him, unless and until the rules are complied with :

Provided that the stopping or cutting off the supply of water shall not relieve any person from any penalties or liabilities which he has otherwise incurred.

Procedure for making rules.

31. *(1)* The Chief Commissioner or Committee shall, before making any rules under section 29 or section 30, publish a draft of the proposed rules for the information of persons interested.

(2) The publication shall be made—

(*a*) in the case of rules under section 29, in such manner as in the opinion of the Chief Commissioner is sufficient; and

The Rangoon Water-works Act, 1884.
(Chapter VII.—Arrears and Offences.—Sections 33-38.)

(b) in the case of rules under section 30, in such manner as the Chief Commissioner, by order, directs.

(3) A notice shall be published with the draft rules specifying a date at or after which the draft shall be taken into consideration.

(4) The Chief Commissioner or Committee shall, before making the rules, receive and consider any objection or suggestion which is made by any person with respect to the draft before the date so specified.

Publication of rules.

32. Every rule made under section 29 or section 30 shall be published in the local official Gazette in English and in such other language or languages as the Chief Commissioner directs, and such publication shall be conclusive evidence that the rule has been made as required by section 31.

CHAPTER VII.

ARREARS AND OFFENCES.

Arrears of water-rents.

33. All arrears of water-rents under this Act may be recovered, on application to such Revenue-officer as the Local Government may appoint in this behalf, as if they were arrears of land-revenue.

Power for Committee to turn off water on neglect to pay water-tax or water rent.

34. If any person supplied with water neglects to pay—

(a) the water-tax leviable under the Burma Municipal Act, 1884, or

I of 1884.

(b) any water-rent payable by him to the Committee,

the Committee may turn off or cut off the water from the house or land in respect of which the water-tax or water-rent is payable, by cutting off the pipe to the house or land, or by such other means as the Committee think fit, and may recover in manner provided by the last foregoing section the expense of turning off or cutting off the water from the person:

Provided that the stopping or cutting off the supply of water shall not relieve any person from any penalties or liabilities which he has otherwise incurred.

Penalty for obstructing, diverting or wasting water.

35. If any person unlawfully obstructs the flow of, flushes, draws off, diverts or takes, water from any water-works belonging to, or under the management or control of, the Committee, or from any water or streams by which those water-works are supplied, or wastes any water supplied to him under this Act, he shall be punished with fine which may extend to one hundred rupees.

Penalty for unauthorized application of water.

36. If any person—

(a) uses for other than domestic purposes any water supplied under this Act for domestic purposes; or

(b) where water is supplied under section 18 for a specified purpose, uses that water for any other purpose,

he shall be punished with fine which may extend to fifty rupees, without prejudice to the right of the Committee to recover from him the price of the water misused.

Penalties for causing the water of the Committee to be fouled, &c.

37. (1) If any person—

(a) bathes in, at or upon any water-works, or washes, throws or causes to enter therein any dog or other animal, or

(b) throws any rubbish, dirt, filth or other noisome thing into any water-works, or washes or cleanses therein any cloth, wool, leather or skin of any animal, or any clothes or other thing, or

(c) causes the water of any sink, sewer or drain, or of any steam-engine or boiler, or any other filthy water belonging to him or under his control, to turn or be brought into any water-works, or does any other act whereby the water in any water-works is fouled, or likely to be fouled,

he shall, for every such offence, be punished with fine which may extend to one hundred rupees, and to ten rupees in addition for each day (if more than one) during which the offence continues.

Prosecutions.

38. Prosecutions under this Act or the rules made under this Act may be instituted by the Committee or any person authorized by them in this behalf, and not otherwise.

D. FITZPATRICK,
Secy. to the Govt. of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

[Third publication.]

The following Act of the Governor General of India in Council received the assent of His Excellency the Governor General on the 10th October, 1884, and is hereby promulgated for General information :—

ACT NO. XX OF 1884.

An Act to amend the Indian Salt Act, 1882.

WHEREAS it is expedient to exclude the Province of Sindh from the operation of those portions of the Indian Salt Act, 1882, which do not extend by their own operation to the whole of British India; It is hereby enacted as follows :—

XII of 1882.

Repeal of words "to the Province of Sindh" and "Province" in section 1 of Act XII of 1882.

1. From such day as the Governor of Bombay in Council, by notification in the official Gazette, fixes in this behalf, the words "to the Province of Sindh" and the word "Province," in paragraphs three and four respectively of section 1 of the Indian Salt Act, 1882, shall be repealed.

D. FITZPATRICK,

Secy. to the Govt. of India.

GOVERNMENT OF INDIA.

HOME DEPARTMENT.

RESOLUTION OF THE GOVERNMENT OF INDIA ON THE REPORT OF THE EDUCATION COMMISSION.

Circular No. $\frac{10}{309}$.

Extract from the Proceedings of the Government of India, in the Home Department (Education)—under date, Simla, the 23rd October 1884.

Read—

(1) Resolution by Government of India, Home Department, No. $\frac{1}{60}$, dated 3rd February 1882, appointing a Commission to enquire into the present position of education in this country and containing instructions for their guidance.

(2) To Her Majesty's Secretary of State for India, No. 1, dated 6th February 1882, forwarding with remarks a copy of the foregoing Resolution.

(3) From Her Majesty's Secretary of State for India, No. 58, dated 11th May 1882, acknowledging receipt of the Resolution and communicating remarks.

(4) From the President of the Education Commission, No. 6049, dated 9th October 1883, forwarding copies of the Report of the Education Commission.

(5) To all Local Governments and Administrations, Nos. 11—371 to 380, dated 3rd November 1883, forwarding the Report for remarks and suggestions.

(6) To the President of the Education Commission, No. 381, dated 3rd November 1883, conveying the thanks of the Governor General in Council to the Members of the Commission.

(7) To Her Majesty's Secretary of State for India, No. 15, dated 5th November 1883, transmitting for consideration a copy of the Report.

(8) To Her Majesty's Secretary of State for India, No. 3, dated 12th May 1884, submitting the views of the Government of India upon certain questions of principle raised by the Report of the Education Commission.

(9) From Her Majesty's Secretary of State for India, No. 61, Public (Educational), dated 24th July 1884, replying to the foregoing.

(10) Replies of Local Governments and Administrations to Circular Nos. 11—371 to 380, dated 3rd November 1883.

RESOLUTION.

The Education Commission was appointed under the orders of the Governor General in Council, contained in the Home Department Resolution of the 3rd February 1882, which laid down the scope of the enquiry entrusted to the Commission, and indicated in general terms the matters to which the Government desired that special attention should be given. The considerations which led His Excellency in Council to appoint a Commission at this particular time were thus explained in the opening paragraphs of the Resolution :—

The despatch from the Court of Directors of the East India Company, No. 49 of the 19th July 1854, laid down in clear, though general, terms the principles which should govern the educational policy of the Government of India. It set forth (in the words of Lord Dalhousie) "a scheme of education for all India, far wider and more comprehensive than the Supreme or any Local Government could ever have ventured to suggest." Up to the time of its issue the efforts of the Government in the cause of education had been marked neither by consistency of direction nor by any breadth of aim. The annual expenditure upon public instruction had been insignificant and uncertain; and the control of its operations had not been deemed worthy the attention of any special Department of the State. The educational system elaborated in the despatch was indeed, both in its character and scope, far in advance of anything existing at the time of its inception. It furnished in fact a masterly and comprehensive outline, the filling up of which was necessarily to be the work of many years. Hence it became a matter of importance that Government should from time to time review the progress made under its orders, and enquire how far the superstructure corresponded with the original design.

2. Such an enquiry was instituted by the Secretary of State for India in his despatch No. 4 of the 7th April 1859, in which, after describing the measures actually taken upon the orders of 1854, Her Majesty's Government confirmed and supplemented the lines of policy therein contained, so far as general education was concerned, and called upon the Government of India for fuller report as to the operation of the system in all its parts. Owing to imperfections in the method of the annual reports as then prepared, the Government of India

found it difficult to comply in any satisfactory manner with this demand of the Secretary of State, and it was not until the year 1867 that it was found possible to present anything like a complete review of the whole educational system. In March of that year Mr. A. M. Monteath, then Under Secretary in the Home Department, submitted his "Note upon the state of education in India during 1865-66;" which was followed by similiar "Notes" prepared by his successor, Mr. A. P. Howell, dealing with the statistics of 1866-67, 1867-68, and 1870-71.

3. In the year 1871 the control of the Educational Department was, under the operation of the financial decentralisation scheme, made over to the Local Governments; and the Government of India has since that time had to depend mainly upon the Annual Departmental Reports for its knowledge of the manner in which the educational system is progressing, and in which it is being developed and adapted to the more modern requirements of the different Provinces.

4. In view of the facts that, since the measures set forth in the despatch of 1854 came into active operation, a full quarter of a century has elapsed, and that it is now ten years since the responsible direction of the educational system was entrusted to the Local Governments, it appears to His Excellency the Governor General in Council that the time has come for instituting a more careful examination into the results attained, and into the working of the present arrangements, than has hitherto been attempted. The experience of the past has shewn that a mere critical review or analysis of the returns and reports of the different Provinces fails to impart a thoroughly satisfactory knowledge of the actual state of things in the districts, and that there are many points which only an acquaintance with local circumstances can adequately estimate or explain. His Excellency in Council has therefore decided to appoint a Commission on behalf of Government to enquire into the present position of education in British India, and to nominate to this Commission a sufficient number of persons from the different Provinces to secure the adequate and intelligent consideration of the facts that will be laid before it.

2. In selecting the Members of the Commission care was taken, as far as possible, to secure a fair representation, not only of the Education Departments and of the local Executive of the different Provinces, but also of the educated Native community, and of those of the Missionary bodies, who were most largely interested in the subject-matter of the enquiry.

3. In appointing the Commission, the Governor General in Council observed that their duty would be to enquire particularly (subject only to certain limitations as regards the universities, schools of technical instruction, European education, and the educational system of British Burma) into the manner in which effect had been given to the principles of the Despatch of 1854, and to suggest measures for the further carrying out of the policy therein laid down. It was said that "the Government of India was firmly convinced of the soundness of that policy, and had no wish to depart from the principles upon which it was based." The Commission have examined with much care, fulness, and impartiality the past history and present state of education in each Province of British India. It is not necessary to repeat in this Resolution facts and figures, which can readily be gathered from the pages of their Report, or to discuss those questions of opinion regarding the work of the past on which some local authorities take exception to the conclusions at which the Commission have arrived. The criticisms passed by the Commission upon the existing arrangements in the several Provinces are, generally speaking, candid and impartial, and the Governor General in Council will content himself with recommending to Local Governments and departmental officers the careful study not only of the main Report itself but of the Provincial Committees' Reports and the record of evidence, in order that, by comparing the system with which they are best acquainted with those in force elsewhere and with the objections brought forward by outside critics, they may have their attention drawn to any matters which do not happen to be specifically met by the orders and instructions to follow in this Resolution.

4. As regards the general outcome of the Commission's enquiry into the state of education in India, the Governor General in Council thinks that, on the whole, and after making all deductions on account of mistakes and failures on the part of the local authorities in giving effect to the Despatch of 1854, the result is one upon which the Government may congratulate itself. The advance made since 1854 has everywhere been great and encouraging. A reference to General Table I-*a* at page v of the Appendix to the Report shows that the number of educational institutions in the Provinces comprised in the table had risen from 50,998 with 923,780 pupils in 1855 to 114,109 institutions with 2,613,978 pupils in 1881-82. The vastness of the field which

has still to be occupied is gathered from the fact, brought out in the Census Report, that, after excluding children under five who are too young to be at school, out of every 1,000 males in the Empire only 104 are able to read and write or are under instruction. The Census Commissioner writes:—"Burma is the only Indian country where the majority of the males are instructed. There 532 of every 1,000 males (over 5) are able to read and write or are at school. In Madras we find the next highest proportion. But the drop from the Burma figure is very great, the Madras figure being 158 in every 1,000. Of the large Provinces, Bombay comes next, with 127; then Bengal, with 102. The North-West proportion is extremely low, 66, and the Punjab little better, 72." In Bengal, which has 1,099,767 pupils in its schools and colleges, the Census returns show that in every 1,000 males above five years of age 34 are learning, 67 can read and write, and 898 are ignorant, while in every 100 boys of school-going age 20 only are under instruction. The percentage of persons instructed or under instruction is better in some Provinces and worse in others, but is extremely small in each.

5. It is of the utmsot importance, in view of these facts, that there should be no loss of educational power from adherence to mistaken methods. It is impossible for the Government to find funds to meet a tithe of the demands for aid that can fairly be made upon it. This was fully recognized in the Despatch of 1854, one of the main objects of which was to indicate the mode in which Government funds might be made to go furthest, and private effort be most effectively evolved to supplement and economise the resources of the State. The Commission have rightly devoted the chief part of their labour to the careful examination and elucidation of the conditions of this problem, and the Governor General in Council trusts that the result may be to give a fresh impetus to the cause of education in India. His Excellency in Council believes that this desirable end will be materially furthered by the new powers in connection with education which are being conferred upon local bodies all over the country under the arrangements for the development of local self-government.

6. It appears from the Report that the experience of nearly thirty years has brought to light no serious flaw in the general outlines of the policy laid down in 1854 and confirmed in 1859. If in any Province unsatisfactory results are brought to notice, or if the progress made in any particular respect is shown to have been less than might have been hoped for, this will almost invariably be found to have been due to a departure from, or failure to act up to, the principles of the Despatches upon which the whole educational system rests. The Commission have done good service in indicating clearly where mistakes of this kind have been made, and their recommendations are so framed, and descend at times to such minuteness of detail, that, when once the orders of Government have been issued in respect of them, no departures from the right paths should be possible in the future. It is especially matter for congratulation that so much substantial unanimity has been secured among a body of men representing so many different interests and such varied lines of training and experience.

Indigenous Education—Chapter III of the Report.

7. In the Resolution of the 3rd February 1882, the Government of India specially directed the attention of the Commission to the subject of primary education, and in connection with this to 'the extent to which indigenous schools exist in different parts of the country, and are or can be utilised as a part of the educational system.' It was added that the Governor General in Council 'was disposed to advocate the making as much use as possible of such schools.' The result of the enquiries made by the Commission is to show that, although in some Provinces considerable use has been made of indigenous institutions, in others they have, for various reasons, into which it is not necessary to enter, formed a less prominent feature in the scheme of primary education. The Commission have framed a series of recommendations providing for the recognition of indigenous schools, where these exist, giving them a distinct claim to grants-in-aid from public funds, and placing them, where they accept those grants, under a system of supervision and improvement, to be exercised by local boards where such boards have been formed,

and in other cases by the Educational Department. The Governor General in Council entirely approves of the leading principles laid down by the Commission and embodied in the following recommendations of Chapter III of their Report :—

*1. That all indigenous schools, whether high or low, be recognized and encouraged if they serve any purpose of secular education whatsoever.

5. That a steady and gradual improvement in indigenous schools be aimed at with as little immediate interference with their personal or curriculum as possible.

10. That where municipal and local boards exist, the regulation, supervision, and encouragement of indigenous elementary schools, whether aided or unaided, be entrusted to such boards: provided that such boards shall not interfere in any way with such schools as do not desire to receive aid or to be subject to the supervision of the boards.

12. That such boards be required to give elementary indigenous education free play and development, and to establish fresh schools of their own only where the preferable alternative of aiding suitable indigenous schools cannot be adopted.

8. These recommendations set out correctly, in the opinion of the Governor General in Council and Her Majesty's Secretary of State, the general principles on which recognition should be extended to indigenous schools. His Excellency in Council is glad to see that the Local Governments, in Provinces where indigenous schools exist, are agreed in accepting them.

9. The Secretary of State, in approving the proposals of the Commission in regard to indigenous institutions generally, deprecates, as the Commission do, undue interference of a direct kind with their internal management and curriculum. In the case of indigenous institutions of a high order, the recommendation of the Commission is that the best practicable mode of encouraging such as desire recognition should be ascertained in communication with those interested in their management. The Governor General in Council commends this course to the adoption of the Local Governments. The University authorities, who already take cognizance of the study of the Indian classics, might also usefully be invited to advise in the matter. It is believed that no great expenditure of funds will be found to be necessary in the case of the Sanskrit tôls and High Arabic schools. In Bengal, where up to date most has been done for these schools, the mere fact of Government recognition served at once to draw forth pecuniary aid from the leaders of the Native community.

10. In connection with the ordinary indigenous schools, the most important point is that local boards, municipal and rural, should be brought to recognize the claims of such schools to aid from the funds and cesses at the disposal of the boards, and that fresh schools should not be opened by them when the primary educational wants of the locality can be met by aiding an existing indigenous school and encouraging its improvement.

11. The Governor General in Council observes that some Local Governments are under a misapprehension as to the meaning of recommendations 8 and 9 under this chapter of the Report and the corresponding clauses in other chapters. It is not intended by the Commission to compel aided schools to receive pupils of all castes under penalty of losing their grants. It is open to any aided school to register itself as a special school for children of specified classes or not belonging to specified castes. It will not necessarily lose its grant by so doing. It is, however, the desire of the Government that the educational authorities and the local boards should encourage aided schools to throw their doors open to all castes and classes exactly as those of the Government schools must be open. Under all circumstances care must be taken to see that due provision is made in each locality for the education of low caste children; and when funds are insufficient for all purposes a 'public' school should receive aid in preference to a 'special' one.

12. As regards the remaining recommendations in this chapter, the Governor General in Council commends them generally to the adoption of Local Governments. Recommendation 13, 'that the local inspecting officers be *ex-officio* members of municipal or district school boards,' need not, however, be

* The numbering of the Recommendations followed here is that of Chapter III of the Report. In Chapter XIII the proposed definition of 'Indigenous Schools' is numbered as a Recommendation (1).

acted upon literally in all Provinces. The chief thing is to arrange that the local boards are enabled, in some form or other, to avail themselves of the knowledge and advice of the local inspecting officers; and this appears to be generally provided for.

Primary Education—Chapter IV of the Report.

13. Having provided for the distinct recognition of indigenous schools, the Commission pass on in Chapter IV of the Report to the general subject of primary education. With the general policy of their recommendations under this head the Governor General in Council and the Secretary of State entirely concur. The chief object kept in view has been the development of the grant-in-aid system in connection with this class of education. The Commission commence by recommending—

1. That primary education be regarded as the instruction of the masses through the vernacular in such subjects as will best fit them for their position in life, and be not necessarily regarded as a portion of instruction leading up to the university.

This definition is accepted by Government. The cardinal principles are then laid down—

3. That, while every branch of education can justly claim the fostering care of the State, it is desirable, in the present circumstances of the country, to declare the elementary education of the masses, its provision, extension and improvement, to be that part of the educational system to which the strenuous efforts of the State should now be directed in a still larger measure than heretofore.

28. That primary education be declared to be that part of the whole system of public instruction which possesses an almost exclusive claim on local funds set apart for education and a large claim on provincial revenues.

These recommendations are quite in accordance with the views repeatedly expressed by Her Majesty's Government, and again endorsed by the Secretary of State in his Despatch No. 58 of the 11th May 1882. Fully to understand their bearing it is necessary to refer to the recommendation (23 in Chapter V) describing the relation which it is proposed that the State should hold towards secondary education, *viz.*:—

23. That it be distinctly laid down that the relation of the State to secondary is different from its relation to primary education, in that the means of primary education may be provided without regard to the existence of local co-operation, while it is ordinarily expedient to provide the means of secondary education only where adequate local co-operation is forthcoming; and that therefore, in all ordinary cases, secondary schools for instruction in English be hereafter established by the State preferably on the footing of the system of grants-in-aid.

Accepting the principles thus laid down, the Governor General in Council considers that the general effect of the Commission's proposals is to carry out the policy explained by the Government of India in the Resolution of the 3rd February 1882 appointing them. It was there said that it would be contrary to the policy of the Government of India to check or hinder in any degree the further progress of high or middle education, but it was held that the different branches of public instruction should for the future move forward together, and with more equal steps than hitherto; that the development of elementary education called for more systematic attention than it had always received; and that secondary education should, if possible, be made more self-supporting. This is precisely the result to which the recommendations of the Commission directly point, and for this reason the Governor General in Council desires to give them his cordial support.

14. The detailed proposals of the Commission are well calculated to give effect to the general policy which they advocate. The Government of India especially notes and accepts the recommendations—

7. That as a general rule aid to primary schools be regulated to a large extent according to the results of examination; but an exception may be made in the case of schools established in backward districts or under peculiar circumstances, which may be aided under special rules.

9. That the standards of primary examination in each Province be revised with a view to simplification, and to the larger introduction of practical subjects, such as Native methods of arithmetic, accounts and mensuration, the elements of natural and physical science, and their application to agriculture, health and the industrial arts; but that no attempt be made to secure general uniformity throughout India.

14. That the existing rules as to religious teaching in Government schools be applied to all primary schools wholly maintained by municipal or local fund boards.

16. That the first charges on provincial funds assigned for primary education be the cost of its direction and inspection and the provision of adequate normal schools.

15. The Governor General in Council attaches great importance to the provision of a well-judged system of normal schools. There may be, in the case of Bengal, difficulties in the way of insisting upon a normal training for all teachers in primary schools; but the Government of India considers it very desirable, with a view to improving the character of the instruction given in the aided indigenous schools, which undertake practically the whole primary education of the masses in that Province, that those teachers who are willing to submit to normal training should have opportunities given them of securing it, and that their doing so should be favourably recognised in their grants. It is hoped, therefore, that the Lieutenant-Governor of Bengal will be able to provide reasonable facilities for a certain amount of normal training for primary school teachers. All the other Local Governments already recognise the importance of this.

16. The question of legislation in support of primary education (recommendation 4), and the relations of local boards to primary education (recommendations 29-34) will be noticed below. The other detailed recommendations of the Commission under this chapter are for the most part accepted by Local Governments. It is here only necessary to remark that the curriculum of a primary school ought, while not neglecting the preparation necessary for any pupils who may be advancing to the secondary stage, to aim principally at imparting instruction calculated to be of real practical benefit to the bulk of the children whose education will terminate with the primary course. This is the object which the Commission had in view in framing their recommendations 1, 9 and 12.

17. A question is raised by some Local Governments with reference to recommendation 17 (which deprecates the entire exemption of the children of rate-payers from fees in municipal and local board schools). The weight of authority is in favour of the soundness of the principle of charging some fees to all scholars not specially exempted on the ground of poverty, and the Government of India is itself in favour of this course, though there may be cases where local circumstances may render advisable the more favourable treatment of the children of cess-payers in respect of the amount of fee. So, again, the Governor General in Council considers correct the principle laid down in recommendation 19 that fees should be levied in all aided schools, the proceeds being left at the entire disposal of the managers. This is strictly in accordance with the rule embodied in paragraph 54 of the Despatch of 1854. If any exception is allowed, it should, in the opinion of the Government of India, be confined to the lowest classes of aided indigenous schools.

18. The recommendations of the Commission (Nos. 20 and 21) regarding the requirement of preliminary educational tests for the filling of all offices under Government open a very important question to which, the Governor General in Council is glad to observe, most of the Local Governments have already given serious attention. It is not of course necessary to apply the rule to menial offices, but for all employments above that grade the Government of India entirely supports the views of the Commission. The Governor General in Council would recommend the admirable arrangements now in force to this end in the Madras and Bombay Presidencies to the early consideration of all other Governments.

19. In giving effect to some of the recommendations under this chapter, the Local Governments must be allowed a certain latitude of application. Thus, the principle underlying recommendation 16 is that provincial as distinct from local funds must contribute fairly to charges on account of primary education. If this is done, it is a matter of minor consequence whether normal schools (or any other item) are actually debited to provincial or local funds. Again, while the suggestions of the Commission (No. 35) with reference to the treatment of minorities in the matter of language are sound, there may be some provinces where the matter is not of importance. In the opinion of the Chief Commissioner this is the case in the Central Provinces. Local circumstances must determine the precise application of the general rule.

Secondary Education—Chapter V of the Report.

20. It was one of the principal objects of the Despatch of 1854 to develop the grant-in-aid system in connection with secondary education. Leaving the

general question of grants-in-aid to be dealt with under Chapter VIII, the Commission recommend in their Chapter V that the function of State effort shall henceforth ordinarily be confined to extending secondary education in cases where there is a local demand for this and local co-operation. They propose to provide effective support for this system by throwing open all scholarships, as directed by the Despatch of 1854, to pupils in aided and unaided institutions, and by making them tenable at such institutions. They deal with the alleged one-sidedness of secondary education at present, to which attention was directed in paragraph 17 of the Resolution appointing them, by proposing a bifurcation of the curriculum in high schools—one course leading to the University, and the other intended to fit youths for commercial or other non-literary pursuits. Their principal recommendations under this chapter, in all of which the Government of India concurs, are the following:—

1. That in the upper classes of high schools there be two divisions—one leading to the Entrance Examination of the Universities, the other, of a more practical character, intended to fit youths for commercial or other non-literary pursuits.

12. That in all Provinces the system of scholarships be so arranged that, as suggested in the Despatch of 1854, they may form connecting links between the different grades of institutions.

13. That scholarships payable from public funds, including educational endowments not attached to a particular institution, be awarded after public competition, without restriction, except in special cases, to students from any particular class of schools.

14. That scholarships gained in open competition be tenable, under proper safeguards to ensure the progress of the scholarship-holder, at any approved institution for general or special instruction.

21. The proposals under this chapter also meet with a favourable reception from the Local Governments. The bifurcation of studies suggested in recommendation 1 is of special importance at the present time. Every variety of study should be encouraged which may serve to direct the attention of Native youth to industrial and commercial pursuits. To be of any value the bifurcation should be carried out, as the Commission advise, in the high school course. To postpone it till after matriculation at the University, as proposed by some authorities, would to a great extent render its advantages futile.

22. There is one matter regarding which no specific recommendation is made, but to which attention was drawn in the Resolution appointing the Commission, and which is discussed in paragraphs 219-50 of their Report, *viz.*, the place which should be occupied by English and the Vernacular in middle schools. The Governor General in Council is disposed to agree with the Commission that, for boys whose education terminates with the middle course, instruction through the Vernacular is likely to be the most effective and satisfactory. The experience of Bengal goes indeed to show that even for lads pursuing their studies in high schools a thorough grounding conveyed through their own Vernacular leads to satisfactory after results. It is urged by those who take this view that many of the complaints of the unsatisfactory quality of the training given in the middle and high schools of the country are accounted for by the attempt to convey instruction through a foreign tongue. The boys, it is said, learn a smattering of very indifferent English, while their minds receive no development by the imparting to them of useful knowledge in a shape comprehensible to their intellects, since they never really assimilate the instruction imparted to them. It has been proposed to meet this difficulty by providing that English shall only be taught in middle schools as a language, and even then only as an extra subject where there is a real demand for it and a readiness to pay for such instruction. His Excellency in Council commends this matter to the careful consideration of Local Governments and educational authorities.

23. The recommendation (9) that the Departmental authorities, in consultation with the managers of aided schools, should determine the scale of fees to be charged, and the proportion of free pupils, appears to be in accordance with the present practice of most Local Governments. The proposal was not unanimously adopted by the Commission, and the Bombay Government considers that this and the following recommendation (that managers of aided schools be not required to charge fees as high as those of a neighbouring Government school of the same class) involve undue interference with the management of aided schools. Some of the objections urged against the proposal before

the Commission would be met by recognizing the right of the managers of an aided school to pay out of subscriptions or endowments any share of the fees that they might wish so to defray. Generally speaking, the recommendation is favourable to the position of aided schools, for the effect is to give their managers a potential voice in the settlement of fees both in aided and Government schools, and thus to protect private enterprise against unfair competition, and assist new schools of this class to secure a reasonable start. On the whole, the Governor General in Council would leave the practice alone where it is already in force, and would recommend those Governments who have not at present adopted it to consult the wishes of managers and be guided by the result.

24. The Governor General in Council attaches great importance to the recommendation of the Commission in regard to the establishment everywhere of a sound system of scholarships. On this question the following remarks were made in the Resolution appointing the Commission :—

Provision should be made by means of a proper system of scholarships for the rise of youths of proved ability from the lowest to the highest grade of institution. The funds available for scholarships ought in any case to be so distributed that ample facilities for obtaining a good secondary education are held out to a large number of youths in the lower schools. The provision of scholarships tenable during a university course need not be so liberal, but should still be sufficient to afford the best of the pupils of middle and high schools a fair opportunity of obtaining an advanced education if they show themselves fit for it. The Government scholarships ought, however, in no way to be placed on an eleemosynary basis, but should always be given as distinct rewards for merit tested and proved by competitive examinations. This will leave a wide field open for the establishment of scholarships requiring local or other qualifications, through the munificence of private individuals or corporations.

His Excellency in Council is glad to observe that the Local Governments generally approve, and are preparing to give effect to, the suggestions of the Commission on this point. This also is especially a matter to be settled in communication with the managers of aided schools. The Educational Reports of the different Provinces should contain full information as to the steps taken to carry out the reforms necessary in some of the local systems.

25. The Government of India recommends to Local Governments the consideration of the advantage of attaching boarding-houses to high schools, as suggested by the Chief Commissioner of Assam. It appears probable that in some localities such institutions might prove to be extremely useful.

Collegiate Education—Chapter VI of the Report.

26. The Commission were precluded by the terms of their appointment from enquiring into the working of the Indian Universities, and they have therefore put forward, in Chapter VI of their Report, but few suggestions of a general character regarding collegiate instruction, which is dominated by the requirements of the Universities. Their proposals have reference chiefly to matters of departmental detail. Some of these are, however, of sufficient importance to demand notice. The Governor General in Council approves of No. 2 of the recommendations :—

2. That the rate of aid to each college be determined by the strength of the staff, the expenditure on its maintenance, the efficiency of the institution and the wants of the locality.

Colleges cannot be properly aided under a strict application of the payment-by-results system; and certainly under that system no inducement is held out to the starting of new institutions.

His Excellency in Council also approves of the proposal—

5. That Indian graduates, especially those who have also graduated in European Universities, be more largely employed than they have hitherto been in the colleges maintained by Government.

27. Recommendation 4 in this chapter and recommendations 1 and 11 of Chapter VII relate to questions of the pay and position of officers now serving in the Educational Department, which the Government of India does not consider it either necessary or desirable to reopen.

28. The Governor General in Council regrets that he is obliged to dissent from the following proposals of the Commission :—

8. That an attempt be made to prepare a moral text-book, based upon the fundamental principles of natural religion, such as may be taught in all Government and non-Government colleges.

9. That the Principal or one of the Professors in each Government and aided college deliver to each of the college classes in every session a series of lectures on the duties of a man and a citizen.

It is doubtful whether such a moral text-book as is proposed could be introduced without raising a variety of burning questions; and, strongly as it may be urged that a purely secular education is imperfect, it does not appear probable that a text-book of morality, sufficiently vague and colourless to be accepted by Christians, Muhammadans and Hindus, would do much, especially in the stage of collegiate instruction, to remedy the defects or supply the shortcomings of such an education. The same objection appears to apply to the proposal that a series of lectures should be delivered in each college on the duties of a man: and as to the proposed lectures on the duties of a citizen, Mr. Telang's objections at page 612 of the Report appear to be unanswerable. The Secretary of State intimates his concurrence in the views of the Government of India on this matter, but adds that possibly hereafter some book in the nature of a Text-book of Moral Rules may be written of such merit as to render its use desirable. In that event the question can be reconsidered.

The Government of India commends the other general recommendations of this chapter to the adoption of Local Governments. Recommendation 14 is designed to regulate the expenditure on scholarships tenable in Arts colleges with reference to the whole funds available for education, and to prevent an undue expenditure on collegiate education. Efforts should be made to call forth private liberality in the endowment of scholarships not only in Arts colleges but for the encouragement of technical education.

Internal Administration of the Department—Chapter VII of the Report.

29. Chapter VII of the Report deals with the internal administration of the Department.

The Governor General in Council approves of recommendation 2—

2. That conferences (1) of officers of the Educational Department and (2) of such officers with managers of aided and unaided schools be held from time to time for the discussion of questions affecting education, the Director of Public Instruction being in each *ex-officio* president of the conference. Also that Deputy Inspectors occasionally hold local meetings of the schoolmasters subordinate to them for the discussion of questions of school management.

It is hoped that Local Governments will lose no time in inaugurating these conferences; and if any Government desired to try the plan of a permanent consultative board, the Government of India would not object to this. The question raised in recommendation 4, regarding the adoption of inter-school rules, might, where there is any doubt as to the advisability of the practice, be referred to such a conference.

The Governor General in Council also approves of recommendation 5—

5. That it be an instruction to the Departments of the various Provinces to aim at raising fees gradually, cautiously, and with due regard to necessary exemptions, up to the highest amount that will not check the spread of education, especially in colleges, secondary schools, and primary schools in towns where the value of education is understood.

This appears to His Excellency in Council and to the Secretary of State to go quite far enough. The Government of India is not in favour of any summary raising of fees in colleges. Though it is desirable to see high education made as self-supporting as possible, the steps to this end should be cautious and well considered. Any considerable raising of fees must be accompanied by the establishment of scholarships on a sufficient scale to obviate any danger of closing the avenues of high education to youths of ability but with restricted private means.

His Excellency in Council also approves of recommendations 12 and 13—

12. That it be distinctly laid down that Native gentlemen of approved qualifications be eligible for the post of Inspector of Schools, and that they be employed in that capacity more commonly than has been the case hitherto.

13. That Inspectresses be employed, where necessary, for the general supervision of Government, aided, and other girls' schools desiring inspection.

Here it may be remarked generally that, in proportion as the Department withdraws from pushing its own institutions, its machinery for inspection

will require strengthening. A grant-in-aid system postulates a thorough inspection of all institutions brought under it.

The other recommendations in this chapter (with the exception of 1) have the general approval of the Governor General in Council. His Excellency in Council attaches much importance to the work done by Text-book Committees. The whole question of text-books, as discussed in paragraphs 375—388 of the Report, is deserving of the special attention of Local Governments.

External Relations of the Department—Chapter VIII of the Report.

30. With the principles embodied in the recommendations concerning the external relations of the Department (Chapter VIII) the Governor General in Council generally concurs.

The outcome of the proposals, so far as they concern advanced education, when read in connection with those set forth in preceding chapters, may be stated thus:—That for all kinds of such education private effort should in future be increasingly and mainly relied on, and that every form of private effort should be systematically encouraged in such ways as these:—(*a*) by clearly showing that whilst existing State institutions of the higher order should be maintained in complete efficiency, wherever they are necessary, the improvement and extension of institutions under private managers will be the principal care of the Department; (*b*) by leaving private managers free to develop their institutions in any way consistent with efficiency and the protection of neighbouring institutions from unfair competition; (*c*) by insisting on all institutions maintained from public funds and under official management refraining from undue competition with corresponding aided schools by such means as charging lower fees; (*d*) by liberal rates of aid so long as aid is needed; (*e*) by co-operation in the gradual raising of fees, so that less and less aid may be required; and (*f*) by favouring the transfer to bodies of Native gentlemen of all advanced institutions maintained from public funds which can be so transferred without injury to education generally.

The Government of India does not advocate, nor does it understand the Commission to advocate, any hasty upsetting of existing arrangements; but it thinks the Local Governments may be required now finally and fully to accept these principles and to give effect to them as opportunity may offer; and in this conclusion it has the support of Her Majesty's Secretary of State.

31. The Governor General in Council approves of the following recommendations which involve principles calculated to give effect to the general policy of the Report:—

11. That in ordinary circumstances the further extension of secondary education in any district be left to the operation of the grant-in-aid system as soon as that district is provided with an efficient high school, Government or other, along with its necessary feeders.

12. That it be a general principle that the grant-in-aid should depend—

(*a*) on locality, *i. e.*, that larger proportionate grants be given to schools in backward districts;

(*b*) on the class of institutions, *i.e.*, that greater proportionate aid be given to those in which a large amount of self-support cannot be expected, *e.g.*, girls' schools and schools for lower castes and backward races.

13. That the following be adopted as general principles to regulate the amount of grants-in-aid except in cases in which recommendations for special aid have been made:—

(*a*) That no grant be given to an institution which has become self-supporting by means of fees, and which needs no further development to meet the wants of the locality.

(*b*) That the amount of State aid (exclusive of scholarships from public funds) do not exceed one-half of the entire expenditure on an institution.

(*c*) That as a general rule this maximum rate of aid be given to girls' schools, primary school and normal schools.

30. That all Directors of Public Instruction aim at the gradual transfer to local Native management of Governments schools of secondary instruction (including schools attached to first or second grade colleges), in every case in which the transfer can be effected without lowering the standard or diminishing the supply of education, and without endangering the permanence of institutions transferred.

32. It is satisfactory to find that the principles of this important chapter are generally accepted by the Local Governments. There may be slight

difficulties, however, in adapting some of them to existing local arrangements—thus recommendation 1 (that teachers in Non-Government Schools be allowed to obtain certificates by examination without normal training) is objected to in Madras, where there is a very complete system of normal training. But if the examination for certificates is properly conducted, the exceptions proposed in the rule might usefully be allowed. The matter is one for a conference to settle. Recommendation 2, regarding the mode of calculating grants to schools where the teachers, being employed by religious or charitable associations, draw no regular salary, is also objected to in Madras; but the Governor General in Council think it right that a reasonable salary should be assumed as the basis of calculation in such cases. His Excellency in Council has already explained why he agrees with the Commission that the payment-by-results system is not suited to colleges. A careful revision of the grant-in-aid rules, made in consultation with managers of aided schools, should be carried out where this has not already been done. The policy laid down in recommendation 10, that the improvement and extension of private institutions shall be in future the principal care of the Department, meets with general acceptance, and His Excellency in Council hopes that real effect may be given to it. It should be understood that board schools and municipal schools are not private institutions in the sense contemplated by the Commission. What is wanted is to draw forth genuine private enterprise, and to encourage the transfer of Government schools and board schools to the hands of trustees who will interest themselves in their maintenance, and thus set free the funds of the public for the extension of education in other directions. It is not fostering education by private enterprise to give a school that has no endowment or subscription—only its fee income—a grant sufficient to defray the balance of its expenses. Such a school is in fact a Government or board school. Hence the value of the principle that State aid should not exceed half the entire expenditure on an institution, those interested being thus compelled to raise funds to supplement the fee income.

33. The Government of India accepts the cautious and well-considered proposals of the Commission on the subject of the gradual withdrawal of Government from the charge of institutions of a high order, and especially from colleges. These recommendations are quite in accordance with the policy of Government as explained in paragraph 10 of the Resolution appointing the Commission. It was said—

> In pursuance of this policy it is the desire of Government to offer every encouragement to Native gentlemen to come forward and aid, even more extensively than heretofore, in the establishment of schools upon the grant-in-aid system; and His Excellency in Council is the more anxious to see this brought about, because, apart altogether from the consequent pecuniary relief to Government, it is chiefly in this way that the Native community will be able to secure that freedom and variety of education which is an essential condition in any sound and complete educational system. It is not, in the opinion of the Governor General in Council, a healthy symptom that all the youth of the country should be cast, as it were, in the same Government educational mould. Rather is it desirable that each section of the people should be in a position to secure that description of education which is most consonant to its feelings and suited to its wants. The Government is ready therefore to do all that it can to foster such a spirit of independence and self-help. It is willing to hand over any of its own colleges or schools in suitable cases to bodies of Native gentlemen who will undertake to manage them satisfactorily as aided institutions; all that the Government will insist upon being that due provision is made for efficient management and extended usefulness. It will be for the Commission to consider in what mode effect can most fully be given to these views, and how the grant-in-aid system may best be shaped so to stimulate such independent effort, and make the largest use of the available Government funds.

It is left to the Local Governments to give effect to the recommendations on this subject gradually and as local circumstances permit. It is, as has been repeatedly declared, in no degree the wish of the Government of India to discourage high education in any way whatever. On the contrary it believes it to be one of its most important duties to spread and foster it. What it specially, however, desires is to secure assistance to the limited funds of the State by calling forth every available private agency in connection with every branch of public instruction. It is in connection with high education, and in view of the direct pecuniary advantages which it holds out to those who follow it, that the Government thinks it can most properly insist on the fullest development of the principle of self-help.

34. With reference to the modified conscience clause embodied in the proviso to recommendation 25, the Secretary of State has decided that, as no practical difficulty has arisen from the absence of such a condition in the scheme of education laid down in the Despatch of 1854, the proviso had better be dropped. The following recommendation (26) may also therefore be dispensed with.

Special Classes—Chapter IX of the Report.

35. Chapter IX deals with the subject of special classes—(1) Native Chiefs and Noblemen; (2) Muhammadans; (3) aboriginal races; (4) low castes; and (5) the poorer classes. As to the education of the sons of Chiefs and Nobles, the Government of India will only remark that institutions designed for them should be entirely self-supporting. The Governor General in Council has the subject of Muhammadan education at present under separate consideration; and will merely say here that, in view of the backward condition into which in some Provinces the members of that community have fallen, he thinks it desirable to give them in some respects exceptional assistance. The proposals bearing upon the education of aboriginal races are approved. His Excellency in Council attaches great importance to the provision of adequate educational facilities for children of low caste parents. In their recommendations bearing on this point in Chapter IX, the Commission re-affirm the principle that no boy be refused admission to any Government college or school merely on the ground of caste, and they recommend that it be applied with due caution to every institution, not reserved for special classes, which is wholly maintained at the cost of public funds, whether provincial, municipal, or local. They had already touched upon the subject in their recommendations under indigenous and primary education (Nos. 8, 9 and 14, Chapter III, and 25 and 26 of Chapter IV). In the case of aided schools the Commission, as already explained, propose to stimulate the admission of low-caste pupils by requiring institutions wishing to exclude them to register themselves as "special schools," by favouring schools which do not so register, and by requiring the maintenance of a due proportion between special and other primary schools.

There are doubtless many parts of India, even at the present day, where much tact will have to be shown by the officers of Government in leading the managers of aided schools to throw their institutions open to low-caste children. It has been above explained that no compulsion is to be used, but it is hoped that by the exercise of that due caution on which the Commission rightly insist, and through the example set by Government and other schools supported by public funds, progress may be made in rendering the aided schools of the country available for all classes of the community. As regards the poorer classes generally, the Commission would make due provision for free studentships and special schools suited to their wants.

Female Education—Chapter X of the Report.

36. The Governor General in Council has nothing to add to what the Commission say on the subject of female education (Chapter X). All their proposals appear to be suitable and are generally approved by Local Governments.

Legislative—Chapter XI of the Report.

37. In their Chapter XI the Commission discuss the question of legislation. The Local Governments appear to be unanimous in deprecating any special educational legislation at the present time. Under all the Acts for settling the conditions of local self-government in municipalities and rural tracts, provision, more or less complete, has been made for education, and the wish is generally expressed that each province should be left to work on the lines laid down in the local laws, and that any further legislative action should be deferred until it be seen whether the results are satisfactory or the reverse.

38. The Governor General in Council is content for the present to accept in this matter the conclusions of the Local Governments, in reliance upon their hearty co-operation in the complete application of the principles now laid

down by the Government of India with the approval of the Secretary of State. The local boards will therefore ordinarily form the school board for the area under their jurisdiction. It will probably be found desirable to appoint special educational committees of the boards, and some local enactments permit the association of outsiders on such committees with the members of the boards. The boards will also doubtless see it to be advisable to encourage the formation of school committees in connection with individual institutions or groups of institutions. The chief matter is that the Local Government shall see that the boards give full effect to the policy of Government, and that they work the grant-in-aid rules equitably and liberally, maintaining the essential principles of the Government system, and encouraging the development of private enterprise in education. Their relations to the Department, and the position of inspecting officers, must be determined by the Local Governments, having regard to the capacity and character of each board and the advanced or backward character of the tract for which it is appointed. The Governor General in Council has no desire to insist on universal uniformity. As regards control of funds, most of the local enactments do not provide for a separate school fund. This will make it the more necessary for the Local Government to see that a clear understanding is come to with each board as to the provision to be made for education and the due appropriation of the Government subsidy. The working of the boards should be fully noticed in the Annual Provincial Education Reports.

Financial—Chapter XVI of the Report.

39. After all, the most important question in connection with the spread of education in India is that of the provision of funds. The Governor General in Council is glad to find from the reports of the Local Governments that they are alive to the necessities of the case and ready to do what they can to meet them. The *Bengal* Government estimates that 14 lakhs of rupees of additional charge are required to enable it to do all it desires for primary and aided education. It hopes that 1½ lakhs of this burden will be taken up by the municipalities of the Province, and for the rest it proposes to increase its own allotments as its resources permit, hoping in nine years' time to work up to the maximum. Bengal is a province where private liberality has already come forward to some extent, and where the fees paid for education are substantial. But the Governor General in Council is not without hope that the era of private enterprise in education is only now beginning in Bengal, and he trusts the Local Government will do all it can to elicit and encourage a large development of such effort. The *Madras* Government pledges itself in future to contribute for education 5 per cent. of its Provincial income. The payments from local funds and town funds are also expected to grow, and altogether it is anticipated that 21 lakhs of rupees per annum will be forthcoming in the immediate future as against 14 lakhs estimated by the Commission for 1881-82. The *Bombay* Government also promises to increase its allotments as its funds permit. The *North-Western Provinces and Oudh* Government has not yet submitted any financial report. The *Punjab* Government is unable to increase its payments. In the *Central Provinces* 5 per cent. of the Provincial income is to be set apart for education. The cess contribution is rising; towns are expected to contribute more largely; and considerable donations from private liberality have been received for the establishment of colleges at Jubbulpore and Nagpore. In *Assam*, taking provincial and local revenue together, about 5½ per cent. is given to education. The allotments have steadily increased. In *Coorg* and *Hyderabad* all the funds necessary in the backward condition of the Provinces are forthcoming. The rate of advance must everywhere be determined by the means of all kinds at the disposal of the Local Governments. In Bombay, the Punjab, and some other Provinces private munificence has been very prominent, especially in connection with higher education. The Government of India feels sure that there will be no falling off in this respect. The Local Governments should also, as far as their means permit, supplement this increased local effort by contributions from provincial revenues. In urging on Local Governments a more liberal policy in regard to educational expenditure, the Government of India is aware that the policy is

one the proposed development of which was not contemplated on the conclusion of the provincial contracts, under which education is purely a provincial charge. The Governor General in Council will, therefore, should necessity arise, and should a review of the financial situation of any Local Government show that it is unable to increase expenditure on education to the extent contemplated, be prepared to consider any claims that may reasonably be put forward for assistance from Imperial revenues, and to deal with them in as liberal a spirit as the condition of Imperial finances at the time will permit. The Government of India is, however, confident that the several Local Governments will not make applications of this nature, unless, on a review of their whole resources, it is found to be inevitable. In the event of assistance being required, the Government of India desires it, therefore, to be understood that this will be granted, not solely on the terms of the provincial contract in respect of education, but with regard to the results of the contract as a whole, and to the present state and prospects of the finances of the Province concerned, as well as of the Imperial finances. In introducing the new schemes of local self-government, the Governor General in Council has always deprecated any attempts to impose additional financial burdens on the local boards. It is, however, hoped that they will themselves, in view of their increased powers and responsibilities, be prepared hereafter to provide further funds for the extension of education, as circumstances may from time to time permit.

40. The Governor General in Council has already conveyed to the President and Members of the Commission the thanks and acknowledgments of the Government of India. The labours of the Special Committee who drafted the chapters of the report are particularly deserving of cordial recognition. His Excellency in Council has now much pleasure in making public the following extract from a despatch from the Secretary of State:—

> I am glad to avail myself of this opportunity to express my entire satisfaction at the manner in which the Commission have discharged the duty entrusted to them. They have examined with great care and impartiality the past history and present condition of education in every province of British India (except Burma), and it is difficult to over-estimate the value of their labours. I request that your Lordship will convey my thanks to the President and Members of the Commission, official and unofficial, for the very important public service which they have rendered.

ORDER.—Ordered that the foregoing Resolution be communicated to the Department of Finance and Commerce, to the several Local Governments and Administrations, and to the President and Members of the Education Commission; and that it be published in the *Gazette of India*.

A. MACKENZIE,

Secretary to the Government of India.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

No. 949R.C., dated 22nd October 1884.

RESOLUTION—By the Government of India, Public Works Department.

Assam Railway Surveys.

Read again—

Public Works Department Resolution No. 59R.C. of the 24th January 1884.

Public Works Department Resolution No. 433R.C. of the 30th May 1884.

Read now—

No. 2190, dated 6th August 1884.

From—The Secretary to the Chief Commissioner, Assam, Public Works Department,
To—The Secretary to the Government of India, Public Works Department.

I am directed by the Chief Commissioner to forward for the orders of Government the accompanying Report No. 1527, dated 31st July 1884, by the Engineer-in-Chief, Assam Railway Surveys, detailing the operations in connection with these surveys since November 1883.

2. The estimates and plans detailed in the list appended to Mr. Buyers' Report are also sent herewith

3. In reference to paragraph 41 of the Report, the Chief Commissioner, I am to say, will be glad if arrangements can be made next season for the investigation of the line between the Dhansiri and the Daiang rivers referred to by Mr. Molesworth, as Mr. Elliott is inclined to concur with that officer in thinking that a practicable line with much less waterway will be found here.

4. In regard to the proposed bridge over the Dhansiri at Golaghat the Chief Commissioner hopes it will be constructed as a combined road and railway bridge. It will be necessary eventually to have a road bridge here, and the opportunity might be taken to combine both in one

5 From paragraph 18 of Mr. Buyers' Report it would appear that the discovery of limestone on the Doigrung river near the village of Murphulani, and another small outcrop on the Nambar nearer the line, was *recently* made. This, I am to say, is *not* so, as the existence of this limestone, as well as the limestone north of the Jamuna river referred to in paragraph 62 has long been known. A kiln was constructed at the first-mentioned spot over two years ago in view to testing the capabilities of this limestone, and orders have already been issued by the Chief Commissioner for the further exploration and testing of this material during the next dry season.

6 In reference to paragraph 19, the Chief Commissioner is of opinion that the line should be taken to Golaghat even if it is out of the way, in view to the development here of a large trade eventually, as noted by the Engineer-in-Chief.

7. The quotation in paragraph 6 in connection with large importation of rice from Assam should be modified, for although there are some quantities, they are not what might strictly be termed large.

8. As regards paragraph 67, the Chief Commissioner strongly objects to the principle of laying a railway on a Trunk Road under any circumstances, and in the case of the line to the east of the Digru river it is proved by the Engineer-in-Chief that the Trunk Road here is wholly unsuitable on professional grounds for a railway, the idea therefore of utilising the road should be abandoned.

9. In reference to paragraph 72 where the Engineer-in-Chief thinks the Dimapur valley route preferable to that along the Trunk Road, the Chief Commissioner, I am to say, considers Mr. Buyers' arguments are sound, and that the Dimapur valley route possesses superior claims.

10. The line of the Dhodur Alli—an old road above Golaghat, and referred to in paragraph 74—is no doubt the best that is obtainable not only on account of its proximity to many of the most flourishing tea gardens in Assam, but because it crosses the rivers at much narrower and more favorable crossings. But the Chief Commissioner objects to the Dhodur Alli itself being appropriated for the railway.

11. In reference to paragraph 79 where the Engineer-in-Chief thinks it desirable to have two parties engaged in the hills during the next season, I am to say that on reference to the Deputy Commissioner's report on North Cachar it is observed that 80 coolies were employed last year by the survey party, a very moderate number, but the District Officer could only supply these by a ten days' rotation, that is, it took 240 men a month or 1,200 men in five months to supply this number, a larger period of service would have made them discontented. These facts, I am to say, are brought forward to show the difficulties in supplying labor. Mr. Elliott is most anxious to help the survey in every way, but the population of North Cachar is very scanty, and if double the number of coolies employed last year will be wanted next season it will be a severe tax upon them.

12. In conclusion I am to express the Chief Commissioner's satisfaction at the amount of work done during the past working season, and at the enlarged evidence that the line can be made at or below the original estimate.

ASSAM RAILWAY SURVEYS.

Report on Survey Operations during the season 1883-84.

No. 1527, dated 31st July 1884.

From—The Engineer-in-Chief, Assam Railway Surveys,

To—The Secy. to the Chief Commissioner, Assam, Public Works Department.

I have the honor to forward estimates and plans, as detailed in accompanying list, representing the results of the work accomplished since November 1883, in connection with the Assam Railway Surveys. Explanatory notes are attached to each estimate.

2. *Four divisions formed.*—In expectation of an adequate staff being forthcoming four survey divisions were formed, but when the parties proceeded to take the field it was only found possible to make up two divisions to any thing like a satisfactory strength, and the two which received the preference, as being the most remote and difficult to reach, were the North Cachar Hills and the Lumding Dimapur Divisions.

3. *Distribution.*—Though the Government of India letter No. 981R.C., dated 2nd November 1883, containing instructions for the season's operations did not reach me until after the staff had been located on their several sections, I had learnt, during my visit to Simla in September, what the nature of those instructions would probably be, and I was thus enabled to make a distribution which proved to be in accordance with what was desired. One party was sent to the North Cachar Hills, two to the Dimapur valley, and the fourth to the branch from the Lumding river towards Gauhati.

4. *Work not generally started until middle of December.*—The various parties left Shillong about the middle of November, some quite unavoidable delay having been incurred in recruiting khalasees, but what with the long march, and detention on the road owing to bad weather, and for the purpose of enlisting jungle cutters, it was the middle of December before three of the parties reached the scene of work and were able to commence operations.

5. *Arrangement for supplies and coolies in the North Cachar Hills made by the Deputy Commissioner and the Sub-Divisional Officer.*—To meet the wants of the party in the North Cachar Hills, Mr. Knox Wight, Deputy Commissioner of Cachar, and Mr. Soppitt, the Sub-Divisional Officer, had collected large supplies of food at Gunjong, the sub-divisional head-quarter's station; a considerable proportion of these were carried up all the way from Silchar. They had also made all arrangements for the coolies required for jungle-cutting. The Executive Engineer, in charge of the hill section, was thereby relieved of much trouble and the assistance rendered by the above officers greatly facilitated his work.

6. *Difficulties in the Dimapur valley on account of coolies deserting.*—For the work in the Dimapur valley a large number of coolies were enlisted in the Kamrup district, but these proved a most unsatisfactory lot, and within a few weeks the bulk of them had deserted. Fortunately the Deputy Commissioner of the Naga Hills was able, from the first to furnish 40 Mekir coolies for the division between the Lumding river and Dimapur, and these did very good work, but on the lower division between Dimapur and Golaghat, where the Executive Engineer was dependent on the Kamrup coolies work, for sometime, came almost to a stand, in consequence of the desertion of the men, and he was only relieved of great anxiety when he succeeded in collecting some Mekirs from the adjacent hills. So far as our experience goes only hill coolies are of any use in heavy jungle.

Food supplied by the Commissariat Department.—The food supply of the men working in the Dimapur valley would have been a matter of difficulty, and would have taken a considerable time to arrange, had it not been for the kindness of Colonel Rowband, the Commissariat Officer at Shillong, in arranging for permission to draw all that was wanted from the Commissariat godown at Dimapur.

7. *No difficulties on the Gauhati branch as regards coolies or supplies.*—On the Gauhati branch there were no special difficulties either as regards coolies or supplies, thanks in a great measure to the assistance of Mr. Primrose, Officiating Deputy Commissioner of Nowgong.

8. *Special difficulties in the way of survey.*—From what has been written above, some of the difficulties in the way of the survey will have been perceived : to these must be added the rough nature of the country and the heavy jungle in parts, the unsettled weather and the unhealthy climate. Progress, therefore, is necessarily slow when compared with what is attainable in more favorable districts, and is obtained at the expense, possibly, of more real hard work, as it certainly is of infinitely greater discomfort and risk. The work of the season may be divided into two main heads (1) Divisional Surveys ; (2) Personal Examination of the country apart from these.

DIVISIONAL SURVEYS.

No. I.—Division, North Cachar Hills.

9. *Staff employed.*—The staff engaged on this division consisted of the following officers :—

Mr. E. J. Moore, Executive Engineer.
„ H. T. Gwyther, Assistant Engineer.
„ J. A. Wallace, „ „
„ B. A. Maine, Sub-Engineer.

10. *Work started from the watershed between the Mahur and Mupa rivers.*—Work was commenced in the middle of December at the gap in the watershed between the Mahur and Mupa rivers, noted in paragraph 5 of my report on the exploration of the North Cachar Hills during the season 1882-83, and was thence carried northwards into the Mupa valley. I accompanied Mr. Moore from Shillong in order to put him on the right track which he would otherwise probably have had much difficulty in striking.

Reasons for doing this.—My object in starting work from this point was to get an estimate for the section through the Mupa valley which had appeared to me to be on the whole by far the most difficult piece of ground on the proposed line in the hills out of the Jatinga valley.

For some reasons I should have preferred starting work on three divisions from the common point of junction near the Lumding river, but there were practical difficulties in the way of collecting supplies and coolies there, which would have delayed the work, and the season's operations in the hills might have been confined to the section of the country along the Langladisa, in which there are evidently no very great engineering difficulties.

11. *Executive Engineer's instructions.*—Mr. Moore's instructions were, to make a careful survey of the Mupa valley between the point from which he started and the watershed at the head of the Dijakho, and then to lay down a line over this section on which to base an estimate before proceeding to extend the survey farther north, using no gradient more severe than 1 in 70 or curve of smaller radius than about 600 feet.

Tedious nature of the work.—The rough nature of the ground and the heavy jungle rendered this a more tedious operation even than I had expected and with the utmost exertions of himself and staff, it took three months to finish. Upwards of 13 miles of preliminary trial lines were run, and a large number of cross sections were taken necessitating more than 14 miles additional jungle cutting ; the final line is about 6½ miles long and there were thus, by the time this was finished, about 35 miles of jungle cut.

12. *Best alignment in the Mupa valley approximately obtained but a slight alteration required in the run upto the Dijakho watershed.*—Mr. Moore considers that he has got very approximately the best line obtainable, but since extending the survey it has been found that it will be advisable to cut through the watershed at the head of the Dijakho at a somewhat lower level, and this will necessitate a slight alteration of the alignment between the crossing of the Boila and Chain 236 and the watershed by throwing it farther down the slope of the hills ; this will improve the gradient and it is not anticipated that it will practically affect the estimate one way or the other.

13. *Prominent features of the country.*—It is not necessary to say very much regarding the nature of the ground and the character of the work on this short section beyond what the plan and longitudinal section show for themselves. The country is covered with dense jungle which of course adds greatly to the difficulty of survey ; the hill sides have generally steep slopes terminating in places in perpendicular cliffs at the base of which the Mupa runs, and they are cut into deep ravines by numerous small water courses owing to a heavy rainfall working on friable rock and soil.

14. *Best ground along right bank of the Mupa and description of section.*—The preliminary surveys showed that the ground along the right bank of the Mupa is very much better than that along the left bank, and in order to make the most of it, Mr Moore has run his line sharp down to the river from the starting point, with the ruling gradient of 1 in ·70, crossing it at chain 95.

Allowing a short piece of level over the bridge, the gradient of 1 in 70 is prolonged for about three-fourths of a mile, and then the line rises and falls, as the ground is most favorable, until the Boila river is reached at chain 236, after which there is a steady ascent of 1 in 70 up to the Dijakho watershed ; but as has been already noticed this gradient will be somewhat improved by piercing the watershed at a lower level.

15. *Curves.*—Curves of 573 feet radius (10°) have with one solitary exception been employed ; flatter curves could only be introduced at considerable extra cost, and though some

saving could be effected by the introduction of sharper ones it would not probably be so great as to render any such change, which would always operate detrimentally against the working of the line, at all desirable.

I may, however, note that when making the preliminary estimate I fully contemplated the employment of curves of 400 feet radius.

16. *Heaviest work encountered in running up to the Dijakho watershed.*—It will be seen that by far the heaviest work is concentrated in about one mile of the ascent to the Dijakho watershed: here 4 tunnels aggregating 530 lineal yards have been estimated through four spurs.

It may be found advisable to tunnel through the two high spurs near the Mupa, but these have been taken as open cuttings throughout in the estimate.

17. *Mupa and Boila viaducts.*—Two considerable streams the Mupa and Boila are crossed and their ravines are estimated to be spanned by viaducts, in each case, of one central 100 feet with side 40 feet girders, supported on wrought iron cylinders of the pattern given in Indian State Railways Type Drawings E.P. No. 2, filled with portland cement concrete. Trestles formed of these cylinders will not probably be cheaper than ordinary brickwork piers, but they can be more rapidly erected, with less skilled labor, and are preferable in a country subject to violent earthquakes; besides all means by which the use of lime can be economised are to be studied for the carriage of this will be difficult. The question of water way has not had to be considered in these two instances for it is most economical to bridge the entire ravine in both.

18. *Extension of survey to the Langting river.*—After finishing this section Mr. Moore was not able to accomplish more in the season than to examine the country and run trial lines as far as the Langting river, but, from these and cross sections taken in connection with them, a line has been laid down on the plan, and, on the section which this gives, an estimate has been framed which it is believed may be accepted as very approximately accurate.

19. *Country becomes easier on extension.*—It will be seen that after crossing the Dijakho watershed, the work becomes very much lighter, as the contours of the ridges and spurs are more rounded and the slopes comparatively gentle and less fissured.

20. *Obligatory points and gradients.*—There are apparently three obligatory points on this section, *viz.*, at chains 495, 510, and 630 where the line is carried through depressions in spurs thrown out from the main ridge.

Gradients of 1 in 70, with intermediate pieces of level, have been employed, and they suit the line laid down on the plan best, but as the final line will doubtless not follow exactly the same traces, it must not be assumed that the same gradient will rigidly adhered too. Apparently, however, it will be necessary to run down with the gradient of 1 in 70 for about two miles from the Dijakho watershed.

21. *Station sites.*—There is very fair ground for a station about chain 560, the next station south would be in the Mahur valley, about 12 miles distant, and there is no good site between. There may be some difficulty about water here, for the Dijakho runs dry, but probably it may be obtained in the usual way by sinking a well, should this fail it may be pumped up from the Langting. It would give too long a run to place the station by the Langting, and besides this would throw it on to a high bank; but it may be remarked that water is abundant in the Mahur valley, and there will probably be no difficulty at the next station site on the north side, so that it will not be absolutely necessary to make this an engine watering station.

22. *Line taken along western slope of ridge in preference to eastern.*—This section of line runs along the western slopes of a ridge separating the small streams Dijakho and Langdreng both of which flow into the Langting. Mr. Molesworth in his note, dated the 27th March 1884, of his journey across the North Cachar Hills, has remarked that I had suggested the examination of an alternative line, along the eastern side of this ridge, but to gain this it has been found that much heavier work would be entailed for some distance after passing through the Dijakho watershed, and a uniform gradient of about 1 in 70, after it was reached, into the Langting valley.

23. *Comparison of final ad preliminary estimates.*—The estimates, which have been prepared, give the means of testing the accuracy of my preliminary estimate on two very different descriptions of ground.

In paragraph 5 of Report on the exploration of the North Cachar Hills, it will be seen that I took the Mupa valley section as 5½ miles long and estimated the cost at Rs. 1,80,000 per mile. This section is found to be 6·648 miles long and the estimate comes to Rs. 1,80,552 per mile, a very close approximation as regards the mileage rate, but longer by upwards of one mile. This is owing to the difficulty I had in fixing on the map, the exact point where the watershed between the Mahur and Mupa was crossed. The piece from the Dijakho watershed to the Langting is 5·55 miles and the estimate amounts to Rs. 99,109 per mile: this is a portion of the section extending from the Dijakho to the Gireso watershed, of which I estimated the length to be 18 miles and the cost Rs. 1,00,000 per mile, and I allowed for this portion 6 miles scaled from map, *plus* ¼ for curves equal to 7½ miles, so that the true distance and estimate are both within the mark; the mileage rate is very close.

24. *Length of section remaining to be surveyed between the Langting and Lumding junction.*—There probably remain yet nearly 30 miles to connect the survey with the junction

point near the Lumding, for the course of the Lumding is quite incorrectly shewn on the map, and the junction of the Langladisa should be further north, so that the valley of the Langladisa is actually considerably longer than would appear; it is, however, an easy valley, and therefore though, being included in the hill section, the length of that will be slightly increased thereby, the estimate will not be affected, for that was taken in this valley at the same mileage rate as the section in the plains, and the mileage of the latter will be correspondingly decreased.

25. *Credit due to staff.*—I could not have had a better man than Mr. Moore for the work in the hills, and his staff have seconded his labors with energy and zeal.

II.—Lumding-Dimapur Division.

26. *Staff employed on the Lumding-Dimapur Division.*—The following staff has been engaged on the survey of this section:—

Mr. T. H. Tyndall, Temporary Executive Engineer.
„ C. J. S. Baker, Assistant Engineer.
„ R. Campbell, „ „

27. *Reasons for fixing the starting point about seven miles west of Dimapur.*—This party started work from the neighbourhood of Dimapur, while another party started at the same time and from the same point to work north towards Golaghat. The point selected by me, on the map, for I had not seen the country, was about seven miles west of Dimapur on the watershed between the head of the Deolao, a tributary of the Jamuna, and a small stream running into the Dhansiri, and the reason for selecting it was that it lay conveniently on a line carried along the apparent watershed between the Dhansiri and the Jamuna which appeared to offer the best alignment.

28. *This point found unsuitable and therefore abandoned for one nearer Dimapur.*—Mr. Tyndall spent a month in running trial lines from this point, but found, in every direction he tried, the ground so broken, that he moved much closer to Dimapur where the ground appeared to him more favorable. North of the original starting point the ground was much easier, but this change necessitated the abandonment of some work there.

29. *Two traverses run and plans and estimates given for both.*—One traverse it will be seen follows very closely the left bank of the Dhansiri for 19 miles when it turns to the right and terminates on the summit of the ridge forming the watershed between the Dhansiri and the head of the Langpher: another, which has been carried as far as the valley of the Diphu river, a tributary of the Jamuna, leads off from mile 12 on the first, and would be a more direct line for the Lumding junction. Plans, sections and estimates are forwarded for both. The estimates, however, for each are based, not upon the exact traverse, but upon an alignment, laid down upon the plans as nearly as possible coincident with it; and further anticipated improvements in the alignment are shewn by blue lines, the effects of which will be to reduce the distance.

30. *Reasons for failure in completing the survey.*—I regret very much that the party were not able to carry the survey through to the Lumding. The country is no doubt a peculiarly difficult one to survey: the view which the valley presents when looked down upon from the high ranges which surround it is in a measure deceptive, and particularly is this the case with regard to the distant central portions; shrouded in dense forest, its minute features cannot be detected, and the whole appears a slightly undulating plain; no human tracks exist, and to become acquainted with it almost every step must be tediously cut, while even then all knowledge is confined to the narrow trace; owing to these causes difficulties are unexpectedly encountered which necessitate the abandonment of much work. It would be the best plan I believe in a country of this description, utterly unknown, to cut a trace through, in the first place regardless of minor difficulties in the features of the ground, and to make use of this at a base for farther operations; at any rate such appears to me to be the lesson taught by the past season's work.

31. *Farther examination of the country between the Lumding and Dhansiri.*—A certain amount of farther acquaintance has, however, been gained of the country lying between the points up to which the traverses have been carried and the Lumding junction. Mr. Campbell, Assistant Engineer, came across from the Dhansiri to the Lumding, where he met me in April; he descended from the ridge on which the traverse ends near mile 24½, and found himself almost at once in what proved, to his surprise, to be the bed of the Langpher, for this river is not shewn within many miles of this; in fact the map right round from Dimapur to the Dyung is very misleading. Starting from zero of the Gauhati branch survey, we examined the country for some miles east in the direction of the Dhansiri and I found it to be very much the same in its features, as far as we went, as the first few miles of that branch, the section of which may be referred to, in order to get an idea of what a line taken fairly straight through it would be, but which I should think is susceptible of considerable improvement by winding about, as the low ridges, which lie between the Lumding and the Langpher are not continuous, but broken by frequent depressions. The jungle is not quite so dense as it is nearer Dimapur.

32. *Site for junction station.*—About two miles east of zero there is a very good site for a junction station on an open level plateau upwards of one mile long and half a mile broad with good water convenient.

33. *Best line may be got in the direction of the Diphu traverse.*—Mr. Campbell unfortunately fell ill, but I advanced to within ten miles, judging by the map, of the point which the Diphu traverse reached, and this may be taken as the interval as yet unexplored and regarding which nothing is clearly known. I am not at all sure that the best line will not be got in the direction of the Diphu traverse, it ought to be shorter than one taken so far up the Dhansiri as the other traverse has gone, and I saw nothing to favor the idea that an easier line would be got between the end of this and the Lumding junction.

I found a very easy small valley running up from the Langpher which led me on to a watershed which I believe to be the head of the Diphu, but the season was too far advanced for me to carry the exploration farther in this direction, and I was anxious also to see the country above Nowgong.

34. *Estimates.*—It will be seen that the estimate for the 24·56 miles of what, to distinguish it, may be called the Dhansiri traverse, amounts to Rs. 66,564 per mile, while that for 21·87 miles of the Diphu line is Rs. 68,685 per mile. The distance from the end of either traverse to the junction station site near the Lumding is apparently the same, and may be taken at 22 miles. As a preliminary estimate last year, I put down Rs. 80,000 per mile for all the work in the Brahmaputra valley and I have little doubt that this mean rate will amply cover the cost of the section from the Lumding to Dimapur, in fact to work up to it a rate of Rs. 95,000 per mile is available for these 22 miles.

35. *Another season necessary to complete survey.*—It will be necessary to devote another season to the survey of this section, and I can only hope that the line then obtained will be so satisfactory that farther elaboration will be considered unnecessary.

36. *The whole valley under forest but well adapted for cultivation.*—The whole country along the valley between the Lumding and Dimapur is under jungle and there is not a single clearance for cultivation. However, while exploring in April, I met men from the hills on the north prospecting for village sites and on the Lumding, below the Langladisa opposite the Gauhati branch, I found two villages established where last year, there had been none and was informed by one of the men that they had been driven from the south side of the Dyung by tigers, and that they had come there as the soil was good, especially for cotton, and they were no longer so afraid of the Nagas.

I am told that many years ago there was a police outpost on the Langpher, and some villages, all of which were cut up by Nagas. Not a trace of these now exists unless the castor oil plants growing in places denote the sites of former cultivation. There is no apparent reason why cultivation should not extend along the whole of the valley, and it is probable that in the course of time with a railway and security for life and property it will do so.

There are large areas of level ground admirably adapted for tea. A planter with some knowledge of the Dimapur valley told me that the soil was "magnificient," and that with a railway, land will be rapidly taken up for gardens.

37. *No important engineering work so far as the survey extends.*—There is no work of any engineering importance along the Dhansiri traverse. At a few points spurs come down to the river, and at two opposite miles 6 and 19, to avoid these, the traverse has been carried across bends of the river as shown on the plan. I think, however, if the final line is carried along this way that it will be better, and probably cheaper, to cut through these spurs, even at the expense of cuttings 50 or 60 feet deep, than to divert the Dhansiri as shewn, and bank across the old bed.

38. *No large bridges.*—There are no bridges of any importance : the largest consists of only two spans of 40 feet ; in fact there is no gathering ground to permit the formation of any large stream, the watershed between the Dhansiri and Diphu being at no great distance.

39. *Flood level in the Dhansiri.*—No flood levels of the Dhansiri could be obtained above Dimapur owing to the entire want of population ; the levels shewn have been arrived at by taking the highest recorded flood level at Dimapur, and running this up proportionally to the inclination of the bed of the river ; the heights are probably in excess and if so, err on the safe side.

40. *The Diphu traverse.*—The Diphu line after leaving the Dhansiri at the 12th mile, shows a somewhat heavier section and a tortuous alignment, but any line across from the Dhansiri to the Lumding must have a large number of curves to avoid heavy earthwork.

So far as it goes the work cannot be called at all heavy except in the last two miles, but Mr. Tyndall says he was turned by some very rough country in front of him and he therefore went back and carried his survey farther along the Dhansiri. If the distance between the ends of the two traverses and the Lumding junction be equal and the costs the same, the Diphu route would be both shorter and cheaper, as regards total cost, than the Dhansiri.

41. *Hardships experienced.*—This party experienced much bad weather, and worked under greater discomfort than any other ; the absence of bamboos and grass in the forest prevented their getting good huts built, and this no doubt partly affected the health of the men. It is I am persuaded through no want of energy that they failed to accomplish the task before them.

III.—Dimapur-Golaghat Division.

42. *Work started on 2nd and 3rd Division simultaneously from a common point.*—It has already been noticed that work was started on this division simultaneously with that on the 2nd division from a common point.

43. *Work accomplished.*—Mr. Clift, the Executive Engineer, had only one Assistant Engineer, Mr. Lilley, to help him, and the difficulties he encountered at the outset, owing to the desertion of his coolies, have already been noticed. It is greatly to Mr Clift's credit, that, notwithstanding this, he carried a survey through to Golaghat and an alternative, offering a somewhat shorter route into Upper Assam, to near the village of Jamugurighon, on the right bank of the Darang.

44. *Remarks on country between the Dhansiri and Darang river with reference to Mr. Molesworth's proposal to carry the line along it.*—Mr. Molesworth, Consulting Engineer to the Government of India for State Railways, in his note dated the 24th October 1883, on my report on the exploration of the North Cachar Hills, suggested the examination of the country between the Dhansiri and the Darang rivers on a line which he roughly indicated on the map. This note did not reach me until after work had been commenced, but I may remark that from a simple study of the map, I had in the first place sketched in identically the same line, crossing the Dhansiri at the same point, previous to preparing my report in order to arrive at the through distance to Dibrugarh, but on making enquiries in Shillong, I was informed that the country between the two rivers, was low, flooded during the rains, full of bi's and quite impracticable; for these reasons I laid the line down along the left bank of the Dhansiri; but for these objections the line between the two rivers is very obviously the one to take.

After receipt of Mr Molesworth's note I made further enquiries and all that I was able to learn until I personally visited the Dimapur valley in the end of January, corroborated the above statements; then, when I was at Barpathar, two natives, one of them the mauzadar of the place, the other a shikari, who professed to have shot through the jungle, told me that the bils were confined to the sides of the two rivers and that it was possible to get ground the whole way along the centre above the influence of floods. I have never met any European who has been through this tract of country and as I had to hurry back to meet Mr Molesworth I had not time to examine it myself. Mr Clift tells me that the Executive Engineer of the Naga Hills states that it is impracticable. I desired Mr Clift if possible to cut a trace through, but he could not muster sufficient coolies to undertake the work without abandoning the Golaghat line, along the left bank of the Dhansiri, which was already advanced and which it would have been suicidal to abandon on the meagre and most unsatisfactory reports obtained. It was better to get one line through to Golaghat, which we knew to be practicable, than to run the risk of having nothing to shew, should the general opinion regarding the other route prove to be correct.

45. *Nature of country.*—The length of the line from opposite Dimapur to Golaghat is 45 miles, or nine miles less than the road mileage between opposite points. The valley to within six miles of Golaghat, with the exception of a patch of cultivation at Barpathar, is covered with heavy forest, hence many of the difficulties have been encountered here which have already been enumerated in the 2nd division and it is needless to recapitulate.

The ground is less broken generally than it is south of Dimapur, or rather the belt of level land extends much farther back from the bank of the Dhansiri, but on the other hand the drainage crossed is heavier, in places however low spurs, thrown out from the hills to the west, come down to the river and cannot be avoided. Buried in the jungle are occasional bils, and a considerable amount of work has been lost to get a line avoiding these as much as possible.

The propinquity of a road, with rest houses, has facilitated movements and reduced discomforts and has therefore been a help to the work.

46. *Estimate.*—The estimate amounts to Rs. 65,276 per mile, and includes the cost of a bridge across the Dhansiri at Golaghat of 6 spans of 100 feet supported on cast iron screw piles 2½ feet diameter, the roadway being carried on the bottom boom to allow greater headway with a lower formation, reducing thereby the height of bridge and bank, and the length of gradient of 1 in 150 towards the Golaghat station which is especially desirable.

There is no other bridging of any magnitude, and no special difficulties are anticipated in the foundations; the beds of the streams show either stiff clay or gravel.

47. *Estimate under the preliminary one.*—The estimate is very much less than that of Rs. 80,000 per mile which I took in my preliminary calculation, but, as stated in my report, that was based on Colonel Lindsay's estimate for a line between Gauhati and Goalpara, and not on any personal acquaintance with the country.

48. *Questions affecting rates.*—High rates will have to be given to attract labor into the Dimapur valley, which has an evil reputation for unhealthiness, and to allow for the shortness of the working season. The great bulk of the labor will probably have to be imported from Bengal. These facts have been kept in view in fixing the rates for such items as earthwork, brickwork, and ballast; but the high cost under these heads is partly counterbalanced by the present low price of iron, which affects bridging and permanent-way, and the low figure taken for sleepers which can be obtained in any quantities in the forest through which the line passes.

I must also note that a higher rate would have had to be fixed for brickwork had not a valuable outcrop of nummulitic limestone, sufficient at any rate for all our work in the Dimapur valley, been found on the Doegrung river, near the village of Murphulani, and another smaller outcrop on the Nambor nearer the line; the sites are marked on the index map. It is very probable that a careful examination of the country in this direction may lead to farther discoveries.

The high price of brickwork in Assam is in a great measure due to the absence of limestone, the bulk of the lime used being brought round from Sylhet, and if any large beds are discovered, they would prove very valuable not only to the railway but to the province generally.

Mr. LaTouche of the Geological Survey hopes to be able to spend some time in October or November in examining the ground in this neighbourhood. Small outcrops of coal have been found close to the limestone.

49. *Alternative line by Jamugurigaon.*—The alternative line which crosses the Dhansiri near Barpothar and the Daiang near Jamugurigaon is estimated to cost Rs. 65,776 per mile or Rs. 500 per mile more than the line *viâ* Golaghat, but this is because the cost of the large bridges over these two rivers is distributed over a shorter mileage.

A line taken across here would probably save three miles in the through distance and about two lakhs of rupees, but for various reasons I am not inclined to recommend its adoption, though, without seeing the country above Golaghat, it would be rash to give a decided opinion.

Golaghat is not a place of any great importance at present, but considerable sized boats can get up the Dhansiri so far, during the greater part of the year, whereas they cannot get up as far as Barpothar or Jamugurigaon, and with a railway passing through it, a large trade may in course of time be developed between it and the country lying to the north. A branch line may also in time be desired to the bank of the Brahmaputra and this would be shorter from the Golaghat route, while if limestone should be found in any large quantities near Murphulani, there would be another argument in favor of its adoption.

IV.—Lumding-Roha Division.

50. *Forms portion of Gauhati branch.*—This is a portion of the proposed branch line to Gauhati which would take off from the main line at a point between the Lumding and Langpher rivers. A good site for the junction station has already been indicated about two miles east of zero of this branch survey, but over at least the greater part of these two miles it is probable that the main and the branch lines may best follow a common alignment.

51. *Chainage on plans does not agree with chainage on ground.*—The chainage on the plans and sections is numbered from the Lumding, but this does not follow the order in which the line was surveyed and pegged out.

52. *Only one Assistant Engineer available to start the survey.*—When work was started, only one officer, Mr. Denne, Assistant Engineer, was available, and he commenced operations in the end of November from a point on the Assam Trunk Road about two miles on the Gauhati side of Roha; this is the terminal point on the plans and sections. Mr. Denne worked singlehanded until the end of January when Mr. W. H. Sherman, Executive Engineer, arrived and took over the Division, but by this time the survey had reached the Jamuna river.

53. *Reasons for discrepancy in chainage.*—Mr. Molesworth and I in the middle of February found the survey carried a short way south of the Jari Jan. Up to this point the country is fairly open, what jungle is met with not being very heavy, and as far as the Jamuna there is a considerable population along the banks of the Kopili villages, for some miles, being practically continuous. Towards the Lumding the jungle is heavier, and as it becomes unhealthy late in the season, and the previous year in marching through it I had experienced considerable difficulty with regard to drinking water, I advised Mr. Sherman to move as soon as possible to the Lumding and work back; this he did and in consequence the chainage of the plans does not agree with the chainage marked on the ground.

54. *Only a trial traverse run at Lumding end.*—Mr. Sherman wisely contented himself with running some kind of a line from the Lumding to connect with the survey already done, and time did not permit him to elaborate the work. The estimates, therefore, are for a line which can be very considerably improved at the Lumding end.

55. *Estimates.*—The total length of line from the Lumding to the Trunk Road near Roha is 56·715 miles, the estimate for which amounts to Rs. 40,06,354, which gives a rate of Rs. 70,640 per mile.

Mr. Sherman has also given me estimates for the above divided into two sections; the first extending from the Lumding to the Lanka Jan, 13·10 miles, is estimated to cost Rs. 1,09,404 per mile, but without doubt this can be greatly reduced: the second comprises the remainder of the division, 43·615 miles, the estimate for which gives a mean rate of Rs. 58,997 per mile. The alignment of this last section may possibly be somewhat improved, but with the effect of rather reducing the through distance and total cost than the mileage rate, which is already, considering the high rates of labour, very low, for reasons which will appear.

56. *Description of line.*—Commencing from zero, about a mile north of where the Langladisa joins the Lumding, the line runs for about 4½ miles between the Lumding and Langpher rivers. The distance between these two rivers at zero scales 6 miles, whereas the actual distance is only about two miles: this corroborates what I remarked, in the report on the exploration of the North Cachar Hills, regarding there being some mistake in the position of the Lumding here.

The ground is very undulating, and in the fourth mile a high ridge is cut through. A high and costly bridge over the Langpher is necessitated by the nearness of the crossing to the Dyung the floods of which must affect the tributary for a considerable distance up, owing to the small fall in its bed. I think a great saving can be effected by crossing the Langpher higher up; this would remove the bridge further away from the influence of the Dyung floods, and from my examination of the country in April last, it seemed to me, that the crossing might advantageously be placed so far up as to out-flank the high ridge. Between the Langpher and mile 7 the work is light, but from that, onward to the Lanka Jan, near mile 13, the traverse crosses a succession of ridges and ravines at right angles. Immediately to the west of mile 8 there is a large bil, which extends almost to the Dyung; if the line is kept to the east of this bil, as this traverse is there seemed to me no hope of materially reducing the work here, except possibly by extending the line by a circuit more to the east, but as this would apparently only lengthen the line, without reducing the total cost, it is objectionable. It is however very probable that a better line may be got by passing west of the bil.

Between miles 10 and 13 the banks and cuttings are very heavy, but I found that by throwing the line a very little over to the west, the high ridges might be almost entirely avoided and the quantity of earth-work reduced to quite a moderate amount; the line has been taken straight and unfortunately has cut the ridges at their highest points. Up to the Lankha Jan there is uniform forest, but north of this the country opens out, and exploration becomes much easier, while the ground itself is less broken. There is a considerable amount of drainage, flowing from the east and north into the Kopili, crossed between the Lanka Jan and the Jogi (Jori) Jan, which is near mile 28: the line between these streams skirts for some distance the edge of low lying ground, much of which is under rice cultivation about the group of villages bordering the Lalung Bil, to serve which it is proposed to provide a station in the 17th mile.

It will be observed that from mile 28 to the end, only three large bridges are provided and not a single small one, and an inspection of the map is alone almost sufficient to explain the reason; indeed, the three streams which it is proposed to bridge might be blocked were it not for interfering with the boat traffic. It will be seen that the alignment runs between two systems of drainage, connected however by the above three main channels; that the first of these, the Jori Jan, connects with the second, the Jamuna, and that again, through the Titulisar and the Haria, with the Kallang, a loop of the Brahmaputra. The Jori Jan is merely an escape channel of the Kopili, which carries off some of its water to the Kallang as indicated, and there is no doubt that all the water of the Jamuna might be sent down the Titulisar into the Kallang and not allowed to cross the line into the Kopili, to be again crossed between Roha and Gauhati. The third, the Titamari, again is only a short connecting channel between the Kallang and the Kopili, in which the current flows in one direction or the other according as to which of the two rivers happens to be in highest flood.

The highest ground is generally along the edge of the Kopili: when the water spills over the right bank, it finds its way at will by a multitude of depressions into the Kallang but until it tops the bank, the above three channels offer the only means of escape for the Kopili flood in that direction. The railway embankment will confine the flood when it reaches such a height, and leave it only these three means of escape; one of the effects will be to increase the current from the Kopili through the bridges, but it is believed that ample waterway has been allowed to meet this contingency.

The Kopili channel is evidently not large enough to carry off all the water that comes down, and another effect of interfering with the overflow will probably be to increase its capacity, by the action of the water itself in eroding the banks and straightening the course. The flood level marked on the section is the highest of which any record has been obtained; this flood is stated to have occurred 30 or 40 years ago (it may have been in the same year as the great flood in Sylhet and Cachar) and formation has been kept in no place less than 2½ feet above it. The line will intersect a few petty basins, the drainages of which fall into the Kopili under ordinary circumstances, but as their watersheds are said to be with one exception, and it can be diverted below the flood level, no special provision is required to pass the water across the line.

It may be advisable to keep the line at two or three points farther away from the river where this has a set towards it and to prevent further erosion of the river bank by spurs or groynes; I think also the line may be somewhat straightened over the last few miles.

57. I have suggested to the Executive Engineer certain improvements, which it appeared to me, might be made in the alignment of the first thirteen miles, and on these suggestions and his own knowledge of the country farther north, he has marked on the index map in blue an alternative for future investigation, extending from zero to mile 30 near the village of Kumrakata. The effect of this alteration, it is believed, will be to reduce the through distance by 1¼ miles and the total mean milcage rate to roughly Rs. 68,000.

The whole of the country, however, between zero and the village of Kumrakata requires further examination, and I have added a dotted blue line shewing a route which I think also should be examined, though native reports regarding the jungle south of the Lalang Bil are not favorable.

58. Mr. Molesworth in his note, dated the 27th March 1884, stated that the cost of the branch from the Lumding to Gauhati should not, in his estimation, come to more than Rs. 66,000 or 68,000 per mile; the estimates accompanying give for the section of 56·715 miles, actually laid out, a rate of Rs. 70,640 per mile as already stated; improvements which are no doubt possible in the alignment will probably bring this down to Rs. 68,000 per mile, but I may mention that I believe that Mr. Molesworth, in making his estimate, allowed Rs. 3,300 per mile less than I have done on the four heads, stations, staff quarters, station machinery and plant, so that if his figures were taken, even on the present alignment his estimate would suffice for this section, and I believe it will be sufficient for the remaining portion to Gauhati with my figures under these heads. Taking into consideration more specially, the high price of labor, I am inclined to think that these figures are not too high, but with the improvements in the alignment which I have indicated, there can, I think, be no doubt, that the branch line can be made for the rate, Mr. Molesworth has stated.

59. *Waterways.*—The largest streams have in the above description been specified. On the present alignment the bridge over the Langpher is by far the largest on the division. It consists of 6 spans of 100 feet, but it has been remarked how it can probably be very materially reduced: three hundred lineal feet waterway would be ample to take all the water of the Langpher itself without doubt, but at the point where the traverse crosses a high bridge is necessary and there is no economy in restricting the waterway for it would throw the abutments into very low ground. The flood level shown on the section is due to the Dyung floods, and has been obtained by working up from the highest flood mark pointed out at the point where the Dyung is joined by the united streams of the Lumding and Langpher about two miles below the line crossing, for owing to the want of population on the Langpher there is no means of obtaining it directly. Both this and the Lumsakhong 5 spans of 40 feet, are properly speaking ravine viaducts.

For the Lanka Jan, Jori Jan and Jamuna, spans of four 40 feet, three 40 feet, and four 60 feet respectively, have been allowed. The Jamuna is provided with a pier abutment at the north end to permit of the bridge being extended if the waterway is found insufficient.

For the Titamari a central span of 100 feet is provided to pass boat traffic and two side spans of 40 feet to take the spill water of the Kopili or Kallang and a road under the west span.

The estimates are for brickwork in piers and abutments, but an alternative estimate has been made for screwpiles in some of the bridges; these would appear to be somewhat more expensive, but if it is found that the use of them will expedite the work, they may be employed without materially affecting the estimate.

In the Langpher bridge, however, it will, I think, be best to adhere to brick piers on account of the danger from drift timber and the probable nature of the foundations.

On the first thirteen miles there are a number of treble 6 feet arched culverts in high banks, which on account of their length of barrel are costly and have therefore been included under "Major bridges." It has not been thought advisable to try and reduce the cost of these by placing them on the slopes of the ravines, as these are steep and as far as can be judged of loose soil, but it is possible that rock may be found closely underlying the soil, and it may then be economical to have recourse to that expedient; it must however be remembered that it is believed the alignment is capable of considerable improvement here, and with this the height of bank, and consequently the length of barrel, would be considerably reduced, and the reason for such an expedient disappear. The Executive Engineer states that he has made a comparative estimate of the cost of a culvert placed on the slope, with a stepped masonry channel to carry the water down to the bottom of the ravine and that he finds it more expensive.

The bridge estimates, both on this and the other divisions, have been prepared from rough sketchs as I have not thought it necessary to incur the delay of making detailed drawings for this preliminary work.

No borings were taken in the beds of the streams, but judging from appearance in each case, it is believed that ample depths have been allowed.

60. *Stations.*—The estimates of this division only make a proportional allowance for the junction station, which is two miles east of zero. The first station is in mile 7, which will give nearly 9 miles run from the junction, but if the line is carried west of the bil referred to, this station will be on the bank of the Dyung and somewhat more favorably situated for picking up the traffic passing along that river. The other stations have been placed with due regard to distance, so as best to serve the country traversed. A station will be required just beyond the terminal point near the trunk road, and it will probably be advisable to give a goods siding from it to the bank of the Titamari to reduce the cost of the carriage of the considerable traffic which this station may expect to draw from the Kallang and the Kopili.

61. It will be seen that the severest gradient adopted on this section, as well as throughout the Dimapur valley, so far as the survey has extended, is 1 in 150 and I hope to be able

to keep to this, which was also the ruling gradient adhered to on the line between Comillah and Cachar, in the Assam valley. The intermediate hill section will, it is believed, require nothing more severe than about 1 in 70.

Local Resources and Labor.

62. The following remarks regarding local resources and labor apply to all the divisions generally. Sandstone is found along the line throughout the North Cachar Hills and also in the hills north of the Langpher, but so far as I have seen, it is generally of very inferior quality, and even were it otherwise the difficulty of procuring quarry men and stone dressers in any number and the high price of lime, would preclude the adoption of rubble masonry in the plains at least.

Brickwork has therefore been generally estimated for.

All the materials for making bricks are plentiful. Lime is however the great difficulty. I have already noticed that limestone has been found in the Dimapur valley, and if the outcrops have been fairly reported upon, they should yield at least enough lime for the work in the Dimapur valley itself. I have heard that limestone exists in a valley north of the Jamuna river, and if this is true, though I have nothing but a vague rumour to the effect at present to go upon, it would come in most useful for the Gauhati branch: otherwise we must hope that the Dimapur valley may be able to furnish it, but failing this we can apparently only look to Sylhet for our supplies both for the work on the branch line and in the North Cachar Hills.

With the Dimapur valley lime, it is probable that sand can be used, where this can be found of good quality, but with the fat Sylhet lime it is customary to use only surkhi, and that slightly underburnt, to render it somewhat hydraulic.

If limestone is found to exist in sufficient quantities in the Dimapur valley, it will be another argument in favor of making the section from Golaghat to the Lumding first as Mr. Molesworth has proposed.

63. The question of labor is also a very serious one for the supply is very scarce in Assam, and the bulk of it will have to be imported, and to introduce the large amount that will be required on heavy railway works, special arrangements will have to be made, necessitating probably the organization of a special recruiting agency.

How to supply food without fail in adequate quantities, and the least possible cost, to large number of laborers, working in jungles far from bazaars, and all sources of supply will at the outset prove a subject for anxious consideration. Therefore I am of opinion that the construction of the central portion at least of the North Cachar Hills Section, extending from the head of the Jatinga to the head of the Langlatisa, which is farthest from the sources of supply of labor, food, and lime should not be put in hand, until the rails have been carried up to the foot of the hills on each side with the exception perhaps of such work as tunnelling, which cannot be pushed beyond a certain point and which might seriously delay the through opening of the line. The estimated rates for the hill work are based on the assumption that this will be done.

64. Assam imports large quantities of rice and of other common articles of food, and the railway during construction will increase the demand; considering this and that very large quantities of railway material will have to be carried up the Brahmaputra, if work is pushed on simultaneously from both ends, and not piecemeal, by sections, from the Chittagong end, which of course would be a very slow way of carrying it out, and I believe would never be contemplated, it would be most satisfactory and economical to establish a small flotilla of steamers to carry every thing required for the line, railway material, food, and laborers. These steamers might return with coal for the Railway in Northern and Eastern Bengal.

The rates which the Steamer Companies at present charge for carriage of iron from Calcutta are exhorbitant. Major Willans informs me that he is paying Rs. 1-3 per maund for carriage of rails to Kokilamukh opposite Jorhat, the carriage by railway from Chittagong if that were made, at such a rate as one-third of a pie per maund per mile, would only amount to 13½ annas. The River Companies would have vastly to reduce their rates before it would be as cheap to do the platelaying from Golaghat up the Dimapur valley, for instance, with material carried by them as by telescoping it out from Chittagong, but there are other considerations which would make it pay to do the platelaying from the Northern and at almost any cost.

65. *Remarks connected with the economical and expeditious construction of the line.*—The southern half of the North Cachar Hills Section would no doubt be done with labor, food and materials drawn through Cachar, but the northern half would be most expeditiously and economically carried out had it lines both to Golaghat and Gauhati to draw upon; the former would be invaluable if lime can be got from the Dimapur valley, but labor and food could be most cheaply drawn through the Gauhati branch. If it be a question of which should be preferred, then I should not hesitate to decide in favor of the line from Lumding to Golaghat

both on the grounds that it forms a section of the main line, and that it would be more useful to the province in facilitating greatly communication with the Naga Hills, for the Gauhati branch would be of little use, except towards the construction of the railway until connected with Cachar or extended into Upper Assam, and of course labor and food can be brought round by Golaghat.

It would much facilitate the movement of labor, materials and food in the Dimapur valley, and would besides give confidence to the laborers, if a temporary line were laid down, and with this view immediately, it is decided to start work; arrangements should be made to deliver as soon as possible about 100 miles of rails and fastening at Golaghat, the sleepers for which can be had on the spot.

A few miles of light portable railway can probably be most profitably employed, especially in the hills but such questions may be left for discussion until the survey is farther advanced.

COUNTRY BETWEEN GAUHATI AND THE DHANSIRI RIVER BY THE TRUNK ROAD.

66. *Gauhati Roha-Section.*—I have been over most of the ground between Gauhati and Roha by the Trunk Road twice, the first time being with Mr. Molesworth in February. As a result of these journeys I have marked on the accompanying index map approximately what I think will be found to be the best course for the line. A fairly easy passage can be got through the hills between Gauhati and the Digru river on the continuation of the valley for some distance up which an old road between Gauhati and Sonapur runs. Any heavy work will be confined, by the report of Mr. Denne, Assistant Engineer, who examined it, to a length of about 1½ miles, and nothing worse than a couple of deep, though not long, cuttings will be encountered.

The line on this section only crosses two large streams, *viz.*, the Digru and the Kopili; the Um Jam which is crossed by the Trunk Road being avoided by taking the railway across the Kopili below its confluence. East of this crossing the line would keep between the Kopili and the Kallang, and it may be found best to block all the minor drainage.

There can, I think, be no doubt that the estimate of Rs. 68,000 per mile will be sufficient.

67. *Trunk Road alignment objectionable.*—East of the Digru river the alignment of the Trunk Road has been advocated, but no one with any knowledge of the subject would be guilty of doing this. Of course the ground is that the road embankment is there ready. The road will always be useful in supplying a means of approach to the station. Apart from destroying its usefulness as a road by placing the rails upon it, such policy would be an extravagant one, and seriously increase rather than decrease the total cost of the line, for the road alignment is a very tortuous one, apparently adopted quite regardless of this particular and with a view to save earthwork, bridging not being considered. Even if adopted, it would require in many places, if not generally, to be raised, and in others to be widened, while when the sinuosities had been taken out and suitable curves adapted, probably not much more than half the original road would remain, and, after all, the result would be a longer line and a greater expenditure than there need have been.

As an example of the saving that may be effected in distance, and consequently in cost, I would point out, that when compared with the 16 miles east of Nonkhlao by road, the alignment I have marked is from 3 to 4 miles shorter, crosses only one large stream instead of two, and avoids a large amount of minor drainage.

68. *Reason for not being able to examine country above Golaghat.*—It had been my intention, after setting Mr. Moore to work in the North Cachar Hills, to march from Gauhati up the Trunk Road as far as Dibrugarh, and thence to return by the Dimapur valley and the Gauhati branch. I should thus have seen the whole country above Gauhati, that could come within the scope of my work, but the announcement of Mr. Molesworth's intention to pay a visit to the North Cachar Hills, forced me to alter my plans and left me with only sufficient time to pay a hurried visit to the Dimapur valley before joining him at Gauhati.

69. *Roha-Dhansiri Section.*—As I was particularly anxious to see the country along the Trunk Road between Nowgong and the Dhansiri river, I took it on my return from the Lumding in April, and I may at once state that I was so unfavorably impressed with the portion of it east of Joklabundha, that I am most thoroughly confirmed in the opinion, which I formed on other grounds and expressed in my report on the exploration of the North Cachar Hills, that it would be a mistake to take the railway by this route.

Mr. Ward in the note which he wrote on that report, when Officiating as Chief Commissioner, used as an argument against the line from the Lumding to Roha that it would pass through a swampy country. I therefore did not expect that the line which he advocated along the Trunk Road would be open to this objection at least, and that to a very much greater extent. I doubt very much if the country between Roha and the Lumding is any worse than that between Roha and Gauhati as regards the ratio which marsh or bil land bears to arable; whereas from Joklabundha to the Dhansiri the vast bulk of the narrow strip of land between the hills and the Brahmaputra is a swamp, and as far as I could learn, it is too low for anything to be grown upon it.

70. *Approximate best alignment marked on map.*—In case, however, this route should be eventually selected for a railway, I have drawn on the map the line which I think will approximately be found the best to take.

71. *Description of country between Roha and Dhansiri river.*—Of course the trunk road would not be followed between Roha and Nowgong for that would involve two crossings of the Kallang with heavy bridges. After crossing the Titamari, nearly on the alignment of the present survey to the Lumding, it would diverge north-east, and from the Ilaria river to about Samagoorie, thirteen miles beyond Nowgong, it would encounter little drainage, as the bulk of this is intercepted by the Noaloie or Nianoye nullah, which runs almost parallel to the direction of the line. Between Nowgong and Samagoorie there is a series of villages, closely linked together, along the east bank of the Kallang; the road follows almost every winding of the river keeping generally close to the bank and between the river and the villages; it is quite unfitted for the railway, for there is scarcely such a thing as a couple of hundred yards of straight upon it; but even were it perfectly straight it would not be worth taking, for I do not suppose it has an average height of bank of so much as two feet, and the railway besides destroying the road would require to be fenced, and then innumerable foot crossings would have to be given to allow the villagers access to the river on which they are dependent for water, in addition to the larger crossings required for trade.

The railway should run some distance behind the villages which form only a narrow belt.

Between Samagoorie and a point about 3 miles beyond Joklabundha, a considerable saving can be effected on the road mileage. There is a cluster of villages along the Kallang for the last five or six miles before Joklabundha is reached, but otherwise the population appears much more sparse after Samagoorie is passed. Soon after leaving Joklabundha jungle is entered upon, and there is scarcely the vestige of a hut to be seen for about 20 miles, the few there are being chiefly about a tea garden, nor is there land suitable for bearing a population. For three or four miles the road twists and turns, cutting through a network of narrow spurs and ravines the bottoms of which are morasses, and runs up and down with very severe gradients: it then passes for about five miles across very low ground, an uninterrupted swamp covered with dense canegrass, skirting the foot of the hills with an average 4 to 6 feet bank; again it crosses for two miles another belt of spurs and ravines and then enters upon another stretch of 4 or 5 miles of swamp. After these twenty miles the character of the country considerably improves; the width of the belt of land between the Brahmaputra and the hill increases; the same swamp continues but there is generally a ledge of fairly level ground along the foot of the hills above the Brahmaputra flood; this ledge is however intersected by numerous small streams which would make bridging a heavy item in the cost of the line; at some points it is only 200 or 300 yards broad, at other it breaks up into ravines or is encroached upon by the swamp running right up to the foot of the hills, but, broadly speaking, the tendency is for the width to increase the farther east we go, and opposite the Diphlu tea garden, I judged the width to be about three miles.

The road generally skirts very near the edge of the ledge or step and is no better than a surface track. The villages are mean and very few and far between. There are four or five tea gardens, but these during their busiest season have easy access to the Brahmaputra by tributary streams, and even were it otherwise they are not worth considering.

72. *Dimapur valley route preferable to that along the Trunk Road apart from question of connection with the Cachar line.*—Such then, broadly considered, is this country through which it has been proposed to carry the railway; a country practically uncultivated, because the ground does not exist fit for cultivation and which must remain so until its surface is raised, if in the meantime the Brahmaputra does not carry it away. If it were a garden teeming with population, with the Brahmaputra to serve it so near, there might yet be grounds for preferring the route by the Dimapur valley, but considering what it is now, and what for an indefinite period it must remain, it appears to me not to have the slightest claim to consideration. Leaving out entirely the question of connection with Cachar, and supposing the problem to be simply the establishment of railway communication between the upper and lower portions of the Assam valley proper, it seems to me that the Dimapur valley route possesses superior claims. No doubt that line is about thirty miles longer, and between the Lanka Jan and Golaghat passes through about 100 miles of forest, with scarcely any population, but the great bulk of it can be brought under cultivation and the soil is admirably suited for tea. The railway would open this country out in a way it can never be opened out otherwise, whereas the other route is already well served by the Brahmaputra and the Kallang. The Naga Hills also would be served. Mr. Ward has stated that to serve the Naga Hills a tramway might be laid along the Dimapur valley from Golaghat or some other point on the railway but with this added, the cost of the scheme he advocated would be greater than that of the direct Dimapur valley. The cost of the Trunk Road line, as it may be called, would certainly not be less mile for mile than that of the alternative.

73. *But this connection must follow, with opinions in its favor.*—But, the feasibility of the North Cachar Hills route having been established, the advantages of the Dimapur valley route cannot be treated independently of the connection with Cachar for that, even if not established at first, is certain to follow. I have already gone into the advantages of that connection and shall not enter upon them again here. I have learnt nothing to make me alter my views, but on the contrary, I am more than ever convinced that they are right. Mr. Molesworth has satisfied himself regarding the feasibility of the route picked out by me through the hills, and has confirmed the advantages of that route over any other while the opinion of any Tea Planters with whom I have had an opportunity of communicating or of explaining the subject, from Nowgong upwards, has been unhesitatingly given in its favor.

I append on this subject copy of an interesting letter, dated 19th July, which I have received from Mr. Phillips, Chief Superintendent of the Assam Tea Company's Gardens, Nazira. Mr. Phillips is, I believe, about the most influential Planter in Assam, and has charge of the largest concern employing upwards of 7,000 imported coolies. As I had not been able to visit Upper Assam above Golaghat, I asked him to favor me with his own opinion and to procure that also of Planters whose tea passes through the hands of Calcutta Agents, as to which scheme, *viz.*, a line to Fakirgunj opposite Dhubri or one to Chittagong and Chandpur, would suit them best and it will be seen that the opinion is quite in favor of the latter.

The Kamrup Planters might (probably would) prefer a scheme that would give them a line to Dhubri, but they are of small account in the consideration of any scheme. The total tea manufactured in Kamrup in 1882 only amounted to 11,175 maunds, and it is doubtful if they had the railway whether they would make any extensive use of it. Part of the tea, though not much, comes from the north side of the Brahmaputra, and that would certainly not take the railway, while in Kamrup generally, the bulk of the garden labor, I am informed, is local and not imported.

74. *The Dadur Ali probably offers the best alignment above Golaghat.*—I have not, as noted, seen any of the country above Golaghat, but all the information I have acquired points to the line of the Dadur Ali, an old road, being the best. The most detailed information on this point is contained in a letter dated the 21st February 1884, addressed by Mr. Phillips, to the Secretary to the Chief Commissioner of Assam, in the Public Works Department. This alignment would carry the railway south of the Trunk Road and of the stations of Jorhat and Sibsagar, and it is claimed for it, that it passes near many of the most flourishing gardens in Assam.

There is evidently an advantage in keeping the railway away from the Brahmaputra, for this will always complete with it for traffic, and by doing so the belt of valley south of the river will be more equally intersected and served than if the railway were to run direct from Golaghat to Jorhat and thence along or near the Trunk Road to Dibrugarh.

The great bulk of the tea gardens I am informed lie south of the Trunk Road.

For these reasons were a line carried by the Trunk Road route between Roha and the Dhansiri, it would be desirable after crossing the Dhansiri to make for Golaghat, or a point near it, and on this account there is not so great a difference between the length of this and the Dimapur valley route as I calculated in my report of last year.

75. *Alternative line between Roha and Dimapur through the Jamuna valley.*—It may be worth mentioning that were it a matter of vital importance, and at the sacrifice of other consideration, to reduce the length of line between Upper and Lower Assam, this might be effected by running direct from Roha to Dimapur by the Jamuna valley: this route would only be very slightly longer than that by the Trunk Road to Golaghat. The Junction Station would in that case be at Dimapur, considering that it is important not to increase the through distance between Upper Assam and Cachar. The two parties, which worked in the Dimapur valley marched by this route, and report that there are no engineering difficulties on it, but I cannot recommend any such scheme and indeed think it would be a very great mistake. The length of line to construct would be about twenty-five miles greater than by the proposed schemes, and all traffic between Lower Assam and Cachar would have to go about seventy miles farther round than it would have to do if the direct route between Roha and the Lumding existed; in fact the tax on this would no doubt be soon found to be so intolerable that the direct line would be demanded; the only benefits it would confer would be to shorten by about two hours the railway journey between Lower and Upper Assam and to reduce the transit charges between the two parts by the amounts due to a saving of something like 20 miles in distance.

76. *Unable to add anything to what has already been written regarding the financial prospects of the line.*—I am unable to add anything to what I have already written regarding the financial prospects of the line which can be of any value. The total registered trade of the Brahmaputra valley during 1880-81 and 1881-82 was stated in last year's report, but it must remain a matter for pure speculation as to what proportion of that trade would be diverted from the river to the railway and to what extent the railway would create fresh trade for itself.

Any estimate based on present traffic returns would probably be very soon exceeded.

It is not probable that I should have been in any better position to write on this subject even had I been able to visit the upper portion of the valley and have consulted a large number of the Planters. They are all doubtless eager for the railway, but they could not have enlightened me as to what amount of traffic the railway might attract. I have heard very diverse opinions.

77. *Length and estimate of the Gauhati less than previously assumed.*—I must notice that the length of the branch line from the Lumding to Gauhati will probably be only 111 miles, which at the rate of Rs. 68,000 per mile will give a total cost of Rs. 75,48,000 instead of the figures taken in the report on the exploration of the North Cachar Hills, *viz.*, 122 miles at Rs. 80,000 per mile equal to total cost Rs. 97,60,000.

The estimates have been remarked on elsewhere, but there has been a saving in the distance on the section surveyed, and the alignment I have marked between Roha and Gauhati shows a yet larger proportional one when compared with the Trunk Road mileage, which in the absence of any knowledge of the country was taken.

78. *Opening out tea gardens at the Lumding.*—I would also remark that since writing the above I have received a letter from a Planter, stating that he has been reading the reports on the railway surveys, and that he intends to open out a garden at the Lumding, and asking for a rough sketch of the proposed route so that he may pick out a convenient site. Many others, I have no doubt, will follow his example when they feel assured that the line is to be put in hand.

79. *Suggestions for programme of survey operations during season, 1884-85.*—It remains for me to suggest a programme for next season's operations. Mr. Moore should return to the North Cachar Hills and carry on the survey towards the Lumding while another party should be sent to complete the survey between the Lumding and Dimapur. Mr. Molesworth has recommended that the survey from the Cachar line into the Jatinga valley should be put in hand, and I think that this would be the most useful way of employing a third party. There remains to consider what to do with the fourth party. Judging by what was accomplished in the North Cachar Hills last season, it will take eight years, with only one party each year to complete the survey of the Hill Section, apart from laying down the final line.

I should like to see two parties engaged in the hills, but there are difficulties about coolies, unless, however, the survey is to drag along for years, these difficulties must be faced.

I must remark, however, that two of my parties only consist of one Executive Engineer and one Assistant Engineer each, and for the hill work, it would be necessary to increase the strength, so that if one more Assistant Engineer at least is not forthcoming, it would be better to put the fourth party to survey from Golaghat upwards, and while this was going on the Executive Engineer in charge could detach a subordinate to cut a trace through the forest between the Dhansiri and Daiang rivers north of Dimapur, which it was not possible to get done last season. I trust that early orders may be issued as it takes about two months to make all the arrangements for taking the field, and the working season is short.

80. *Conclusion.*—In conclusion I trust that the services of the staff, who have discharged their arduous duties, to my entire satisfaction amidst much discomfort and with much risk to health may be brought to the favorable notice of the Government of India.

No. 1555, dated 19th July 1884.

From—J. Phillips, Esq., Chief Superintendent, Assam Company,

To—The Engineer-in-Chief, Assam Railway Survey, Shillong.

I have the honor to acknowledge the receipt of your letter No. 1405, dated the 31st May last, and regret that indisposition and press of other work have prevented me replying to it earlier.

2. The subject of your letter is one that must interest most deeply all residents and proprietors of land in this province, and it is pleasing to us all to find that there appears to be good grounds to expect that the Government of India are taking in hand vigorously the question of bringing the province into easy communication with the marts and ports of Bengal, and have at length, as I assume is the case, concluded that the river route is not adapted practically to secure this object which opinion has long been held by residents in the province.

3. You desire me to give you my views as to which of the two routes from Golaghat towards Bengal would be most likely to benefit Tea Planters in Assam, *viz.*, one from Golaghat to Fakirgunj and the other from Golaghat to Chittagong with a branch to Chandpur for delivery of produce for Calcutta.

4. For the conveyance of produce, that is, tea, it has been found that the fewer transhipments it undergoes the better, hence although when the Eastern Bengal Railway was first opened a considerable quantity of tea was sent by that line from Kooshtea, this mode of acceleration has been completely given up owing to the violence the chests received whilst being loaded into and unloaded from the trucks and hackeries in Calcutta. Tea from Assam is now loaded into flats which convey it direct to the jetties in that city, and it is found preferable to put up with the extra time occupied so that the chests may be placed in the warehouses without being injured.

5. Calcutta must be looked upon as the market for the bulk of the crop of tea produced in Assam, Sylhet and Cachar, although some few estates ship their produce direct to England, notably, the Assam Company, Noakacharree Tea Company, Jhanzi Tea Association, Jorhat Tea Company, Meleng Tea Estate, Brahmaputra Tea Company, and some others in this district.

6. Your proposal therefore to deliver the tea for Calcutta at Chandpur, from whence a choice of carriage exists, *viz.*, steamers or native boats, meets entirely all objections that could

be urged against the Chittagong route. The provincial line having a terminus at Fakirgunj would place us in but a little better position than we occupy at present, as from that station to Calcutta, we should still only have steamers offering to carry our cargo, and it is notorious that for the limited business done from Assam there can be no free and open competition, and we will be compelled to pay whatever charges are demanded by the practical monopolists as at present.

7. It is certain that no tea would be sent to Calcutta *viâ* Dhubri or Goalundo by rail.

8. Shippers to England direct will be able to secure cheaper transit from Chittagong to London, as I understand that the port is open all the year round and regularly visited by the British India and other first class Ocean steamers.

Transit through Calcutta entails upon such shippers charges which could be considerably reduced if the business was done at Chittagong, provided freight and insurance from this port is not heavier than from Calcutta.

9. Upwards also, as you point out, the cheap rice and other crops from Sylhet and Tippera would be brought into the province at a lower cost than is paid to bring from Serajgunj.

At present rice from Serajgunj is costing all estates in this district, Rs. 3-4-0 and Rs. 3-8-0 per maund.

10. The connection of Upper Assam with Cachar and Sylhet by direct line has undoubtedly very much to recommend it, more especially as the branch to Chandpur puts us in connection with the Central Bengal and Eastern Bengal Railways which would bring mails, passengers and immigrants more quickly to the province than they could expect to come if the circuitous route *viâ* Dhubri and Gauhati was adopted.

11. Politically there would also be much gained by this line, as administration—military and civil—of all districts and their bordering hill tracts, would be much facilitated by it, and it would then probably be found advisable to attach the Maimensing, Tippera and Chittagong districts to Assam and to administer the affairs of the whole of the Assam valley and the territory south of the Megna and Brahmaputra under one Chief Executive Officer.

12. As regards the financial prospects of this scheme, I think you must obtain information on these out of Assam as residents in the province are, as a rule, so confined in their undertakings as to be able to give little assistance or advice beyond their own little concerns and responsibilities. You can obtain, of course, local information and advice which will be reliable, but, for the broad subject of shewing the financial results from the investment of the capital required to lay down say, 550 miles of railway, you will have to gather your information from experts who have worked in larger fields than Assam, and I could not myself venture any opinion that would in any way aid you.

We have at any rate admittedly vast and valuable resources in the province which only require labor and capital to develop them, and these can only be introduced when communications are improved.

The climate of Upper Assam has everything to recommend it as a residence for Europeans who are able to work with health and energy at all seasons of the year in it, and if this line should become an accomplished fact, there is a moral certainty that great benefits to the province would accrue, and I hope it will be found also that these will compensate investors for the outlay incurred.

Under similar circumstances elsewhere, they have done so, and why should they not in Assam?

I regret that I do not feel justified in going further in my remarks under this head than the foregoing, but will be glad to collect for you such information as you would like to have to consider when you extend your inspection above Golaghat, when I shall be very pleased to lay it before you in Nazira which station you will be passing through or near.

13. I will thank you for any information you may be able to give me regarding the port of Chittagong to make me clear on the point of its adaptability for the business of this Company.

RESOLUTION.—The report, estimates, &c., now submitted to the Government of India relate to the surveys, made during the cold season of 1883-84, of the undernoted sections of the proposed Chittagong-Assam Railway, which comprised—

(1) a few miles of the hilly portion of the line in the Dijako and Mupa Valleys;

(2) the portion of the Gauhati Branch between Lumding Junction and Roha;

(3) the section between Golaghat and Lumding Junction.

The surveys are confirmatory, so far as they go, of the opinions previously expressed as to the feasibility and cost of the proposed railway.

2. As regards the section in the Dijako and Mupa Valleys, while the surveys establish the fact that a feasible line can be obtained in one of the most difficult portions of the hill route, and that the cost will be about the figure previously estimated, the details will have to be worked out with careful cross sections before the line can be finally located. The effect of this will, it is believed, be rather to reduce than increase the estimated cost. These surveys appear also to establish the fact that the western side of the range flanking the Dijako Valley affords a very fair line for a railway.

3. With regard to the surveys between Lumding Junction and Roha, the line from Roha to the 12th or 14th mile from the Junction may be accepted as not capable of any material improvement, but the remaining length will have to be carefully examined. The alignment here is doubtless capable of considerable improvement.

4. The examination of the country between Lumding Junction and Golaghat must be considered as preliminary only; nothing is established beyond the fact that a line with no very heavy work can be obtained between Golaghat and Lumding, but there appears to be very little doubt that further examination will result in a considerable improvement of the alignment.

5. The construction of the section between Golaghat and the Lumding river is of the first importance; it is also necessary that the construction of the sections in the plains, both to the north and to the south of the hilly portion, should be well advanced before the construction of the latter is commenced. In this view Mr. Buyers should be instructed to concentrate work during the coming cold season on the detailed survey of the Lumding-Golaghat section on the one side, more especially on the route previously suggested by the Consulting Engineer for State Railways between the Dhansiri and Daiang rivers, and of the Jatinga Valley and its approaches on the other, withdrawing the staff on the Gauhati Branch which is of minor importance.

ORDER.—Ordered, that this Resolution be forwarded to the Chief Commissioner, Assam, for information and guidance, the plans and sections being at the same time returned.

Also that it be published in the Supplement to the *Gazette of India*, in continuation of Public Works Department Resolution No. 433R.C. of 30th May 1884.

W. S. TREVOR, *Colonel, R.E.*,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 22nd OCTOBER 1884.

GENERAL REMARKS.—There has been a heavy and seasonable burst of the north-east monsoon in the Madras Presidency, and prospects have much improved everywhere, except in Bellary and Anantapur. In Mysore rain has again been heavy and general, and the prospects of the season are now encouraging. There has been good rain in Coorg, and the prospects of the crops are favourable. More rain is still required in parts of Poona, Sholapur, Belgaum, and Dharwar. In the Deccan and Southern Mahratta Country rain was general, excepting in Kaladgi, where it is much wanted. In Nasik and Khandesh the crops have been slightly injured by excessive rain.

In the Berars and Hyderabad and in the Central India and Rajputana States there was little or no rain during the week, but the prospects of the crops are on the whole very favourable. There was no rain in the Punjab and the North-Western Provinces and Oudh during the period under report. In the former province the *kharif* harvest promises to be very favourable. In the North-Western Provinces and Oudh the *kharif* crops are generally in good condition, though they have been injured in some places by excessive rain. In the Central Provinces agricultural prospects are generally good. Except in Cuttack, no rain fell in Bengal during the week. Paddy on high and low lands are still in need of rain. In Assam the prospects of the *sali* crops are fair. Rain is much needed at Gauhati. In British Burma the condition of the crops is generally good, though more rain would be beneficial in a few districts.

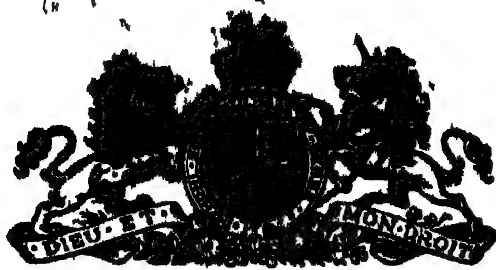
The last report of the Meteorological Department, dated 23rd instant, states that showers have fallen in Assam, at Burdwan and Saugor Island, and at some places in the Bombay Presidency, while at most stations in the Carnatic as well as at Bangalore rain has been general.

Agricultural operations remain for the most part unchanged. Sowing and ploughing for the *rabi* are generally in progress throughout the country. The *kharif* is being harvested in Bombay, North-Western Provinces and Oudh, and in the Punjab. Harvest operations are also in progress in some districts of Madras.

The public health is generally good. Prices are generally stationary.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—(Oct. 22nd)		
Bellary ...	·65 (average)	Pasture very scanty.
Kurnool ...	·82 (average)	Standing crops good; sowing of white *cholum* progressing; harvest early cereals, outturn below half. Some small-pox and cattle-disease.
Ganjam ...	·63 (average)	Small-pox, cholera, and cattle-disease prevalent.
Kistna ...	·57 (average)	Standing crops generally good; harvest dry crops, outturn below average. River 2·70 feet over anicut. Small-pox, fever, and cattle-disease in places.
Chingleput (Madras) ...	5·58 (average)	Standing crops good; harvest paddy and *ragi*, yield half the average. Small-pox in 3 taluks; 41 deaths from cholera.
Coimbatore ...	3·60 (average)	Standing crops benefited by recent rain; harvest paddy and *ragi*, outturn about average.
Tanjore ...	6·89 (average)	Standing crops good. Rivers 3 to 10 feet. Harvest wet and dry crops, outturn below average. 46 deaths from cholera.
Madura ...	3·11 (average)	Prospects considerably improved throughout; pasture scanty. 28 deaths from cholera.
Malabar ...	3·53 (average)	Second crop cultivation progressing. Fever and slight small-pox prevalent; 2 deaths from cholera.
Travancore ...	12·21	Second crop cultivation progressing. Fever, small-pox, and cholera in parts.
		General Remarks.—General prospects. Heavy and seasonable burst of north-east monsoon general from Nellore and Cuddapah southward. Prospects much improved and good, except in Bellary and Anantapur. Prices rising in Bellary.
Bombay—(Oct. 22nd)		
Karachi ...	*Nil*; total from 1st January to date at Tatta, 5·13; Jerruck, 9·71; Sakro, 12·96; Kotri and Ghorabari, 8·92.	Fever generally prevalent; diarrhœa of a bad type in Kotri, 12 deaths out of 19 from 15th to 19th, no fresh case since; cattle-disease in 8 talukas, loss of 192 cows and buffaloes, and 60 sheep and goats; small-pox in Moghul, Bin, and Ghorabari talukas, 1 fresh case, 2 deaths, 6 remaining sick. Prices—wheat, red rice, and *bajri* in Karachi 26, 28 and 40; in Kotri 24 and 38; in Sujawal 24, 34 and 40; and in Tatta 26, 30 and 36 pounds per rupee, respectively.
Hyderabad ...	*Nil*	River at Kotri on 20th, 9 feet 5 inches against 7 feet last year. Fever in 11, small-pox in 2, and cattle-disease in 4 talukas. Prices of grain steady.
Ahmedabad ...	*Nil*	Reaping of *kharif* crops in progress; crops healthy. Fever in Dholka, Gogo, Dholera, Viramgaum, and Parantij. Wheat 31 and *bajri* 33 pounds per rupee.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bombay—*contd.*		
Baroda ...	·25	Total rainfall 47·92. Public health good. Harvests commenced in Naosari and Kadi divisions. Prices—*bajri* 34 and rice 23 pounds per rupee.
Surat ...	·1	Total rainfall 39·92. *Kharif* harvest commenced in places; standing crops healthy; preparations for *rabi* progressing. Cholera in Jalalpur taluka, 4 cases, 2 deaths. *Juari* 29 and *nagli* 40 pounds per rupee.
Nasik ...	Rain throughout the district, except in Peint.	Break urgently wanted. Public health good. *Kharif* crops in good condition, but slightly damaged in parts by excessive rain; *rabi* sowing is in progress. Wheat 40, *bajri* 33½, and rice 21 pounds per rupee.
Colaba (Bombay) ...	Rain on 4 days; total of week 1·38.	Total to date 73·6, being 3·10 above average; abnormal temperature 2° cool to 1° warm; vapour in air defective from 15th to 17th; abnormal wind veered from north-east on 19th to south on 21st; thunder and lightning from 18th to 21st.
Poona ...	Good rain—1·0 at Sirur; light showers in 6 talukas.	More rain wanted eastward, where *kharif* crops are not good. Scarcity of fodder in the east. *Bajri* 33 and *juari* 24; in Poona *bajri* 28 and *juari* 30 pounds per rupee.
Ahmednagar ...	Nagar, 2·48; Kopargaon, ·71; Parner, ·41; Jamkhed, Sheogaon, Newasa, and Sangamner, none; slight in remaining talukas.	*Kharif* crops are in good condition; harvesting in progress in Hainer, Shrigonda, Jamkhed, Sheogaon, and Kopargaon; sowing of *juari* completed in all talukas, except Akola, where it is just begun. Fever prevalent in Sheogaon. *Bajri*—maximum 48 pounds per rupee in Akola, minimum 36 in Karjat; *juari*—maximum 60 pounds in Sangamner, minimum 34 in Karjat.
Sholapur ...	Sholapur, 2·51; Barsi, ·8; Madha, ·65; Karmala, ·17; Pandharpur, 1·4; Sangola, 1·14; Malsiras, ·60.	*Juari* 33 pounds 28 tolas and *bajri* 33 pounds 9 tolas per rupee. Prospects somewhat brighter. More signs of rain.
Dharwar ...	1·33; Hangal, ·65; Mugud, ·52; Ranibennur, ·32; Bankapur and Ron, ·22; Karajgi and Kal[illegible] ·14; Gadag, in Navalgund, Nargund, Mandarji, and Kod.	Rain has done some good to crops in Dharwar, Ranibennur, and Hangal talukas; rain urgently required throughout the district. Sowing of late crops retarded in eastern talukas, where also scarcity of fodder is being felt; standing crops suffering from drought. There are still signs of rain, which has been falling, though slightly, since last three days in Dharwar and adjoining talukas. 35 deaths from cholera. Prices rose greatly, but have again fallen: average prices [illegible] rice 26 pounds per rupee.
Kanara ...	Karwar, ·16; Kumpta, ·73.	Total rainfall 93·52. C[illegible] in Karwar 15 seers; district average 14¾ seers [illegible]. Small-pox, 2 deaths in Kumta; fever in Honavar and Haliyal talukas. Rice harvest continues on coast. Weather cloudy.
Rajkot ...	......	General health good; weather warm and cloudy; fever generally prevails; cholera in Dhoraji, Upteta, and Jetpur. *Bajri* 38 and *juari* 52 pounds per rupee.
		General Remarks.—Good rain throughout the Deccan and Southern Mahratta Country, excepting Kaladgi where it is much wanted; more rain also required in parts of Poona, Sholapur, Belgaum, and Dharwar. Crops slightly injured by excessive rain in parts of Nasik and Khandesh; *kharif* harvest and *rabi* sowing in progress in most districts. Fever in parts of 14 districts; cholera, small-pox, and cattle-disease in a few districts.
Bengal—(Oct. 22nd)		
Chittagong ...	*Nil*	Weather cooler at nights. Prospects of crops fair. Prices stationary. Sporadic cases of cholera and cattle-disease still continue; general health good.
Dacca ...	*Nil*	Crops generally fair, though injured somewhat by want of rain and subsidence of water; cutting of jute completed and that of sugarcane commenced; pulses being sown. Public health generally good.
24-Pergunnahs (Calcutta)	*Nil*	Prospects of *amun* paddy good; sugarcane doing well; ploughing and sowing of *rabi* crops going on. Prices of common rice stationary. Public health generally good; ordinary fever prevails in the interior. State of river normal.
Moorshedabad ...	*Nil*	Weather seasonable. *Dearah* lands must be resown owing to late rise in rivers. Heavy showers of rain, of which there is no prospect, much wanted for *amun*, condition being worst in thanas Sootee and Mirzapore. Ordinary rice selling at from 12 to 13½ seers per rupee.
Rajshahye ...	*Nil*	Weather very cloudy. Rain still wanted for *amun*. Few cases of cholera reported from Nowgong.
Burdwan ...	*Nil*	*Aus* being reaped; prospects bad if rain holds off. Prices slightly lower.
Rungpore ...	*Nil*	Weather fair. Prospects of crops not very favourable. Prices of food-grains rising. Malarious fever prevalent.
Bhagalpur ...	*Nil*	Prospects of crops good; *rabi* being sown. Prices of rice stationary.
Purneah ...	*Nil*	Prospects of crops fair, except in Motihari and Dhamduka; *rabi* cultivation progressing. Common rice 14 seers per rupee. Much fever. Ganges and Kusi falling.
Patna ...	*Nil*	Sowing of *rabi* crops in full progress; *cheena* looks well; rain wanted for standing paddy. Public health good, except in Bihar subdivision, where cholera still prevails.



Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bengal—*contd.*		
Durbhunga ...	*Nil*	Prospects of paddy only moderately fair and not the same everywhere; *rabi* sowing commenced. Prices slightly falling. Public health good.
Hazaribagh ...	*Nil*	Weather cloudy. Paddy on low lands doing well; rain much needed for paddy on high lands; lands for winter crops being prepared. Cases of small-pox in certain thanas, otherwise general health good.
Cuttack ...	·25	More rain expected. Prospects of *sarad* crops good. Sufficient rain fell last week in Kandrapara in parts of Sadr sub-division; rain wanted in Jajpore. Price of rice almost stationary. Public health good.
		General Remarks.—There has been slight rain in Cuttack, Puri, Backergunge, and Mymansingh. Rain very much wanted for paddy on high lands which has suffered. Paddy on low lands also requires rain. Prices of rice high, but almost stationary. Sowing of *rabi* crops in full progress. Sporadic cases of cholera still reported from nine districts, and fever beginning to be prevalent in several districts. Reports have come in at Nawada of beggars dying of starvation.
N. W. Provinces and Oudh—		
Benares (Oct. 21st)	No rain	The *kharif* crops are all good, including sugarcane and late rice, though *mung, bajra,* and *urd* have been slightly damaged by excessive rain, as already reported; sowing for the *rabi* crop is in progress. Health of men good; save a little fever in the city; no cattle-disease. Prices nearly stationary. Bazars well supplied
Gorakhpur („ 18th)	......	Fine weather; floods subsiding. *Rabi* sowings somewhat delayed by late rains. Cholera decreasing. Prices very slightly rising.
Fyzabad („ 21st)	No rain	Clear weather; west wind. *Rabi* sowing going on. Public health good; cattle-disease in part of district.
Lucknow („ 20th)	No rain	Rice and *kodo* nearaly cut; *rabi* crops are being sown. Health of people good, but slight cattle-disease reported in tahsil [illegible] Supplies sufficient. Prices stationary
Rae Bareli („ „)	......	Weather cloudy; wind [illegible] health good. Supplies abundant. [illegible] stationary.
Partabgarh („ 21st)	......	*Rabi* sowings in full swing; *bajra* being cut; prospects excellent General health good. Prices almost stationary.
Allahabad („ „)	No rain	*Rabi* sowings nearly completed. Health good. Prices falling.
Cawnpore („ 20th)	No rain	Weather clear. The cessation of the rains has improved the prospects of the *kharif* crops; *rabi* ploughing and sowings are in progress. Fever and [illegible] are prevalent; no cattle-disease.
Farukhabad („ 21st)	......	Weather fine; fever decreasing. Ploughing for *rabi* in progress.
Sitapur („ „)	......	Clear weather; westerly wind. Wheat sowings have commenced, and prospects are favourable. Cholera reported from pargana Misrik.
Bareilly („ 20th)	......	Condition of crops fair. Market stationary. Slight fever, but cholera disappearing; cattle healthy.
Moradabad („ 21st)	No rain	*Rabi* ploughing in progress; *bajra* and *dhan* being out. Fever less prevalent.
Kumaon („ 20th)	......	Weather fine. Harvest all reaped. General health good. Prices falling. Cattle-disease continues.
Agra („ 21st)	No rain	*Kharif* being cut; *rabi* ploughings and sowings going on. No cholera reported during week; but fever very prevalent. Prices steady.
Jhansi („ „)	......	Prospects fair; cultivation of land for the *rabi* in progress. Prices falling. Cholera stopped, but fever prevalent.
Aligarh („ „)	......	Weather fine, but rather warm. Slight cholera reported from Atrauli and Sikandrarao; fever prevalent throughout the district. *Kharif* crops considerably damaged by last rain. Prices show fall in *juari* and rise in gram, *bajra*, and *mung*.
Meerut („ 20th)	No rain	West wind; weather seasonable. Hopes entertained that damage by recent rains may turn out less than at first expected. Fever prevalent; cholera continues in Hapur. Supplies sufficient. Prices steady.
Saharanpore („ 21st)	......	Weather seasonable. Fever abating; cholera has ceased in Deobund. Rice and *makki* being reaped; wheat sowing begun. Little change in prices. Some cattle-disease in Nakur.
		General Remarks.—No rain is reported during the week. Agricultural prospects are good, though damage has, in some places, been caused by the recent heavy rains; ploughing and sowing operations for the *rabi* are in progress. The general health is good, and there is no marked change in prices.
Punjab—(Oct. 22nd)		
Delhi ...	......	Fever prevalent. *Rabi* sowings in progress. Prices of gram and *bajri* rising, and of other food-grains stationary.
Hissar ...	......	Fever prevalent; cattle-disease in Rohtak. *Rabi* sowings progressing. Prices stationary or rising.
Umballa ...	......	Fever still prevalent throughout the district. *Makki* harvested; rice and *juari* being harvested; yield expected to be above average; sowing of gram, barley, and mustard in progress. Prices stationary.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Punjab—*contd.*		
Jullundur ...	......	Ordinary autumnal fever prevalent. *Rabi* ploughings commenced; prospects of coming harvest favourable. Prices stationary.
Amritsar ...	......	Slight fever. Prices almost stationary.
Sialkot ...	......	Health good. *Kharif* harvest above average, except that of cotton and maize.
Ferozepore ...	......	Fever prevalent in the district. Probable yield of *kharif* crops good. Prices rising.
Lahore ...	......	Slight fever prevalent. Crop prospects fair. Prices stationary.
Rawalpindi ...	......	Fever in five and cattle-disease in one tahsil. Expected yield of *kharif* harvest above average in one, average in four, and below average in one tahsil. Prices falling.
Mooltan ...	......	Fever still prevailing in the district. Expected *kharif* yield average; *rabi* sowings comm enced. Prices steady.
Dera Ismail Khan ...	......	Health and prospects good. Coming yield above average.
Peshawar ...	......	Health and *kharif* prospects good. Prices falling.
		General Remarks.—No rain during the week. Fever very prevalent. *Kharif* prospects very favourable; *rabi* sowings commenced.
Central Provinces—(October 22nd)		
Nagpur ...	*Nil*	Weather cloudy and close. *Kharif* prospects fair; *rabi* sowings progressing. Fever prevalent. Prices steady.

HENRY F. BLANFORD,

Meteorological Reporter to the Government of India.

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The "Indian Law Reports," published under the authority of the Governor General in Council, appear in monthly parts, published as soon as possible after the first of each month, at Calcutta, Madras, Bombay, and Allahabad, and comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allah-

abad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat; the copies for subscribers registered by Messrs Thacker, Spink & Co, are distributed by that firm; and the Madras, Bombay and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad respectively.

On and from the 1st January, 1884, the terms of subscription and sale will be reduced as follow:—

Terms of subscription, payable annually in advance

	Without postage	With postage
For the Calcutta Series	R10 0	R12 8
" Madras "	" 5 0	" 6 0
" Bombay "	" 7 8	" 8 8
" Allahabad "	" 5 0	" 6 0
Complete set	" 20 0	" 22 8

A part of any series purchased separately, R1.

Persons desiring to subscribe for or purchase the Reports should apply to—

Messrs. Thacker, Spink & Co, Calcutta
" Thacker & Co, Bombay
" Higginbotham & Co, Madras
The Government Central Book Depôt, Bombay
" " Book Depôt, Allahabad.

Orders and subscriptions for 1884 should be at once remitted.

NOTICE.

Indian Law Reports.

Advertisements will be received for publication on the wrappers of the Indian Law Reports, Calcutta Series, by the Calcutta Central Press Company, "Limited," 5—1, Council House Street, at the following rates, payable in advance:—

	One page	*Half page*	*Quarter page.*
For one issue	R 15	R10	R 6
" three issues	" 40	" 25	" 14
" six "	" 70	" 40	" 25
" twelve "	" 110	" 70	" 15

At these rates the advertisers will have the option of changing their advertisements in each issue.

LEGISLATIVE DEPARTMENT.

NOTIFICATION.

Simla, the 31st October, 1884.

No. 19.—His Excellency the Viceroy and Governor General has been pleased to accept the resignation by the Hon'ble D. G. Barkley of his office of Additional Member of the Council of the Governor General for the purpose of making Laws and Regulations.

D. FITZPATRICK,
Secretary to the Government of India.

HOME DEPARTMENT.

NOTIFICATIONS.—JUDICIAL.

Simla, the 29th October 1884.

No. 1374.—In exercise of the power conferred by Section 5 of Act XIV of 1874 (The Scheduled Districts Act, 1874), the Governor of Bombay in Council is pleased, with the previous sanction of the Governor General in Council, to extend Section 40 of Act XIV of 1869 (The Bombay Civil Courts Act, 1869) to the Province of Sind.

EXAMINATIONS.

The 29th October 1884.

No. 43.—The following Regulations respecting the examination of candidates for the Civil Service of India, to be held in June 1885, are published for general information :—

EXAMINATIONS FOR THE CIVIL SERVICE OF INDIA.

Regulations for the Open Competition of June, 1885.

N.B.—The Regulations are liable to be altered in future years.

1. On the 2nd June, 1885, and following days, an Examination open to all qualified persons will be held in London (*a*). Not fewer than persons will be selected, if so many shall be found duly qualified; *viz.*, for the Lower Provinces of Bengal (including Assam); for the Upper Provinces of Bengal (including the Punjab and Oudh); for Burma; for Madras, and for Bombay (*b*).

2. No person will be deemed qualified who shall not satisfy the Civil Service Commissioners—

(i) That he is a natural-born subject of Her Majesty.

(ii) That his age will be above seventeen years and under nineteen years on the 1st January, 1885. [*N.B.—In the case of Natives of India this must be certified by the Government of India, or of the Presidency or Province in which the Candidate may have resided.*]

(iii) That he has no disease, constitutional affection, or bodily infirmity unfitting him, or likely to unfit him, for the Civil Service of India.

(iv) That he is of good moral character.

3. Should the evidence upon the above points be *primâ facie* satisfactory to the Civil Service Commissioners, the Candidate, on payment of the prescribed fee (*c*), will be admitted to the Examination. The Commissioners may, however, in their discretion, at any time prior to the grant of the Certificate of Qualification hereinafter referred to, institute such further inquiries as they may deem necessary; and if the result of such inquiries, in the case of any Candidate, should be unsatisfactory to them in any of the above respects, he will be ineligible for admission to the Civil Service of India; and if already selected will be removed from the position of a Probationer.

4. The Examination will take place only in the following branches of knowledge:—

	Marks.
English Composition	300
(*d*) History of England—including a period selected by the Candidate...	300
(*d*) English Literature—including books selected by the Candidate ...	300
Greek	600
Latin	800
French	500
German	500
Italian	400
(*e*) Mathematics (pure and mixed)	1,000
Natural Science; that is, the Elements of any two of the following Sciences, *viz.*:— Chemistry, 500; Electricity and Magnetism, 300; Experimental Laws of Heat and Light, 300; Mechanical Philosophy, with outlines of Astronomy, 300.	
Logic	300
Elements of Political Economy	300
(*f*) Sanskrit	500
(*f*) Arabic	500

Candidates are at liberty to name any or all of these branches of knowledge. No subjects are obligatory.

(*a*) An order for admission to the Examination will be sent to each Candidate on the 19th of May.
(*b*) The numbers will be announced hereafter.
(*c*) The fee (£5) will be payable by means of a special stamp according to instructions which will be communicated to Candidates.
(*d*) A considerable portion of the marks for English History and Literature will be allotted to the work selected by the Candidate. (See notice on p. 4.) In awarding marks for this, regard will be had partly to the extent and importance of the periods or books selected, but chiefly to the thoroughness with which they have been studied.
(*e*) The Examination will range from Arithmetic, Algebra, and Elementary Geometry, up to the elements of the differential and integral calculus, including the lower portions of applied Mathematics.
(*f*) The standard of marking in Sanskrit and Arabic will be determined with reference to a high degree of proficiency, such as may be expected to be reached by a Native of good education.

5. The merit of the persons examined will be estimated by marks; and the number set opposite to each branch in the preceding regulation denotes the greatest number of marks that can be obtained in respect of it.

6. The marks assigned to Candidates in each branch will be subject to such deduction as the Civil Service Commissioners may deem necessary (*g*), in order to secure that "a Candidate be allowed no credit at all for taking up a subject in which he is a mere smatterer."

7. The Examination will be conducted on paper and *vivâ voce*, as may be deemed necessary.

8. The marks obtained by each Candidate, in respect of each of the subjects in which he shall have been examined, will be added up, and the names of the several Candidates who shall have obtained, after the deduction abovementioned, a greater aggregate number of marks than any of the remaining Candidates, will be set forth in order of merit, and such Candidates shall be deemed to be Selected Candidates for the Civil Service of India, provided they appear to be in other respects duly qualified. Should any of the Selected Candidates become disqualified, the Secretary of State for India will determine whether the vacancy thus created shall be filled up or not. In the former case, the Candidate next in order of merit, and in other respects duly qualified, shall be deemed to be a Selected Candidate. A Selected Candidate declining to accept the appointment which may be offered to him will be disqualified for any subsequent competition.

9. Selected Candidates, before proceeding to India, will be on probation for two years, during which time they will be examined periodically, with a view of testing their progress in the following subjects (*h*) :—

	Marks.
1. Law	1,250
2. Classical Languages of India—	
Sanskrit	500
Arabic	400
Persian	400
3. Vernacular Languages of India (each)	400
4. The History and Geography of India	350
5. Political Economy	350

In these Examinations, as in the open competition, the merit of the Candidates examined will be estimated by marks, and the number set opposite to each subject denotes the greatest number of marks that can be obtained in respect of it at any one Examination. The Examination will be conducted on paper and *vivâ voce*, as may be deemed necessary. The last of these Examinations will be held at the close of the second year of probation, and will be called the "Final Examination," at which it will be decided whether a Selected Candidate is qualified for the Civil Service of India. At this Examination Candidates will be permitted to take up any one of the following branches of Natural Science, *viz.*,—Agricultural Chemistry, Botany, Geology, or Zoology, for which 350 marks will be allowed.

10. Candidates will be tested during their probation as to their ability to perform journeys on horseback; and no Candidate will be deemed qualified for the Civil Service of India who fails to satisfy the Civil Service Commissioners of his competence in this respect.

11. Any Candidate who, at any of the periodical Examinations, shall appear to have wilfully neglected his studies, or to be physically incapacitated for pursuing the prescribed course of training, will be liable to have his name removed from the list of Selected Candidates.

12. The Selected Candidates who, at the Final Examination, shall be found to have a competent knowledge of the subjects specified in Regulation 9, and who shall have satisfied the Civil Service Commissioners of their eligibility in respect of nationality, age, health, character, and ability to ride, shall be certified by the said Commissioners to be entitled to be appointed to the Civil Service of India, provided they shall comply with the regulations in force at the time for that Service.

(*g*) Marks assigned in English Composition and Mathematics will be subject to no deduction.

(*h*) Full instructions as to the course of study to be pursued will be issued to the successful Candidates as soon as possible after the result of the Open Competition is declared.

13. Persons desirous to be admitted as Candidates must apply on forms, which may be obtained from "The Secretary, Civil Service Commission, London, S.W.," at any time after the 1st December, 1884. The forms must be returned so as to be received at the office of the Civil Service Commissioners on or before 31st March, 1885 (*i*).

The Civil Service Commissioners are authorized by the Secretary of State for India in Council to make the following announcements:—

(1) *Selected Candidates will be permitted to choose, according to the order in which they stand in the list resulting from the Open Competition, so long as a choice remains, the Presidency (and in Bengal the Division of the Presidency) to which they shall be appointed; but this choice will be subject to a different arrangement, should the Secretary of State, or the Government of India, deem it necessary* (*k*).

(2) *The Probationers, having passed the necessary Examinations, will be required to report their arrival in India within such period after the grant of their Certificate of Qualification as the Secretary of State may in each case direct.*

(3) *The seniority in the Civil Service of India of the Selected Candidates shall be determined according to the order in which they stand on the list resulting from the Final Examination.*

(4) *An allowance amounting to £300 will be given to all Candidates who pass their probation at one of the Universities or Colleges which have been approved by the Secretary of State, viz., the Universities of Oxford, Cambridge, Dublin, Glasgow, Edinburgh, St. Andrew's, and Aberdeen; University College, London; and King's College, London; provided such Candidates shall have passed the required Examinations to the satisfaction of the Civil Service Commissioners, and shall have complied with such rules as may be laid down for the guidance of Selected Candidates.*

(5) *Selected Candidates desiring to remain in this country an additional year after the completion of their two years' probation for the purpose of taking a degree at one of the Universities abovementioned should apply to the Secretary of State for India for permission to do so. Besides the allowances abovementioned, a bonus of £150 will, as a temporary and experimental measure, be paid to any Candidate who, having obtained permission to remain an additional year, passes an examination qualifying for a degree in Honors at Oxford or Cambridge. This privilege will be hereafter extended to any other of the Universities above referred to, at which an academical distinction is obtainable which, in the opinion of the Secretary of State, corresponds to a degree in Honors at Oxford or Cambridge and to obtain which the additional year's residence in this country is necessary.*

(6) *All Selected Candidates will be required, after having passed the first periodical Examination, and before receiving the first instalment of their allowance, to attend at the India Office for the purpose of entering into an agreement binding themselves, amongst other things, to refund in certain cases the amount of their allowance in the event of their failing to proceed to India. A surety will be required.*

(7) *After passing the Final Examination, each Candidate will be required to attend again at the India Office, with the view of entering into covenants by which, amongst other things, they will bind themselves to agree to such Regulations for the provision of pensions for their families as may be approved by the Secretary of State for India in Council. The stamps payable on these covenants amount to £1.*

(8) *Candidates rejected at the Final Examination of 1887 will in no case be allowed to present themselves for re-examination.*

(*i*) These forms should be accompanied by evidence on the points mentioned in Regulation 2 and by a list of the subjects in which the Candidate desires to be examined. Evidence of health and character must bear date not earlier than 1st March, 1885. Applications for leave to alter or add to the list of subjects named will not be entertained unless received on or before the 4th of May.

(*k*) This choice must be exercised immediately after the result of the Open Competition is announced, on such day as may be fixed by the Civil Service Commissioners.

Notice respecting the Examination in the History of England and English Literature.

History of England.

For the guidance of Candidates who may have a difficulty in making their selections for special study under this head, the following list is given as indicating the character and amount of reading that would be regarded as satisfactory.

Any one of the following periods, to be studied generally in "Bright's History," and particularly in portions selected by the Candidate, of the Text books named:—

1. **Henry II. to Edward III., A.D. 1154-1377.**—Stubb's Select Charters; Stubb's Constitutional History of England.

2. **The Tudors, A.D. 1485-1603.**—Hallam's Constitutional History of England; Froude's History of England.

3. **The Stuarts, A.D. 1603-1714.**—Hallam's Constitutional History of England; Macaulay's History of England.

4. **A.D. 1714-1805.**—Lord Stanhope's History; Sir T. E. May's Constitutional History; *either* Massey's Reign of George III. *or* Lord Stanhope's Life of Pitt.

English Literature.

Under this head there will be (besides the general paper) a special paper on the following books:—

1. **Chaucer.**—Prologue and Clerk's Tale.
2. **Shakespeare.**—As You Like It, Antony and Cleopatra.
3. **More.**—Utopia.
4. **Byron.**—Childe Harold.
5. **Burke.**—Thoughts on Present Discontents, Reflections on the French Revolution.

The oral examination in English Literature will have reference chiefly to such works, *not included in the foregoing list*, as the Candidate may offer for the purpose.

EVIDENCE OF AGE TO BE REQUIRED FROM CANDIDATES FOR THE CIVIL SERVICE OF INDIA.

I.—Every candidate born in England or Wales should produce a Certificate from the Registrar-General of Births, Marriages, and Deaths, or from one of his provincial Officers. This Certificate may be obtained at Somerset House, or from the Superintendent Registrar of the district in which the birth took place.

II.—A Candidate who is a Native of India must have his age certified by the Government of India, or of the Presidency or Province in which he may have resided.

III.—Every other Candidate *not producing the Certificate* mentioned in Clause I must prove his age by Statutory Declaration, and should also, if possible, produce a record of Birth or Baptism from some official Register; under which term may be included the Parochial Registers of Baptisms, the non-Parochial Registers of Baptisms and Births deposited at Somerset House under Acts of Parliament, the Register kept at the India Office of persons born in India, &c., &c. This Regulation applies—

1. To all Candidates not born in England or Wales.
2. To Candidates who, though born in England or Wales, cannot produce the Registrar-General's Certificate.

The Civil Service Commissioners reserve to themselves the right of deciding in each case upon the sufficiency of the evidence produced, but they subjoin the following general rules for the guidance of Candidates:—

(*a*) The Declaration should specify precisely the date and place of birth, and should, if possible, be made by the father or mother of the Candidate. If made by any other person, it should state the circumstances which enabled the Declarant to speak to the fact. If an entry in a Bible or other family record be referred to, the Bible or other record must be produced at the time of making the Declaration, and must be mentioned in the Declaration as having been so produced.

(*b*) If the Candidate was born in England or Wales, the Declaration must contain a statement that after due inquiry no entry has been found in the books of the Registrar-General; or a separate Declaration must be made to that effect.

(*c*) If no extract from any Register is produced, the Declaration must contain a statement that after due inquiry no such Record is believed to exist; or a separate Declaration must be made to that effect.

(*d*) Statutory Declarations must be exactly in the form prescribed by the Act of 5 and 6 William IV., c. 62. A printed form, if required, will be supplied on application to the Civil Service Commissioners.

N.B.—Clergymen who are not Magistrates are not qualified to take Declarations.

CIVIL SERVICE OF INDIA.

FORM OF APPLICATION; TO BE FILLED UP BY CANDIDATES.

*** *This form must be sent so as to be received at the Office of the Civil Service Commission on or before the 31st March, 1885.*

*Date*____________________

SIR,

BEING desirous to offer myself as a Candidate at the Examination for the Civil Service of India, which is appointed to commence on the 2nd of June, 1885, I transmit herewith, as required by the Regulations—

(1) A certificate of my birth, showing that I was born on the day of 18 , and that therefore my age was above 17 years and under 19 years on the 1st of January, 1885.

(2) A certificate signed by

of my having "no disease, constitutional affection, or bodily infirmity unfitting me, or likely to unfit me, for the Civil Service of India."

(3) Proof of my moral character, *viz.*:—

(1) A testimonial from

(2) A testimonial from

(4) A statement of the branches of knowledge in which I desire to be examined.

I have also to state, with reference to Section 2, Clause (i) of the Regulations, that I am a natural-born subject of Her Majesty.

I am, SIR,

Your obedient Servant,

*Name in full*____________________

*Address*____________________

____

To the Secretary,
Civil Service Commission.

(1) If a General Register Office certificate cannot be obtained, the instructions printed on the other side will show what evidence should be supplied. If evidence is already in the hands of the Commissioners, strike out "A certificate of my birth," and insert "Evidence is already in the possession of the Commissioners."

(2) The terms indicated by the marks of quotation must appear in the certificate, which must be given after personal examination, and bear date not earlier than 1st March, 1885.

(3) Two testimonials must be sent bearing date not earlier than 1st March, 1885. One of them should be given by an intimate acquaintance (not a relative) of not less than three or four years' standing; the other, if the candidate has recently left school, should be given by his late schoolmaster, or, if he has had employment of any kind, by his late employer. If the candidate has been at any University, he should send a certificate of good conduct from his College tutor.

(4) This should be given on the form herewith. If the History of England or English Literature be named, the schedule should also be filled up.

CIVIL SERVICE OF INDIA.

PART V.

Bills introduced into the Council of the Governor General for making Laws and Regulations, or published under Rule 22.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

[First publication.]

The following Bill was introduced into the Council of the Governor General of India for the purpose of making Laws and Regulations on the 23rd October, 1884:—

No. 15 of 1884.

A Bill to amend the Oudh Estates Act, 1869.

WHEREAS it is expedient to amend the Oudh Estates Act, 1869; It is hereby enacted as follows:—

Amendment of definition of "registered" in section 2 of Act I of 1869.

1. Subject to the saving in section 2 of this Act, for the definition of "registered" in section 2 of the said Act, there shall be deemed to have been substituted from the date of the passing of the said Act the following definition, namely:—

"Registered."

"'Registered' means—

"(*a*) in the case of a will, registered according to the law for the time being in force relating to the registration of assurances, or deposited with a Registrar according to the law for the time being in force relating to the deposit of wills; and

"(*b*) in the case of any other instrument, registered according to the law for the time being in force relating to the registration of assurances."

Saving of certain wills.

2. Nothing in section 1 shall affect any will—

(*a*) declared by a judicial decision pronounced before the twenty-third day of October, 1884, to be invalid on the ground that it was not registered in accordance with the provisions of the said Act; or

(*b*) of which the validity is being questioned on that ground in a suit commenced before the twenty-third day of October, 1884.

STATEMENT OF OBJECTS AND REASONS.

IT has recently been held by the Privy Council that a will that was deposited under the provisions of Part IX of Act VIII of 1871 was not "registered" within the meaning of section 13 and the definition in section 2 of the Oudh Estates Act 1869, which declares that "'registered' means registered according to the provisions of the rules relating to the registration of assurances for the time being in force in Oudh."

2. The consequences of this ruling, which affects also section 20 of the Act, where a similar provision occurs, are most important, since the procedure that is now pronounced to be inadequate to satisfy the requirements of the law has been constantly acted on. It is stated that the taluqdárs never suspected that the validity of wills formally deposited in the registration offices under sealed covers could be called in question. Moreover, it scarcely could have been intended that taluqdárs should be required to register their wills open, and it seems obvious that they cannot in the future be required to do so, which they will have to do under the decision of the Privy Council if the law remains unaltered.

3. Under these circumstances, it is considered advisable to amend Act I of 1869 so as to legalize the existing practice. This is done by the present Bill, and as the omission to fulfil the requirements of the law which has taken place in the past would seem to have been unintentional and due to a prevalent and hitherto undisputed misapprehension of its meaning, retrospective effect has been given to the amendment which covers all wills hitherto or at present only deposited and not registered, except wills already declared invalid by judicial decision or being questioned in a suit commenced before the date of the introduction of the Bill.

J. W. QUINTON.

The 23rd October, 1884.

D. FITZPATRICK,
Secy. to the Govt. of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

[First publication.]

The following Bill was introduced into the Council of the Governor General of India for the purpose of making Laws and Regulations on the 23rd October, 1884 :—

No. 16 OF 1884.

A Bill to amend Act XXII of 1881.

1. WHEREAS it is expedient to amend the Excise Act, 1881; It is hereby enacted as follows :—

In the said Act, after section 34, the following section shall be inserted :—

Power to invest police-officers with powers of excise-officers.

"34A. The Local Government may, from time to time, invest any police-officers of or above the grade of head constable, either by name or in virtue of their offices, with the powers conferred on excise-officers by sections 27, 28 and 29 of this Act; and every officer so invested shall, for all purposes connected with the exercise of these powers, be deemed to be an excise-officer within the meaning of this Act."

STATEMENT OF OBJECTS AND REASONS.

SECTION 46 of Act X, 1871, corresponding to section 59 of Act XXI of 1856, enabled Local Governments to confer on certain police-officers powers of searching for and seizing spirituous liquors and intoxicating drugs and arresting persons found in possession of them. These powers have been conferred and exercised up to the present time in the North-Western Provinces and Oudh, and are essential to the efficiency of the excise-administration, as no separate establishments for the prevention of smuggling are maintained in those provinces, and the land-revenue officials have little leisure for excise-duties.

2. The excise law came under revision in 1881 and was re-enacted in a somewhat simpler form by Act XXII of that year.

Section 24 of that Act gives Collectors power to appoint persons by name or by virtue of their office to be officers for the collection of the excise revenue, but as police-officers are not specially mentioned among the persons to be so appointed, and as section 20 of Act V, 1861, precludes the exercise by them of any such authority, it has been held that they cannot be appointed to discharge excise functions, and that the power of so employing them conferred upon Local Governments by Act X, 1871, has been taken away by the Act of 1881.

3. This seems to have escaped notice when Act XXII of 1881 was passed. In the Statement of Objects and Reasons, in the Report of the Select Committee and in the speeches of the Hon'ble Member in charge of the Bill, nothing whatever is said of depriving the Local Governments of the power hitherto enjoyed by them of employing police-officers on excise-duties. Mr. Whitley Stokes, accounting for the omissions in the later Act, stated that they were provided for by other enactments or were fit subjects for executive orders. The omission now brought to light does not fall under either of these categories, and it is impossible to suppose that a power held to be necessary for the excise-administration was taken away from Local Governments by a side wind.

4. The Government of the North-Western Provinces and Oudh urge that the omission should now be rectified, and with this object the present Bill is introduced.

The 23rd October, 1884.

J. W. QUINTON.

D. FITZPATRICK,
Secy. to the Govt. of India.

GOVERNMENT OF INDIA.

HOME DEPARTMENT.

MEDICAL ATTENDANCE ON, AND SUPPLY OF MEDICINES TO, GOVERNMENT CLERKS AND THEIR FAMILIES.

No. 14/447-51.

Extract from the Proceedings of the Government of India, in the Home Department (Medical),— dated Simla, 25th October 1884.

Read the undermentioned papers :—

Home Department Circular letter to Local Governments and others, Nos. 3986-3996, dated the 31st August 1869.

Home Department letter to the Government of the Punjab, No. 639, dated 12th October 1875.

Home Department letter to the Surgeon-General, Indian Medical Department, No. 425, dated 27th July 1876.

Home Department Resolution, Nos. 13—632-639, dated 18th December 1879.

Military Department letter to the Surgeon-General, Her Majesty's Forces, No. 689S.C., dated 23rd August 1883.

Military Department letter to the Inspector General of Military Works, No. 88C., dated 25th January 1884.

Letter from Director General of Ordnance to the Military Department, No. 159E., dated 14th April 1884.

RESOLUTION.

The papers read above relate to medical attendance on, and supply of medicines to, Government clerks and their families. Doubts having arisen as to the application of these orders in the case of certain offices, the Governor General in Council is pleased to prescribe the following rules in supersession of all previous orders on the subject, with effect from the 1st January 1885 :—

(1) All clerks of all Government offices are entitled to gratuitous medical attendance and medicines for themselves.

(2) All clerks of Army Head Quarters offices are entitled to similar privileges for themselves and their families.

(3) Subject to the above rules, clerks drawing Rs. 250 per mensem and upwards are entitled to the services of the Civil Surgeon, and those drawing less than that amount to the services of the Assistant Surgeon or medical subordinate provided for the purpose, it being understood that, in conformity with paragraph 4 of circular letter, dated 31st August 1869, above quoted, the attendance of the Civil Surgeon should be given in all cases of emergency or of great danger or difficulty, when applied for by the subordinate medical attendant.

ORDER.—Ordered, that a copy of this Resolution be forwarded to the Local Governments and Administrations noted in the margin for information and guidance. In places where there is no druggist's shop, medicines may continue to be supplied from the Government Stores;

Bengal.	British Burma.
North-Western Provinces and Oudh.	Assam.
Punjab.	Coorg.
Central Provinces.	Hyderabad.

that a copy be forwarded to the Governments of Madras and Bombay for information;

and that a copy be forwarded to all the other Departments of the Government of India and to the Surgeon-General with the Government of India for information.

Also that the Resolution be published in the Supplement to the *Gazette of India* for general information.

A. MACKENZIE,

Secretary to the Government of India.

A

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House, Simla, on Thursday, the 23rd October, 1884.

PRESENT:

His Excellency the Viceroy and Governor General of India, K.G., G.M.S.I., G.M.I.E., *presiding*.
His Honour the Lieutenant-Governor of the Panjáb, K.C.S.I., C.I.E.
His Excellency the Commander-in-Chief, G.C.B., C.I.E.
The Hon'ble J. Gibbs, C.S.I., C.I.E.
Lieutenant-General the Hon'ble T. F. Wilson, C.B., C.I.E.
The Hon'ble C. P. Ilbert, C.I.E.
The Hon'ble Sir S. C. Bayley, K.C.S.I., C.I.E.
The Hon'ble T. C. Hope, C.S.I., C.I.E.
The Hon'ble Sir A. Colvin, K.C.M.G., C.I.E.
The Hon'ble J. W. Quinton.
The Hon'ble D. G. Barkley.
The Hon'ble H. J. Reynolds.

PÁNCH MAHÁLS LAWS BILL.

The Hon'ble MR. ILBERT moved for leave to introduce a Bill to amend the law in force in the Pánch Mah). He said:—"This Bill has been prepared at the request of the Government of Bombay. The territory known as the Pánch Mahál is at present one of the scheduled districts in that Presidency, and the object of this measure is to regulationize it and to assimilate the law in force in it to that in the neighbouring Kaira district."

The Motion was put and agreed to.

OUDH ESTATES ACT, 1869, AMENDMENT BILL.

The Hon'ble MR. QUINTON moved for leave to introduce a Bill to amend the Oudh Estates Act, I of 1869. He said:—

"This legislation is undertaken at the instance of the Government of the North-Western Provinces and Oudh, and of the associated body of the Oudh taluqdárs known as the British Indian Association.

"Act I of 1869 defines the rights of taluqdárs and others in certain estates in Oudh, and regulates the succession thereto. Sections 13 and 20 empower taluqdárs to make bequests of their estates under certain circumstances by wills executed not less than three months before the death of the testator, and registered within one month from the date of their execution. In the Preliminary chapter, 'registered' is defined to mean registered according to the provisions of the rules relating to the registration of assurances for the time being in force in Oudh.

"The practice which has since obtained among Oudh taluqdárs making a will under the Estates Act is to deposit the will in a sealed cover with the registrar; and until lately it was believed that this was all that the law required.

"In 1882, however, a case came in appeal before the Court of the Judicial Commissioner, in which—although the point was not put in issue in the Court of first instance—the Judicial Commissioner held that a will so deposited was invalid, so far as it affected the landed estate, because it had not been registered.

"This judgment was appealed to the Privy Council. Their Lordships ruled that the Judicial Commissioner was right; that under the rules of Act VIII of 1871—the Registration Act applicable—deposit was one thing and registration another; and that a will deposited under the provisions of that Act relating to the deposit of wills was not thereby registered within the meaning of the Oudh Estates Act.

"The Government of the North-Western Provinces and Oudh now urge that the consequences of this ruling are most important, since the procedure that it pronounces to be inadequate has been constantly acted on; and the President of the British Indian Association, in a memorial to the Lieutenant-Governor and Chief Commissioner, asserts that the taluqdárs were never led either by the civil officers or the legal advisers whom they consulted in such matters to suspect that the validity of wills formally deposited in the registration offices under sealed covers could be called in question.

"It is obvious that taluqdárs cannot be expected in future to register their wills open. If this be insisted on, sections 13 and 20 would probably remain a dead-letter.

"Under these circumstances, it is considered advisable to amend Act 1 of 1869 so as to legalize the existing practice This is done by the present Bill, and, as the omission to fulfil the requirements of the law which has taken place in the past would seem to have been unintentional and due to a prevalent and hitherto undisputed misapprehension of its meaning, retrospective effect has been given to the amendment, which covers all wills hitherto or at present only deposited and not registered, except wills already declared invalid by judicial decision or being questioned in a suit commenced before the date of the introduction of the Bill."

The Motion was put and agreed to.

The Hon'ble MR. QUINTON also introduced the Bill.

The Hon'ble MR. QUINTON also moved that the Bill and Statement of Objects and Reasons be published in the *North-Western Provinces and Oudh Government Gazette* in English and in such other languages as the Local Government thinks fit.

The Motion was put and agreed to.

EXCISE ACT, 1881, AMENDMENT BILL.

The Hon'ble MR. QUINTON also moved for leave to introduce a Bill to amend the Excise Act, 1881. He said:—

"The Act is itself an Act to amend the law relating to the excise-revenue in Northern India, British Burma and Coorg. The few remarks called for at this stage of the Bill have reference, I would explain, to the North-Western Provinces and Oudh, but, should the Motion be accepted, the other Local Governments to whose territories the Bill is applicable will be given an opportunity of expressing their opinions upon it before the Council is asked to pass it into law.

"It has been prepared, at the instance of the Government of the North-Western Provinces and Oudh, in order to legalize a practice, which has prevailed in those Provinces since 1856, of employing officers of Police above a certain rank as Excise-officers for the prevention of smuggling. With the other branch of the excise-administration, namely, the collection of revenue, Police-officers have no concern whatever.

"Act X of 1871, which consolidated and amended the excise law in Northern India, British Burma and Coorg by its 46th section, corresponding to section 59 of Act XXI of 1856, enabled the Local Governments to confer on officers

of the Police Department powers with respect to the seizure of, and search for, spirituous and fermented liquors and intoxicating drugs of every description, and the arrest of persons found in possession thereof. This power has been fully exercised up to the present time, and on it the Government has to rely for the prevention of smuggling, as no separate establishments are entertained for that purpose. Formerly a functionary styled the Abkárí Dárogha was maintained in each district, but he was found to be more ornamental than useful, and after mature deliberation his office was abolished.

"No doubt as to the legality of the practice arose till a short time ago, when a decision in a criminal case by the Judge of Agra led the Government to look closer into the question, and it then appeared that under the law now in force it was open to argument whether Police-officers could be employed on excise-duties.

"That law, Act XXII of 1881, purported, as I have said, to amend the law relating to the excise-revenue in Northern India, British Burma and Coorg; and its sixth chapter, which treats of officers and their powers, has no provision corresponding to section 46 of Act X of 1871 and section 59 of Act XXI of 1856, to which I have already referred. Section 2 of the Act, it is true, saves all powers conferred under the Excise Act of 1871, but it has been held that this must be read with section 20 of the Police Act, which prohibits the exercise of any authority by Police-officers other than that therein specified, and that nothing short of an Act of the legislature can now legalize their employment as Excise-officers.

"It may be asked, how it comes that so important a point was overlooked for so long by the Government of the North-Western Provinces and Oudh? The answer is that such an effect of Act XXII of 1881 was neither intended nor foreseen when that Act was passed.

"The Statement of Objects and Reasons makes no mention of any alteration of the law as regards the excise-functions of Police-officers; it is not alluded to in the speeches of the Hon'ble Member in charge of the Bill—the then Legal Member; and the Report of the Select Committee is altogether silent upon it. Mr. Whitley Stokes did not include it in the substantial alterations made by the Bill, and appears to have thought that it was a matter to be regulated by executive order, and that any legislative provision on the subject was superfluous. As occasionally happens, an effort to attain brevity brought about obscurity. It is impossible to suppose that a power on which Local Governments mainly relied for preventing injury to the excise-revenue by smuggling was thus taken away by a side wind, or that, if this result of the Bill had been contemplated, it would have been allowed to pass without comment from the Governments affected by it while the Bill was being carried through Council.

"The Bill on the table merely restores to Local Governments the power which they possessed under the previous law, which some of them at least have been exercising up to the present time in the belief that they had never been deprived of it."

The Motion was put and agreed to.

The Hon'ble Mr. Quinton also introduced the Bill.

The Hon'ble Mr. Quinton also moved that the Bill and Statement of Objects and Reasons be published in the *North-Western Provinces and Oudh Government Gazette*, the *Panjáb Government Gazette*, and the *Central Provinces* and *British Burma Gazettes* in English and in such other languages as the Local Governments think fit.

His Excellency the President:—"I should like to ask one question with regard to the Bill. I understand from the remarks of Mr. Quinton that the Bill has been introduced at the request of the Government of the North-Western Provinces and Oudh. I suppose that it will not be extended to the Panjáb, the Central Provinces or British Burma unless the Governments of those Provinces desire that it should be so extended?"

The Hon'ble Mr. Quinton:—"The draft Bill does not provide for that."

His Excellency THE PRESIDENT:—"You mean that before the Bill passes out of Select Committee and comes on finally in Council the views of those Governments will be received?"

The Hon'ble MR. QUINTON:—"Yes, my Lord; certainly."

The Motion was put and agreed to.

INDIAN RAILWAYS BILL.

The Hon'ble MR. HOPE moved for leave to introduce a Bill to amend and consolidate the law regulating the construction and working of Railways. He said:—

"We have at present, as the Council are aware, a certain amount of law relating to railways. This law, however, may be said to be not only of a very scant and meagre nature, but also to relate almost exclusively to the actual conditions of the working of railways as between the Railway Companies and the public; that is to say, it chiefly relates, speaking very broadly, to various acts on the part of one or the other, all of which conduce more or less to the satisfactory carrying on of the railway business from day to day. Besides this, however, there are many other branches of the question which our law—I can only speak broadly in a sketch of this kind—does not touch at all. I may illustrate these branches by mentioning some of them, namely, the nature of the numerous obligations of a Company in constructing a line and also in working it, in order to ensure its safety and convenience; to secure due accommodation for landholders on both sides of the line and protection of their rights; to enforce proper enquiries into the various questions, or the accidents, which may arise; to regulate rates and fares so that the public shall not be at the mercy of the Companies as powerful monopolists; to provide for the systematic keeping of accounts in the interests both of the Government, which, I am sorry to say, still very often has to guarantee the Railway Companies, and also of the shareholders themselves. All these and various other matters, of more or less importance, have hitherto been provided for in the best way possible in the contracts between the Government and the Companies, or by departmental rules and regulations. As regards State Railways, however, such matters have been entirely within the discretion of the Executive Government. These contracts have been found in the course of years to be often incomplete or obscure; each new railway which has been established or guaranteed has got for itself a separate contract, the result being that there is a very considerable amount of difference in each regarding matters of the same nature, which ought to be dealt with uniformly in all cases. Besides this, we have been urged by several of the large Railway Administrations to introduce an Arbitration Act for the settlement of differences which occasionally arise between them, owing principally to the large increase in the interchange of railway traffic in India, which is likely still to develop further with the growth of our railway systems. Experience has also shown the necessity for a compulsory reference to arbitration in certain cases, where the continuance of disputes is likely to be prejudicial to the interests of the public.

"This is, I think, a general description of the Bill which I am moving for leave to introduce, sufficient to satisfy the Council that some legislation is desirable.

"As regards the further steps to be taken, I have only to say that it is not contemplated to introduce the Bill at the present time. The rough draft of the Bill has been prepared in the Public Works Department, and all provisions in the existing contracts and in Indian Acts or English Statutes or Bills which appeared suitable have been embodied in it. What is contemplated is that this draft shall be referred to the various Local Governments, Chambers of Commerce and Railway Administrations throughout India before its introduction into the Council. I hope to be able, if the Council agree to the Motion now before them, to introduce a considerably amended draft in the course of the current session at Calcutta, after we have received and considered the various opinions which are to be called for on the measure in the manner I have indicated."

The HON'BLE MR. ILBERT said:—

"My hon'ble friend Mr. Hope has explained that the draft which he proposes to circulate for criticism is merely a rough draft prepared by the Public Works Department.

"It has not yet been considered in the Legislative Department, and it will have to be very carefully scrutinised in that Department before it is introduced into this Council. I have read the draft somewhat hastily, and have made some suggestions as to the form and arrangement of the clauses; but the Bill raises a good many difficult questions, some of which I should like to have a further opportunity of considering, and which the Council will be in a better position to consider after the draft has received that external criticism to which Mr. Hope has explained that he proposes to submit it."

His Excellency THE PRESIDENT said:—

"The remarks that have fallen from my hon'ble friends, Mr. Hope and Mr. Ilbert, will show that in giving my assent to the introduction of this Bill I am in no way committed to any provisions which it may contain, and which, as Mr Hope has explained, are at present only in rough draft, and therefore not in a condition to be submitted to me. I entirely agree that it is desirable to consolidate and amend the law relating to railways in this country in various ways; and I am very glad to find that Mr. Hope proposes to consult public bodies and persons interested in railways, either as shareholders, managers of companies, or on behalf of the public, before the Bill is introduced into this Council. It will, of course, before its introduction, be submitted to my successor, Lord Dufferin, who will by that time have assumed the office of Viceroy; and for myself I have only to say that I agree that a Bill for consolidating and amending the law regarding railways in India is undoubtedly needed."

The Motion was put and agreed to.

The Council adjourned *sine die.*

Mr. Whitley Stokes did not [illegible] D. FITZPATRICK,

SIMLA; The 30th October, 1884. *Secretary to the Government of India, Legislative Department.*

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 29th OCTOBER 1884.

GENERAL REMARKS.—The north-east monsoon continues to be favourable in Madras, and good rain has again fallen in several districts. In Bellary and Anantapur prospects have now considerably improved, and prices are falling. In Mysore the rainfall was again general, crops are in fair condition, and the prospects of the season are favourable. In Coorg agricultural prospects are good. Good rain fell throughout the Deccan and Southern Mahratta Country during the week under report; standing crops have been much benefited, and general prospects greatly improved. In a few districts the crops have been slightly damaged by excessive rain. In the Central India and Rajputana States and in the Berars and the Nizam's Territories agricultural prospects continue very good. Slight rain fell in a few districts of the Punjab, and the prospects of the harvest are very favourable. Except in the Saugor district, there was no rain in the Central Provinces, where agricultural prospects are generally good. In the North-Western Provinces and Oudh rain fell in a few districts, and prospects are uniformly good. In Bengal rain has been almost general, but was insufficient in many districts. In Tipperah more rain is still much wanted. Rain fell in the Assam districts, and the prospects of the *rabi* crop are generally good. In British Burma the condition of the crops is generally very favourable.

According to the last report of the Meteorological Department, dated 30th instant, rain has fallen generally in South Madras, and showers are reported from Rawalpindi, Rajahmundry, and Moulmein.

There is no change to record in agricultural operations. In Bombay, the Punjab, in places in the North-Western Provinces and Oudh, and in Hyderabad the *kharif* is being harvested, while ploughing and sowing for the *rabi* are generally in active progress throughout the country.

Fever is very prevalent in the Punjab and the Central Provinces, elsewhere the public health is good.

Prices are falling in Bellary and Anantapur in the Madras Presidency; in the Punjab they are fluctuating, and elsewhere they are generally stationary.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—(Oct. 29th)		
Bellary ...	3·06 (average)	Standing crops much benefited. More rain wanted in 4 taluks. 4 deaths from cholera in Alur taluk.
Kurnool ...	2·59 (average)	Standing crops good; sowing of white *cholum* continues; harvest early cereals, outturn below half. Small-pox in 2 taluks.
Ganjam ...	3·1 (average)	Small-pox and cholera prevalent.
Kistna ...	3·83 (average)	Standing crops generally good; harvest dry crops, outturn below average. River 2·50 feet over anicut. Small-pox, fever, and cattle-disease in places, 5 deaths from cholera in Narasaraopet taluk.
Chingleput (Madras) ...	6·6 (average)	Standing crops good: harvest paddy, outturn half. Small-pox in 3 taluks; 26 deaths from cholera.
Coimbatore ...	1·14 (average)	Standing crops good; agricultural operations progressing; harvest paddy and *ragi*, outturn nearly average.
Tanjore ...	2·76 (average)	Standing crops generally good; harvest wet and dry crops, outturn below average. 40 deaths from cholera.
Madura ...	1·62 (average)	Prospects considerably improved. 127 deaths from cholera.
Malabar ...	·94 (average)	Second crop cultivation progressing. Small-pox and cattle-disease prevalent; slight fever in two taluks; 3 deaths from cholera.
Travancore ...	·14	Cultivation progressing. 5 deaths from cholera. *General Remarks.*—General prospects. North-east monsoon continues favourable. Prospects much improved. Prices falling in Bellary and Anantapur.
Bombay—(Oct. 29th)		
Karachi ...	No rain	Total rainfall from 1st January in Dadu 6·87, in Ketibandar 10·30, and in Mugalbhin 13·56. River at Kotri on 27th, 8 feet 8 inches against 6 feet 9 inches on same date last year. Fever generally prevalent; cholera in Kotri, 69 cases, 38 deaths, also in Johi and Shah Hassan, 19 cases, 13 deaths; small-pox in 5 villages in the districts, 12 fresh cases, no deaths, 9 remaining sick; cattle-disease in 7 talukas, some loss in 5. Rats doing damage in Jati and Shahbandar, and in Manjhand taluka. *Barani* cultivation suffered from insufficient rain. *Makri* insect in Shahbandar. Prices—wheat, red rice, and *bajri* in Karachi 26, 28 and 40; in Sehwan 36, 32 and 36; in Mirpur Batoro 22, 36 and 44; and in Sakro 17, 28 and 48 pounds per rupee, respectively.
Hyderabad ...	......	River at Kotri on 27th, 8 feet 8 inches against 6 feet 9 inches last year. *Rabi* operations in progress. A few cases of sporadic cholera in Hyderabad town and suburbs; fever in 12, small-pox in 2, and cattle-disease in 4 talukas. Prices of grain steady.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bombay—*contd.*		
Ahmedabad ...	......	Slight damage to *bajri* in Gogo and Dhandhuka by recent rain; reaping of *kharif* crops in progress, and sowing of *rabi* commenced. Fever in some talukas. Wheat 30 and *bajri* 32 pounds per rupee.
Baroda ...	......	Public health fair, but fever pretty general everywhere; cattle-disease in Vijapur. Prices—*bajri* 34½ and rice 23 pounds per rupee.
Surat ...	·11	Total rainfall 40·3. *Kharif* reaping commenced; crops healthy; sowing of *rabi* progressing. Fever in some talukas. *Juari* 30 and *nagli* 42 pounds per rupee.
Nasik ...	*Nil*	Weather fair and dry. *Kharif* crops being harvested; *rabi* sowing completed in places. Public health good. Wheat 40, *bajri* 33¾, and rice 21 pounds per rupee.
Colaba (Bombay) ...	·64 on 22nd	Total to date 73·70, being 3·47 above average; average abnormal temperature 1° cool. Vapour in air excessive from 22nd to 24th, and very defective from 25th to 28th; wind normal. Thunder and lightening on 22nd and 23rd.
Poona ...	Rain throughout the district, maximum at Purandhar, 8·38; minimum at Sirur, ·86.	State of crops improved by late rains; *rabi* sowing progressing. *Bajri* 32 and *juari* 34; in Poona, *bajri* 28 and *juari* 30 pounds per rupee.
Ahmednagar ...	Rain général throughout the district, varying from 4·47 in Pahura to ·73 in Kopargaon.	Harvesting in progress in Parner, Shrigonda, Jamkhed, Sheogaon, Newasa, Kopargaon, and Sangamner; condition of *kharif* crops good; sowing of *juari* completed in Akola. Fever still prevalent in Sheogaon. *Bajri*—maximum 54 pounds per rupee in Sangamner, minimum 36 in Shrigonda; *juari*—maximum 60 pounds in Sangamner, minimum 36 in Shrigonda.
Sholapur ...	Sholapur, 3·67; Barsi. 5·73; Madha, 1·97; Karmala, 1·65; Pandharpur, 1·88; Sangola, 2·20; Malsiras, 2·29.	*Juari* 34 pounds 2 tolas and *bajri* 32 pounds 29 tolas. Prospects tolerably good, except in Malsiras. Easterly winds set in, and no more rain expected.
Dharwar ...	Gadag, 7·52; Ranibennur, 6·64; Karajgi, 6·33; Navalgund and Nargund nearly 6·0; Mugud, 4·10; Mandargi and Kod, 2·95; Dharwar, 2·26; Hubli, 1·30; Bankapur and Kalghatgi, 1·14; Hangal, ·89 and 4·50.	Rain has done immense good; rice and other crops which had suffered from drought will improve; sowing of late crops has commenced, except in Gadag taluka, where it is hindered by excess of moisture. Scarcity of drinking-water in eastern talukas has been removed. All danger of famine or necessity for relief works is past. Cholera prevails slightly. Great fall in prices; average prices—*juari* 45 and rice 28 pounds per rupee.
Kanara ...	Karwar, 2·54; Kumpta, 5·81; Sirsi, 2·30; Haliyal, 1·0.	Total rainfall 96·6. Common rice in Karwar 15 seers; district average 11⅝ seers per rupee. Rice harvest continues on coast. Weather settled fair.
Rajkot ...	·12	Total rainfall 39·20. General health good. Weather little cold in the morning and hot during the day. Fever generally prevails; cholera in Dhoraji, Kutirjana, and Jetpur. *Bajri* 37 and *juari* 54 pounds per rupee. *General Remarks.*—Good rain throughout the Deccan and Southern Mahratta Country. Standing crops much benefited, and general prospects greatly improved; crops slightly damaged by excessive rain in parts of Ahmedabad, Khandesh, Colaba, and Ratnagiri, and by rats and insects in parts of Karachi. *Kharif* harvest and *rabi* sowing in progress in almost all districts. Cholera in parts of 10 and fever in 15 districts; small-pox and cattle-disease in a few places.
Bengal—(Oct. 28th)		
Chittagong ...	6·04	Rain has done immense good to standing crops; prospects favourable. Prices stationary. Cholera still reported, otherwise public health good.
Dacca ...	2·17	Prospects of crops favourable, owing to recent rain; pulses being sown; lands being ploughed for chillies, mustard, and potatoes. Public health generally good.
24-Pergunnahs (Calcutta)	1·68	Prospects of *amun* paddy generally satisfactory; sowing of *rabi* crops commenced; sugarcane doing well. Common rice selling at from 11½ to 15½ seers per rupee. Fever continues in parts of Bassirhat division, otherwise public health good. State of river normal.
Moorshedabad ...	2·15	Weather cloudy and warm, rough and stormy on 24th and 25th; rain has been general and will do much good, specially to *amun*. Public health fairly good.
Rajshahye ...	2·20; Nattore, 2·46; Nowgong, 1·76.	Weather bright and cool. Rain of 24th, 25th, and 26th will save *amun* to a great extent and facilitate *rabi* sowings. Health fair.
Burdwan ...	1·52; Cutwa, 3·82; Culna, 1·89; Raniganj, 1·47.	Prospects of crops improved by late rain which was general; the outturn of *amun* paddy expected to be about 4 annas; *aus* crop about 8 annas and sugarcane about 12 annas. Prices slightly falling. Public health good.
Rungpore ...	0·51	Weather seasonable. Prospects of crops continue bad. Price of rice stationary. Fever prevalent.
Bhagalpur ...	0·69	Prospects of crops good. Rice selling at 13¼ seers per rupee. Some cases of cholera and small-pox in Banka and some fever in the north.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bengal—*contd.*		
Purneah ...	1·18	Prospects of crops very fair in north, but poor in south; *rabi* sowing progressing. Common rice 14 seers per rupee. Rivers falling. Fever very prevalent.
Patna ...	3·86	Sowing of *rabi* crops and poppy continues; rain benefited standing paddy and *rabi*. Cholera still prevails in Seelao thana in Behar sub-division, otherwise public health good.
Durbhunga ...	4·14	Prospects of standing paddy and early *rabi* sowings improved; late *rabi* sowings partially injured. Prices stationary. Public health on the whole good.
Hazaribagh ...	Slight rain	Weather clear and becoming cool. Prospects of paddy good; sowing of winter crops continues. Public health good.
Cuttack ...	1·02	Weather fair. *Sarad* crops coming into ear; *laghu sarad* ripening; *rabi* crops germinating. Prices of rice almost unchanged. Cholera abating; public health generally good.
		General Remarks.—Rainfall almost general, but insufficient in many districts. Much rain still wanted in Tipperah. Sowing of *rabi* crops going on in many districts and that of poppy and potatoe in a few; prospects of crops generally fair; paddy crops not good in Beerbhoom, Nuddea, and Rungpore. Prices almost stationary. Some cholera and fever prevails in several districts and small-pox in two; public health generally good. It is reported that in Nawada that only 2 or 3 beggars died rather from disease than starvation.
N. W. Provinces and Oudh—		
Benares (Oct. 28th)	2·0 of rain in each tahsil on 25th.	Seeds sown a day or two before the rains, will not germinate, and will have to be resown; sugarcane and rice will all benefit by the rain. Slight fever lingers in the city, otherwise the health of men and cattle good. Prices fluctuate slightly. Grain having fallen; barley and *bajri* having risen in price.
Gorakhpur („ 27th)	Slight rain at the end of week.	*Rabi* sowings in progress. Cholera almost disappeared. Prices stationary.
Fyzabad („ 20th)	Rain during the week from ·2 to ·7.	*Rabi* sowing in progress. Prices stationary. Health of people and condition of cattle good.
Lucknow („ 27th)	No rain	Weather clear. *Rabi* sowing continues. *Hewat* crops doing well. Supplies sufficient. Prices steady. Health of people good. Slight cattle-disease still reported in tahsil Malihabad.
Rae Bareli („ „)	......	Weather fine, but occasionally cloudy. *Rabi* sowings in full swing. Health of men and condition of cattle good. Prices almost stationary.
Allahabad („ 28th)	Heavy fall of rain on 25th in 7 tahsils; 3·6 at Sadr; much less in other places.	The fall of rain is most beneficial to all crops. Health excellent. Prices rising slightly owing to demand for seed.
Cawnpore („ 27th)	No rain	Weather clear and cool. *Kharif* prospects fair; *rabi* ploughings and sowings in progress. Fever and ague generally prevalent. A little cattle-disease in pargana Narwal. Prices steady.
Farukhabad („ 28th)	......	Weather fine. *Rabi* sowings in progress. *Bajri* being cut. Health of people improving.
Sitapur („ „)	......	Westerly winds prevail. *Rabi* sowings continue. Cholera reported last week has abated.
Bareilly („ 27th)	......	Crops in good condition. Prices stationary. Fever prevalent; cattle healthy.
Kumaon („ „)	Slight shower once	Weather again clear. *Kharif* crops all cut; ploughing for *rabi* begun. Prices stationary. General health good; cattle-disease continues.
Agra („ 28th)	No rain during week	*Kharif* being harvested and *rabi* being sown. No cholera; fever very prevalent. Prices steady.
Jhansi („ „)	......	*Mung*, *urd*, and *tili* are being cut; *rabi* ploughing and sowing in progress. Prices show a tendency to fall. Fever prevalent.
Meerut („ 27th)	No rain	Wind mainly west, but shifting occasionally. Fever continues, cholera at Hapur and Meerut. Supplies sufficient. Prices steady.
		General Remarks—Rain in a few districts during the week. Agricultural condition uniformly good. *Rabi* sowings in full progress. Prices steady and health normal.
Punjab—(Oct. 20th)		
Delhi ...	No rain	Reaping commenced. Fever continues. Prices of wheat, barley, *bajri*, and *juari* falling; gram rising and rice stationary.
Hissar ...	......	Fever prevalent; slight cattle-disease in Rohtak. *Kharif* being harvested and *rabi* operations progressing.
Umballa ...	......	Fever prevalent, but improvement observable. *Makki* and rice harvested; *juari* being harvested, yield expected to be above the average; sowing of gram, barley, and mustard in progress. Prices of food-grains stationary.
Jullundur ...	......	Ordinary fever. *Kharif* harvest being reaped and *rabi* ploughings progressing. Prices steady.
Amritsar ...	·10	Slight fever. Harvest in good state. Prices of wheat, barley, and rice stationary; gram and *bajri* rising and *juari* falling.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Punjab—*contd.*		
Sialkot ...	Rain at Zafarwal, ·2	Health good. Harvest above average. Prices stationary.
Ferozepore ...	·10	Fever prevalent in the district. Probable yield of *kharif* crops good. Prices of wheat, gram, and barley rising.
Lahore ...	·3	General health good. State of crops fair.
Rawalpindi ...	·70	*Kharif* outturn above average in two and average in four tahsils.
Mooltan ...	......	Fever still prevalent. Expected *kharif* yield average; *rabi* sowings commenced. Prices stationary.
Dera Ismail Khan ...	......	Health and prospects good. Coming yield above the average and very general.
Peshawar ...	......	Slight fever. *Kharif* crops being harvested. Prices falling.
		General Remarks.—Slight rain during the week. Fever still prevalent. *Kharif* crops still being harvested, and the yield expected to be generally good; *rabi* sowing commenced in several districts. Prices of food-grains fluctuating.
Central Provinces—(October 29th)		
Nagpur ...	......	Weather clear and cold. *Kharif* crops in good order; *rabi* sowings in progress. Fever prevalent. Prices stationary.
Jubbulpore ...	*Nil*	Weather clear and cool. Reaping of *dhan* and *rabi* sowings continue. Fever in places. Wheat 25 and rice 14 seers per rupee.
Saugor (Oct. 28th)	Heavy rain at Kurai	Paddy and *kodo* being cut; *til*, cotton, and *juari* not matured; *rabi* land under preparation; sowings commenced in places. Fever prevalent. Prices steady.
Seoni ...	*Nil*	Weather clear. *Rabi* sowings progressing; much land dried up through sudden cessation of rain. Prices slightly fallen.
Hoshangabad ...	*Nil*	Weather cloudy. *Rabi* sowings continue. Fever prevalent. Rain wanted. Wheat 22 and rice 11 pounds per rupee.
Khandwa ...	*Nil*	Weather cloudy. Prospects fair. Health good and prices stationary.
Raipur ...	*Nil*	Weathers till lately cloudy, now clear. Rice earing; wheat and pulse being sown. Fever prevalent. Prices steady. Wheat 30 and rice 30 pounds per rupee.
Sambalpur (Oct. 25th)	*Nil*	Weather cloudy. Fever and cattle-disease abating. Prospects good. Common rice 28 seers per rupee.
		General Remarks.—Clear weather prevails throughout almost the whole province; the late clouds have disappeared without rain, except in the Saugor district. *Rabi* sowings are in progress, and prospects are generally good. Fever is very prevalent in some districts.
British Burma—(Oct. 29th)		
Akyab (Oct. 25th)	7·07	Total rainfall 186·30. Cholera continues in town and district. Crop prospects good. Season favourable.
Bassein (" ")	3·92	Total rainfall 101·69. Cattle-disease in one township.
Rangoon (" ")	1·93	Total rainfall 86·66. Slight cholera in town.
Amherst (" ") (Moulmein)	1·51	Total rainfall 175·40. General appearance of crops good.
Tavoy (" ")	0·54	Total rainfall 160·47. Prospects of crops excellent.
Pegu (" ")	0·60	Total rainfall 108·99. Crops promising.

HENRY F. BLANFORD.

Meteorological Reporter to the Government of India.

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The "Indian Law Reports," published under the authority of the Governor General in Council. appear in monthly parts, published as soon as possible after the first of each month, at Calcutta, Madras, Bombay, and Allahabad, and comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Benga, Secretariat; the copies for subscribers registered by Messrs. Thacker, Spink & Co., are distributed by that firm; and the Madras, Bombay and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad respectively.

On and from the 1st January, 1884, the terms of subscription and sale will be reduced as follow:—

Terms of subscription, payable annually in advance

	Without postage.	With postage.
For the Calcutta Series . . .	R10 0	R12 8
" Madras " . . .	" 5 0	" 6 0
" Bombay " . . .	" 7 8	" 8 8
" Allahabad " . . .	" 5 0	" 6 0
Complete set	" 20 0	" 22 8

A part of any series purchased separately, R1.

Persons desiring to subscribe for or purchase the Reports should apply to—

Messrs. Thacker, Spink & Co., Calcutta.
" Thacker & Co., Bombay.
" Higginbotham & Co., Madras.
The Government Central Book Depôt, Bombay.
" " Book Depôt, Allahabad.

Orders and subscriptions for 1884 should be at once remitted.

NOTICE.

Indian Law Reports.

Advertisements will be received for publication on the wrappers of the Indian Law Reports, Calcutta Series, by the Calcutta Central Press Company, "Limited," 5—1, Council House Street, at the following rates, payable in advance :—

	One page.	Half page.	Quarter page.
For one issue	R 15	R10	R 6
" three issues	" 40	" 25	" 14
" six "	" 70	" 40	" 25
" twelve "	" 110	" 70	" 45

At these rates the advertisers will have the option of changing their advertisements in each issue.

THE BENGAL LAW REPORTS.

A few sets of the Bengal Law Reports (Volumes 1 to 15) are available at Messrs. Thacker, Spink & Co., Calcutta, at R375 a set.

PART I.

Government of India Notifications, Appointments, Promotions, &c.

MILITARY SECRETARY'S OFFICE.

NOTIFICATION.

Simla, the 7th November 1884.

Programme of His Excellency the Viceroy's arrival in Calcutta.

His Excellency the Viceroy and Governor General will arrive in Calcutta by a special train on Tuesday, the 2nd December 1884, at 3-5 P.M., Railway time.

His Excellency will be received at the Sealdah Railway Station by the Chairman of the Corporation and Commissioner of Police for the Town of Calcutta and the Magistrate of the 24-Pergunnahs, and at Government House by the Lieutenant-Governor of Bengal, Members of His Excellency's Council, the principal Civil and Military Officers, and other Gentlemen who are desirous of attending.

A Guard-of-Honor of the Eastern Bengal Railway Volunteers will be drawn up on the platform of the Sealdah Railway Station and a Guard-of-Honor of Native troops, with Band, outside the Station.

The route taken will be by Lower Circular Road, Dhurrumtolah Street, and Esplanade.

The Body-Guard will form the Escort.

Guards-of-Honor of British Infantry and of the Calcutta Volunteer Rifles, with Band, will be drawn up in front of the Grand Staircase of Government House.

A Viceregal Salute will be fired from the ramparts of Fort William as His Excellency arrives at the Sealdah Station.

Full dress will be worn by Officers entitled to uniform. Gentlemen not entitled to wear uniform will appear in morning dress.

By Command,

H. LEGGE, *Major*,
for *Military Secretary to the Viceroy.*

RESOLUTION—By the Government of India, Public Works Department.

New Indian Railway Bill.

Read—

Railway Despatch No. 164, dated the 3rd November 1884, to Her Majesty's Secretary of State for India, and enclosure.

OBSERVATIONS.—The necessity for consolidating and amending the law relating to Indian Railways has at various times been under the consideration of the Government of India, and the question came more especially into prominence in 1882, owing to the extension of railways by private enterprize, which then for the first time took place.

2. The existing law relates chiefly to the conditions of the working of open lines of railways as between the several Railway Administrations and the public. With a view, however, to facilitate the preliminary negotiations for, and the eventual completion and working of, railway undertakings promoted by private enterprize, and also to afford securities of various kinds which appear desirable in the interest of the general public, the Government of India desires to embody in a general Act for Indian Railways the various provisions defining those obligations of a Railway Company towards Government as well as towards the public, in constructing and working a line of railway, which general experience has proved to be desirable.

3. In this view a draft Bill has been prepared, which embodies—

(1) the existing Indian Railway Acts;

(2) such of the provisions of the English Railway Acts or Bills as seem suitable to the circumstances of India;

(3) those provisions of the existing contracts with guaranteed and other Indian Railway Companies which are of general application, and not special to the particular railway to which the contract relates.

4. The Government of India has further noticed, in connection with the large increase in the interchange of railway traffic which has of late years occurred, and which is likely to develop itself still further with the growth of the Indian railway system, the necessity for facilitating a reference to arbitration when differences or disputes arise between two or more railway administrations. To meet this want, provision has been made detailing the proceedings to be followed in arbitration, and including a power to enforce a reference to arbitration in cases where the continuance of a dispute is likely to be prejudicial to the interests of the public.

RESOLUTION.—Resolved that the rough draft referred to in the above observations be circulated in its present preliminary shape, and prior to its consideration in detail by the Legislative Department of the Government of India, to the various Local Governments, Chambers of Commerce, and Railway Administrations in India; and that those authorities be invited to express, and communicate to the Government of India, their opinions on the various provisions in the Bill.

2. The Government of India hopes to derive, in its further consideration of the Bill, great assistance from the views and criticisms hereby invited, and requests that they may be submitted at the earliest possible date, in order that there may be no unnecessary delay in the introduction of a suitable draft of the Bill.

ORDER.—Ordered, that this Resolution, together with the draft Railway Bill, be communicated to the Governments, Administrations, Officers, and Chambers of Commerce named in the margin for information and guidance; and to the several Departments of the Government of India.

The Governments of Madras, Bombay, Bengal, the North-Western Provinces and Oudh, and the Punjab.
The Chief Commissioners, Central Provinces, Assam, and British Burma.
The Residents, Hyderabad and Mysore.
The Agents to the Governor General for Rajputana, Central India, and Biluchistan.
The Consulting Engineers to the Government of India for Guaranteed Railways.
The Director General of Railways.
The Accountant General, Public Works Department.
The Chambers of Commerce, Madras, Bombay, Calcutta, Karachi, and Rangoon.

Ordered also, that this Resolution and the draft Railway Bill be published in the *Gazette of India* for general information.

DRAFT INDIAN RAILWAY BILL.

CONTENTS.

CHAPTER I.

PRELIMINARY.

SECTION.

1. Short title, local extent and commencement.
2. Repeal of Acts.
3. Definitions.
4. Application of Act to railway companies.
5. Application of Act to steam vessels and ferries.
6. Power to extend Act to steam tramways.
7. Power to declare Local Government in respect of any railway.

CHAPTER II.

INSPECTORS OF RAILWAYS.

8. Appointment and duties of Inspectors.
9. Powers of Inspectors.
10. Facilities to be afforded to Inspectors.

CHAPTER III.

CONSTRUCTION AND EQUIPMENT OF RAILWAYS.

General conditions and selection of line.

11. General power to construct, maintain and work railways.
12. Standard dimensions to be followed.
13. Selection of line.

Land.

14. Land.
15. Surplus land.
16. Rights to minerals.

Works.

17. Prosecution of works.
18. Situation of stations, &c.

Works for the accommodation of lands adjoining a railway.

19. Accommodation works.

Level-crossings, fences, &c.

20. Level-crossings, fences, gates and bars.

Over and under bridges.

21. Power to order over and under bridges.

Equipment with rolling-stock.

22. Equipment with rolling-stock.

Default by company.

23. Power to resume railway in case of default by company.

CHAPTER IV.

TELEGRAPHS.

Lines worked by Railway Administration.

24. Telegraph requirements of railway administration.
25. Working of telegraphs by railway administration.

SECTION.

Lines worked by the Government Telegraph Department.

26. Power to construct and work Government telegraphs on railways.

General.

27. Free passes.
28. Free carriage of maintenance stores.
29. Removal of vegetation, &c., for proper insulation.

CHAPTER V.

RAILWAY POLICE.

30. Governor General in Council to provide and maintain police.
31. Establishment, pay, pensions, &c., of police.
32. Division of cost of police.

CHAPTER VI.

OPENING OF RAILWAYS FOR PUBLIC TRAFFIC.

Notice of intention to open, and report by Inspector.

33. Railway when to be opened.
34. Notice of intention to open.
35. Sanction not to be given until after report by Inspector.

Subsequent Closure and Re-opening.

36. Material alterations necessitate fresh sanction for opening.
37. Governor General in Council empowered to close railway.
38. Re-opening of railway.

CHAPTER VII.

OBLIGATIONS RELATING TO THE PUBLIC SERVICE.

(A) Conveyance of Mails by railway.

39. Director General of the Post Office may require conveyance of mails.
40. One mail train daily to serve postal arrangements.
41. Railway administration to receive, convey and deliver mails.
42. Speed and timing of trains carrying mails.
43. Special trains exclusively for Post Office.
44. Provision of standard postal compartments and vans.
45. Use of standard postal compartments and vans.
46. Instructions of Director General of the Post Office regarding conveyance of mails to be observed.
47. Mail guard may take mails as luggage.
48. Railway administration to give facilities for receipt and delivery.
49. Postal accommodation at railway stations.

Terms on which postal services are to be rendered.

50. Carriage of mails.
51. Construction, fitting and maintenance of standard postal compartments and vans.
52. Provision of postal accommodation at railway stations.
53. Director General of the Post Office may notify that any standard compartment or van, or any postal accommodation at a station, is no longer required by him.
54 Revision of mutual agreements regulating payments by Post Office.
55. Differences to be settled by arbitration.

SECTION.

(B) Conveyance of Her Majesty's forces by railway.

56. General conditions.
57. Priority of demands of Governor General in Council.

(C) Conveyance of Bullion and Coin by railway.

58. Conveyance of bullion and coin.

(D) Power of Government on occasions of emergency to take possession of railways.

59. Power of Government on occasions of emergency to take possession of railways.

CHAPTER VIII.

WORKING OF RAILWAYS.

Opening of railway and subsequent maintenance.

60. Completion and opening.
61. Sanction for use of locomotive engines, carriages, &c.
62. Maintenance of the railway.
63. Maintenance certificates.

Additional works subsequent to opening.

64. Governor General in Council may require additions and alterations.
65. Provision of land when required.
66. Prosecution of works.

General rules for working a railway.

67. Railway administration to make rules.
68. Copy and translation of Act, &c., to be shown at stations, &c.

Working arrangements.

69. Working of railway and train service.
70. System of working train service.
71. Governor General in Council may require alterations in working.
72. Maximum speed of trains.
73. Communication between passengers and the railway servants.
74. Latrine accommodation in passenger carriages.
75. Accommodation for carriage of dogs in passenger trains.

Tolls and Charges.

76. Rates and fares.
77. Free allowance of luggage.
78. Children.
79. Classification of goods.
80. Terminal charges.
81. Railway administration to explain charges.
82. Tolls where two railways are worked by one administration.
83. Undue preference.

Running powers, facilities, and accommodation for other railways.

84. Governor General in Council may require running powers.
85. Where two or more railways fail to agree regarding conduct of joint traffic, Governor General in Council may decide dispute.
86. Joint use of stations.
87. Interchange of traffic and rolling-stock, and through-booking.
88. Clearing through traffic.
89. Agreements with the Governor General in Council for construction or lease of rolling-stock, &c.

SECTION.

Working agreements.

90. Powers of railway administrations to enter into working agreements.

Power to establish ferries, roadways on bridges, roads, and other means of transport.

91. Establishment of ferries, roadways, &c., for accommodation of traffic.

CHAPTER IX.

CARRIAGE OF TRAFFIC.

Carriage of property.

92. Tare weight and maximum load to be exhibited on wagons, &c.
93. Special contract limiting liability.
94. Limit of period of liability for overcharge.
95. No liability for loss of gold, silver, &c., unless value declared and increased charge accepted.
96. No liability for unbooked luggage.
97. Plaintiffs not required to prove negligence.
98. Lien for money due for carriage, &c., of property.
99. Written account of property to be given on demand.
100. Dangerous goods.

Liability for goods booked by ship.

101. Restrictions or contracts limiting liability for goods booked by ship.
102. Limit of liability for persons and goods carried by ship.

Carriage of passengers.

103. Maximum number per compartment.
104. Passengers on payment of fares to be furnished with tickets.
105. Tickets to be shown and given up on demand.
106. Fares and tickets at intermediate stations.
107. Fares to be prepaid.
108. Power to remove persons suffering from infectious disease.

CHAPTER X.

ACCIDENTS.

Report of, and compensation for, accidents.

109. Accidents to be reported.
110. Power for Governor General in Council on application of injured person to refer question of compensation to arbitration.
111. Medical examination of injuries

Duties of Railway, Police, and Civil officers on occurrence of serious accidents.

112. Interpretation.

Duties of Managers and Railway Officers.

113. Station-master to report accident.
114. Manager to report accident.
115. Manager to hold departmental inquiry.
116. Prosecution of offenders.
117. Arrest of offenders.
118. Attendance of witnesses.
119. Judicial inquiries.
120. Lists of officers to be maintained and supplied by Manager.

Duties of the Railway and District Police.

121. Railway police may investigate any accident.
122. Railway police superintendent to investigate serious accidents.

SECTION.

Duties of Civil Officers.

123. Magistrate to report to Local Government the occurrence of any serious accident.
124. Duties of Magistrate on occurrence of serious accident.
125. Inquiry by Magistrate.
126. District medical officer to attend when called upon.
127. Investigation in adjacent foreign territory.
128. Evidence on technical points.
129. Judicial inquiry.
130. Lists of officers to be maintained and supplied by Magistrate.

Inspector's duties.

131. Duties and powers of Inspector on occurrence of serious accident.

Temporary entry upon land for repair or prevention of accident.

132. Temporary entry upon land for repairing or preventing accident.
133. Danger from tree likely to fall on railway.

General return of accidents.

134. Submission of return of accidents.

CHAPTER XI.

ACCOUNTS, STATISTICS, AND AUDIT.

Submission of returns.

135. Accounts and statistics to be submitted.
136. Statistics for registration of inland trade.

Capital and revenue accounts.

General power to [illegible]
137. Items to be included in capital account.
138. Items to be included in revenue account.
139. General principles of allocation of [illegible]ture to capital or revenue.
140. Working expenses.

Appointment and functions of auditors.

141. Appointment of auditors.
142. Audit of accounts.
143. Cost of audit to be borne by company.
144. Duties of auditors.
145. Differences to be settled by arbitration.

CHAPTER XII.

OFFENCES AND PROCEDURE.

(A.)—Offences by the railway administration.

146. For wilful neglect or violation of any rule made under section 20.
147. Execution of works required to be done by any notice.
148. Recovery of costs of execution.
149. For non-completion of a railway within the time limited.
150. For contravening provisions of Chapter VI relating to opening of railways.
151. For neglect to convey mails.
152. For neglect to convey Her Majesty's forces.
153. For running a train in excess of authorized speed.
154. For not providing means of communication in trains between passengers and railway servants.
155. For not providing latrine accommodation in passenger carriages.
156. For not providing suitable accommodation for dogs, &c.

SECTION.

157. For failing to explain charges for conveyance of goods.
158. For neglect to comply with any order of the Governor General in Council under sections 84 to 88.
159. For omitting to fix and exhibit tare weight and maximum load of wagons, and maximum number of passengers per compartment.
160. For omitting to report accident.
161. For not sending return of accidents, or making rules under section 67, or exhibiting copy under section 68.
162. For failing to deliver accounts, statistics, &c.
163. For false returns.

(B.)—Offences by railway servants.

164. For omitting to give notice of accident.
165. For drunkenness or breach of duty.
166. For endangering the safety of persons.
167. For receiving bribes.
168. For compelling passengers to enter carriages already full.

(C.)—Offences by persons generally.

169. For not giving account of goods or giving false account.
170. For taking dangerous goods on railway or delivering such goods without notice.
171. For travelling without ticket or not showing or delivering up ticket.
172. For travelling in a railway carriage when suffering from an infectious disease.
173. For evading payment of fare.
174. For entering carriage in motion.
175. For riding on the steps.
176. For riding on engine, tender, &c.
177. For smoking.
178. For taking animals into passenger compartment.
179. For intoxication or nuisance.
180. For entering carriage or room reserved for females.
181. For obstructing railway servant in his duty.
182. For entering carriage already full.
183. For needlessly interfering with means of communication in a train.
184. For removing signals or injuring carriage, &c.
185. For trespass, and refusing to leave on request.
186. For cattle trespass and similar offences.
187. For opening or not properly shutting gates.
188. For minors obstructing line or throwing stones at train.
189. For wilful act or omission endangering persons on railway.
190. For rash or negligent act.
191. Disobedience of omnibus, &c., drivers to railway servants.

(D.)—Arrest of offenders.

192. Arrest, for offences punishable under this Act, of offender whose name is unknown, &c.
193. Arrest for offences against certain sections.

(E.)—Jurisdiction.

194. Magistrates having jurisdiction.
195. Place of trial.

(F.)—Saving of other Criminal laws.

196. Saving of prosecutions under other laws.

SECTION.

CHAPTER XIII.

ARBITRATION.

Cases in which arbitration is to have effect.

197. Governor General in Council may require differences to be referred to arbitration.
198. Application of provisions for arbitration.

Proceedings in arbitration.

199. Reference to arbitrators.
200. Appointment of arbitrators by parties.
201. Appointment of arbitrators by Governor General in Council.
202. In case of death or unfitness of single arbitrator the matter to begin *de novo*.
203. Appointment of arbitrators by parties to supply vacancies.
204. Appointment of arbitrators by Governor General in Council to supply vacancies.
205. Appointment of arbitrator not revocable without mutual consent.
206. Appointment of umpire by arbitrators.
207. Appointment of umpire by Governor General in Council.
208. Appointment of umpire by arbitrators to supply vacancy.
209. Appointment of umpire by Governor General in Council to supply vacancy.
210. New arbitrator or umpire to have the same powers as his predecessor.
211. Reference to umpire.
212. Powers for arbitrators and umpire to call for books, &c., and administer oath.
213. Arbitration to proceed as arbitrators and umpire think fit.
214. Arbitration may proceed in absence of parties.
215. Several awards may be made.
216. Awards made in due time to bind all parties.
217. Umpire may extend period for making his award.
218. Award cannot be set aside for informality.
219. Awards to be obeyed.
220. Courts to give full effect to awards.
221. Costs of arbitration and award.
222. Payment of costs.
223. Power to state special case.
224. Remuneration of arbitrators, &c., appointed by the Governor General in Council.

CHAPTER XIV.

NOTICES, ORDERS, &c.

225. Requisitions, &c., by the Director General of the Post Office.
226. Requisitions, &c., by the Governor General in Council.
227. Notices may be printed or written.
228. Office to be maintained in India with authorized agent.
229. Notices, &c., how to be served by railway administration.

SCHEDULES.

I. Acts repealed.
II. List of articles required to be declared and insured.

APPENDICES.

A. Sections of the existing Indian Railway Acts included in the draft Bill.

B. Sections of the English Regulation of Railways Bill included in the draft Bill.
C. Clauses of the various contracts with Indian railway companies included in the draft Bill.
D. Provisions of the contracts with the principal Indian railway companies excluded from the draft Bill.

October 1884.

DRAFT.

INDIAN RAILWAY BILL.

CHAPTER I.

PRELIMINARY.

Short title, local extent and commencement.

[IV of 1879, sec. 1.]

1. *(1)* This Act may be called the Indian Railway Act, 188 .

(2) It extends to the whole of British India and, so far as regards subjects of Her Majesty the Empress of India, to the dominions of Princes and States in India in alliance with Her said Majesty; and

(3) It shall come into force on the day of .

Repeal of Acts.

[IV of 1879, sec. 2, in part.]

2. *(1)* On and from that day, the Acts specified in the first schedule hereto annexed shall be repealed.

(2) But all rules made, notifications published and powers conferred under any of these Acts, or under any enactment thereby repealed, shall, so far as they are consistent with this Act, be deemed to have been respectively made, published and conferred under this Act.

Definitions.

3. In this Act, unless there is something repugnant in the subject or context,—

[IV of 1879 sec. 3 (modified).]

(1) "Railway" means a railway for the public conveyance of passengers or goods; and includes—

(*a*) all land within the fences or other boundary-marks prescribed under section 20;

(*b*) all lines of rail, sidings or branches worked over for the purposes of, or in connection with, a railway;

(*c*) all stations, offices, warehouses, manufactories, fixed machinery and other works constructed for the purposes of, or in connection with, a railway;

(*d*) all collieries, quarries, mines, wharves, piers, or jetties, in or on which is any railway siding; and

(*e*) all vessels and rafts used for the purpose of carrying on the traffic of a railway.

For the purpose of section 3, sub-sections (3) and (4), section 7, the whole of Chapters II, III, IV and V, sections 33, 34, 35, 67, 100, 109 to 132 (both inclusive), 135, 137, 139, sub-section (1), 141 to 150 (both inclusive), 160 to 167 (both inclusive), 170, 174, 175, 176, 184 to 190 (both inclusive), 192 to 196 (both inclusive), and the whole of Chapters XIII and XIV, "railway" includes a railway under construction and a railway not used for the public conveyance of passengers or goods.

[New.] (2) "Inspector" means any Inspector of railways appointed under this Act.

[IV of 1879, sec. 3 (modified).] (3) "Railway administration" means, in the case of a railway under construction or being worked by Government, or a Native State, the Manager of the railway, and in the case of a railway under construction or being worked by a Company or private individual, that Company or individual.

[IV of 1879, sec. 3.] (4) "Railway-servant" means any person employed by a railway administration to perform any function in connection with a railway, and in section 165, sub-section (2), sections 166, 167, 181 and 186, includes any person employed to perform any such function by any other person in execution of a contract into which he has entered with a railway administration.

[34 & 35 Vic., c. 78, sec. 2 (modified).] (4) "Railway company" means any company empowered to construct, maintain, or work a railway, and includes, except when otherwise expressed, any individual or individuals who are owners or lessees of a railway or parties to an agreement for working a railway.

[New.] [cf. 8 Vic., c. 16, sec. 2.] (5) "Special agreement" means any agreement made, before the passing of this Act, by the Secretary of State in Council or by the Governor General in Council with any railway company, with reference to the construction, maintenance or working of a railway; and any such agreement made after the passing of this Act and applying or excluding any of the provisions of this Act.

[8 & 9 Vic., c. 20, sec. 3.] (6) "Lease" includes an agreement for a lease.

[8 & 9 Vic., c. 20, sec. 3.] (7) "Toll" includes any rate, charge or other payment payable for any passenger, animal, carriage, goods, merchandise, articles, matters or things conveyed on any railway.

[35 & 36 Vic., c. 50, sec. 2 (modified).] (8) "Rolling-stock" includes locomotive stock.

[8 & 9 Vic., c. 20, sec. 3.] (9) "Goods" includes things of every kind conveyed on any railway.

[New.] (10) "Mails" shall have the same meaning as in the Indian Post Office Act for the time being in force.

[New.] (11) "Director General of the Post Office" includes any officer of the Post Office authorized by the Director General of the Post Office to act in his behalf for all or any of the purposes of this Act.

[cf. 5 & 6 Vic., c. 55, sec. 20. 7 & 8 Vic., c. 85, sec. 12. 16 & 17 Vic., c. 69, sec. 18.] (12) "Her Majesty's forces" includes any officer or man of Her Majesty's regular, auxiliary, or reserve forces, or any officer or man of Her Majesty's navy, naval coast volunteers, or any other officer or man under the command or government of the Admiralty, or any officer or man of the police force.

[cf. 5 & 6 Vic., c. 55, sec. 20. 7 & 8 Vic., c. 85, sec. 12. 16 & 17 Vic., c. 69, sec. 18.] (13) "Proper authority" in relation to any of Her Majesty's forces means the Department of the State or other authority empowered to direct or sanction the movement of any such officer or man.

[New.] Application of Act to railway companies. **4.** This Act shall apply to every railway company except so far as its provisions are inconsistent with the special agreement.

[New.] cf. 26 & 27 Vic., c. 92, secs. 30 to 33.] Application of Act to steam vessels and ferries. **5.** This Act shall, unless there is something repugnant in the sense or context, apply to all steam vessels or ferries which any railway administration may be authorized by the Governor General in Council, or by the special agreement, to build, buy or hire, or to use, maintain and work, or to enter into arrangements for using, maintaining and working.

Power to extend Act to steam tramways. **6.** The Governor General in Council may, by notification in the *Gazette of India*, extend this Act or any portion thereof to any tramway worked by steam. [IV of 1879, sec. 54.]

Power to declare Local Government in respect of any railway. **7.** The Governor General in Council may, from time to time, by notification in the *Gazette of India*, declare what Government or other authority shall be deemed to be, for the purposes of this Act, the Local Government in respect of the whole or any part of a railway. [IV of 1879, sec. 53.]

CHAPTER II.

INSPECTORS OF RAILWAYS.

Appointment and duties of Inspectors. **8.** (1) The Governor General in Council may, from time to time, appoint persons, by name or by virtue of their office, to be inspectors of railways. [34 & 35 Vic., c. 78, sec. 3 (modified).]

(2) The duties of an Inspector of railways shall be—

(a) To inspect a railway or portion thereof with a view to determine whether it is fit to be opened for public traffic, and to report thereon to the Governor General in Council, as required in section 35.

(b) To make such periodical or other inspections of any railway, or portion thereof, or of any rolling-stock, as the Governor General in Council may from time to time direct.

(c) To make inquiry into the cause of any accident under section 151.

(d) To perform such duties, in connection with the inspection and supervision of railways, as are imposed on him by this Act, or as the Governor General in Council may by general or special order direct or authorize him to perform.

Powers of Inspectors. **9.** Every Inspector shall, for the purpose of any inspection which he is required or authorized to conduct, be deemed to be a public servant within the meaning of the Indian Penal Code, and shall, subject to the control of the Governor General in Council, have the following powers, namely:— [IV of 1883, sec. 2 in part (modified).]

(a) he may enter on and inspect any railway or portion thereof or any rolling-stock used thereon;

(b) he may, by an order in writing under his hand, require the attendance of any person who is engaged in the management, construction, or working of a railway, whom he thinks fit to call before him and examine for the said purpose, and may require any such person to answer, or furnish returns regarding, such inquiries for the said purpose as he thinks fit to make;

(c) he may require and enforce the production of all books, papers and documents belonging to or in the possession of any railway administration which in his opinion are necessary for the said purpose.

[IV of 1883, sec. 2 in part.]

Facilities to be afforded to Inspectors.

10. Every railway administration whose railway or rolling-stock is being inspected under this Act shall afford to the Inspector all reasonable facilities for making the inspection.

CHAPTER III.

CONSTRUCTION AND EQUIPMENT OF RAILWAYS.

General conditions and selection of line.

[New.]

General power to construct, maintain and work railways.

11. Subject to the provisions of this Act, the Governor General in Council may—

(1) himself construct, maintain or work any line or lines of railway for the conveyance of passengers or goods, or both; or

(2) by agreement with any railway company authorize that company either on its own behalf or on behalf of the Government of India or of any other railway company to construct, maintain or work any line or lines of railway for the conveyance of passengers or goods, or both.

New.]

Standard dimensions to be followed.

12. Every railway administration authorized to construct a line of railway shall, unless the Governor General in Council in any case otherwise direct, absolutely follow the maxima and minima moving and fixed dimensions laid down from time to time by the Governor General in Council, for general adoption on any gauge, and shall follow such standard for the weight of rails, strength of bridges and general structural character of all works, up to rail level inclusive, as the Governor General in Council may from time to time prescribe.

[New.] [Similar, B. C. Ry., cl. 2. B. & N.-W. Ry., cl. 4. S. M. Ry., cl. 4. Gd. Rys., cls. 1 & 2.]

Selection of line.

13. *(1)* When a railway administration is authorized by the Governor General in Council to construct any particular line of railway, the gauge, route and direction of the railway shall be such as is selected and determined by the Governor General in Council.

(2) The Governor General in Council may from time to time alter the route or direction so determined or extend or limit the same as he may think fit, subject to this qualification, that, if the alteration is made after the railway has been commenced in a previously selected route or direction, the expense of, and incident to, the alteration shall be adjusted as may be determined by mutual agreement between the Governor General in Council and the railway administration.

Land.

[Gd. Ry. Contracts, cl. 8 (modified).] [Similar, B. C. Ry., cl. 4. B. & N.-W. Ry., cl. 7. S. M. Ry., cl. 7.]

Land.

14. All land from time to time required for the purposes of a railway shall be acquired by the Governor General in Council, and possession thereof shall be given to the railway administration on such terms as may be mutually agreed upon between the Governor General in Council and the railway administration.

Do. do.

Surplus land.

15. Where a railway administration has obtained possession of land which is not permanently required for the purposes of the railway it shall, as soon as practicable, restore the land.

[8 & 9 Vic., c. 20, s. 77.]

Rights to minerals.

16. A railway administration shall not, except by virtue of an express stipulation to that effect, be entitled to any minerals under any lands acquired by it, other than such minerals as it may be necessary to dig or carry away or use in the construction of the railway works.

Works.

[B. C. Ry., cl. 5 (modified).] [Similar, B. & N.-W. Ry., cl. 3. S. M. Ry., cl. 3. Gd. Rys., cl. 4.]

Prosecution of works.

17. Every railway administration shall, on receiving possession of the land required for the purposes of the railway, proceed with diligence in the construction thereon of the authorized lines and of all such works as may be necessary or expedient, either for the original construction of the lines and the working thereof, or for their permanence and protection from injury by inundation or from any other cause.

[B. & N.-W. Ry., cl. 5 (modified).] [Similar, B. C. Ry., cl. 2. S. M. Ry., cl. 5. Gd. Rys., cl. 4.]

Situation of stations, &c.

18. The Governor General in Council may from time to time determine the situation, arrangement and dimensions of all stations, station-yards, and works to be constructed in connection with, or as part of, any railway, and also of any junctions which any railway administration may at any time, with the sanction of the Governor General in Council, make between its own and any other railway.

Works for the accommodation of lands adjoining a railway.

[8 & 9 Vic., c. 20, s. 68 (in part).]

Accommodation works.

19. (*1*) Every railway administration shall make and maintain the following works for the accommodation of the owners and occupiers of lands adjoining the railway (that is to say):—

(*a*) Such and so many convenient gates, bridges, arches, culverts and passages over, under, or by the sides of, or leading to, or from the railway as may, in the opinion of the Governor General in Council, be necessary for the purpose of making good any interruptions caused by the railway to the use of the lands through which the railway is made; and

(*b*) All necessary arches, tunnels, culverts, drains, or other passages, either over or under or by the sides of the railway, of such dimensions as will, in the opinion of the Governor General in Council, be sufficient at all times to convey the water as freely from the lands lying near or affected by the railway as before the making of the railway, or as nearly so as may be.

(*2*) The works specified in clause (*a*) shall be made forthwith after the part of the railway passing over such lands has been laid out or formed, or during the formation thereof.

(*3*) The works specified in clause (*b*) shall be made from time to time as the railway works proceed.

Provided as follows:—

(*i*) a railway administration shall not be required to make any accommodation works in such a manner as would prevent or obstruct the working or using of the railway, nor to make any accommodation works with respect to which the owners or occupiers of the lands have agreed to receive and have been paid compensation instead of the making them;

[8 & 9 Vic., c. 20, s. 73, (modified).]

(ii) a railway administration shall not be compelled to defray the cost of executing any further or additional accommodation works for the use of owners and occupiers of land adjoining the railway after five years from the opening of the railway, or the portion thereof passing through such land, for public traffic.

Level-crossings, fences, &c.

[IV of 1879, sec. 52 (modified).]

Level-crossings, fences, gates and bars.

20. The Governor General in Council, or the Local Government with the previous sanction of the Governor General in Council, may, from time to time, make rules requiring—

(a) that boundary-marks or fences be provided for any railway or any part thereof, and for roads constructed in connection therewith;

(b) that suitable gates, bars, stiles or handrails be erected, and that convenient ascents and descents and other convenient approaches be made, at places where any railway crosses a road on the level; and

(c) that persons be employed to open and shut such gates or bars;

and may by such rules determine what kind of fences shall, for the purposes of section 86, be deemed to be suitable for the exclusion of cattle.

Over and under bridges.

[26 & 27 Vic., c. 92, s. 7 (in part).]

Power to order over and under bridges.

21. Where a railway administration has constructed, or is authorized to construct, a railway across any turnpike road or public carriage road on the level, the Governor General in Council, or the Local Government with the previous sanction of the Governor General in Council, may, if it appears to them necessary for the public safety, at any time require the railway administration, within such time as the Governor General in Council or the Local Government directs, and at the expense of the railway administration, to carry the turnpike road or public carriage road either under or over the railway by means of a bridge or arch, with convenient ascents and descents and other convenient approaches, instead of crossing the same on the level, or to execute such other works as, under the circumstances of the case, may appear to the Governor General in Council or the Local Government with the previous sanction of the Governor General in Council, best adapted for removing or diminishing the danger arising from the level-crossing.

Equipment with rolling-stock.

[B. & N.-W. Ry., cl. 14.]
[Similar, B. C. Ry., cl. 6.
S. M. Ry., cl. 8.
Gd. Rys., cl. 8.]

Equipment with rolling-stock.

22. Every railway administration shall with reasonable speed equip its railway, when constructed, with rolling-stock, plant and machinery of good quality and adequate in quantity to work the railway.

Default by company.

Power to resume railway in case of default by company.

23. (1) If a railway company makes default—

[B. C. Railway Contract, cls. 43-44 (modified).]
[Similar, B. & N.-W. Ry., cls. 55 & 59.
S. M. Ry., cls. 65 to 68.
Gd. Ry., cl. 28.]

(a) in raising or paying the money required for the construction of any railway which it is authorized to construct, or

(b) in the due application of any money drawn by it out of any money paid into the Bank of England or a Government treasury in pursuance of the special agreement, or

(c) in the execution of any works which it is bound under the special agreement to execute, or

(d) in complying with any other provision of the special agreement,

the Governor General in Council may give the Company six months' notice in writing of his intention to terminate the interest of the Company in the railway, and, unless the default is made good before the expiration of those six months, may, on or at any time after the expiration thereof, take possession of the railway and of the rolling-stock, plant and stores belonging or appropriated thereto, and thereupon the property of which possession is so taken shall vest in Her Majesty free from all debts and liabilities affecting the same.

(2) If possession is taken under this section, the Governor General in Council shall be liable to pay to the Company within six months from the date of taking possession—

(a) if no receipts have then been entered in the capital account of the Company, the amount of the expenditure of the Company as entered in that account and certified by the Governor General in Council;

(b) if any receipts have then been so entered, the ultimate certified excess of the said expenditure over the said receipts;

and, in either case,—

[illegible] value (to be ascertained by arbitration in case of difference) of the stores of which possession is so taken; and

(ii) so much (if any) of the money paid by the Company into the Bank of England or a Government treasury as may not have been drawn out by the Company:

Provided that, if the power of taking possession is exercised after the railway is opened for traffic, there shall be deducted from the money payable by the Governor General in Council under this section the amount (to be ascertained by arbitration in case of difference) requisite to place the railway in a fair working condition and to render its equipment with rolling-stock, plant, machinery and boats reasonably adequate both in quantity and quality to the amount charged in the capital account for such equipment.

(3) When possession of a railway is taken under this section, the obligations of the parties to the special agreement under any of the provisions thereof shall cease; but nothing in this section shall exempt either party from liability for any previous breach of the special agreement, or deprive the Governor General in Council of any right to recover from the Company any amount payable to him by the Company, or from applying in or towards satisfaction of any amount so payable any money which he may receive from the Company under this section.

CHAPTER IV.

TELEGRAPHS.

Lines worked by Railway Administration.

Telegraph requirements of railway administration.

[B. C. Ry. Contract, cl. 16 (modified).]
[Similar, B. & N.-W. Ry., cl. 10.

24. All such electric telegraph wires and telegraphic appliances as may be required for the purposes of a railway shall be provided and maintained by the Governor General in

[S. M. Ry., cl. 11. Different, Gd. Rys., cl. 4.]

Council, and the railway administration shall have the exclusive use thereof whilst it works the railway.

[B. C. Ry. Contract, cl. 16 (modified).]

Working of telegraphs by railway administration.

25. (1) The working of such telegraphs and telegraphic appliances as are provided for the use of the railway administration under the last preceding section shall be exclusively in the hands of the railway administration and at its cost; and the railway administration shall work such telegraphs in accordance with the rules which the Governor General in Council may, from time to time, lay down for observance under the powers conferred upon him by the Indian Telegraph Act for the time being in force.

[Similar, B. & N.-W. Ry., cls. 10 & 11. S. M. Ry., cls. 11 & 12.]

[I of 1876.]

(2) The railway administration shall pay such charges of the Government Telegraph Department, for rent, maintenance and inspection of the telegraphs and telegraphic appliances provided for its use, as the Governor General in Council may, from time to time, prescribe.

Lines worked by the Government Telegraph Department.

[B. C. Ry. Contract, cl. 15.]

Power to construct and work Government telegraphs on railways.

26. (1) The Governor General in Council may construct, maintain, use and work, as his own property, such electric telegraphs and telegraphic appliances as he may think fit upon the land of any railway or upon any part or parts thereof.

[Similar, B. & N.-W. Ry., cl. 9. S. M. Ry., cl. 10.]

(2) The Governor General in Council may, for such purposes, at all reasonable times, by his agents, workmen or others, enter on any line of railway or any part of any such line, and erect, maintain make, execute and do thereon all such buildings, machinery, works, acts and things as the Governor General in Council may consider necessary or proper, in relation to the construction, maintenance, use and working of any such telegraphs and telegraphic appliances.

(3) The Governor General in Council shall not, in respect to such matters or any of them, be subject to the control or interference of any railway administration.

(4) All buildings, machinery, works and appliances erected on, or brought on to, any railway, under or for the purposes of this section, by, or on behalf of, the Governor General in Council, shall be and remain the property of Her Majesty.

General.

[B. C. Ry., cl. 15.]

Free passes.

27. Every railway administration shall at all times furnish the Governor General in Council with such free passes as he may require for persons employed by him in or about or in connection with the erection, maintenance, working or inspection of the telegraphs and telegraphic appliances along its line of railway.

[Similar, B. & N.-W. Ry., cl. 9. S. M. Ry., cl. 10.]

[New.]

Free carriage of maintenance stores.

28. Every railway administration shall carry free of charge over its railway all maintenance stores of the Government Telegraph Department necessary for the maintenance of the telegraph lines and offices on the railway.

[New.]

Removal of, vegetation, &c., for proper insulation.

29. The Director General of Telegraphs, or any officer of the Government Telegraph Department authorised by him in that behalf, may cut down and remove, or otherwise deal with, all trees, branches of trees, grass or other vegetation, along any line of railway, which in his opinion are likely to interfere with the proper insulation of the telegraph wires:

[New.]

Provided that, if such trees, branches of trees, grass or other vegetation are on lands adjoining the railway but not in the possession of the railway administration, full compensation shall be paid to the owners and occupiers of the lands for any loss, injury or inconvenience sustained by them respectively by reason of such removal; the amount of which compensation, in case of any dispute about the same, shall be settled by arbitration.

CHAPTER V.

RAILWAY POLICE.

[B. C. Ry., cl. 17, in part (modified).]

Governor General in Council to provide and maintain police.

30. It shall be the duty of the Governor General in Council to provide and maintain for the purposes of any railway, whether under construction or open for traffic, a proper force of police.

[Different, B. & N.-W. Ry., cl. 12. S. M. Ry., cl. 18.]

[New. cf. sec. 74 (2) of XIII of 1884.]

Establishment, pay, pensions, &c., of police.

31. The establishment of such railway police shall consist of such number of officers and men, and the officers and men shall receive such pay, leave-allowances, gratuities and pensions, as the Governor General in Council, after consultation with the Magistrate of the district, the Inspector General of Police and the railway administration, may, from time to time, direct:

[S. of S.'s No. 119 Financial, dated 30th April 1884 (in part).]

Provided that the Governor General in Council may at any time employ temporarily any additional police which he may deem necessary in the interests of law and order.

[S. of S.'s No. 119 Financial, dated 30th April 1884 (in part).]

Division of cost of police.

32. The cost of all railway police, whether provided for the maintenance of law and order, or for the protection of railway property, shall be shared by the Governor General in Council and the railway administration in the ratio of 3 to 7.

CHAPTER VI.

OPENING OF RAILWAYS FOR PUBLIC TRAFFIC.

Notice of intention to open, and report by Inspector.

[IV of 1883, sec. 2, in part (modified).]

Railway when to be opened.

33. A railway, or portion or extension of, or addition to, a railway, shall not be opened for the public conveyance of passengers or goods until one month after the railway administration has given to the Governor General in Council notice in writing of the intention of opening the same, nor until the Governor General in Council has by order sanctioned the opening of the same:

Provided that the Governor General in Council may in any case, if he thinks fit, reduce the period of, or dispense with, the notice of intention to open a railway required under this section.

[New.]

Notice of intention to open.

34. At the time of giving notice of intention to open a railway, or portion or extension of, or addition to, a railway, the railway administration shall submit to the Inspector duplicate copies of all such information and of all such details of the construction of the railway as the Governor General in Council may, from time to time, require to accompany such notice.

[IV of 1883, sec. 2, in part (modified).]

Sanction not to be given until after report by Inspector.

35. *(1)* The sanction referred to in section 33 shall not be given until the Inspector has, after inspection of the railway, portion, extension or addition, as the case may be, reported to the Governor General in Council—

(*a*) that he has made a careful inspection of the line, works and rolling-stock;

(*b*) that the maxima and minima moving and fixed dimensions laid down by the Governor General in Council have not been infringed;

(*c*) that the weight of rails, strength of girder bridges and general structural character of the works up to rail level inclusive, are in accordance with the prescribed standard;

(*d*) that the line is sufficiently supplied with rolling-stock; and

(*e*) that the opening of the railway, portion, extension or addition, as the case may be, to public traffic in passengers or goods, will not in his opinion be attended with danger to the public using it or to the railway servants.

[IV of 1883, sec. 2 in part (modified).]

(2) Notwithstanding anything in this section, the Governor General in Council may, in any particular case or in any particular class of cases, by special order, confer on an Inspector power to sanction the opening to public traffic of a railway, portion, extension or addition, if in that officer's opinion the opening of the same will not be attended with danger to the public using it or to the railway servants.

[IV of 1883, sec. 2 in part.]

(3) In such case it shall not be necessary to make the report required by sub-section (1); but the Governor General in Council may, by order, cancel the sanction given under sub-section (2), or direct that the sanction shall be subject to such conditions as he thinks fit.

[IV of 1883, sec. 2 in part.]

(4) The sanction given under this section may be either absolute or subject to such conditions as the Governor General in Council, or the Inspector, as the case may be, thinks necessary for the safety of the public.

[IV of 1883, sec. 2 in part.]

(5) When sanction for the opening of any railway, or portion or extension of, or addition to, any railway is given subject to conditions, and the railway administration fails or neglects to fulfil, or comply with, those conditions, the sanction shall on the failure or neglect forthwith be deemed to be void, and the railway, or portion, or extension, or addition, as the case may be, shall not be used unless and until sanction is again obtained under this section for the opening thereof.

Subsequent Closure and Re-opening.

[IV of 1883, sec. 2 in part (modified).]

Material alterations necessitate fresh sanction for opening.

36. *(1)* Where a railway administration makes an alteration in any portion of its railway, previously opened for public traffic, and the alteration in any way materially affects the structural character of the railway below rail level, the railway administration shall give notice thereof to the Inspector.

(2) If the Inspector considers that the alteration is such as to cause danger to, or affect the safety of, passengers carried thereon or the railway servants, the portion so altered shall not be used for the public conveyance of passengers or goods unless and until sanction is obtained, in accordance with the provisions of section 35, for the opening of it.

[IV of 1883, sec. 2 in part (modified).]

Governor General in Council empowered to close railway.

37. When, after inspecting any railway or portion of a railway, or any rolling-stock used thereon, the Inspector reports to the Governor General in Council that in his opinion the use of the railway or portion or of any specified rolling-stock will be attended with danger to the public using it or to the railway servants, the Governor General in Council may, by order, direct that the railway or portion be closed for the public conveyance of passengers or goods, or that the rolling-stock so specified shall no longer be used, as the case may be.

[IV of 1883, sec. 2 (modified).]

Re-opening of railway.

38. *(1)* When a railway or portion of a railway has been closed under section 37, it shall not be re-opened for the public conveyance of passengers or goods unless and until it has been inspected, and its opening sanctioned, in accordance with the provisions of section 35.

[IV of 1883, sec. 2.]

(2) When the Governor General in Council has directed under section 37 that any rolling-stock shall not be used, the rolling-stock shall not be used unless and until the Inspector reports that it is fit for use and the Governor General in Council sanctions its use.

CHAPTER VII.

OBLIGATIONS RELATING TO THE PUBLIC SERVICE.

(A) Conveyance of Mails by railway.

[1 & 2 Vic., c. 98, sec. 1. 7 & 8 Vic., c. 85, sec. 11. 10 & 11 Vic., c. 85, sec. 16.]

Director General of the Post Office may require conveyance of mails.

39. The Director General of the Post Office may, subject to the general control of the Governor General in Council, by notice in writing delivered to any railway administration, require that any mails shall, after the opening of the railway to public traffic and from and after the day to be named in any such notice, be conveyed and forwarded by the railway administration on its railway, either by the ordinary passenger or goods trains, or by special trains, as need may be, and either with or without any guards appointed and employed by the Director General of the Post Office in charge thereof and any other officers of the Post Office.

[New.]

One mail train daily to serve postal arrangements.

40. The Governor General in Council may at any time require that a railway administration shall cause at least one passenger train each way daily to be so timed as to conveniently serve the postal arrangements of the empire; such train to be termed a mail train.

[1 & 2 Vic., c. 98, sec. 1. 7 & 8 Vic., c. 85, sec. 11. 10 & 11 Vic., c. 85, sec. 16.]

Railway administration to receive, convey and deliver mails.

41. *(1)* Every railway administration shall, from and after the day named in the notice referred to in section 39, provide sufficient carriages and engines on its railways for the

conveyance of the mails to the satisfaction of the Governor General in Council, and receive, take up, and convey, by such ordinary or special trains or otherwise, as need may be, all such mails as may for that purpose be tendered to it, or any of its officers, servants or agents, by any officer of the Post Office, and also receive, take up and convey, in and upon the carriages carrying such mails, the guards in charge thereof, and any other officers of the Post Office.

(2) Every railway administration shall receive, take up, deliver and leave the mails, guards and officers at such places in the line of the railway, and subject to all such reasonable regulations and restrictions, as the Governor General in Council may, in that behalf, from time to time, order or direct.

[1 & 2 Vic., c. 98, sec. 1. 7 & 8 Vic., c. 85, sec. 11. 10 & 11 Vic., c. 85, sec. 16 (modified).]

Speed and timing of trains carrying mails.

42. A railway administration shall not, except in case of absolute necessity or with the previous consent of the Director General of the Post Office, make any alteration in the rate of speed, or in the places, times and duration of stoppages, of any train by which the mails are conveyed, until the expiration of one month after notice of any such intended alteration has been given to the Director General of the Post Office.

[31 & 32 Vic., c. 119, sec. 36.]

Special trains exclusively for Post Office.

43. Where, in pursuance of any notice under this chapter, the mails are conveyed and forwarded by any railway administration on its railway by a special train, the Director General of the Post Office may, by notice in writing, require that the whole of that special train shall be appropriated to the service of the Post Office exclusively of all other traffic except such as he may sanction.

[1 & 2 Vic. c. 98, sec. 3 (modified).]

Provision of standard postal compartments and vans.

44. Every railway administration shall, on being required so to do by the Director General of the Post Office, provide and furnish (either in addition to, or in substitution for, the carriages aforesaid, as the Director General of the Post Office may direct) a separate compartment or separate compartments, of a standard size, to be from time to time approved by the Governor General in Council, for each railway or class of railways, or a separate van or separate vans, of a standard size and wheel base, to be from time to time approved by the Governor General in Council, for each railway or class of railways, and shall fit up every such compartment or van in such manner as the Director General of the Post Office may, from time to time, direct, for the purpose of collecting, sorting and distributing the mails.

[1 & 2 Vic., c. 98, sec. 3 (modified).]

Use of standard postal compartments and vans.

45. Every railway administration shall forward any such standard compartment or van by such trains and subject to all such reasonable regulations as the Director General of the Post Office may, in that behalf, direct; and every railway administration shall receive, take up and convey in any such compartment or van all such mails, guards and other officers of the Post Office as the Director General of the Post Office may reasonably require, and shall deliver and leave any mails, guards and other officers of the Post Office at such places on the line of the railway as the Director General of the Post Office may, in that behalf, from time to time, reasonably direct:

[New.]

Provided that the total weight of the mails which, and of the guards or other officers of the Post Office who, may under this section be required to be carried over any railway or portion thereof in any such standard compartment or van shall in no case, without the consent of the railway administration, exceed the net load allowed to be carried in other similar vehicles used for public traffic on the railway.

[1 & 2 Vic., c. 98, sec. 5.]

Instructions of Director General of the Post Office regarding conveyance of mails to be observed.

46. Every railway administration by whom any mails are required to be conveyed, and its officers, servants and agents, shall obey, observe and perform all such reasonable regulations respecting the conveyance, delivering and leaving of the mails, and of the guards and officers of the Post Office, on its railways, as the Director General of the Post Office may, in his discretion, from time to time, give or make:

Provided that no officer or servant of the Post Office shall interfere with, or give orders to, the engineer or other person having the charge of any engine upon any railway along which mails are conveyed; but if any cause of complaint arises the same shall be stated to the conductor or other officer of the railway having the charge of the train, or to the chief officer at any station upon the railway; and, in case of any default or neglect on the part of any officers or servants of the railway administration to comply with any reasonable regulations of the Director General of the Post Office, the railway administration shall be wholly responsible for the same.

[7 & 8 Vic., c. 85, sec. 11 (in part).]

Mail guard may take mails as luggage.

47. The Director General of the Post Office may send any mail guard with mails, not exceeding the weight of luggage allowed to any other passenger (or subject to the general rules of the railway administration working the railway for any excess of that weight), by any trains other than a mail train upon the same conditions as any other passenger.

[36 & 37 Vic., c. 48, sec. 18 (in part).]

Railway administration to give facilities for receipt and delivery.

48. (1) Every railway administration shall afford all reasonable facilities for the receipt and delivery of mails at any of its stations without requiring them to be booked or interposing any other delay.

(2) Where the mails are in charge of a guard appointed by the Director General of the Post Office, every railway administration shall permit that guard, if he thinks fit, to receive and deliver them at any station by himself or his assistants, rendering him nevertheless such aid as he may require.

[New.]

Postal accommodation at railway stations.

49. Every railway administration shall, on the conditions specified in section 52, provide such accommodation for the collection, sorting and distribution of mails, or for other purposes of the Post Office, as the Director General of the Post Office may, subject to the general control of the Governor General in Council, from time to time reasonably require at the stations along its railway, and shall allow the Director General of the Post Office to place letter-boxes at its stations.

Terms on which Postal Services are to be rendered.

[New.] **50.** The conveyance of mails over any railway shall be conducted on the following terms and conditions:—

Carriage of mails.

(*a*) Every railway administration shall convey the mails, including such guards and other officers of the Post Office as the Director General of the Post Office may, under section 15, reasonably require to be conveyed in a standard compartment or van, free of cost over its railway up to a limit of one standard postal van (as described in section 44) by any ordinary passenger train (including the mail train, if any, referred to in section 40).

(*b*) The Director General of the Post Office shall pay for any vans, carriages, compartments, or other conveniences, additional to the above, required for, or in connection with, the conveyance of mails, at such reasonable rates, to cover haulage and other charges, as may from time to time be mutually agreed upon between the Governor General in Council and each railway administration.

(*c*) Where the Director General of the Post Office sends any mails in passenger or goods trains, under the charge of a railway administration, and without any guards of the Post Office, he shall pay for the conveyance of such mails according to weight, at such reasonable rates as may from time to time be mutually agreed upon between the Governor General in Council and each railway administration.

(*d*) When mails are required to be conveyed by special train, the Director General of the Post Office shall pay for the special train such reasonable charges as may from time to time be mutually agreed upon between the Governor General in Council and each railway administration.

[New.] **51.** (*1*) Every railway administration shall provide and maintain at its own cost the standard postal compartments and vans, to be supplied under section 44 on the requisition of the Director General of the Post Office, inclusive of all special fittings and appliances required in or about such compartments or vans for the collection, sorting and distribution of mails, or for any other purposes of the Post Office.

Construction, fitting and maintenance of standard postal compartments and vans.

(*2*) The Director General of the Post Office shall pay to the railway administration, in lieu of rent and maintenance, such reasonable charges at a rate, not exceeding 10 per cent. per annum, as may from time to time be mutually agreed upon between the Governor General in Council and each railway administration, on the total capital cost of each such compartment or van.

[New.] **52.** (*1*) Every railway administration shall provide and maintain at its own cost the accommodation required at any railway station for the purposes of the Post Office, under section 49.

Provision of postal accommodation at railway stations.

(*2*) The Director General of the Post Office shall pay to the railway administration, in lieu of rent and maintenance, such reasonable charges, at a rate not exceeding 7½ per cent. per annum, as may from time to time be mutually agreed upon between the Governor General in Council and each railway administration, on the total capital cost of all such accommodation so provided.

53. The Director General of the Post Office may at any time notify to any railway administration that any standard compartment or van referred to in section 51, or any accommodation of the nature referred to in section 52, is no longer required for the purposes of the Post Office; and the original cost of providing such standard compartment or van or such accommodation shall thereupon be adjusted as may be mutually agreed upon between the Governor General in Council and the railway administration; and the liability of the Post Office for rent and maintenance charges as aforesaid on the capital cost of such standard compartment or van, or of such accommodation, shall thereupon cease. [New.]

Director General of the Post Office may notify that any standard compartment or van, or any postal accommodation at a station, is no longer required by him.

54. It shall be lawful for the Governor General in Council or for any railway administration, at any time within six months after the expiration of the first five years during which any mutual agreement for regulating the payment to be made by the Post Office for any services rendered under this chapter shall have been in force, or within six months after the expiration of any subsequent term of five years during which any such agreement shall have been in force, to require a revision of the terms for the payment of such services; and the terms shall thereupon be revised as may be mutually agreed upon between the Governor General in Council and the railway administration, and the revised terms so agreed upon shall come into force on the expiration of six months from the date of the revised agreement. [New.]

Revision of mutual agreements regulating payments by Post Office.

55. In case of difference of opinion, the difference shall be determined by arbitration, but so that the services to be performed by any railway administration under this chapter be not suspended, postponed or deferred by reason of such conditions or remuneration, if any, not having been then fixed or agreed on between the Director General of the Post Office and the railway administration, or by reason of the award on any reference to arbitration to determine the conditions or remuneration not having been then made. [1 & 2 Vic., 98, sec. 6 part).]

Differences to be settled by arbitration.

(B) Conveyance of Her Majesty's forces by railway.

56. Whenever it is necessary to move any of Her Majesty's forces, [or any engineers, artizans and other persons, when employed in the business of the Government,] by any railway, the railway administration shall, on the production of a route or order for their conveyance signed by or on behalf of the proper authority, convey such forces, [and persons,] respectively, with their baggage, stores, arms, ammunition and other necessaries and things, by the ordinary trains on its railway at the usual hours of starting, or by special trains, as may be required in each case by the proper authority; and such forces [and persons] shall [16 & 17 Vi c. 69, sec. in part (moc fied).]

General conditions.

respectively be conveyed at rates calculated as follows, namely:—

[B. C. Ry. Contract, cl. 13.] [Similar, Gd. Rys., cl. 19. Different, B. & N.-W. Ry., cl. 27. S. M. Ry., cl 22.]

(a) All commissioned officers in Her Majesty's forces [and persons in a similar station in life] shall be entitled to travel in first class carriages at second class fares. All persons in Her Majesty's forces, [engineers and artizans] under the rank of commissioned officers shall be entitled to travel in second class carriages at the lowest fares, [and all other such persons aforesaid, including prisoners and paupers, at the lowest fares].

[New.]

(b) The lowest fares on any railway shall be held to be—

(i) by a mail train, the lowest fare charged to the public for a passage by that train;

(ii) by troop extra train or by other passenger train (not a mail train), the lowest fare charged to the public by any passenger train on the particular railway travelled over.

[B. C. Ry. Contract, cl. 13(modified).] [Similar, Gd. Rys., cl. 19.]

(c) For every one hundred men conveyed at the lowest fares two tons of luggage, and for any number less than one hundred, twenty seers of luggage per man, shall be conveyed free of charge, and persons entitled to travel first class shall be allowed the ordinary amount of luggage taken by a first class passenger free of charge.

[B. C. Ry. Contract, cl. 13 (modified).] [Similar, Gd. Rys., cl. 19.]

(d) Every railway administration shall at all times, when and as required by Government, convey all military and naval establishments not hereinbefore specified, all horses and other animals used for military purposes, guns, military stores and equipments, and all public stores of what kind soever, at rates, to be from time to time mutually agreed upon between the Governor General in Council and each railway administration, not exceeding the lowest rates for the time being ordinarily chargeable by the railway for the carriage of the animals, goods and stores respectively:

[New.]

Provided that when a special train is used, on the requisition of the proper authority, for the conveyance of Her Majesty's forces [and other persons aforesaid] the remuneration to be paid to the railway administration for the use of the special train, calculated on the above basis, shall be subject to a minimum charge to be from time to time mutually agreed upon between the Governor General in Council and each railway administration.

[B. C. Ry. Contract, cl. 13.]* [Similar, B. & N.-W. Ry., cl. 29. S. M. Ry., cl. 24. Gd. Rys., cl. 19.]

Priority of demands of Governor General in Council.

57. The several privileges of conveyance and carriage hereby stipulated for shall at all times be enjoyed in preference to, and with priority over, the public use of the said lines.

(C) *Conveyance of Bullion and Coin by railway.*

[B. C. Ry., cl. 14 (modified).] [Similar, B. & N.-W. Ry., cl. 28. S. M. Ry., cl. 23.]

Conveyance of bullion and coin.

58. Every railway administration shall convey gold and silver bullion and coin and copper coin belonging to Government, and the persons in charge thereof, at special rates and on special conditions to be from time to time agreed upon between the Governor General in Council and each railway administration.

(D) *Power of Government on occasions of emergency to take possession of railways.*

[34 & 35 Vic., c. 86, sec. 16.]

Power of Government on occasions of emergency to take possession of railways.

59. (1) When the Governor General in Council declares that an emergency has arisen in which it is expedient for the public service that the Government of India should have control over the railways in India, or any of them, the Governor General in Council may, by order, empower any person or persons named in the order to take possession in the name or on behalf of the Government of India of any railway in India, and of the plant belonging thereto, or of any part thereof, and to take possession of any plant without taking possession of the railway itself, and to use the same for the service of the Government of India at such times and in such manner as the Governor General in Council may direct; and the railway administration, its officers and servants, shall obey the directions of the Governor General in Council as to the user of such railway or plant as aforesaid for the service of the Government of India.

[34 & 35 Vic., c. 86, sec. 16 (modified).]

(2) Any order given by the Governor General in Council in pursuance of this section shall remain in force for any period named in the order, not exceeding one month, and may be renewed from month to month so long as, in the opinion of the Governor General in Council, the emergency continues.

[34 & 35 Vic., c. 86, sec. 16.]

(3) There shall be paid to any railway administration, whose railway or plant may be taken possession of in pursuance of this section, such full compensation, for any loss or injury it may have sustained by the exercise of the powers of the Governor General in Council under this section, as may be agreed upon between the Governor General in Council and the railway administration, or, in case of difference, as may be settled by arbitration.

[34 & 35 Vic., c. 86, sec. 16.]

(4) Where any railway or plant is taken possession of in the name or in behalf of the Government of India in pursuance of this section, all contracts and engagements between the railway administration and its officers and servants, or between the railway administration and any other person, in relation to the working or maintenance of the railway, or in relation to the supply or working of the plant of the railway, which would, if such possession had not been taken, have been enforceable by or against the railway administration, shall, during the continuance of such possession, be enforceable by or against the Government of India.

(5) For the purposes of this section—

[34 & 35 Vic., c. 86, sec. 16.]

"railway" shall include any tramway, whether worked by animal or mechanical power, or partly in one way and partly in the other, and any stations, works or accommodation belonging to or required for the working of the railway or tramway;

[34 & 35 Vic., c. 86, sec. 16.]

"plant" shall include any engines, rolling-stock, horses or other animals or mechanical power, and all things necessary for the proper working of a railway or tramway, which are not included in the word "railway."

CHAPTER VIII.

WORKING OF RAILWAYS.

Opening of railway and subsequent maintenance.

[B. & N.-W. Ry., cl. 15 (modified).] [Similar, B. C. Ry., cl. 6. S. M. Ry., cl. 9.] [Gd. Rys., cl. 5.]

Completion and opening.

60. Every railway administration shall open its railway throughout, or any portion thereof, for public traffic when and so soon as the Governor General in Council has authorized its opening on the report of the Inspector, as provided in section 35 of this Act, that the railway, or portion, is fit for the conveyance of passengers

or goods and properly equipped with rolling-stock, plant, and machinery.

[IV of 1879, sec. 4 (modified).]

61. The authority of the Governor General in Council to open a railway for public traffic shall be held to include permission to use on the railway locomotive engines or other motive power, and carriages and wagons to be drawn or propelled thereby.

Sanction for use of locomotive engines, carriages, &c.

[B. & N.-W. Ry., cls. 16 to 18.] [Similar, B. C. Ry., cl. 8. S. M. Ry., cls. 13 to 15. Gd. Rys., cl. 13.]

62. When any railway, or portion thereof, has been authorized by the Governor General in Council to be opened for public traffic the railway administration shall—

Maintenance of the railway.

(*a*) keep the railway or portion in good repair, in good working condition, and sufficiently supplied with rolling-stock, plant, machinery, and stores;

(*b*) keep the rolling-stock and fixed and moveable machinery and plant for the time being belonging to the railway or portion in good repair and in good working condition, and

(*c*) maintain a sufficient staff for the purposes of the railway or portion.

[New.]

63. In the case of State railways, and in the case of any company's railway where the special agreement so provides, or in any case if any railway company so desires, the Inspector shall, after proper inspection, countersign, or, if necessary, qualify, the periodical certificates, given by the responsible officers of the railway administration, regarding the proper maintenance of the way, works, and stock during the period to which the certificate refers.

Maintenance certificates.

Additional works subsequent to opening.

[B. & N.-W. Ry., cl. 22.] [Similar, B. C. Ry., cl. 9. S. M. Ry., cl. 16. Gd. Rys., cls. 4 & 24.]

64. *(1)* The Governor General in Council may, from time to time, after any railway or portion of a railway has been opened for public traffic, by notice in writing, require the railway administration to carry out any reasonable alteration, improvement, or addition which may in his opinion be necessary, for the safety of passengers or of the public or for the effectual working of the railway or portion, to be made in or to any part of the railway or portion or any of the stations or works belonging thereto.

Governor General in Council may require additions and alterations.

(2) The notice shall specify the alteration, improvement, or addition required, and shall also in general terms describe the works to be executed for the purpose of effecting the same.

[B. & N.-W. Ry., cl. 22.] [Similar, B. C. Ry., cl. 9. S. M. Ry., cl. 16. Gd. Rys., cls. 4 & 24.]

65. All land which may be required for the purpose of the works referred to in the last foregoing section shall be provided by the Governor General in Council, and all such land shall, when in the possession of the railway administration, be as between the Governor General in Council and the railway administration subject as nearly as may be to the stipulations and provisions to which it would have been subject had it been land of which possession was given to the railway administration by the Governor General in Council for the original construction of the railway or of works necessary or proper for the purposes thereof.

Provision of land when required.

[B. & N.-W. Ry., cl. 22.] [Similar, B. C. Ry., cl. 9. S. M. Ry., cl. 16. Gd. Rys., cls. 4 & 24.]

66. On receiving any such notice, and on obtaining possession of such land, if any, as may be requisite for the prosecution of the works described in the notice, the railway administration shall, with all reasonable speed, execute those works.

Prosecution of works.

General rules for working a railway.

[IV of 1879, sec. 8.]

67. *(1)* Every railway administration shall make general rules consistent with this Act for the following purposes (that is to say):

Railway administration to make rules.

[IV of 1879, sec. 8.]

(*a*) for regulating the mode in which, and the speed at which, carriages and wagons used on the railway are to be moved, or propelled;

[IV of 1879, sec. 8.]

(*b*) for regulating the maximum number of passengers which each carriage and compartment may carry, and the mode in which such number shall be denoted thereon;

[IV of 1883, sec. 3.]

(*c*) for regulating the provision to be made for the accommodation and convenience of passengers;

[IV of 1879, sec. 8.]

(*d*) for declaring what shall be deemed to be, for the purposes of this Act, dangerous goods;

[IV of 1883, sec. 3.]

(*e*) for regulating the conduct of the railway servants; and

[IV of 1879, sec. 8.]

(*f*) generally for regulating the travelling upon, and the use, working, and management of, the railway;

[IV of 1879, sec. 8.]

(2) Any such rule may contain a provision that any person committing a breach of it shall be liable to a fine which may extend to fifty rupees, or, in default of payment of such fine, to simple imprisonment for a term which may extend to two months.

[IV of 1879, sec. 8.]

(3) A rule made under this section shall not take effect until it has received the sanction of the Governor General in Council.

[IV of 1879, sec. 8.]

(4) Every such rule shall be published in the *Gazette of India*, and shall be otherwise notified to the railway servants and the public in such manner as the Governor General in Council, from time to time, directs.

[IV of 1879, sec. 8.]

(5) The Governor General in Council may at any time alter or cancel any rule made under this section.

[IV of 1879, sec. 9 (modified).]

68. *(1)* Every railway adminstration shall cause an abstract of this Act, and a copy of the time tables and tariff of charges for both passengers and goods, and of the scale of terminal charges, if any, which it may, from time to time, publish for its railway, to be exhibited in some conspicuous place at each station of the railway, so that they may be easily seen and read.

Copy and translation of Act, &c., to be shown at stations, &c.

[IV of 1879, sec. 9 (modified).]

(2) All such documents shall be so exhibited in English and in the principal vernacular language of the district in which the station is situate, and in such other language, if any, as the Governor General in Council may direct, and copies of the time table and tariff of charges shall be kept for sale at each station of the railway.

Working arrangements.

[B. & N.-W. Ry., cl. 23 (in part).] [Similar, B. C. Ry., cl. 11. S. M. Ry., cl. 19. Gd. Rys., cl. 8.]

Working of railway and train service.

69. From and after the time when any railway has been opened throughout for public traffic, and in the case of a railway company until the special agreement terminates by efflux of time or otherwise, the railway administration shall keep the railway so opened and work the same and carry on thereon the business of carriers of passengers and goods, and in particular shall, unless hindered or prevented from so doing by accident or any other matter not within its own control, run daily from each extremity of the line of railway and of the several branches respectively to the other extremity of the same line of railway and the same several branches respectively at least one train carrying passengers.

[New.]

System of working train service.

70. Every railway administration shall conduct its train service on a system of working to be from time to time approved by the Governor General in Council.

[B. & N.-W. Ry., cl. 24.] [Similar, B. C. Ry., cl. 8. S. M. Ry., cl. 21. Gd. Rys., cls. 8 & 10.]

Governor General in Council may require alterations in working.

71. The Governor General in Council may, from time to time, if he thinks any alteration or improvement in the working of any railway or any part thereof necessary for the safety of passengers or of the public or for the effectual working of the railway, require the railway administration to effect the alteration or improvement, and the same shall thereupon be effected by the railway administration.

[New.] [cf. General rule No. 29.]

Maximum speed of trains.

72. The Governor General in Council may, from time to time, lay down for any railway or portion thereof a maximum rate of speed for passenger and mixed or goods trains.

[31 & 32 Vic., c. 119, sec. 22.]

Communication between passengers and the railway servants.

73. Every railway administration shall provide and maintain in good working order, in every train worked by it which carries passengers and travels more than twenty miles without stopping, such efficient means of communication between the passengers and the railway servants in charge of the train as the Governor General in Council may approve.

[New.]

Latrine accommodation in passenger carriages.

74. Every railway administration shall provide latrine accommodation in its passenger carriages of all classes, when used for through journeys of a greater length than 50 miles.

[New.]

Accommodation for carriage of dogs in passenger trains.

75. Every railway administration shall provide in all its passenger trains suitable and sufficiently roomy and well ventilated dog-boxes or other accommodation for live animals, such as dogs, cats, birds, or the like, which passengers may reasonably require to be conveyed in the same train with themselves.

Tolls and Charges.

[New.] [cf. B.&N.-W. Ry., cl. 25. B.C. Ry., cl. 12. S. M. Ry., cl. 20. Gd. Rys., cl. 8.]

Rates and fares.

76. Every railway administration shall charge such rates and fares for the carriage of goods, animals and passengers on its railway, or so much thereof as has for the time being been opened for public traffic, as may from time to time be fixed by the railway administration, subject to the limits, if any, laid down in the special agreement.

[B. & N.-W. Ry., cl. 25 in part (modified).]

Provided that the Governor General in Council may require that the charges for the conveyance of salt and coal and food-grains on any railway be reduced to any rate not below *one-seventh of a pie* per maund per mile for full wagon-loads carried not less than 100 miles, and may also require that passengers be conveyed on any railway at any rate not below *one and a half pies* per mile in closed carriages provided with seats.

[Contract for working R. M. Ry. by B. B. & C.I. Ry. Co., cl. 16.]

Alternative.

Provided that the Governor General in Council may, from time to time, fix and vary both maximum and minimum rates and fares with a reasonable difference between the maximum and minimum, for the carriage of goods and passengers over any railway, and the rates and fares to be charged by the railway administration for the carriage of goods and passengers shall not exceed the maximum and shall not be less than the minimum rates and fares which may, from time to time, be fixed by the Governor General in Council under this section.

[New.]

Free allowance of luggage.

77. The free allowance of personal luggage, not being merchandise or other articles carried for hire or profit, shall in no case be less than 15 seers weight for each passenger.

[New.]

Children.

78. Children not above three years old accompanying passengers shall be carried free on all railways. Children above three years and under twelve years old shall be carried on all railways at half the ordinary fares.

[New.] [Similar, B. C. Ry., cl. 13.]

Classification of goods.

79. The classification of goods shall be arranged by every railway administration subject to the approval of the Governor General in Council.

[Mr. Chamberlain's Ry. Reg. Bill, 1884, sec. 21.]

Terminal charges.

80. (*1*) It shall be lawful for any railway administration to charge a reasonable sum for station terminals, subject to the sanction of the Governor General in Council.

[Mr. Chamberlain's Ry. Reg. Bill, 1884, sec. 21.]

(*2*) In this section "station terminals" means charges in respect of the provision of stations, sidings, wharves, depôts, warehouses, cranes, and other similar matters.

[Hodges, page 466.]

(*3*) But a station shall not be considered a terminal station in regard to any goods conveyed on any railway unless the goods have been received thereat direct from the consignor of the goods, or are directed to be delivered thereat to the consignee.

[31 & 32 Vic., c. 119, sec. 17.]

Railway administration to explain charges.

81. Where any charge is made by a railway administration in respect of the conveyance of goods over its railway, it shall, on application in writing, within one week after payment of the said charge, made to it by the person by whom or on whose account the charge has been paid, within fourteen days after the receipt of the application, render an account to the applicant, distinguishing how much of the charge comes under each of the following heads:—

(*a*) The conveyance of the goods on the railway, including therein tolls for the use of the railway, for the use of carriages and for locomotive power,

(*b*) Loading and unloading, covering and other expenses,

(c) Collection and delivery;

but without particularizing the several items of which the charge under each head consists.

[31 & 32 Vic., c. 119, sec. 18.]

Tolls where two railways are worked by one administration.

82. Where two railways are worked by one railway administration, then in the calculation of tolls and charges for any distances in respect of traffic (whether passengers, animals, goods, carriages, or vehicles) conveyed on both railways, the distances traversed shall be reckoned continuously on those railways as if they were one railway.

[B. & N.-W. Ry., cl. 30.] [Not in other contracts.]

Undue preference.

83. No railway administration shall, as between members of the general public, make or give any undue or unreasonable preference or advantage to or in favour of any particular person or company or any particular description of traffic in any respect whatsoever, or subject any particular person or company or any particular description of traffic to any undue or unreasonable prejudice or disadvantage in any respect whatsoever.

Running powers, facilities, and accommodation for other railways.

[B. & N.-W. Ry., cl. 32.] [Similar. B. C. Ry., cls. 36 & 37. S. M. Ry., cl. 43.]

Governor General in Council may require running powers.

84. The Governor General in Council may, from time to time, require any railway administration to allow the use of its railway or any part or parts thereof for the passage of engines and trains belonging to other railways of the same gauge upon the payment of reasonable tolls and under reasonable conditions and restrictions.

[5 & 6 Vic., c. 55, sec. 11.]

Where two or more railways fail to agree regarding conduct of joint traffic, Governor General in Council may decide dispute.

85. Where two or more railway administrations whose railways have a common terminus or a portion of the same line of rails in common, or which form separate portions of one continued line of railway communication, are not able to agree upon arrangements for conducting at such common terminus, or at the point of junction between them, their joint traffic with safety to the public, the Governor General in Council, upon the application of either of the parties, may decide the questions in dispute between them, so far as the same relate to the safety of the public, and may order and determine whether the whole or what proportion of the expenses attending on such arrangements shall be borne by either of the parties respectively.

[B. & N.-W. Ry., cl. 33 (modified).] [Similar, B. C. Ry., cls. 36 & 37. S. M. Ry., cl. 47.]

Joint use of stations.

86. The Governor General in Council may, from time to time, require any railway administration to allow the use of any of the stations belonging to its railway for the accommodation of the traffic of any other railway, whether of the same or any other gauge, upon the payment of reasonable tolls and under reasonable conditions and restrictions.

[B. & N.-W. Ry., cl. 34 (modified).] [Similar, B. C. Ry., cl. 37. S. M. Ry., cl. 46.]

Interchange of traffic and rolling-stock, and through-booking.

87. The Governor General in Council may, from time to time, require any railway administration to make reasonable arrangements for the interchange of rolling-stock, and for the interchange and, if necessary, transhipment of traffic, with railways belonging to other railway administrations, and for through-booking.

[B & N.-W. Ry., cl. 35.]

Clearing through traffic.

88. Every railway administration shall comply with all regulations from time to time prescribed by the Governor General in Council for clearing through traffic with railways belonging to other railway administrations.

[42 & 43 Vic., c. 41, sec. (d).] [Similar, S. M. Ry., cl. 44 & 45.]

Agreements with the Governor General in Council for construction or lease of rolling-stock, &c.

89. A railway administration may make and carry into effect agreements with the Governor General in Council for the construction of rolling-stock, plant, or machinery used on, or in connection with, railways, or for leasing or taking on lease any rolling-stock, plant, machinery, or equipments required for use on a railway.

Working agreements.

[42 & 43 Vic., c. 41, sec. 2, and 26 and 27 Vic., c. 92, sec. 22.]

Powers of railway administrations to enter into working agreements

90. Any railway administration may, from time to time, make with the Governor General in Council, and carry into effect, or, with the sanction of the Governor General in Council, make with any other railway administration, and carry into effect, any agreement with respect to any of the following purposes, namely:—

(a) the working, use, management and maintenance of any railway or part of a railway;

(b) the supply of rolling-stock and machinery necessary for any of the purposes hereinbefore mentioned, and of officers and servants for the conduct of the traffic of any such railway or part;

(c) the payments to be made and the conditions to be performed with respect to such working, use, management and maintenance;

(d) the interchange, accommodation and conveyance of traffic on, coming from, or destined for, the respective railways of the contracting parties, and the fixing, collecting, apportionment and appropriation of the revenues arising from that traffic;

(e) generally the giving effect to any such provisions or stipulations with respect to any of the purposes hereinbefore mentioned as the contracting parties may think fit and mutually agree on.

Provided that in every such case the authority so to agree, or the agreement when entered into, shall not affect any of the tolls which the railway administrations parties thereto are, from time to time, respectively authorized to demand and receive from any person or company; but all such persons and companies shall, notwithstanding the agreement, be entitled to the use and benefit of the railways of any such railway administrations parties to the agreement, on the same terms and conditions, and on payment of the same tolls as they would be if the authority had not been given or the agreement had not been entered into.

Power to establish ferries, roadways on bridges, roads, and other means of transport.

[B. and N.-W. Ry., cls. 36 & 37 (in part). 42 & 43 Vic., c. 41, sec. 4.]

Establishment of ferries, roadways, &c., for accommodation of traffic.

91. A railway administration may, from time to time, with the sanction of the Governor General in Council, exercise all or any of the following powers:—

(a) It may establish, for the accommodation of the traffic of its railway, any ferry properly equipped with boats and fixed and moveable machinery and plant of good quality and adequate in quantity to work the ferry.

(*b*) It may work any ferry established by it under this section for purposes other than the accommodation of the traffic of the railway.

(*c*) It may provide and maintain on any of its bridges roadways for foot passengers, horses, cattle, carriages, carts, or other traffic.

(*d*) It may construct and maintain roads for the accommodation of traffic passing to or from its railway.

(*e*) It may provide and maintain any means of transport which may be required for the reasonable convenience of passengers or goods carried or to be carried on its railway.

(*f*) It may charge tolls on the traffic using such ferries, roadways, roads, or means of transport as it may provide under this section, according to tariffs to be arranged from time to time with the sanction of the Governor General in Council :

Provided that nothing in this section shall affect section 143 of the Army Act of 1881.

CHAPTER IX.

CARRIAGE OF TRAFFIC.

Carriage of property.

[New.]

Tare weight and maximum load to be exhibited on wagons, &c.

92. (*1*) Every railway administration shall accurately fix and determine the tare weight and maximum permissible load of every wagon or truck in its possession; and shall exhibit the figures representing the weight and load so determined in a conspicuous manner on the outside of every such wagon or truck.

(*2*) Every person owning a wagon or truck, which passes over a railway, shall similarly fix and exhibit the tare weight and maximum permissible load of every such wagon or truck:

Provided that the gross weight of any such wagon or truck bearing on the rails shall not, when distributed, exceed the maximum weight per axle from time to time fixed by the Governor General in Council for each railway or class of railway.

[IV of 1879, sec. 10.]

[To be considered in connection with recent decisions as to the law of common carriers in India.]

Special contract limiting liability.

93. (*1*) Every agreement purporting to limit the obligation or responsibility imposed on a carrier by railway by the Indian Contract Act, 1872, sections 151 and 161, in the case of loss, destruction, or deterioration of, or damage to, property shall, in so far as it purports to limit such obligation or responsibility, be void, unless—

(*a*) it is in writing signed by, or on behalf of, the person sending or delivering such property, and

(*b*) it is otherwise in a form approved by the Governor General in Council.

[IV of 1879, sec. 2.]

(*2*) Nothing in the Carriers' Act, 1865, shall apply to carriers by railway.

[New.]

Limit of period of liability for overcharge.

94. Notwithstanding anything to the contrary contained in the Indian Limitation Act, 1877, a person shall not be entitled to a refund of overcharges of freight on goods carried by railway, unless his claim is preferred in writing to the railway administration within six months from the date on which the goods were delivered for carriage by railway, or within six months from the date of payment of the overcharges if the payment was, at the time, made under protest by the consignor or consignee.

[IV of 1879, sec. 11.]

No liability for loss of gold, silver, &c., unless value declared and increased charge accepted.

95. (*1*) When any property mentioned in the second schedule hereto annexed is contained in any parcel or package delivered to a carrier by railway, the carrier shall not be liable for loss, destruction, or deterioration of, or damage to, such property, unless at the time of delivery the value and nature thereof have been declared by the person sending or delivering the same, and an increased charge for the safe conveyance of the same, or an engagement to pay such charge, has been accepted by some railway servant specially authorized in this behalf.

[IV of 1879, sec. 11.]

(*2*) When any property of which the value and nature have been declared under this section has been lost, destroyed, or damaged, or has deteriorated, the compensation recoverable for such loss, destruction, damage, or deterioration shall not exceed the value so declared.

[IV of 1879, sec. 12.]

No liability for unbooked luggage.

96. A carrier by railway shall in no case be answerable for loss, destruction, or deterioration of, or damage to, any passenger's luggage, unless a railway servant has booked and given a receipt for the same.

[IV of 1879, sec. 13.]

Plaintiffs not required to prove negligence.

97. In any suit against a carrier by railway for compensation for loss, destruction, or deterioration of, or damage to, property delivered to a railway servant, it shall not be necessary for the plaintiff to prove in what manner such loss, destruction, deterioration, or damage was caused.

[IV of 1879, sec. 14.]

Lien for money due for carriage, &c., of property.

98. If any person fails to pay on demand any sum due by him to a carrier by railway for conveyance of any property by railway, or for the custody of any property, or for demurrage or wharfage in respect of the same, the railway administration may detain the whole or any part of such property, or, if the same has been removed from the railway, any other property of such person then on such railway or thereafter coming into the possession of the railway administration;

and may also sell by public auction, in the case of perishable property at once, and in the case of other property on the expiration of at least fifteen days' notice thereof published in one or more of the local newspapers, or, where there are no such newspapers, in such manner as the Local Government may, from time to time, direct, sufficient of such property to produce the sum payable as aforesaid, and all charges and expenses of such detention, notice, and sale, or, if such person fails to remove from the railway within a reasonable time any property so detained, the whole of such property;

and may, out of the proceeds of the sale, retain the sum so payable, together with all charges and expenses aforesaid, rendering the surplus, if any, of such proceeds, and so much of the property (if any) as remains unsold, to the person entitled thereto;

or such carrier may recover any such sum by suit.

Written account of property to be given on demand.

99. The owner or person having the care of any property which has been carried upon any railway, or is brought into any station or warehouse for the purpose of being carried upon a railway, shall, on demand by any railway servant appointed in this behalf by the railway administration, deliver to him an exact account in writing signed by such owner or person of the quantity and description of such property.

Dangerous goods.

100. (*1*) No passenger shall take with him on a railway, and no person shall deliver or tender for carriage upon any railway, any dangerous luggage or goods without giving notice of their nature to a railway servant, or, in the case of luggage or goods delivered or tendered for carriage, distinctly marking their nature on the outside of the package containing the same.

(*2*) Any railway servant may refuse to carry upon a railway any luggage or parcel which he has reason to believe may contain dangerous goods, and may require such luggage or parcel to be opened to ascertain the fact previously to carrying the same.

(*3*) If any such luggage or parcel is received for the purpose of being carried upon a railway, any railway servant may stop the transit thereof until he is satisfied as to the nature of its contents.

Liability for goods booked by ship.

Restrictions or contracts limiting liability for goods booked by ship.

101. Where a railway administration under a contract for carrying animals or goods by sea procures the same to be carried in a ship not belonging to the railway administration and loss or damage happens to the animals or goods during the carriage thereof in the ship, the railway administration shall be answerable in damages in respect of the loss or damage in like manner as it would be answerable if the ship had belonged to itself.

Limit of liability for persons and goods carried by ship.

102. Where a railway administration under a contract for carrying persons, animals, or goods by sea procures them to be carried in any ship not belonging to the railway administration, it shall be answerable for loss of life or personal injury, or in respect of loss or damage to such animals or goods, to no greater amount than if the ship had belonged to itself; provided that the loss or damage has happened during the carriage of the same in the ship, proof whereof shall lie upon the railway administration.

Carriage of passengers.

Maximum number per compartment.

103. Every railway administration shall fix, subject to the approval of the Governor General in Council, the maximum number of ordinary passengers and of troops that may be carried in each compartment of every description of carriage, and shall exhibit the number so determined in a distinct and conspicuous manner inside each compartment of the 1st and 2nd class in English, and both inside and outside each compartment of all classes inferior to the second class, in English as well as in the vernacular language most commonly used in the districts through which the railway passes.

Passengers on payment of fares to be furnished with tickets.

104. Every person desirous of travelling on a railway shall, upon payment of his fare, be supplied with a ticket, specifying in English and the principal vernacular language of the district in which the ticket is issued, the class of carriage for which, and the place from and place to which, the fare has been paid, and the amount of such fare.

Tickets to be shown and given up on demand.

105. Every passenger shall, when required, show his ticket to any railway servant duly authorized to examine the same, and shall deliver up such ticket upon demand to any railway servant duly authorized to collect tickets.

Fares and tickets at intermediate stations.

106. (*1*) At intermediate stations, the fares shall be deemed to be accepted and the tickets supplied only upon condition that there be room in the train for which the tickets are supplied.

(*2*) If there is not room for all the passengers to whom tickets have been supplied, those who have obtained tickets for the longest distance shall have the preference, and those who have obtained tickets for the same distance shall have the preference according to the order in which they have received their tickets:

Provided that all officers and troops of Her Majesty on duty, and all other persons on the business of the Government, who, by virtue of this Act or of the special agreement or, in the case of a railway worked by Government, of any direction of the Governor General in Council, are entitled to be conveyed on a railway in preference to, or in priority over, the public, shall be entitled to such preference and priority without reference to the distance for which, or the order in which, they have received their tickets.

(*3*) Any passenger to whom a ticket has been supplied at any station and for whom there is no room shall, on returning the ticket within a reasonable time after its issue, be entitled to have his fare at once refunded.

Fares to be prepaid.

107. Except with the permission of the railway administration or of such officer as it appoints in this behalf, no person shall enter any carriage used on any railway for the purpose of travelling therein without having first paid his fare and obtained a ticket.

Power to remove persons suffering from infectious disease.

108. (*1*) Any passenger found suffering from an infectious disease in a railway carriage or in any place on a railway may, if his remaining in such carriage or place is likely to spread the infection of such disease, be removed from such carriage or place by any railway servant.

(*2*) Any passenger so removed who has paid his proper fare to or at the place at which he is so removed, shall be entitled, on returning his ticket, to have refunded so much of his fare as is paid in respect of the distance between the place at which he is removed and his place of destination.

CHAPTER X.

ACCIDENTS.

Report of, and compensation for, accidents.

109. Every railway administration shall, within twenty-four hours after the occurrence upon the railway of—

Accidents to be reported.

(*a*) any accident attended with loss of human life or serious injury to person or property,

(*b*) any accident of a description usually attended with such loss or injury, or

(*c*) any accident of any other description which the Governor General in Council may, from time to time, direct to be notified,

give notice thereof to the Local Government and to the Inspector.

Power for Governor General in Council on application of injured person to refer question of compensation to arbitration.

110. Where a person has been injured or killed by an accident on a railway the Governor General in Council, upon application in writing made by the person if he is injured, or his representatives if he is killed, may, if he thinks fit, refer the question of compensation to arbitration in accordance with the provisions of this Act.

111. Whenever any person injured by an accident on a railway claims compensation on account of the injury, any judge of the court in which proceedings to recover such compensation are taken, or any person who, by the consent of the parties or otherwise, has power to fix the amount of compensation, may order that the person injured be examined by some duly qualified medical practitioner named in the order, and not being a witness on either side, and may make such order with respect to the costs of such examination as he thinks fit.

Medical examination of injuries.

Duties of Railway, Police, and Civil Officers on occurrence of serious accidents.

112. In sections 113 to 131 the words "district superintendent of police" of the district in which the occurrence takes place shall be substituted for the words "railway police superintendent" in respect of railways whereon a railway police superintendentship has not been established. In the same sections the word "Manager" shall include the Agent of a guaranteed or other railway company, or other officer in charge, and the Chairman of the Corporation in the case of the Calcutta municipal railway and the Vice-Chairman of the Calcutta Port Commissioners in the case of railways belonging to that body, and also the Chief Engineer or Engineer-in-Chief, or other officer in charge of any railway.

Interpretation.

Duties of Managers and Railway Officers.

113. (*1*) On the occurrence of any serious railway accident as defined in section 109, sub-sections (*a*) and (*b*), the nearest station-master, or, where there is no station-master, the officer in charge of the section of the railway on which the accident occurs, shall give immediate notice thereof in writing, or by telegraph when possible,—

Station-master to report accident.

(*a*) to the nearest Magistrate in the district in which the accident occurred;

(*b*) to the railway police superintendent;

(*c*) to the officer in charge of the police station in the jurisdiction of which the accident occurred; and

(*d*) to the senior policeman present at his station.

114. The Manager shall, within 24 hours after the occurrence of any serious accident as defined in section 109, sub-sections (*a*) and (*b*), give notice thereof,

Manager to report accident.

(*a*) to the Inspector;

(*b*) to the Secretary to the Local Government in the Judicial Department in order that the Local Government may, if necessary, watch over the investigation.

115. (*1*) The Manager shall cause departmental inquiry to be held promptly for the investigation of the causes of every serious accident, and shall give notice of the holding of the inquiry to the railway police superintendent.

Manager to hold departmental inquiry.

(*2*) The railway police superintendent shall, if practicable, attend the inquiry, or, in his unavoidable absence, depute an officer of police to be present in his behalf.

(*3*) The Manager shall communicate the conclusion at which he has arrived as the result of the inquiry to the Magistrate and to the Inspector, with a statement of the persons, if any, whom the railway authorities intend to prosecute.

116. (*1*) It shall be the duty of the Manager, or other officer deputed by him in that behalf, to take all necessary proceedings for the prosecution of any railway servants who, to the best of his judgment, are guilty of crime or of breaches of this Act, or of the general rules sanctioned by the Governor General in Council, if in his judgment such crime or breaches of this Act or of the general rules are calculated to cause serious accidents.

Prosecution of offenders.

(*2*) It shall be duty of the railway police superintendent, to make a report of all cases in which there appears to be ground for suspecting railway subordinates of such misconduct, and to prosecute all persons when required to do so by the Manager.

117. When it is necessary to arrest any offender under sections 192 and 193, it shall be the duty of the railway police superintendent, or the senior police officer or policeman present, or, in the event of there being no member of the police force present, a railway servant, when required to do so by the Manager, or other officer authorized by him in that behalf, to at once arrest the offender, or, when the offender is himself a railway servant, whose removal would cause danger or grave inconvenience, to take precautions to prevent his escape pending the arrival of a substitute.

Arrest of offenders.

118. It shall be the duty of the Manager, upon the requisition of the Magistrate or other officer holding an inquiry, to arrange for the attendance, as long as needful, at the court or place of inquiry, of any officer or servant of the railway, whose attendance may be necessary.

Attendance of witnesses.

119. In the case of judicial inquiries, the Manager shall report the result to the Inspector, and forward to him a copy of the decision of the court.

Judicial inquiries.

Lists of officers to be maintained and supplied by Manager.

120. It shall be the duty of the Manager—

(*a*) to maintain at each railway station, or, in the case of lines under construction, in each divisional office, a list of Magistrates or other officers (such list to be furnished by the Magistrate having jurisdiction over the place where the station is situate), to whom reports of accidents should be made; and

(*b*) to supply to the Magistrate a list of railway officers to whom any summons may be sent for service on subordinate railway servants.

Duties of the Railway and District Police.

121. The railway police may make an investigation in the case of any railway accident.

Railway police may investigate any accident.

122. *(1)* On the occurrence of a serious accident, as defined in section 109, sub-sections (*a*) and (*b*), the railway police superintendent shall at once advise the local administration, and proceed without delay to the scene of the accident, and investigate the circumstances thereof.

Railway police superintendent to investigate serious accidents.

(2) If the railway police superintendent is himself unable to proceed, he shall so inform the nearest Magistrate in the district, and shall depute a subordinate police officer to act in his behalf.

(3) The police investigation shall be held as far as possible in connection with the departmental inquiry held by the Manager under section 115.

(4) If the police officer is of opinion that sufficient grounds exist for a judicial investigation, he shall bind all parties to appear before a Magistrate on a date to be fixed by the police officer.

(5) If an officer of the railway police makes the investigation, he shall give immediate information thereof to the district police, either direct or through the Magistrate of the district, and shall further report the result of the investigation to the Manager and to the Magistrate of the district.

(6) When the investigation is made by the railway police and an officer of the railway police calls for the assistance of the officers of the district police, it shall be the duty of the district police to afford all necessary assistance, and if occasion arise, to carry the investigation beyond the limits of the railway premises.

(7) But the railway police superintendent is primarily entrusted with the duty of investigation within railway limits, and, subject to any provisions elsewhere contained in this chapter, the further prosecution of the case, on the conclusion of the preliminary local police investigation, shall rest with the railway police.

Duties of Civil Officers.

123. The Magistrate shall report to the local Government the occurrence of any serious accident within the meaning of section 109, sub-sections (*a*) and (*b*).

Magistrate to report to Local Government the occurrence of any serious accident.

124. The Magistrate of the district or the sub-divisional Magistrate, on receiving information of the occurrence of a serious accident within the meaning of section 109, sub-sections (*a*) and (*b*), shall, at his discretion, either—

Duties of Magistrate on occurrence of serious accident.

(*a*) himself proceed to the scene of the accident and make any inquiry;

(*b*) depute a subordinate Magistrate to make inquiry; or

(*c*) direct the railway or district police, as the case may be, to make investigation.

125. *(1)* The Magistrate, or other officer holding the inquiry, may summon any railway servant or other person whose presence he thinks necessary, and, after taking the evidence and completing his inquiry, shall, if he considers there are sufficient grounds for judicial investigation, take the requisite steps to bring to trial any person whom he considers criminally liable for the accident.

Inquiry by Magistrate.

(2) The Magistrate shall communicate the result of his preliminary local inquiry to the Manager and to the Inspector.

(3) If the Magistrate delays action until receipt of the railway departmental report, he shall, on receipt of that report, decide whether to discharge the persons accused or to proceed with the case.

(4) If the Manager does not prosecute the persons who ought, in the opinion of the Magistrate, to be prosecuted, the Magistrate may arrange for their prosecution.

126. It shall be the duty of the Civil Surgeon of the district, or other district medical officer, when required to do so by the Manager or the Magistrate of the district, or the superintendent of police, to proceed to the scene of any railway accident attended with personal injury, for the purpose of rendering medical aid and of making, before the investigating authorities, any professional statement that may be required.

District medical officer to attend when called upon.

127. Where the investigation or inquiry has reference to matters occurring on, or in any way attributable to, adjacent foreign territory, the Magistrate shall, so far as may be necessary, communicate with the Magistrate or other officer having jurisdiction in such territory.

Investigation in adjacent foreign territory.

128. *(1)* If, in the course of the judicial inquiry, the Magistrate wishes for the assistance of the Inspector or Manager or for the attendance of any officer of the railway, to explain or give evidence upon any matter relating to railway supervision, management, or working, he may issue a requisition to such officer or officers to attend the Court.

Evidence on technical points.

(2) In cases where technical points are involved the Magistrate, or other officer holding the inquiry, shall call for and take the opinion of professional persons.

129. On the conclusion of the inquiry the Magistrate shall, if he thinks it necessary, report the result to the local Government; and shall in-

Judicial inquiry.

every case send a copy of his decision to the Manager.

130. It shall be the duty of a Magistrate through whose jurisdiction a railway passes—

Lists of officers to be maintained and supplied by Magistrate.

(a) to maintain a list of railway officers (such list to be furnished by the Manager), to whom summons may be sent for service on subordinate railway servants; and

(b) to supply to the Manager a list of Magistrates or other officers to whom reports of accidents should be made.

Inspector's duties.

131. (1) On receiving notice of a serious accident, the Inspector may, or in any case on requisition from the officer charged with the inquiry, the Inspector shall proceed himself, or by deputy, to the scene of the accident, shall note the facts, watch the proceedings of the departmental or magisterial inquiry, and make such inquiries and investigations as he thinks fit, calling upon the Manager or officer in charge of the line for any assistance needed, and the Inspector shall form his own conclusions.

Duties and powers of Inspector on occurrence of serious accident.

(2) The Inspector may, by an order in writing under his hand, require the attendance of all such persons as he thinks fit to call before him and examine for the purpose of such inquiries and investigations, and may for such purpose require answers or returns to such inquiries as he thinks fit to make.

He may administer an oath, and require any person examined to make and sign a declaration of the truth of the statements made by him in his examination.

(3) The Inspector shall submit his report, together with any recommendations he may consider necessary to prevent the recurrence of similar accidents, to the Local Government, forwarding a copy to the Manager and to the Magistrate having jurisdiction.

Temporary entry upon land for repair or prevention of accident.

132. The Governor General in Council may empower any railway administration, in case of any accident or slip happening or being apprehended to any cutting, embankment, or other work belonging to the railway administration, to enter upon any lands adjoining its railway for the purpose of repairing or preventing the accident, and to do all such works as may be necessary for the purpose:

Temporary entry upon land for repairing or preventing accident.

Provided as follows:

(i) In case of necessity any railway administration may enter upon the lands and do the works as aforesaid, without having obtained the previous sanction of the Governor General in Council; but in every such case the railway administration shall, within forty-eight hours after such entry, make a report to the Governor General in Council, specifying the nature of the accident or apprehended accident and of the works necessary to be done, and such powers shall cease and determine if the Governor General in Council, after considering the said report, considers that their exercise is not necessary for the public safety:

(ii) Such works shall be as little injurious to the said adjoining lands as the nature of the accident or apprehended accident will admit of, and shall be executed with all possible despatch, and full compensation shall be made to the owners and occupiers of the lands for any loss or injury or inconvenience sustained by them respectively by reason of the works, the amount of which compensation in case of any dispute about the same, shall be settled in the same manner as cases of disputed compensation with respect to the taking of lands are directed to be settled under the Land Acquisition Act.

133. In any case where there is danger that any tree standing near to a railway may fall on the railway so as to obstruct the traffic, the railway administration may, on obtaining an order to that effect from any Magistrate, remove or otherwise deal with the tree, and upon complaint made, shall pay such compensation to the owner of the tree so ordered to be removed or otherwise dealt with as the Magistrate may think proper.

Danger from tree likely to fall on railway.

General return of accidents.

134. Every railway administration shall make up and deliver to the Governor General in Council a return of accidents occurring in the course of the public traffic upon its railway, whether attended with personal injury or not, in such form and manner, and at such intervals of time, as the Governor General in Council from time to time directs.

Submission of return of accidents.

CHAPTER XI.

Accounts, Statistics, and Audit.

Submission of returns.

135. (1) Every railway administration shall keep a capital account and a revenue account, and shall also keep all such accounts of its capital and revenue transactions, and all such details and statistics of its traffic, as are from time to time required by the Governor General in Council, and in the forms in which the Governor General in Council requires the accounts, statistics, and details of traffic last aforesaid repectively to be kept.

Accounts and statistics to be submitted.

(2) Every railway administration shall at its own cost render the capital account and revenue account, and all accounts, statistics, and details of traffic, kept by it under this section, to the Governor General in Council at such times as he may from time to time require.

136. Every railway administration shall furnish such statistics, other than railway statistics proper, as may be required by the Governor General in Council, or any Local Government, for the registration of inland trade. In the case of a railway company payment shall be made for the preparation of such statistics on such terms as may be mutually agreed upon.

Statistics for registration of inland trade.

Capital and revenue accounts.

137. In the capital account of every railway shall be entered all such of the expenditure and receipts by or on behalf of the railway administration in respect to its general an-

Items to be included in capital account.

dertaking as are properly attributable to capital in accordance with the general principles laid down in section 139:

Provided that any railway company may, during the original construction of the railway and works specified in the special agreement, but for no period subsequent to that specified in the special agreement, if authorized so to do by the Governor General in Council, pay out of capital any sums by way of interest on the amounts from time to time *boná fide* paid up on the issued share capital of the railway company, not amounting with the net earnings of the railway company during such period to more than 4 per cent. per annum on the sums in respect of which the interest is paid, and may in like manner also pay out of capital any sums by way of interest on the capital for the time being borrowed by the railway company under the provisions of the special agreement. The moneys paid out of capital under this section may be charged to capital account as part of the original cost of construction.

Items to be included in revenue account.

138. In the revenue account of every railway shall be entered all such of the expenditure and receipts by or on behalf of the railway administration in respect to its general undertaking as are properly attributable to revenue except so much of the expenditure last aforesaid as may under the section last hereinbefore contained be attributable to capital.

General principles of allocation of expenditure to capital or revenue.

139. In any case where any question may or might arise as to whether any expenditure is to be treated in whole or in part as a charge on capital or how the same is to be dealt with, the question shall be determined on the general principle that

(*1*) capital shall bear the cost of—

(*a*) the original construction and completion of the railway, and the stations, station yards, offices, warehouses, houses for employés, fixed machinery, conveniences, and works belonging thereto,

(*b*) the original equipment of the railway and its appurtenances with rolling-stock, plant and moveable machinery,

(*c*) the original provision and equipment of any steam vessel, ferry, roadway, road, or other means of transport which may be provided under the special agreement, or with the approval of the Governor General in Council under section 91,

(*d*) the charges of the Government Telegraph Department for rent, maintenance and inspection of telegraphs during the construction of the railway,

(*e*) the cost of any force of police provided by the Governor General in Council for the protection of any part of the railway during its original construction,

and shall also bear the cost of new works, additional rolling-stock, plant, boats, steam-vessels, and fixed and moveable machinery, and substantial improvements of, and additions to, old works, rolling-stock, plant, boats, and steam-vessels, and fixed and moveable machinery, and that

(*2*) the cost of all working expenses, repairs, restorations, renewals, and replacements shall be charged to revenue account:

Provided that in the case of renewal of rolling-stock a new engine or a new vehicle of any class shall be placed on the railway and charged to revenue, irrespective of cost, in the place of each engine or vehicle, of the same class, condemned.

Working expenses.

140. Working expenses shall include all costs and expenses incurred by any railway administration in or about or in connection with—

(*a*) the maintenance, management and working of so much of the railway as shall for the time being have been opened for public traffic;

(*b*) the maintenance and management of any ferry, roadway, road, or other means of transport, which the railway administration may, under section 91, or by the special agreement, be authorized to establish and maintain;

(*c*) any contribution to a reserve fund which may be established with the sanction of the Governor General in Council;

(*d*) all costs and expenses in any portion of this Act stipulated to be included amongst working expenses; and in general

(*e*) all reasonable expenses proper to be allowed out of revenue in connection with the maintenance, management and working of the undertaking established and carried on by the railway administration.

Appointment and functions of auditors.

Appointment of auditors.

141. It shall be lawful for the Governor General in Council and any railway company each to appoint an auditor or auditors, or, should they so desire, the Governor General in Council and any railway company may together appoint a joint auditor or joint auditors to conduct the audit of the railway company's accounts.

Audit of accounts.

142. The accounts of any railway company in relation to its expenditure and receipts in India, England, and elsewhere may from time to time be audited on behalf of the Governor General in Council, as well as on behalf of the railway company, and the railway company shall produce to the auditor or auditors all vouchers, books, accounts, papers and documents of the railway company necessary for the purpose of audit, and afford to him or them all facilities requisite for the performance of his or their duties.

Cost of audit to be borne by company.

143. The necessary costs of audit, in whatever manner carried out, shall be defrayed by the railway company and included in working expenses.

Duties of auditors.

144. (*1*) Amongst the functions of the auditor or auditors shall be included the duty of seeing that the revenue of the railway company is duly and correctly accounted for and properly applied from time to time in discharging working expenses and providing for the discharge of all liabilities incurred up to the end of the period to which the accounts relate.

(*2*) The auditor or auditors may examine the books of the railway company at all reasonable times, and may call for such further accounts, and such vouchers, papers, and information, as they think fit; and the directors and officers of the

railway company shall produce and give the same as far as they can, and the auditors may refuse to certify to the correctness of the accounts until they have received the same.

[30 & 31 Vic., c. 127, sec. 30 (in part).]

(3) The auditor or auditors may at any time add to their certificate or issue to the shareholders independently, at the cost of the railway company, any statement respecting the financial condition and prospects of the railway company which they think material for the information of the shareholders.

[B. & N.-W. Ry., cl. 46.]

(4) Any correction made in the accounts by any person or persons who shall be acting as joint auditor or joint auditors on behalf both of any railway company and of the Governor General in Council shall be conclusive.

[B. & N.-W. Ry., cl. 46 (modified).]

Differences to be settled by arbitration.

145. If, consequent on the audit of any auditor acting exclusively on behalf of the Governor General in Council, the Governor General in Council shall require alterations to be made in the accounts of any railway company, and the railway company shall object to the alterations, the matter in difference shall be referred to arbitration under the provisions of this Act.

CHAPTER XII.

OFFENCES AND PROCEDURE.

[IV of 1879, sec. 52 (modified).]

(A.)—Offences by the railway administration.

For wilful neglect or violation of any rule made under section 20.

146. Any railway administration wilfully neglecting or violating any rule made by the Governor General in Council or a Local Government, under section 20, shall be liable to a fine not exceeding five hundred rupees for every such neglect or violation or, when such neglect or violation is continuous, for every day during which it continues.

[XIII of 1884, sec. 123; B. & N.-W. Ry., cl. 22; 8 & 9 Vic., c. 20, sec. 62.]

Execution of works required to be done by any notice.

147. (1) If a railway administration fails to execute or complete, to the satisfaction of the Governor General in Council, and within a reasonable time, any works, or any additions, alterations, or improvements to its railways, prescribed in any notice given under this Act, the Governor General in Council may, after not less than ten days' notice to the railway administration, execute, or complete the execution of, the works, additions, alterations, or improvements.

(2) Any works executed or completed by the Governor General in Council under this section shall be taken over by the railway administration as works belonging to the railway.

[XIII of 1884, sec. 124.]

Recovery of costs of execution.

148. (1) Where under this Act a railway administration is required by the Governor General in Council to execute any work and makes default in complying with the requirement, and the Governor General in Council executes the work under the last foregoing section, the Governor General in Council may recover the cost of the work from the railway administration.

(2) All money recoverable by the Governor General in Council under this section may be recovered by suit, and shall, until it is paid, be a charge on the railway.

For non-completion of a railway within the time limited.

149. If any railway company fails, within the period, if any, limited by the special agreement, to complete its railway, it shall be liable to a penalty of five hundred rupees a day for every day after the expiration of the period so limited until the railway is completed and opened for public traffic or until the sum received in respect of the penalty amounts to 5 per cent. on the estimated cost of the works; but no penalty shall accrue in respect of any time during which it appears to the Governor General in Council that the railway Company was prevented from completing or opening such line by unforseen accident or circumstances beyond its control. Provided that the want of sufficient funds shall not be held to be a circumstance beyond its control.

For contravening provisions of Chapter VI relating to opening of railways.

150. Any railway administration contravening, or failing to comply with, any of the provisions of Chapter VI, relating to the opening of railways, shall be liable to a fine not exceeding one thousand rupees for every day during which such contravention or failure continues.

For neglect to convey mails.

151. If any railway administration, or any of its officers, servants, or agents, refuse or neglect to convey any mails, or to receive, take up, deliver, and leave any mails, guards, or other officers of the Post Office, or to afford all reasonable facilities for the receipt and delivery of mails in accordance with the provisions of Chapter VII, or fail to obey, observe, and perform all such regulations in respect thereof as the Governor General in Council may make under the provisions of this Act, the railway administration which, or whose officer, servant, or agent, so offends, shall, for every such offence, be liable to a fine not exceeding two hundred rupees.

For neglect to convey Her Majesty's forces.

152. If any railway administration, or any of its officers, servants, or agents, refuse or neglect, on the requisition of the proper authority, to convey over its railway any of Her Majesty's forces [or any engineers, artizans, and other persons, when employed in the business of the Government], with their baggage, stores, arms, ammunition, and other necessaries and things, as provided in section 56, the railway administration which, or whose officer, servant, or agent, so offends, shall, for every such offence, be liable to a fine not exceeding two hundred rupees.

For running a train in excess of authorized speed.

153. Any railway administration which allows any train to be run on its railway at a speed in excess of that laid down, from time to time, under section 72, shall, for every such offence, be liable to a fine not exceeding five hundred rupees.

For not providing means of communication in trains between passengers and railway servants.

154. Any railway administration omitting to provide and maintain in good working order, in every train worked by it which carries passengers and travels more than twenty miles without stopping, such efficient means of communication as is required under section 73, shall be liable to a fine not exceeding one hundred rupees for each case of default.

155. Any railway administration omitting to provide latrine accommodation in its passenger carriages, as required in section 74, shall be liable to a fine not exceeding one hundred rupees for every carriage not so provided, and for every day on which such carriage is used.

For not providing latrine accommodation in passenger carriages.

156. Any railway administration omitting to provide in any passenger train suitable dog-boxes or other accommodation, as required in section 75, shall be liable to a fine not exceeding fifty rupees for every passenger train run without such accommodation and for every day on which a passenger train is so run.

For not providing suitable accommodation for dogs, &c.

157. Any railway administration which fails to explain its charges in respect of the conveyance of goods over its railway, as required in section 81, shall, for every such offence, be liable to a fine not exceeding twenty rupees for every day after the expiration of the period of fourteen days, named in that section, during which it so makes default.

For failing to explain charges for conveyance of goods.

158. If any railway administration refuses or wilfully neglects to comply with any requisition, order, decision, notice, or regulation, given or made by the Governor General in Council pursuant to any of the provisions of sections 84, 85, 86, 87, or 88, it shall be liable to a fine not exceeding two hundred rupees for every day during which such refusal or neglect continues.

For neglect to comply with any order of the Governor General in Council under sections 84 to 88.

159. Any railway administration omitting to fix and exhibit the tare weight and maximum permissible load of any wagon or truck in the manner required in section 92, or the maximum number of passengers and troops that may be carried in any compartment as required in section 103, shall be liable to a fine not exceeding twenty rupees for each offence, and for every day during which the omission continues.

For omitting to fix and exhibit tare weight and maximum load of wagons, and maximum number of passengers per compartment.

160. Any railway administration omitting to give notice of an accident, as required by section 109, shall be liable to a fine not exceeding one hundred rupees for every day during which the omission continues.

For omitting to report accident.

161. Any railway administration failing to deliver any return mentioned in section 154 within fourteen days after the same ought to be delivered, or to make or notify any rules as required by section 67, or to exhibit any abstract or copy mentioned in section 68, in manner required by that section, shall be liable to a fine not exceeding fifty rupees for every day during which the failure continues.

For not sending return of accidents, or making rules under section 67, or exhibiting copy under section 68.

162. If any railway administration fails to deliver any accounts, statistics, or details of traffic required under section 135, within thirty days after the same have been required, it shall be liable to a fine not exceeding two hundred rupees for every day during which it wilfully neglects to deliver the same.

For failing to deliver accounts, statistics, &c.

163. If any return which is required under this Act is false in any particular to the knowledge of any person who signs the same, such person shall be liable to a fine not exceeding five hundred rupees.

For false returns.

[34 & 35 Vic., c. 78, sec. 10.]

(B.)—Offences by railway servants.

164. Any station-master or other person omitting to give notice of an accident as required by section 113 shall be punished with fine which may extend to fifty rupees.

For omitting to give notice of accident.

[IV of 1879, sec. 24.]

165. *(1)* If any railway servant—

For drunkenness or breach of duty.

[IV of 1879, sec. 25.]

(*a*) is in a state of intoxication whilst actually employed upon a railway in the discharge of any duty, or

(*b*) negligently omits to perform his duty, or

(*c*) performs the same in an improper manner,

he shall be punished with fine which may extend to fifty rupees;

(*2*) if the duty in any such cases is such that the negligent, omission, or improper performance thereof would be likely to endanger the safety of any person travelling or being upon the railway, such servant shall be punished with imprisonment for a term which may extend to one year, or with fine, or with both.

166 If any railway servant in the discharge of his duty endangers the safety of any person—

For endangering the safety of persons.

[IV of 1879, sec. 26.]

(*a*) by disobeying any general rule sanctioned, published and notified in the manner prescribed by section 67; or

(*b*) by disobeying any rule or order which is not inconsistent with the general rules aforesaid, and which such servant was bound by the terms of his employment to obey, and of which he had notice; or

(*c*) by any rash or negligent act or omission,

he shall be punished with imprisonment for a term which may extend to three years, or with fine which may extend to five hundred rupees, or with both.

167. *(1)* Every railway servant shall be deemed a "public servant" within the meaning of sections 161, 162, 163, 164, and 165 of the Indian Penal Code.

For receiving bribes.

[IV of 1879, sec. 27.]

(2) In the definition of legal remuneration contained in the said section 161, the word "Government" shall, for the purposes of this section, be deemed to include any employer of a railway servant as such.

168. Any railway servant who compels or attempts to compel any passenger to enter a carriage or compartment containing the maximum number of passengers denoted thereon, in accordance with section 103, shall be punished with fine which may extend to one hundred rupees.

For compelling passengers to enter carriages already full.

[IV of 1879, sec. 28 (modified).]

(C.)—Offences by persons generally.

79. **169.** If any person, required under section 99 to give an account of the quantity and description of any property, neglects or refuses to give such account, or wilfully gives a false account, he shall be punished with fine which may extend to five rupees for every maund (of 3,200 tolas) of such property; and such fine shall be in addition to any charge to which such property may be liable.

For not giving account of goods or giving false account.

79. **170.** Whoever, in contravention of section 100, takes with him any dangerous goods on a railway, or delivers or tenders any such goods for the purpose of being carried upon a railway, shall be punished with fine which may extend to two hundred rupees.

For taking dangerous goods on railway or delivering such goods without notice.

79. **171.** *(1)* Any passenger travelling on a railway without a proper ticket or having such a ticket and not showing or delivering up the same when so required under section 105 shall be liable to pay the fare of the class in which he is found travelling, from the place whence the train originally started, unless he can prove that he has travelled a less distance only, in which case he shall be liable to pay the fare of the class aforesaid only from the place whence he has travelled.

For travelling without ticket or not showing or delivering up ticket.

(2) Every such fare shall, on application by a railway servant to a Magistrate, and on proof of the passenger's liability, be recoverable from such passenger as if it were a fine, and shall, when recovered, be paid to the railway administration.

172. Any person suffering from an infectious disease, who travels in a railway carriage, knowing, or having reason to suppose, that his being in the carriage is likely to spread the infection of the disease, shall be liable to a fine not exceeding fifty rupees for each offence.

For travelling in a railway carriage when suffering from an infectious disease.

79. **173.** Any person who defrauds, or attempts to defraud, any carrier by railway—

For evading payment of fare.

(a) by travelling, or attempting to travel, on any railway without having previously paid his fare; or

(b) by riding or attempting to ride in or on a carriage, or by a train, of a higher class than that for which he has paid his fare; or

(c) by using or attempting to use a ticket on any day for which such ticket is not available; or

(d) by continuing his journey in or upon any carriage beyond the place to which he has paid his fare, without previously paying the fare, for the additional distance;

or who, in any other manner whatever, attempts to evade the payment of his fare,

or who wilfully alters or defaces his ticket so as to render the date, number, or other material portion thereof illegible,

shall be punished with fine which may extend to fifty rupees, and shall also be liable to pay the fare (if any) which he ought to have paid; and such fare shall be recoverable in manner provided by section 171, sub-section (2), and shall, when recovered, be paid to the railway administration.

174. Any passenger who gets into or upon, or attempts to get into or upon, or quits or attempts to quit any carriage upon any railway, while such carriage is in motion, shall be punished with fine which may extend to twenty rupees. [IV of 1879, sec. 33.]

For entering carriage in motion.

175. Any passenger who rides, or attempts to ride, on the steps, or any other part of a carriage, upon any railway, except on those parts which are intended for the accommodation of passengers, shall be punished with fine which may extend to fifty rupees. [IV of 1879, sec. 33.]

For riding on the steps.

176. Any person who, without the permission of the railway administration, rides or attempts to ride upon any locomotive engine or tender upon any railway; or in or upon any vehicle not appropriated to the carriage of passengers, shall be punished with fine which may extend to one hundred rupees. [IV of 1879, sec. 34.]

For riding on engine, tender, &c.

177. *(1)* Any person who, without the consent of his fellow-passengers, if any, in the same compartment, smokes in or upon any railway carriage, except in a carriage or compartment specially provided for the purpose, shall be punished with fine which may extend to twenty rupees. [IV of 1879, sec. 35.]

For smoking.

(2) Any person who persists in so smoking (except as aforesaid) after being warned by any railway servant to desist may, in addition to incurring the liability above mentioned, be removed by any railway servant from any such carriage, and from the premises of the railway, and, where he has paid his fare and obtained a ticket, shall forfeit such fare and ticket.

178. *(1)* Any person who, without the consent of the station-master and of his fellow-passengers, if any, in the same compartment, takes into any compartment of a passenger carriage any live animal, such as a dog, cat, bird, or the like, shall be punished with a fine which may extend to twenty rupees. [New.]

For taking animals into passenger compartment.

(2) The fare charged for the conveyance, with due consent of the parties above specified, of any such animal in any compartment of a passenger carriage shall be at double the ordinary rate charged for the conveyance of the animal in the dog-box or other accommodation provided by the railway administration for the purpose under section 75.

(3) Any such animal so conveyed shall be removed by the station-master from the compartment without refund of fare, and placed in the dog-box or other accommodation provided for its conveyance under section 75, if, at any subsequent time during the journey, any fellow-passenger in the same compartment so requires.

179. If any person— [IV of 1879, sec. 36.]

For intoxication or nuisance.

(a) is in a state of intoxication, or

(b) commits any nuisance or act of indecency in any railway carriage, or upon any part of any railway, or

(c) wilfully and without lawful excuse interferes with the comfort of any passenger, or extinguishes any lamp in any railway carriage,

he shall be punished with fine which may extend to fifty rupees; and may be removed by any railway servant from any such carriage, and also

from the premises of the railway, and, where he has paid his fare and obtained a ticket, shall forfeit such fare and ticket.

For entering carriage or room reserved for females.

180. If any carriage, compartment, room, or place is reserved by the railway administration for the exclusive use of females, any male person who, without lawful excuse, enters such carriage, compartment, room, or place knowing the same to be reserved as aforesaid, or remains therein after having been informed of its having been so reserved, shall be punished with fine which may extend to one hundred rupees,

and may be removed therefrom, and also from the premises of the railway, by any railway servant,

and, where he has paid his fare and obtained a ticket, shall forfeit such fare and ticket.

For obstructing railway servant in his duty.

181. Whoever wilfully obstructs or impedes any railway servant in the discharge of his duty, shall be punished with fine which may extend to one hundred rupees.

For entering carriage already full.

182. Any passenger wilfully entering a carriage or compartment containing the maximum number of passengers denoted thereon, in accordance with section 103, shall be punished with fine which may extend to one hundred rupees.

For needlessly interfering with means of communication in a train.

183. Any passenger who, without reasonable and sufficient cause, makes use of, or interferes with, the means of communication provided in any train between the passengers and the railway servants in charge of the train, shall be liable for each offence to a fine not exceeding fifty rupees.

For removing signals or injuring carriage, &c.

184. Any person who, without authority or reasonable excuse, makes, alters, shows, hides, removes, or extinguishes any signal or light upon any railway, or upon any engine, carriage, wagon or other vehicle upon a railway,

or who negligently damages any engine, carriage, wagon, or other vehicle belonging to a railway, or any warehouse, building, machine, fence, or other thing so belonging,

shall be punished with fine which may extend to one hundred rupees.

For trespass, and refusing to leave on request.

185. Any person who unlawfully enters upon a railway shall be punished with fine which may extend to twenty rupees; and if any person so entering refuses to leave such railway on being requested to do so by any railway servant, or by any other person on behalf of the railway administration, he shall be punished with fine which may extend to fifty rupees, and may be immediately removed from the railway by such servant or other person as aforesaid.

For cattle trespass and similar offences.

186. *(1)* The owner or person in charge of any bulls, cows, bullocks, calves, elephants, camels, buffaloes, horses, mares, geldings, ponies, colts, fillies, mules, asses, pigs, rams, ewes, sheep, lambs, goats or kids, straying on any railway provided with fences suitable for the exclusion of such animals, shall be punished with fine which may extend to ten rupees for each animal, in addition to any amount that may be recovered under the Cattle Trespass Act, 1871.

(2) Whenever any such animals are wilfully and unlawfully driven, or knowingly and unlawfully permitted to be, on any railway provided with fences suitable for the exclusion of such animals, and

whenever any such animals are wilfully driven, or knowingly permitted to be, on any railway not so provided, otherwise than for the purpose of lawfully crossing the railway, or for any other lawful purpose,

the person in charge of such animals, or if he cannot be identified, then the owner of the said animals, shall be punished with fine which may extend to fifty rupees for each animal, in addition to any amount that may be recovered under the Cattle Trespass Act, 1871.

(3) All fines imposed under this section may, if the convicting Magistrate so direct, be recovered in manner provided by section twenty-five of the Cattle Trespass Act, 1871, and may be appropriated in whole or in part in compensation for loss or damage proved to his satisfaction.

(4) The expression "public road" in sections eleven and twenty-six of the Cattle Trespass Act, 1871, shall be deemed to include a railway; and any railway servant may exercise the powers of seizure provided by the said section eleven.

For opening or not properly shutting gates.

187. Whoever knowing or having reason to believe that any engine or train is approaching along a railway opens any gate which the railway administration has set up on either side of the railway across any road for the use or accommodation of any person, or passes or attempts to pass, or drives or takes, or attempts to drive or take, any vehicle, animal, or other thing, across the railway;

and whoever at any time, in the absence of a gate-keeper, omits to shut and fasten such gate as soon as he and any vehicle, animal, or other thing under his charge have passed through the same,

shall be punished with fine which may extend to fifty rupees.

For minors obstructing line or throwing stones at train.

188. *(1)* Whenever any minor under twelve years of age unlawfully—

(*a*) places or throws, or attempts to place or throw, upon or across a railway any wood, stone, or other thing, or

(*b*) removes or displaces, or attempts to remove or displace, any rail, sleeper, spike, key, or other thing belonging to the permanent-way of a railway, or

(*c*) throws or causes to fall, or attempts to throw or cause to fall, against, into, or upon any engine, tender, carriage, or other vehicle used upon a railway, any wood, stone, or other thing,

such minor shall be deemed guilty of an offence, and the convicting Magistrate may, in his discretion, direct either that the minor, if a male, shall be punished with whipping, or that the father or guardian of the minor shall, within such reasonable time as the Magistrate may fix, execute a bond binding himself, in such penalty as the Magistrate may direct, to prevent the minor from repeating such offence.

(2) The amount of such bond, if forfeited, shall be recoverable as if it were a fine.

(3) Any person neglecting or refusing to execute a bond when required under this section so to do shall be punished with fine which may extend to fifty rupees.

For wilful act or omission endangering persons on railway.

189. Whoever wilfully does any act, or wilfully omits to do what he is legally bound to do, intending by such act or omission to endanger, or knowing that he is thereby likely to endanger, the safety of any person travelling or being upon any railway, shall be punished with transportation (or in the case of a European or American, penal servitude) for a term of not less than seven years, or with imprisonment for a term which may extend to ten years.

For rash or negligent act.

190. Whoever rashly or negligently does any act, or omits to do what he is legally bound to do, and such act or omission is likely to endanger the safety of any person travelling or being upon a railway, shall be punished with imprisonment for a term which may extend to one year, or with fine, or with both.

Disobedience of omnibus, &c., drivers to railway servants.

191. Every driver or conductor of an omnibus, carriage, or other vehicle shall, while in or upon any station-yard or other premises forming part of a railway, obey the reasonable directions of any railway servant duly authorized in this behalf; and every person offending against this section shall be punished with fine which may extend to twenty rupees.

(D.)—Arrest of offenders.

Arrest, for offences punishable under this Act, of offender whose name is unknown, &c.

192. If any person commits any offence punishable under this Act, and there is reason to believe that he will abscond, or his name and address are unknown, and he refuses to give his name and address, or there is reason to believe that the name or address given by him is incorrect, any railway servant or police officer, or any other person whom such railway servant or police officer may call to his aid, may, without any warrant or written authority, arrest and detain such offender until he can be taken before a Magistrate, or give sufficient security for his appearance before such Magistrate, or is otherwise discharged by due course of law.

Arrest for offences against certain sections.

193. Every person committing any offence mentioned in sections 67, 165, 166, 179, 180, 181, 188, 189, and 190 may be arrested without any warrant or written authority by any railway servant or police officer, or by any other person whom such servant or officer may call to his aid;

and every person so arrested shall, without unnecessary delay, be taken before a Magistrate authorized to punish him or to commit him for trial.

(E.)—Jurisdiction.

Magistrates having jurisdiction.

194. No Magistrate other than a Presidency Magistrate and a Magistrate whose powers are not less than those of a Magistrate of the second class shall try any offence under this Act.

Place of trial.

195. (1) Any person committing any offence against this Act or the rules made under it, shall be triable for such offence in any place in which he may be found or which the Local Government may, from time to time, notify in this behalf, as well as in any other place in which he might be tried under any law for the time being in force.

(2) Every notification under this section shall be published in the local official Gazette, and a copy thereof shall also be exhibited in some conspicuous place at each of such railway stations as the Local Government may direct, so that it may be easily seen and read.

(F.)—Saving of other Criminal laws.

Saving of prosecutions under other laws.

196. Nothing in this Act shall be deemed to prevent any person from being arrested, prosecuted, or punished under any other law for any act or omission which constitutes an offence against this Act or the rules made under it:

Provided that no person shall be punished twice for the same offence.

CHAPTER XIII.

Arbitration.

Cases in which arbitration is to have effect.

Governor General in Council may require differences to be referred to arbitration.

197. When a dispute arises between two or more railway administrations, or between a railway administration and any other person or authority, and, in the opinion of the Governor General in Council, the continuance of the dispute is, or is likely to be, prejudicial to the interests of the public, the Governor General in Council may require that the difference be referred to arbitration under this chapter.

Application of provisions for arbitration.

198. This chapter shall apply—

(a) when a dispute arises between two or more railway administrations, or between a railway administration on the one hand, and the Governor General in Council, or a Local Government, or an officer of the Governor General in Council, or of a Local Government, on the other hand, and the parties to the dispute agree to refer it to arbitration under this chapter;

(b) When, under the last foregoing section, the Governor General in Council requires a dispute to be referred to arbitration under this chapter.

Proceedings in arbitration.

Reference to arbitrators.

199. Where the parties agree the reference shall be made to a single arbitrator, and, except as aforesaid, the reference shall be made as follows; namely,

(a) Where there are two parties, the reference shall be made to two arbitrators:

(b) Where there are three or more parties, the reference shall be made to as many arbitrators as there are parties.

Appointment of arbitrators by parties.

200. Where there are to be two or more arbitrators, every party shall by writing appoint one of the arbitrators, and shall give notice in writing thereof to the other party or parties.

201. Where there are to be two or more arbitrators, if any of the parties fail to appoint an arbitrator within fourteen days after being thereunto requested in writing by the other party, or by the other parties or any of them, then, on the application of the parties or any of them, the Governor General in Council, instead of any party so failing to appoint an arbitrator, may appoint an arbitrator; and any arbitrator so appointed shall, for the purposes of this chapter, be deemed to be appointed by the party so failing.

Appointment of arbitrators by Governor General in Council.

202. Where a single arbitrator has been appointed by agreement between the parties, and the arbitrator, before he has made his award, dies or becomes incapable or unfit, or for seven consecutive days fails to act as arbitrator, then, unless the parties have otherwise agreed, the matters referred to him shall be determined by arbitration, under the provisions of this chapter, in the same manner as if such arbitrator had not been appointed.

In case of death or unfitness of single arbitrator the matter to begin *de novo*.

203. When the reference is made to two or more arbitrators, if before the matters referred to them are determined any arbitrator dies, or becomes incapable or unfit, or for seven consecutive days fails to act as arbitrator, the party by which he was appointed shall by writing appoint an arbitrator in his place.

Appointment of arbitrators by parties to supply vacancies.

204. Where the party by which an arbitrator ought to be appointed in the place of the arbitrator so deceased, incapable, unfit, or failing to act, fail to make the appointment within fourteen days after being thereunto requested in writing by the other party, or by the other parties or any of them, then, on the application of the parties or any of them, the Governor General in Council may appoint an arbitrator; and the arbitrator so appointed by the Governor General in Council shall, for the purposes of this chapter, be deemed to be appointed by the party so failing.

Appointment of arbitrators by Governor General in Council to supply vacancies.

205. When any appointment of an arbitrator is made, the party making the appointment shall have no power to revoke the appointment without the previous consent in writing of the other party, or parties.

Appointment of arbitrator not revocable without mutual consent.

206. Where two or more arbitrators are appointed, they shall, before entering on the business of the reference, appoint by writing under their hands an impartial and qualified person to be their umpire.

Appointment of umpire by arbitrators.

207. If the arbitrators do not appoint an umpire within seven days after the reference is made to the arbitrators, then, on the application of the parties, or any of them, the Governor General in Council may appoint an umpire; and the umpire so appointed shall, for the purposes of this chapter, be deemed to be appointed by the arbitrators.

Appointment of umpire by Governor General in Council.

208. Where two or more arbitrators are appointed, if before the matters referred to them are determined their umpire dies, or becomes incapable or unfit, or for seven consecutive days fails to act as umpire, the arbitrators shall by writing under their hands appoint an impartial and qualified person to be their umpire in his place.

Appointment of umpire by arbitrators to supply vacancy.

209. If the arbitrators fail to appoint an umpire within seven days after notice in writing to them of the decease, incapacity, unfitness, or failure to act of their umpire, then, on the application of the parties, or any of them, the Governor General in Council may appoint an umpire; and the umpire so appointed shall, for the purposes of this chapter be deemed to be appointed by the arbitrators so failing.

Appointment of umpire by Governor General in Council to supply vacancy.

210. Every arbitrator appointed in the place of a preceding arbitrator, and every umpire appointed in the place of a preceding umpire, shall respectively have the like powers and authorities as his respective predecessor.

New arbitrator or umpire to have the same powers as his predecessor.

211. Where there are two or more arbitrators, if they do not, within such a time as the parties agree on, or failing such agreement, within thirty days next after the reference is made to the arbitrators, agree on their award thereon, then the matters referred to them, or such of those matters as are not then determined, shall stand referred to their umpire.

Reference to umpire.

212. The arbitrator, and the arbitrators, and the umpire respectively may call for the production of any documents or evidence in the possession or power of the parties respectively, or which they respectively can produce, and which the arbitrator, or the arbitrators, or the umpire shall think necessary for determining the matters referred, and may examine the witnesses of the parties respectively on oath, and may administer the requisite oath.

Powers for arbitrators and umpire to call for books, &c., and administer oath.

213. Except where and as the parties otherwise agree, the arbitrator, and the arbitrators, and the umpire respectively may proceed in the business of the reference in such manner as he and they respectively shall think fit.

Arbitration to proceed as arbitrators and umpire think fit.

214. The arbitrator, and the arbitrators, and the umpire respectively may proceed in the absence of all or any of the parties in every case in which after giving notice in that behalf to the parties respectively, the arbitrator, or the arbitrators, or the umpire shall think fit so to proceed.

Arbitration may proceed in absence of parties.

215. The arbitrator, and the arbitrators, and the umpire respectively may, if he and they respectively think fit, make several awards, each on part of the matters referred, instead of one award on all the matters referred; and every such award on part of the matters shall for such time as shall be stated in the award, the same being such as shall have been specified in the agreement for arbitration, or in the event of no time having been so specified, for any time which the arbitrator may be legally entitled to fix, be binding as to all the matters to which it extends, and as if the matters awarded on were all the matters referred, and that

Several awards may be made.

notwithstanding the other matters or any of them be not then or thereafter awarded on.

216. The award of the arbitrator, or of the arbitrators, or of the umpire, if made in writing under his or their respective hand or hands, and ready to be delivered to the parties within such a time as the parties agree on, or failing such agreement, within thirty days next after the matters in difference or referred to (as the case may be) the arbitrator, or the arbitrators, or the umpire, shall be binding and conclusive on all the parties.

Awards made in due time to bind all parties.

217. Except where and as the parties otherwise agree the umpire may, from time to time by writing under his hand, extend the period within which his award is to be made; and if it be made and ready to be delivered within the extended time, it shall be as valid and effectual as if made within the prescribed period.

Umpire may extend period for making his award.

218. No award made on any arbitration in accordance with this chapter shall be set aside for any irregularity or informality.

Award cannot be set aside for informality.

219. Except only so far as the parties bound by any award in accordance with this chapter from time to time otherwise agree, all things by every award in accordance with this chapter lawfully required to be done, omitted, or suffered shall be done, omitted, or suffered accordingly.

Awards to be obeyed.

220. Full effect shall be given by all the courts in British India, according to their respective jurisdiction, and by the parties respectively, and otherwise, to all agreements, references, arbitrations, and awards in accordance with this chapter; and the performance or observance thereof may, where the courts think fit, be compelled by any process, against the parties respectively or their respective property, that the courts or any judge thereof shall direct, and where requisite frame for the purpose.

Courts to give full effect to awards.

221. Except where and as the parties otherwise agree, the costs of and attending the arbitration and the award shall be in the discretion of the arbitrator, and the arbitrators, and the umpire respectively.

Costs of arbitration and award.

222. Except where and as the parties otherwise agree, and if and so far as the award does not otherwise determine, the costs of and attending the arbitration and the award shall be borne and paid by the parties in equal shares, and in other respects the parties shall bear their own respective costs.

Payment of costs.

223. Upon any reference to arbitration under this chapter the arbitrators or umpire may, on application to, and with the consent of, any court which would have jurisdiction in the matter to which the arbitration relates, state the award as to the whole or any part thereof in the form of a special case for the opinion of the court: and the court shall deliver its opinion thereon, and the opinion shall be added to and form part of the award.

Power to state special case.

224. The Governor General in Council may fix the remuneration of any arbitrator or umpire appointed by him in pursuance of this or any other Act in any case where a railway administration is one of the parties, and may, if he think fit, frame a scale of remuneration for arbitrators or umpires so appointed by him, and no arbitrator or umpire so appointed by him shall be entitled to any larger remuneration than the amount fixed by the Governor General in Council.

Remuneration of arbitrators, &c., appointed by the Governor General in Council.

CHAPTER XIV.

NOTICES, ORDERS, &c.

225. All requisitions, notices, and documents which relate to a railway administration, if purporting to be signed by the Director General of the Post Office or some Deputy or Assistant to the Director General of the Post Office, or by some officer appointed for that purpose by the Director General of the Post Office, shall, until the contrary is proved, be deemed to have been so signed, and to have been given or made by the Director General of the Post Office.

Requisitions, &c., by the Director General of the Post Office.

226. Any notice, determination, decision, direction, requirement, requisition, demand, appointment, certificate, expression of opinion, approval or sanction to be given or signified on the part of the Governor General in Council, for any of the purposes of, or in relation to, this Act, or any of the powers or provisions therein contained, shall be sufficient and binding if in writing signed by a Secretary of the Government of India or by any other officer or servant authorized to act on behalf of the Governor General in Council in respect of the matters to which the same shall relate, and the Governor General in Council shall not in any case be bound in respect of any of the matters aforesaid unless by some writing signed in the manner before mentioned in this section.

Requisitions, &c., by the Governor General in Council.

227. Notices, orders, and other documents under this Act, or under the special agreement, may be in writing or print, or partly in writing and partly in print.

Notices may be printed or written.

228. Every railway company shall at all times keep an office established at some place in India, and shall keep at the said office in India an authorized agent or committee of agency with whom the Governor General in Council or any officer or officers deputed in his behalf may communicate, and every notice requiring to be given to a railway company shall be sufficiently given if left at, or transmitted to, the said office in India, or personally served on the said agent or on any member of the said committee of agency.

Office to be maintained in India with authorized agent.

229. *(1)* Any notice, order, or document required or authorized by this Act, or by the special agreement, to be served on any person by a railway administration may be served—

Notices, &c., how to be served by railway administration.

(a) by delivering the same to such person; or

(b) by leaving the same at the usual or last known place of abode of such person; or

(c) by forwarding the same by post in a prepaid letter addressed to such person at his usual or last-known place of abode.

(2) If the notice is served by post, it shall be deemed to have been served at the time when the letter containing the notice would be delivered in the ordinary course of post, and in proving such service it shall be sufficient to prove that the letter containing the notice was properly addressed and put into the post.

(3) A notice, order, or document, by this Act, or by the special agreement, required or authorized to be served on the owner or occupier of any premises, shall be deemed to be properly addressed if addressed by the description of the "owner" or "occupier" of the premises (naming them), without further name or description.

(4) A notice or document by this Act, or by the special agreement, required or authorized to be served on the owner or occupier of premises may be served by delivering the same, or a true copy thereof, to some person on the premises, or, if there is no person on the premises to whom the same can with reasonable diligence be delivered, by fixing the notice on some conspicuous part of the premises.

The 3rd November 1884.

No. 270.—Colonel R. Home, C.S.I., R.E., Chief Engineer and Joint Secretary to the Government of the Punjab, Public Works Department, is appointed to officiate as Inspector General of Irrigation and Deputy Secretary to the Government of India in the Public Works Department, during the absence of Colonel H. A. Brownlow, R.E., on privilege leave or until further orders.

Major J. H. Western, R.E., Superintending Engineer, 3rd Class, Punjab, will, during Colonel Home's absence, officiate as Chief Engineer and Joint Secretary to the Government of the Punjab in the Public Works Department.

The 5th November 1884.

No. 271.—The following is published for general information in the Public Works Department:—

No. 1216G., dated 15th October 1884.

RESOLUTION—By the Government of India, Public Works Department.

Rules under which the Civil Engineers' Provident Fund is to be conducted.

Read again—

Despatch from the Secretary of State, No. 18, dated 22nd March 1883.
Notification of the Government of India in the Department of Finance and Commerce, No. 449, dated 18th April 1884.

RESOLUTION.—In accordance with instructions from the Secretary of State, the Governor General in Council has approved of the institution of a Provident Fund to which all Civil Engineers in the Public Works Department are permitted to subscribe. His Lordship does not desire, in the first instance, to make subscription to the fund obligatory either on those now in the Department or on those who may hereafter be appointed, but prefers that it shall be established on the basis of encouraging members of the Department to save a certain proportion of their salaries by allowing interest on their contributions. The ultimate form which the conditions of subscription will assume will be further considered when it has been ascertained by experience to what extent officers now in the Department look upon the institution of such a fund as an advantage.

2. The rules under which the fund will for the present be conducted are annexed to this Resolution.

3. As announced in Resolution in the Department of Finance and Commerce, No. 449, dated 18th April 1884, payment may be made to the fund calculated on salaries received since 1st April last; but interest will only be allowed from the dates of deduction or payment of deposits.

The Governments of Madras, Bombay, Bengal, the North-Western Provinces and Oudh, and the Punjab.
The Chief Commissioners, Central Provinces, British Burma, Assam, and Coorg.
The Resident at Hyderabad.
The Agents to the Governor General for Central India, Rajputana, and Biluchistan.
The Accountant General, Public Works Department.
The Inspector General of Military Works.
The Director General of Railways.
The Consulting Engineers to the Government of India for Guaranteed Railways, Calcutta, Lahore, and Lucknow.
The Director General of Telegraphs in India.

ORDER.—Ordered, that this Resolution be communicated to Local Governments and Administrations and Officers named in the margin for information and guidance.

CIVIL ENGINEERS' PROVIDENT FUND.

Character of the Fund.

1. Civil Engineers on the effective list of the Public Works Department.
2. Civil Engineers transferred to the Accounts Branch, or the Superior Railway Revenue Establishment, or to foreign service under Chapter III of the Civil Pension Code.
3. All civil members of the Superior Accounts Establishment who are not Civil Engineers.

I.—The institution of a Voluntary Provident Fund on the following basis is sanctioned for the officers of the Public Works Department indicated in the margin:—

(1) The monthly deposit may be not less than 5 per cent. and not more than 10 per cent. on the salary (as defined in the Financial Codes) of each depositor for that month.

(2) The deposits will be voluntary, and may be discontinued and renewed at the option of the depositor.

(3) Compound interest at 4 per cent. on such payments will be annually credited by Government to each officer subscribing.

(4) The sum which will thus accumulate to the credit of an officer to be his absolute property, to be handed over to him unconditionally on quitting the service, or, in the event of his death before retirement, to his legal representatives.

Management of the fund.

II.—The deposits received under the foregoing resolution will be placed in a Government Savings Bank named "Civil Engineers' Provident Fund." This bank will be managed by and be held in the books of the Accountant General in the Public Works Department.

Receipt of deposits.

III.—Deposits will be received by the various Examiners of Public Works Accounts throughout India. They will be recovered by deduction from the pay-bills, or may be made in cash. Deposits cannot be made otherwise than through an Examiner of Public Works Accounts.

IV.—No withdrawal will ordinarily be allowed from the deposit until the depositor quits the service or dies. But on Local Governments or Administrations being satisfied that the pecuniary circumstances of a depositor are such that the indulgence is absolutely necessary, a deposit may be temporarily withdrawn under orders issued by the respective Local Governments and Administrations—

(i) to pay for the passage of the depositor going on leave out of India on medical certificate, or returning after such absence;

(ii) to pay for the passage of any member of the depositor's family coming from beyond the sea to join him, or going beyond the sea sick or from some urgent cause.

V.—Withdrawals under Rule IV will be recovered in 20 equal monthly instalments compulsorily deducted from salary whenever full salary is drawn until the whole is refunded.

VI.—The balances of deceased depositors will be paid according to Rules 58 and 59, Chapter 19, of the Civil Account Code, and Act V of 1873.

VII.—All sums received from depositors will be credited, and all sums withdrawn will be charged, under the head "Civil Engineers' Provident Fund."

Examiner's account of deposit.

VIII.—The Examiner will furnish the Accountant General in the Public Works Department with a monthly statement of the sums he may receive on account of the fund. This statement will contain (1) the dates of receipt; (2) the numbers of the depositors' accounts; (3) name and official designation of the depositors; and (4) amounts of deposits. The total of this statement will agree with the corresponding credit in the Examiner's account as rendered to the Accountant General. For number of depositors' account, see below Rule X.

Examiner's account of withdrawals.

IX.—The Examiner will furnish the Accountant General in the Public Works Department with a monthly statement of withdrawals. This statement will give the following particulars, and the total of it will agree with the corresponding debit in the Examiner's monthly account as rendered to the Accountant General:—(1) dates of payments; (2) numbers of depositors' accounts; (3) names and official designations; (4) amounts paid; (5) number and date of the orders of the Local Government or Administration for payment as prescribed in Rule IV. This order will be attached to the statement as voucher for the payments. For number of account, see below Rule XI.

Depositor's ledger.

X.—The account of each depositor will be posted in a ledger, to be kept by the Accountant General in the Public Works Department. The ledger will be closed as soon as possible after 31st March of each year.

Number of depositors' accounts.

XI.—Every account in this ledger will receive a distinct number. The number so given to the depositors' accounts will be consecutive. A depositor's number will not be altered, nor will the numbers of closed accounts be given to new

depositors. The Accountant General will notify to the Examiner concerned the numbers given to a depositor's account immediately after his first deposit, and this number will be quoted against all further deposits, and all withdrawals in the statements prescribed in Rules VIII and IX. In the event of the depositor's transfer, the number will be noted on his last-pay certificate, in order that the next Examiner may be able to quote it in his deposit statements.

Interest.

XII.—Interest will be allowed for each calendar month upon the minimum balance of the depositor's account between the close of the fourth day and the end of the month. In calculating interest under this rule the deposits received by deduction from salary will be considered as paid into the fund on the 1st of the month succeeding that for which the salaries from which the deductions are made are due. The interest will be calculated monthly as provided for in the form of ledger, but will not be added to principal until the end of the official year, except when the account is to be finally closed, in which case the interest will be paid at the same time as the principal. The Accountant General in the Public Works Department, in communication with the Comptroller General, will adjust the interest in the accounts of the year for which it is allowed.

Half-yearly advice to depositors.

XIII.—As soon as possible after the 31st March and 30th September of each year, the Accountant General, Public Works Department, will send to each depositor a statement of his account in the form annexed. Depositors are required to satisfy themselves as to the correctness of these statements; and unless errors in them are brought to the notice of the Accountant General within one month from the date of their receipt, Government will not be responsible for any sums not thus acknowledged.

Lieut.-Colonel, R.E.,

Accountant General, Public Works Department.

No. 272.—The services of Major A. J. C. Cunningham, R.E., Executive Engineer, 2nd Grade, are replaced at the disposal of the Military Department, with effect from such date as he may be relieved of his duties in the North-Western Provinces and Oudh.

No. 273.—Mr. C. Swappe, Executive Engineer, 2nd Grade, is appointed to officiate as Engineer-in-Chief of the Bhopal State Railway, with effect from the afternoon of the 15th October 1884, during the absence on sick leave of Mr. H. T. Geoghegan, or until further orders.

This cancels Public Works Department Notification No. 231, dated 25th September 1884.

No. 274.—Captain W. W. B. Whiteford, R.E., Executive Engineer, 3rd Grade, is transferred from the Establishment under the Government of Bombay to that under the Director General of Railways.

No. 275.—Lieutenant W. R. Morton, R.E., is appointed to the Public Works Department as Assistant Engineer, 2nd Grade, and posted to British Burma.

The 6th November 1884.

No. 276.—The services of Captain H. A. Yorke, R.E., Executive Engineer, 3rd Grade, North-Western Provinces and Oudh, at present on furlough, are replaced temporarily at the disposal of the Military Department, with effect from 13th September 1884.

7th November 1884.

No. 277.—Mr. R. C. F. Volkers, Deputy Examiner, is transferred from the Office of the Examiner, Guaranteed Railway Accounts, Madras, to that of the Examiner of Accounts, Indus Valley State Railway.

No. 278.—Mr. C. E. Housden, Assistant Engineer, 1st Grade, Rajputana, is promoted to Executive Engineer, 4th Grade, *temporary rank*, from the 19th October 1884.

No. 279.—Captain M. C. Brackenbury, R.E., Executive Engineer, 2nd Grade, is appointed to act as Deputy Consulting Engineer for Railways, Bombay, during the absence on privilege leave of Colonel J. Bonus, R.E., or until further orders.

This cancels Public Works Department Notification No. 171, dated 24th July 1884.

No. 280.—The services of Mr. G. M. Drury, Class II of the State Railway Superior Revenue Establishment, Traffic Department, are, on return from furlough, placed at the disposal of the Director General of Railways.

W. S. TREVOR, *Colonel, R.E.,*

PART V.

Bills introduced into the Council of the Governor General for making Laws and Regulations, or published under Rule 22.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

[Second publication.]

The following Bill was introduced into the Council of the Governor General of India for the purpose of making Laws and Regulations on the 23rd October, 1884:—

No. 15 OF 1884.

A Bill to amend the Oudh Estates Act, 1869.

WHEREAS it is expedient to amend the Oudh Estates Act, 1869; It is hereby enacted as follows:—

Amendment of definition of "registered" in section 2 of Act I of 1869.

1. Subject to the saving in section 2 of this Act, for the definition of "registered" in section 2 of the said Act, there shall be deemed to have been substituted from the date of the passing of the said Act the following definition, namely:—

"Registered."

"'Registered' means—

"(*a*) in the case of a will, registered according to the law for the time being in force relating to the registration of assurances, or deposited with a Registrar according to the law for the time being in force relating to the deposit of wills; and

"(*b*) in the case of any other instrument, registered according to the law for the time being in force relating to the registration of assurances."

Saving of certain wills.

2. Nothing in section 1 shall affect any will—
